Notes

- AI = Accrued Income (interest and dividends).
- Dynamic Asset Allocation Overlay Portfolio yields are estimates based on stock dividends and income from cash and directly held fixed income securities in the fund, net of estimated fund expenses. Actual dividends, which are distributed annually, can vary significantly due to tax treatment of foreign currency and various instruments. In addition to these dividends the funds may also make annual distributions of short and long-term capital gains.
- Fixed income fund yields are calculated using the 30 day S.E.C. yield. Municipal yields may include a portion of taxable income. Estimated annual income for the fixed income portfolios is based on the monthly income dividends and does not include capital gains distributions. Therefore yield will differ from estimated annual income.
- Total portfolio cost includes the reinvestment of interest, dividends and capital gains distributions as well as sale proceeds and therefore is not equivalent to the capital you have invested in this account.
