Form 990EZ, Part III - Statement of Program Service Accomplishments

Describe what was achieved in carrying out the organization's exempt purposes. In a clear and concise manner, describe the services provided, the number of persons benefited, and other relevant information for each program title.	Expenses (Required for 501(c)(3) and 501(c)(4) organizations and 4947(a)(1) trusts; optional for others.)	
<p>28 Save The Frogs Day http //savethefrogs com/day Save The Frogs Day is an annual event we conceived and coordinate The day is intended to raise awareness of amphibian extinctions, and create an interest and appreciation for amphibians, especially among children The 1st Annual Save The Frogs Day was held April 28th, 2009, and events took place at schools, zoos, and museums in fifteen countries Approximately 40 scientists gave public lectures on this day Proclamations declaring April 28th, 2009 Save The Frogs Day were issued by Governor Tim Kaine of Virginia, Mayor Robertson of Vancouver, British Columbia, Mayor Parrish of Manassas, VA, and the Chairman Stewart of Prince William County, VA To the best of our knowledge, this makes Governor Kaine the highest ranking government official on the planet to officially recognize the amphibian extinction crisis Save The Frogs Day received considerable publicity, as can be gleaned by a Google search of 'Save The Frogs Day', which yields ten pages of results The inaugural Save The Frogs Day took place with only four months of planning, a single coordinator (Dr Kriger) and a minimal amount of funding Given appropriate funding and personnel, we are certain that future Save The Frogs Day events will receive widespread political recognition, and will have the involvement of hundreds of scientists and thousands of schools worldwide We will also involve zoos, museums, and national parks As such, we see Save The Frogs Day as an extremely effective environmental education tool (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>	28a	4,448
<p>29 LECTURES ON THE AMPHIBIAN EXTINCTION CRISIS http //savethefrogs com/events To raise awareness of the plight of amphibians and to motivate people to take action, SAVE THE FROGS! Executive Director Dr Kerry Kriger lectured on the amphibian extinction crisis throughout North America in 2009 During his presentation to adults, Dr Kriger discusses the six primary threats to amphibians and explains how they affect various groups of amphibians He also discusses the necessary actions that must occur in order to prevent further amphibian declines and extinctions, including ways that average citizens can help Dr Kriger gives a separate presentation "The Wild World of Frogs" to children The goal of this presentation is to get kids interested in amphibians, and to give them an introduction to environmental conservation In 2009, Dr Kriger gave 42 presentations to a total of 1810 attendees These lectures have taken place at universities, elementary schools, businesses, community groups, national parks and at other nonprofits including the National Geographic Society, Smithsonian Tropical Research Institute, California Academy of Sciences, Boston Museum of Science, National Wildlife Federation, Defenders of Wildlife Headquarters, Portland Audubon Society, Northwest Environmental Defense Center, Town Hall Seattle, REI Corporate Headquarters, Vancouver Water Resources Education Center, Yellowstone National Park, University of Colorado, British Columbia Institute of Technology, the Joint Meeting of Ichthyologists and Herpetologists, and the New England Wildlife Center We are currently editing film recordings of the lectures, and will post several of the lectures in their entirety on YouTube (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>	29a	7,489
<p>30 FREE COURSE AT SMITHSONIAN INSTITUTE http //savethefrogs com/chytrid/qpcr.html Latin America is home to nearly half of the world's amphibian species In the last two decades however, the deadly amphibian chytrid fungus (<i>Batrachochytrium dendrobatidis</i>) has decimated frog populations throughout Central America and the Andes It is of high importance that Latin American scientists are capable of conducting chytrid research, but few of these scientists are knowledgeable in the laboratory techniques necessary to detect the fungus In October 2009, SAVE THE FROGS! in conjunction with the Herpetological Circle of Panama, offered a free 5-day class at the Smithsonian Tropical Research Institute in Panama City The course, entitled "Instruction and application of quantitative PCR molecular techniques for the study of amphibian epidemics", was attended by 25 scientists from Panama, Colombia, and Costa Rica This course was taught in Spanish by SAVE THE FROGS! Founder & Executive Director Dr Kerry Kriger, and provided attendees with all the skills necessary to perform chytrid detection techniques in their own laboratory This course effectively doubled the number of scientists on the planet knowledgeable in these techniques SAVE THE FROGS! has made all detection protocols, slideshows and supplementary materials publicly and freely available at http //savethefrogs com/chytrid/qpcr.html We plan to offer this course again in Bogota, Colombia in late 2010 (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>	30a	3,789
