PORTFOLIO VALUE

NFS-provided estimated cost basis (including cost basis and short sale proceeds information provided to NFS by customers), realized gain and loss, and holding period information may not reflect all adjustments necessary for tax reporting purposes. Taxpayers should verify such information against their own records when calculating reportable gain or loss resulting from a sale, redemption, or exchange. NFS does not report such information to the IRS or other taxing authorities and is not responsible for the accuracy of such information taxpayers may be required to report to federal, state, and other taxing authorities. NFS makes no warranties with respect to, and specifically disclaims any liability arising out of a customer's use of, or any tax position taken in reliance upon, such information. Unless otherwise specified, NFS determines cost basis at the time of sale based on the average cost-single category (ACSC) method for open-end mutual funds and based on the first-in, first-out (FIFO) method for all other securities.

Amortization accretion and similar adjustments to cost basis have been provided for many fixed income securities (and some bond-like equities), however, they are not provided for certain types, such as short-term instruments, Unit Investment Trusts, foreign fixed income securities, or those that are subject to early prepayment of principal (pay downs). Where current year premium or acquisition premium amortization is provided, the prior years' cumulative amortization is reflected in the adjusted cost basis, but we cannot provide a breakdown or the total of such prior amortization amounts.

LIMITATION ON COST BASIS INFORMATION: NFS's cost basis information system has a cumulative lifetime limit on how much activity it can track for each individual security position in an account. For this purpose, each buy, sell, dividend, wash sale disallowed loss, stock split, stock merger, etc. is an event. For some customers, this limit can be reached with approximately 1500 events. Upon reaching the limit, the system no longer displays or tracks cost basis information for the affected position, and such information will usually show as not available or unknown. Once the limit is reached, all cost basis information for the affected position will need to be tracked and updated by you, the investor.
