Security prices are obtained from sources believed to be reliable. They do not represent bids to buy or sell. Cost information presented should be verified by comparison with personal records, purchase confirmations provided by security issuers. D. A. Davidson uses Broadridge portfolio management software for record keeping, reporting and performance calculations. The following types of securities are not included in performance reports: variable and fixed annuities, insurance and limited partnerships. Past performance is not a guarantee of future results.

The time-weighted rate of return removes the distorting effects of the inflows of new money to the portfolio by assuming a single investment at the beginning of the period and measuring the performance of that amount at the end of the period. It is the return figure most often used to compare the performance of different accounts over the same period. Returns for more than one year are annualized. This calculation does not reflect the actual performance of any specific investment. The information presented should not be considered a replacement for your trade confirmation and/or monthly statements. Market values shown in this report may differ from your D. A. Davidson statement values. For accounts with margin debt (Smart Credit) balances the performance may be a leveraged return which may not reflect the actual performance net of debit balances. Although the method of calculation is considered reliable, the information's accuracy is not guaranteed by D.A. Davidson.
