Summary - The most significant brain development occurs from birth to age 5 and thus is the most critical time in a child's life (as evidenced by current brain research) Early experiences lay the foundation for social, emotional, economic and life success Today, few children grow up exclusively in the care of their parents Most spend at least part of their day away from their parents in child care centers or homes, or with neighbors or other family members as caregivers Those that get safe, nurturing play and learning experiences are ready for school, those that don't are most often the ones who start behind and stay behind In fact, 55% of children in WA are not prepared to enter kindergarten and the percentage rises to 75% among low income children Based in King County, WA yet working locally and state-wide, CCR helps build quality child care and early learning access for all children It is a respected leader in forging and honoring collaborations and building innovative, outcome driven programs focused on building solid learning foundations for all children

4b

(Code) (Expenses \$ 2,161,404 including grants of \$) (Revenue \$)
