Independent Accountants' Report on Financial Statements and Supplementary Information

Board of Directors
Iowa Health System and Subsidiaries

We have audited the accompanying consolidated balance sheets of Iowa Health System and Subsidiaries (the Health System) as of December 31, 2011 and 2010 and the related consolidated statements of operations, changes in net assets and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Health System's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Iowa Health System and Subsidiaries as of December 31, 2011 and 2010 and the results of their operations, changes in net assets and cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1, in 2011 the Health System changed its method of presentation and disclosure of patient service revenue and provision for uncollectible accounts in accordance with Accounting Standards Update 2011-07.

Our audits were performed for the purpose of forming an opinion on the consolidated financial statements as a whole. The consolidating schedules of the Health System and the statement of operations for the Methodist College of Nursing listed in the table of contents are presented for purposes of additional analysis and are not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the consolidated financial statements as a whole.

Notes to Consolidated Financial Statements

(Dollars in Thousands)

December 31, 2011 and 2010

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Organization

Iowa Health System is an Iowa nonprofit corporation formed in December 1994. Iowa Health System and its subsidiaries (the Health System) provide inpatient and outpatient care and physician services from fifteen hospital facilities and various ambulatory service and clinic locations in Iowa and Illinois. Primary, secondary and tertiary care services are provided to residents of Iowa, Illinois and adjacent states.

Basis of Presentation

The consolidated financial statements include the accounts of Iowa Health System and its subsidiaries listed below:

- Central Iowa Health System and Subsidiaries (d/b/a Iowa Health - Des Moines) (Des Moines)
- Trinity Regional Health System and Subsidiaries (Rock Island)
- Methodist Health Services Corporation and Subsidiaries (Peoria)
- St. Luke's Healthcare and Subsidiaries (Cedar Rapids)
- Allen Health Systems, Inc. and Subsidiaries (Waterloo)
- Trinity Health Systems, Inc. and Subsidiaries (Fort Dodge)
- St. Luke's Health System, Inc. (Sioux City)
- Finley Tri-States Health Group, Inc. and Subsidiaries (Dubuque)
- Iowa Physicians Clinic Medical Foundation (d/b/a Iowa Health Physicians)
- Intrust (d/b/a Iowa Health Home Care)

Effective October 1, 2011, the Health System entered into an Affiliation agreement with Methodist Health Services Corporation (MHSC) under which MHSC became an affiliate of the Health System. At December 31, 2011, $513,021 of total assets and net revenues of $89,832 for the three months ended December 31, 2011 have been recorded in the consolidated financial statements.

All significant intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash Equivalents and Short-term Investments

Cash equivalents consist of demand deposits, repurchase agreements, money market funds and other debt securities with original maturities of three months or less at the date of purchase, other than those included in assets limited as to use Short-term investments consist of debt securities with maturities between 91 and 365 days of the balance sheet date

At times, the Health System's cash accounts exceeded federally insured limits Management believes that these institutions are financially stable and that the credit risk related to deposits is minimal

Assets Limited as to Use

Assets limited as to use include amounts held by trustees under bond indenture agreements and related documents and assets internally designated by the Board of Directors for identified purposes and over which the Board of Directors retains control and may, at its discretion, subsequently use for other purposes Amounts required to meet current liabilities are classified as current assets

Inventories

Inventories consist of supplies and are stated at the lower of cost or market

Investments and Investment Income

Investments in equity securities with readily determinable fair values and all investments in fixed income securities are measured at fair value in the consolidated balance sheets The fair values are based on quoted market prices or dealer quotes

Investments in joint ventures and other affiliates, which are more than 20% and not more than 50% owned, are recorded using the equity method Other investments are reported at cost, as adjusted for permanent impairment in value, if any

Realized gains and losses from the sale of investments, interest and dividends, except those earned as a function of operations, and unrealized gains and losses on investments classified as trading securities and those carried at fair value pursuant to ASC Topic 825, are reported as non-operating gains (losses) unless restricted by a donor Unrealized and realized gains and losses and investment income on investments restricted by donors are included as a component of the change in net assets

