Cost Basis on fixed income securities is adjusted for amortization, accretion or principal paydowns The method of calculation is based upon the type of fixed income security and certain attributes, obtained from sources believed to be reliable. In the event, one or more of these attributes is changed, there may be a temporary incorrect adjusted cost basis reflected until the portfolio system is amended to reflect this change. These calculations will not be performed under certain circumstances, including those involving continuously callable bonds, foreign bonds, variable rates, bonds in default, index-linked bonds, bonds sold short or bonds that have a negative yield. This information is meant as a general guide and you should consult your tax advisor in the preparation of your tax returns

[1] This bond is maturing

[3] The cost basis of securities positions acquired prior to the availability of the PORTFOLIO EVALUATION SERVICE for this account, or delivered into this account, has been provided to PERSHING by your financial institution, and we make no representation as to the accuracy of such cost basis.

[5] Unrealized gains and losses are not reported for securities for which cost basis or market value is not available.
