- Adjusted cost basis reflects any cumulative original issue discount, premium, or acquisition premium (including year-to-date amount). It assumes such amounts were amortized or accrued for tax purposes from the acquisition date through the disposition date. Premium amortization was calculated using the yield-to-maturity method. Acquisition premium was calculated using the ratable accrual method. Any market discount accretion for this position was calculated using the straight-line method and, if applicable, recognized upon disposition. Gain/loss displayed for this transaction is calculated using the cost basis adjustments, as described above. The adjusted cost basis used here may not reflect all adjustments necessary for tax reporting purposes (such as wash sale adjustments) and may not apply if you are using an alternative amortization calculation. Refer to IRS Publication 550, *Investment Income and Expenses*, for additional information.