The Health System elected the fair value option for its private investment funds (PIF) that are primarily limited liability corporations and partnerships Management has elected the fair value option for the PIFs because it more accurately reflects the portfolio returns and financial position of the Health System Gains and losses on investments subject to the fair value option are reported in investment income in non-operating gains (losses) on the accompanying consolidated statements of operations

Refer to *Notes 5 and 13* for additional disclosures regarding balance sheet line items and fair value of those investments carried under Topic 825

Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the actual transfer date

Property, Plant and Equipment

Property, plant and equipment acquisitions are recorded at cost less accumulated depreciation Depreciation is provided primarily using the straight-line method over the estimated useful lives of the assets Depreciation of assets under capital lease is provided using the straight-line method over the shorter of the lease term or the estimated useful life of the assets Donated property, plant and equipment are recorded at fair market value at the date of donation

The Health System capitalizes interest costs as a component of construction in progress, based on interest costs of borrowing specifically for a project, net of interest earned on investments acquired with the proceeds of the borrowing During 2011 and 2010, the Health System capitalized $1,067 and $242 of interest expense, respectively

Long-lived Asset Impairment

The Health System evaluates the recoverability of the carrying value of long-lived assets whenever events or circumstances indicate the carrying amount may not be recoverable If a long-lived asset is tested for recoverability and the undiscounted estimate future cash flows expected to result from the use and eventual disposition of the asset is less than the carrying amount of the asset, the asset cost is adjusted to fair value and an impairment loss is recognized as the amount by which the carrying amount of a long-lived asset exceeds its fair value

No asset impairment was recognized during the years ended December 31, 2011 and 2010

Other Assets

Other assets include certain patient records and other intangible assets that are stated at cost less accumulated amortization In addition, other assets include goodwill Annually, the Health System performs an impairment test of all goodwill and any identified impairment loss is recognized as expense Other assets also include deferred financing costs, which are amortized over the period the obligation is expected to be outstanding The Health System has $3,804 and $3,446 of goodwill at December 31, 2011 and 2010, respectively Other intangible assets at December 31, 2011 and 2010 were $18,710 and $12,346, respectively, which are subject to amortization

Net Assets

Net assets are classified into three mutually exclusive classes unrestricted, temporarily restricted and permanently restricted The three classes are based on the presence or absence of donor-imposed restrictions Temporarily restricted net assets are those whose use has been limited by donors to a specific time period or purpose Permanently restricted net assets have been restricted by donors in perpetuity The expiration of donor restrictions is recorded in the period in which the restrictions expire

Temporarily restricted net assets are generally restricted for capital expenditures, passage of time or other donor specified restrictions

Excess of Revenues Over Expenses

Excess of revenues over expense transactions affecting unrestricted net assets are reflected in the consolidated statements of operations Consistent with industry practice, the effective portion of derivative instruments qualifying for hedge accounting carried at fair value, change in defined benefit plans and contributions of long-lived assets (including assets acquired with donor-restricted cash contributions) are excluded from determination of the excess of revenues over expenses Transactions related to temporarily or permanently restricted net assets are recorded as additions or deductions to net assets and reflected in the consolidated statements of changes in net assets Non-controlling interest included as part of excess of revenues over expenses was $1,058 and $1,142 as of December 31, 2011 and 2010, respectively

Change in Accounting Principle

In 2011, the Health System changed its method of presentation and disclosure of patient service revenue, provision for uncollectible accounts and the allowance for uncollectible accounts in accordance with Accounting Standards Update (ASU) 2011-07, *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts and Allowance for Doubtful Accounts for Certain Health Care Entities* The major changes associated with ASU 2011-07 are to reclassify the provision for uncollectible accounts related to patient service revenue to a deduction from patient service revenue and to provide enhanced disclosures around the Health System's policies related to uncollectible accounts The provision for uncollectible accounts related to certain physician and home health services will continue to be presented in operating expenses for purposes of consolidation because the patient's ability to pay is assessed as part of initial revenue recognition As a result of adopting ASU 2011-07, total net patient service revenue, total revenues and total expenses decreased by $93,586 and $96,333 for the years ended December 31, 2011 and 2010, respectively The change had no effect on operating income or on prior year change in net assets

