Education program for 2-7 year olds

14,146

In order to encourage early education in children, Foothold plans to contribute books, computers, and other resources to pre-school aged children. Funding in the form of books, experts, and technology devices are still being provided to area pre-schools in 2010.

This program intends to help in the following areas:

Pre-School funding – where books, technology, and improvements are going to be made to various education based pre-schools.

Early Childhood Development – where early-childhood development professionals will be available for various seminars to parents who wish to learn more about their pre-school aged child's learning abilities.

Technology – where age appropriate computer software programs will be provided for children who can benefit from its use.

Books, computers, equipment, and physical improvements were made at Kids In Bloom a pre-school in the area. This pre-school specializes in early childhood education.

Rusty & Rosie a computer software program was provided for use at Kids in Bloom preschool – to utilize the repetitive advantages of its reading program on 4 year olds. These three areas are deemed to be useful in helping children succeed in school.

2

Education program for 12-20 year olds

15,223

In order to encourage continuous education in children, an Education Day for older children ranging from 12-20 years old was held. The day was filled with seminars, food, and fun.

The children were divided into groups and sent to the following "seminars" throughout the morning:

Computer Technology – where the children learned about the importance of computer literacy. They were taught some hands-on basics like web-programming, flash tutorials, and database queries.

College Planning – where the children were given books to guide them through the college application process, help them study for standardized tests, and show them how to compare and contrast the various local colleges.

Careers Planning – several different professionals came and describe to the children what their jobs were, what they actually did, what kind of education they had to have to get the job and what kind of continuing education they need to have to keep their jobs. A jeopardy type of game with small prizes was played where the children were asked questions about these people and jobs to encourage them to pay attention and remember what they were taught.

After the seminars, the children were treated to bagels and juice. During the snack-break, the children were informed that the MacBook Pro's that they were using – are their own – to keep. It is hoped that each child came away from this day with a new / improved outlook about their current and future educational opportunities.

This Education Day was deemed a success to all who attended. This day was used to enlighten teens about their futures, and about how education can help people to achieve their goals.

3

Education program for 8-12 year olds

10,275

In order to encourage continuous education in children ages 8-12 were specifically targeted to teach them about new technology equipment, and provide opportunities for these children to learn.

Tuition to various educational camps was also provided.

transparent, ethical and efficient government. My administration has several ambitious goals to be completed over the next two years.

One of them is to make Salt Lake County a nationwide leader in customer

make it more informative to the public seeking answers or services.

We are driven to make sure incoming calls are answered by a live person, not a recorded robot. There is little more troub-

you should be able to get immediate help.

Already this year, we've held a number of informal employee focus groups designed to get input on the challenge of providing excellent customer service to our citizens, residents and taxpayers. We've conducted visits and interviews to assess how county employees provide service to our community.

Based on these interactions, we've established our Customer Service Standards, a reflection of how our employees view what they do. Now we're moving to the next step, launching a training program that will reach employees over the next two years.

Customer service is a major component of our mission in Salt Lake County. Even as the sole source provider of many services in the community, we want to excel in how that service is provided. We operate on public dollars. The public has the right to know how tax dollars are spent where they are spent and why we spend them the way we do. We are committed to do the right thing for customers and residents of Salt Lake County. We strive to do so with exceptional service.

We are committed to looking for ways to help the public get the right answers quickly. Our county employees are getting the tools to better understand what the government does outside their specific organization. We want everyone to answer phone lines to become a "community information expert."

I look forward to this initiative as we encourage excellent customer service to become ingrained in the culture of our Salt Lake County work force. We have great customer service today. We will have great customer service in the future.

If you have any feedback on our customer service, good or bad, please send an email at mayor@slco.org or call our office, 801-468-2500.