<p>Getting non-native trout out of Sequoia Kings Canyon The Yellow-Legged Frogs were once the most abundant frog in California, but have disappeared from over 90% of the lakes it once inhabited, in large part due to the introduction of non-native trout, which are voracious predators of tadpoles When the National Park Service requested comments from the public as to whether they should remove the trout from 84 of the lakes in Sequoia & Kings Canyon National Parks, Save The Frogs organized a last-minute campaign and got 707 people from 11 countries to send letters to the Park Superintendent urging the Parks to remove the trout and save the Yellow-legged Frogs These letters constituted an astounding 97% of the comments received by the Park Superintendent! The Park Service is still deciding their course of action, but we have a good feeling our input will save some Yellow-Legged Frogs! (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>		460
<p>In an effort to increase awareness of amphibian extinctions in the general public, SAVE THE FROGS! created a 4x6' educational poster that was posted at 11 locations in the streets of Washington DC We also created a 7x11' poster highlighting the effects of climate change on Yellowstone National Park's declining frog populations These large posters were posted in 5 major airports Denver, Chicago O'Hare, Chicago Midway, Detroit and St Louis (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>		3,550
<p>SAVETHEFROGS.COM WEBSITE The SAVE THE FROGS! website (www savethefrogs com) is our first line of contact with numerous people worldwide, including many who have no prior knowledge of amphibian declines and extinctions Thus we strive to make the website a valuable educational resource for scientists and non-scientists, adults and children The website currently holds approximately 100 pages of information on amphibians, and was viewed by 189,106 unique visitors in 2009 Our website allows us to make use of modern technologies (videos, slideshows, interactive forms), while keeping our costs far lower than if we were dependent on traditional printing and distribution methods (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>		1,643
<p>FROG POETRY AND FROG ART CONTESTS http //savethefrogs com/poetry http //savethefrogs com/art In 2009, SAVE THE FROGS! held the 1st Annual Frog Poetry and Frog Art Contests The goals of the contests were twofold (1) to engage sectors of society not often involved in environmental affairs (namely poets and artists), and (2) to enable non-science teachers (most of whom would otherwise be unable to teach their students about frog extinctions) to educate their students about amphibian extinctions and assist the students in developing an appreciation for frogs, a prerequisite for their interest and involvement in environmental protection The 1st Annual Frog Poetry contest received 414 entries from 401 contestants in 14 countries (age range 6 to 73) The 1st Annual Frog Art Contest received 394 entries from 10 countries SAVE THE FROGS! is currently compiling the best entries from both competitions into a book of frog poetry and art that will be used to raise funds for our amphibian conservation efforts (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>		1,450
<p>NEWS COVERAGE www savethefrogs com/in-the-news The mass media provides an excellent venue for disseminating information on amphibian extinctions without having to pay advertising fees In 2009, Save The Frogs gave 41 interviews (11 Radio, 9 Television, 21 Print) SAVE THE FROGS! will continue to seek as much media coverage as possible to spread the word about the plight of frogs and how frogs are an indicator of the environmental calamities that affect all living things, including people SAVE THE FROGS! is also developing programming ideas for media outlets such as Discovery, PBS, and National Geographic (Grants \$ 0) If this amount includes foreign grants, check here <input type="checkbox"/></p>		570