Net Patient Service Revenue and Accounts Receivable

Net patient service revenue is reported at the estimated net realizable amount primarily from patients and third-party payers for services provided, including retroactive adjustments under reimbursement agreements with third-party payers Retroactive adjustments are accrued on an estimated basis in the period in which the related services are provided, and adjusted in future periods as final settlements are determined

The Health System recognizes patient service revenue associated with services provided to patients who have third-party payer coverage on the basis of contractual rates for the services rendered For uninsured patients that do not qualify for charity care, the Health System recognizes revenue on the basis of its standard rates for services provided On the basis of historical experience, a significant portion of the Health System's uninsured patients will be unable or unwilling to pay for the services provided Thus, the Health System records a significant provision for uncollectible accounts related to uninsured patients in the period the services are provided This provision for uncollectible accounts is presented on the accompanying statements of operations as a component of net patient service revenue

(Dollars in Thousands)

As a service to the patient, the Health System bills third-party payers directly and bills the patient when the patient's liability is determined. Patient accounts receivable are due in full when billed. Accounts receivable are reduced by an allowance for uncollectible accounts. In evaluating the collectability of accounts receivable, the Health System analyzes its past history and identifies trends for each of its major payer sources of revenue to estimate the appropriate allowance for uncollectible accounts and provision for uncollectible accounts. Management regularly reviews data about these major payer sources of revenue in evaluating the sufficiency of the allowance for uncollectible accounts.

For receivables associated with services provided to patients who have third-party coverage, the Health System analyzes contractually due amounts and provides contractual allowances based on these amounts. Additionally, an allowance for uncollectible accounts is provided for expected uncollectible deductibles and copayments on accounts for which the patient is responsible. For receivables associated with self-pay patients, the Health System records a significant provision for uncollectible accounts in the period of service on the basis of its past experience, which indicates that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The difference between the standard rates (or the discounted rates if negotiated or provided by policy) and the amounts actually collected after all reasonable collection efforts have been exhausted is charged off against the allowance for uncollectible accounts.

The Health System's allowance for uncollectible accounts increased from $43,507 at December 31, 2010 to $62,455 at December 31, 2011. Allowances associated with MHSC accounted for $17,054 of the increase. The Health System's allowance for uncollectible accounts for self-pay patients was approximately 92% of self-pay accounts receivable at December 31, 2011 and 2010. The provision for patient uncollectible accounts for the year ended December 31, 2011 was $93,586 ($90,933 when excluding MHSC) compared to $96,333 for the year ended December 31, 2010. The decrease in expense was a result of improved collection and recovery experiences in 2011.

Patient service revenue at established rates less third-party payer contractual adjustments (but before the provision for uncollectible accounts), recognized in the year ended December 31, 2011, was approximately:

Third-party payers	$ 2,113,093
Self-pay	214,323
Total	$ 2,327,416

Charity Care

The Health System provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than established rates. Amounts determined to be charity care are not reported as revenue.

(Dollars in Thousands)

Functional Expenses

The Health System provides general health care services, including acute inpatient, outpatient, physician, ambulatory, long-term and home health care, and incurs related general and administrative expenses Expenses related to providing these services for the years ended December 31 were as follows

	2011	2010
General health care services	$ 1,908,342	$ 1,752,338
Management, general and administrative	399,386	331,733
Research	2,681	2,885
	$ 2,310,409	$ 2,086,956

Contributions and Beneficial Interest in Net Assets

Unconditional promises to give cash and other assets are reported at fair value at the date the promise is received All contributions are considered to be available for unrestricted use unless specifically restricted by the donor Donor-imposed restrictions are considered fulfilled as soon as the stipulated time has expired or the qualifying expenditure has been made Donor-restricted contributions whose restrictions are met within the same year as received are reported as unrestricted contributions

Contributions not expected to be collected within a year are recorded at the present value of expected future cash flows using a risk-free interest rate over the term of the contribution Contributions of property are recorded at fair value when received

