Certificates of deposit (CDs) that have a maturity of one year or less from the date of issue may be shown at face value CDs with a maturity of more than one year from date of issue, including Market Indexed CDs and Market Linked CDs (MCDs), will be shown at market value based upon a matrix or model pricing method that may not represent the actual price if sold prior to maturity (provided that such CDs and MCDs may be shown at face value for up to seven days from date of issue if market value prices have not been received from a third party pricing vendor) CDs are subject to interest rate risk and the actual value of the CDs may be different from their purchase price. The sale or redemption of any fixed income security prior to maturity may result in a substantial gain or loss, and a penalty may apply to the early withdrawal of a CD You may sell the CDs in the secondary market subject to market conditions The secondary market for CDs is generally illiquid. Certain Step Rate CDs are also subject to reinvestment risk if call provisions are exercised by the issuer and if a CD with a comparable rate is not available. The price reflected for MCDs may not be based on the actual closing value of the linked market index on the final maturity date and the market value of MCDs may not correspond directly to increases or decreases in the underlying linked market index If sold prior to maturity, the value of MCDs may be less than the purchase amount or face value Certain MCDs may only be redeemed on pre-specified liquidation dates Certain MCDs may have call features that allow the issuer to call the MCD prior to maturity See sales material or contact your broker/dealer for additional information
