Money fund

An investment in a money market fund is neither insured nor guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at \$1.00 per share, there can be no assurance that will occur and it is possible to lose money should the fund value per share fall. Moreover, in some circumstances money market funds may be forced to cease operations when the value of a fund drops below \$1.00 per share. In that event, the fund's holdings would be liquidated and distributed to the fund's shareholders. This liquidation process could take up to one month or more. During that time, these funds would not be available to you to support purchases, withdrawals, and if applicable, check writing or ATM debits from your account.

All research ratings represent the "opinions" of the research provider and are not representations or guarantees of performance. Because the research report contains more complete information regarding the analyst's opinions, analysis, and rating, you should read the entire research report and not infer its contents from the rating. Where a particular company is covered by both CIRA and Morgan Stanley, you can and should view both research reports. CIRA and Morgan Stanley research reports may contain different or conflicting information about the subject companies of such research reports because they are prepared separately from each other. CIRA stock recommendations include an investment rating and a risk rating. The Investment Rating Code (1, 2 or 3) is a function of CIRA's expectation of total return (forecast price appreciation and dividend yield within the next twelve months) and a Risk Rating. The Risk Rating (L, M, H or S) represents the stock's expected risk, taking into account price volatility and fundamental criteria. Please refer to the end of this statement for a guide describing CIRA ratings.
