Bonds purchased at a premium show amortization.
Year-to-Date and Life-to-Date amortization/accretion figures are net adjustments and may include original issue discount, and/or premium or market discount adjustments, if applicable. These figures assume that the client has made all elections to amortize bond premium and accrete market discount on a current basis. A

negative figure indicates a net reduction in cost basis due to such factors as premium amortization. The cost basis reflects adjustments for amortized and/or accreted amounts.
