Mutual funds

An investment in a money market fund is neither insured nor guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at \$1.00 per share, there can be no assurance that will occur and it is possible to lose money should the fund value per share fall. Moreover, in some circumstances money market funds may be forced to cease operations when the value of a fund drops below \$1.00 per share. In that event, the fund's holdings would be liquidated and distributed to the fund's shareholders. This liquidation process could take up to one month or more. During that time, these funds would not be available to you to support purchases, withdrawals, and if applicable, check writing or ATM debits from your account.

Certain mutual funds may not be transferable to other broker-dealers. For further information, please refer to the fund's Prospectus or call your Financial Advisor.

Yield is the current distribution annualized, divided by the fund's net asset value at the end of the statement period. Distributions may consist of income, capital gains or the return of capital. Distributions and current dividend for funds are based upon information provided by an outside vendor and are not verified by us. "Tax-Based Cost vs. Current Value" is being provided for information purposes only. "Cash Distributions (since inception)" when shown, may reflect distributions on positions no longer held in the account, and may not reflect all distributions received in cash due to but not limited to the following: investments made prior to 1/1/89, asset transfers, recent activity and certain adjustments made in your account. "Total Purchases vs. Current Value" is provided to assist you in comparing your "Total purchases" excluding reinvested distributions, with the current value of the fund's shares in your account. "Fund Value Increase/Decrease" reflects the difference between your total purchases and the current value of the fund's shares, plus cash distributions since inception.

Certificates of deposit

Certificates of deposit ("CDs") are insured by the FDIC up to \$250,000 per account owner per depository institution (principal and accrued interest combined) when aggregated with other deposits held in the same insurable capacity at the same depository institution. The market value of any CD on this statement is estimated using a matrix based on interest rates. If a CD cannot be priced using this method, the statement will not reflect a market value for the CD. The estimated market value may not reflect the actual price you would receive if you were able to sell your CD prior to maturity. FDIC insurance is based on the outstanding principal amount of the CD, or the accreted value in the case of a zero coupon CD, not the estimated market value.
