Identifier	Return Reference	Explanation
Part X	Description of Uncertain Tax Positions Under FIN 48	On September 15, 2009, the Financial Accounting Standards Board's Accounting Standards Codification (Codification) became the single source of authoritative generally accepted accounting principles in the United States of America. The Codification changed the referencing of financial standards but did not change or alter existing generally accepted accounting principles in the United States of America. The Codification became effective for the Organization at that date. The Organization adopted the accounting standard for uncertain tax positions as of July 1, 2009. The standard requires a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with the asset and liability method. The first step is to evaluate the tax position for recognition by determining whether evidence indicates that it is more likely than not that a position be sustained if examined by a taxing authority. The second step is to measure the tax benefit as the largest amount that is 50% likely of being realized upon settlement with a taxing authority. The adoption of the standard on uncertain tax positions did not have a material impact on the Organization's financial statements at June 30, 2010.
