		Generally accepted accounting principles contain a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Organization considers many factors when evaluating and estimating its tax positions, which may require periodic adjustments and which may not accurately anticipate actual outcomes. Based on guidance set forth in professional standards, Citihope has not recorded any liabilities for uncertain tax positions or any related interest and penalties. Citihope's tax returns are open to audit for years ending June 31, 2007 through 2010.
