Total Client Investment: Cost of shares directly purchased and still held. Does not include shares purchased through reinvestment.

Cumulative Investment Return: Estimated Market Value minus Total Client Investment.

Cumulative Investment Return is the capital appreciation (depreciation) of all shares purchased, including shares purchased through reinvestment.

Market Timing: Merrill Lynch's policies prohibit mutual fund market timing, which involves the purchase and sale of mutual fund shares within short periods of time with the intention of capturing short-term profits resulting from market volatility. Market timing may result in lower returns for long-term fund shareholders because market timers capture short-term gains that would otherwise pass to all shareholders and due to increased transaction costs and fewer assets for investment due to the need to retain cash to satisfy redemptions.

Initial Purchase: Date of your initial investment in this fund.

TOTAL INCOME INVESTMENTS				91,189		91,266.28	77	84	.09

Total Client Investment: Cost of shares directly purchased and still held. Does not include shares purchased through reinvestment. Does not apply to income investments "denoted by 'N/A'".

Cumulative Investment Return: Estimated Market Value minus Total Client Investment.

Cumulative Investment Return is the capital appreciation (depreciation) of all shares purchased, including shares purchased through reinvestment.

Market Timing: Merrill Lynch's policies prohibit mutual fund market timing, which involves the purchase and sale of mutual fund shares within short periods of time with the intention of capturing short-term profits resulting from market volatility. Market timing may result in lower returns for long-term fund shareholders because market timers capture short-term gains that would otherwise pass to all shareholders and due to increased transaction costs and fewer assets for investment due to the need to retain cash to satisfy redemptions
