## DETAIL

### PORTFOLIO VALUE

NFS-provided estimated cost basis (including cost basis and short sale proceeds information provided to NFS by customers), realized gain and loss, and holding period information may not reflect all adjustments necessary for tax reporting purposes. Taxpayers should verify such information against their own records when calculating reportable gain or loss resulting from a sale, redemption, or exchange. NFS does not report such information to the IRS or other taxing authorities and is not responsible for the accuracy of such information. Taxpayers may be required to report to federal, state, and other taxing authorities NFS makes no warranties with respect to, and specifically disclaims any liability arising out of a customer's use of, or any tax position taken in reliance upon, such information. Unless otherwise specified, NFS determines cost basis at the time of sale based on the average cost-single category (ACSC) method for open-end mutual funds and based on the first-in, first-out (FIFO) method for all other securities. Amortization, accretion and similar adjustments to cost basis have been provided for many fixed income securities (and some bond-like equities), however, they are not provided for certain types, such as short-term instruments, Unit Investment Trusts, foreign fixed income securities, or those that are subject to early prepayment of principal (pay downs). Where current year premium or acquisition premium amortization is provided, the prior years' cumulative amortization is reflected in the adjusted cost basis, but we cannot provide a breakdown or the total of such prior amortization amounts.

**LIMITATION ON COST BASIS INFORMATION:** NFS's cost basis information system has a cumulative lifetime limit on how much activity it can track for each individual security position in an account. For this purpose, each buy, sell, dividend, wash sale, disallowed loss, stock split, stock merger, etc., is an event. For some customers, this limit can be reached with approximately 1300 events. Upon reaching the limit, the system no longer displays or tracks cost basis information for the affected position, and such information will usually show as not available or unknown. Once the limit is reached, all cost basis information for the affected position will need to be tracked and updated by you, the investor. Please note that the processing fee for physical certificates for non-DRS-eligible securities will increase to \$20 beginning 8/1/2009. The fee for DRS-eligible shares will remain at \$30. Please contact your financial representative with any questions. The Direct Registration System, or DRS, is an industry-wide initiative aimed at increasing efficiency and reducing risks that arise with physical stock certificates by providing for electronic direct registration of securities in an investors name on the books of the transfer agent.

### CDs

Certificates of deposit (CDs) that have a maturity of one year or less from the date of issue may be shown at face value. CDs with a maturity of more than one year from date of issue, including Market Indexed CDs and Market Linked CDs (MCDs), will be shown at market value based upon a matrix or model pricing method that may not represent the actual price if sold prior to maturity (provided that such CDs and MCDs may be shown at face value for up to seven days from date of issue if market value prices have not been received from a third party pricing vendor). CDs are subject to interest rate risk and the actual value of the CDs may be different from their purchase price. The sale or redemption of any fixed income security prior to maturity may result in a substantial gain or loss, and a penalty may apply to the early withdrawal of a CD. You may sell the CDs in the secondary market subject to market conditions. The secondary market for CDs is generally illiquid. Certain Step Rate CDs are also subject to reinvestment risk if call provisions are exercised by the issuer and if a CD with a comparable rate is not available. The price reflected for MCDs may not be based on the actual closing value of the linked market index on the final maturity date and the market value of MCDs may not correspond directly to increases or decreases in the underlying linked market index. If sold prior to maturity, the value of MCDs may be less than the purchase amount or face value. Certain MCDs may only be redeemed on pre-specified liquidation dates. Certain MCDs may have call features that allow the issuer to call the MCD prior to maturity. See sales material or contact your broker/dealer for additional information.
