Understanding Your Year-End Schwab Gain/Loss Report

This page provides an explanation of the terms used in the Year-End Schwab Gain/Loss Report in the order in which they appear.

Accounting Method: The accounting method noted on the report is the one in effect on the last day of the rep calendar year. If you change your accounting method in the middle of a report period, you actually may have a mixed accounting method; however, the accounting method in effect at year-end will be the only method displayed. FIFO accounting (see definition below) is the default method for U.S. tax reporting purposes. Please consult your tax advisor to discuss this and alternative methods.
Single Category Average Cost: The average cost of all shares held in a mutual fund regardless of how long they are owned. This includes shares acquired with reinvested dividends. This method is available for mutual funds and is the method used for open-end funds in this report.
First In First Out (FIFO): The first investments acquired are the first investments sold. This is the "default" method for U.S. tax purposes. Taxpayers wishing to use another method should consult their tax advisors before executing any trade.
Last In First Out (LIFO): The last investments acquired are the first investments sold.
High Cost: Sell lots in order of highest unit cost to lowest unit cost. This will minimize gains and maximize losses.
Low Cost: Sell lots in order of lowest unit cost to highest unit cost. This will maximize gains and minimize losses.
Tax Lot Optimizer: A tax lot consists of one or more shares of a security purchased at the same price on the same day. Lots sold are selected in the following order.
1. *Short Term Losses:* Lots that reflect a short term loss are sold first, beginning with lots that generate the greatest short term loss down to the least short term loss
2. *Long Term Losses:* Lots that reflect a long term loss are sold, beginning with lots that generate the greatest long term loss down to the least long term loss
3. *Short Term No Gains or Losses:* Short term lots that reflect no gain or loss
4. *Long Term No Gains or Losses:* Long term lots that reflect no gain or loss
5. *Long Term Gains:* Long term lots that reflect no gain or loss
6. *Short Term Gains:* Lots that reflect a short term gain, beginning with lots that generate the least short term gain up to the greatest short term gain
Specific ID: The IRS allows taxpayers to specifically identify lots sold. Such identification should be made with the broker at the time of the trade, and the specific ID should be printed on the trade confirmation. An "m" on this report indicates that the account holder has used Specific ID and matched a sale against a particular lot held at the time of trade.

Closing Transaction: The fulfillment of a contract causing an existing investment to end. A sale could be closing transaction for a long position, and a purchase could be a closing position for a short position.

Short-Term/Long-Term: Gain or (loss) on the sale of a capital asset is labeled long-term if the property has been held for more than one year; it is labeled **short-term** if the property has been held for one year or less. Taxpayers must calculate their net capital gains and losses for each tax year. Favorable tax treatment is allowed to the extent there is a **net long-term** capital gain. Investors need to provide the appropriate purchase date on some investments for the system generating this report to properly determine the holding period. For instance, absent notification to the contrary, the report assumes the purchase date is the date of transfer for investments transferred from another brokerage account All transactions are displayed at the lot level. A **lot** is a single unit of shares of an investment that was acquired or opened on a specific trade date and at a specific trade time.

Quantity/Par: The number of shares for each lot within each investment position in the account. This is the number of shares for stocks and mutual funds; it is the number of contracts for options; and it is the face value bonds or notes. Fractional shares are rounded for display purposes on this report.

Acquired/Opened: The trade date, effective date or the date provided by the account holder for a particular lot. This date generally establishes the holding period of the lot. For short positions, the opening date is the date the short position is established (please consult your tax advisors regarding the holding period for short sales). Possible tax modifications of the holding period may be required for covered short positions. If no date is available, the field will be left blank.

Sold/Closed: The trade date, effective date or the date provided by the account holder. For long positions, the closing date is the date on which the long position is disposed. For short positions, the closing date is the date on which the short position is covered.

Total Proceeds: The amount received upon disposition of the holding less commissions and applicable fees.

Cost Basis: The amount paid for the lot including applicable commissions, fees and adjustments for corporate actions and return of capital payments. For Short Sales, while the position remains open, the proceeds appear in the Cost Basis column with a negative value. In the Realized Gain or (Loss) section, the Cost Basis is the amount paid to close the transaction and appears in the Cost Basis column. The proceeds will appear in the Total Proceeds column. For cash in your account, Cost Basis includes total cash less margin loan(s) outstanding at the time this report is printed. Because it may include transactions which have not yet settled, please refer to your account statement for details

Adjusted Cost Basis: The amortized cost basis (for bonds bought at a premium) or the accreted cost basis (for bonds bought at a discount).

Realized Gain or (Loss): A realized gain or (loss) is shown when a closing transaction occurs in your account that requires recognition of a gain or loss. To determine the Realized Gain or (Loss) for a lot, the Cost Basis is subtracted from the Total Proceeds.

Adjusted Realized Gain or (Loss): The realized gain or (loss) that is calculated based on the Adjusted Cost Basis.

Endnotes: Lettered footnotes are placed next to items that required additional explanation. Footnotes are explained on the last page of the report.
e - Data for this holding has been edited or provided by the account holder
i - Value includes incomplete cost basis. If cost basis is not available for an investment, you may be able to provide updates.
m - A sale was matched against a particular lot held at the time of trade.
S - Short sale. Possible tax modifications of the holding period may be required for covered short positions.

Accounting Methods: The default accounting methods used in this report are compliant with IRS accounting methods for individual investors; however, they may require special action on your part and may not be appropriate for your particular filing situation.

The trade date (not the settlement date) determines the date of purchase or sale. Possible tax modifications of the holding period may be required for covered short positions. If no date is available, a blank will be displayed.
