* Uncovered under the cost basis rules as defined below.
 Securities acquired before 2011 are generally not subject to the new cost basis reporting rules set forth in the Internal Revenue Code of 1986, as amended ("IRC") (incorporating amendments enacted by P.L. 110-343, the Emergency Economic Stabilization Act of 2008) and are, therefore, considered "uncovered," under the new cost basis reporting rules, and marked or denoted as such. All other securities in this section are securities which are "covered" under the new cost basis reporting rules. Securities which are "covered" under the new cost basis reporting rules are defined as securities which have been acquired on or after their "applicable date(s)" at which they are subject to the cost basis reporting rules and the adjusted basis will be reported to the IRS on form 1099-B for the applicable tax year in which the security is disposed.

Reporting requirements generally will be phased in over a three-year period, as follows:

- Stock in a corporation acquired on or after January 1, 2011
- Mutual funds and dividend reinvestment plan (DRIP) shares acquired on or after January 1, 2012
- Other securities, principally debt securities and options, acquired on or after January 1, 2013, or later, as determined by the Secretary of the Treasury.

Unrealized gains and losses are not reported for securities for which cost basis or market value is not available.

Disclosures and Other Information

Pricing - This section includes the net market value of the securities in your account on a settlement date basis, including short positions, at the close of the statement period. The market prices have been obtained from quotation services, which we believe to be reliable; however, we cannot guarantee their accuracy. Securities for which a price is not available are marked "N/A" and are omitted from the Total. The estimated annual income (EAI) and estimated current yield (ECY) figures are estimates and for informational purposes only. These figures are not considered to be a forecast or guarantee of future results. These figures are computed using information from providers believed to be reliable; however, no assurance can be made as to the accuracy. Since interest and dividend rates are subject to change at any time, and may be affected by current and future economic, political, and business conditions, they should not be relied on for making investment, trading, or tax decisions. These figures assume that the position quantities, interest and dividend rates, and prices remain constant. A capital gain or return of principal may be included in the figures for certain securities, thereby overvaluing them. Refer to www.pershing.com/business_continuity.html for specific details as to formulas used to calculate the figures. Accrued interest represents interest earned but not yet received.
