include shares purchased through reinvestment.

Cumulative Investment Return: Estimated Market Value minus Total Client Investment.

Cumulative Investment Return is the capital appreciation (depreciation) of all shares purchased, including shares purchased through reinvestment.

Market Timing: Merrill Lynch's policies prohibit mutual fund market timing, which involves the purchase and sale of mutual fund shares within short periods of time with the intention of capturing short-term profits resulting from market volatility. Market timing may result in lower returns for long-term fund shareholders because market timers capture short-term gains that would otherwise pass to all shareholders and due to increased transaction costs and fewer assets for investment due to the need to retain cash to satisfy redemptions.
