Identifier	Return Reference	Explanation
Part X	Description of Uncertain Tax Positions Under FIN 48	During the year ended October 31, 2010, the Organization adopted the accounting standard related to uncertain income tax positions. The standard requires that an uncertain income tax position must be more likely than not (greater than 50% likelihood of realization) before it is recognized in the financial statements. Furthermore, the standard requires that the amount recognized be the same as that which would be determined as a result of a review by tax authorities having all relevant information and applying current conventions. The standard also clarifies the financial statement classification of tax-related penalties and interest and sets forth new disclosures regarding unrecognized tax benefits. During the years from 2007 through 2010, which represent the years management considers to be open for examination by taxing authorities, management did not identify the existence of any uncertain income tax positions.