Interest in charitable trusts and perpetual trusts is carried at the present value of expected future cash flows The Health System's interest in the net assets (the Interest) of certain foundations that raise and hold assets on behalf of the Health System is accounted for in a manner similar to the equity method The Interest is stated at fair value, and changes in the Interest are included in the change in net assets Transfers of assets between these foundations and the Health System are recognized as increases or decreases in the Interest

Estimated Malpractice Costs, Health Insurance and Workers' Compensation

An annual estimated provision is accrued for the self-insured portion of medical malpractice, health insurance and workers' compensation claims and includes an estimate of the ultimate costs for both reported claims and claims incurred but not reported

In 2011, the Health System adopted the provisions of Accounting Standards Update (ASU) 2010-24, *Health Care Entities (Topic 954) Presentation of Insurance Claims and Related Insurance Recoveries*, which eliminates the practice of netting claim liabilities with expected insurance recoveries for balance sheet presentation Claim liabilities are to be determined without consideration of insurance recoveries Expected recoveries are presented separately Prior to the adoption of ASU 2010-24, accounting principles generally accepted in the United States of America required a health care provider to accrue only an estimate of the malpractice claims cost for both reported claims and claims incurred but not reported where the risk of loss had not been transferred to a financially viable insurer There was no material impact of the ASU adoption to the Health System's financial statements

Interest Rate Swap Agreements

The Health System has entered into various interest rate swap agreements (the Swaps) to reduce the effect of changes in cash flows primarily related to interest rate fluctuations on the Health System's various variable rate demand bond issues The Swaps were entered into for the risk management purpose of reducing the variability in cash flows related to the Health System's variable rate debt

As described in *Note 8*, the Health System has designated certain swaps as hedges, while other swaps have not been designated as hedging instruments The effective portion of changes in the fair value of swaps designated as hedges is recognized as a component of other changes in net assets, while the ineffective portion of these swaps changes in fair value, and all changes in fair value of swaps not designated as hedges, is recorded as a component of nonoperating gains (losses) in excess of revenues over expenses

The Swaps are recognized on the consolidated balance sheets at fair value The net cash payments or receipts under the Swaps designated as hedging instruments are recorded as an increase or decrease to interest expense The net cash payments or receipts under the Swaps not designated as hedges are recorded as an increase or decrease to other nonoperating income (loss)

Income Taxes

Iowa Health System and most of its subsidiaries are classified as tax-exempt organizations as described in Sections 501(c)(3) and 501(c)(2) of the Internal Revenue Code (the Code) Tax-exempt organizations are not subject to federal and state income taxes on related income, pursuant to Section 501(a) of the Code These organizations are subject to federal and state income taxes to the extent they have unrelated business income as described under provisions of Section 511 of the Code

The Health System files Form 990 for substantially all of its operating entities in the U S federal jurisdiction and is no longer subject to examination by tax authorities for the years before 2008 The Health System has no material uncertain tax positions

Certain subsidiaries are subject to federal and state income taxes Some of these corporations have accumulated net operating loss carryforwards that are available to offset future taxable income during the carryforward period No income tax benefit has been recognized for the net operating loss carryforwards or other potential deferred tax assets in the consolidated financial statements because the Health System believes realization of these benefits is unlikely

Retirement Plans

Substantially all employees meeting age and length of service requirements participate in defined contribution plans Certain subsidiaries also have defined benefit plans, most of which have been substantially frozen Pension costs for the defined benefit plans, which are composed of normal costs and amortization of prior service costs related to defined benefit plans, are funded currently

Reclassifications

Certain reclassifications have been made to the 2010 financial statements to conform to the 2011 financial statement presentation These reclassifications had no effect on the change in net assets

Note 2: Affiliation with Methodist Peoria

On October 1, 2011, the Health System executed an affiliation agreement with MHSC, a not-for-profit health care organization operating as The Methodist Medical Center of Illinois, located in Peoria, Illinois The results of MHSC's operations have been included in the consolidated financial statements since that date As a result of the affiliation, the Health System will have an opportunity to expand its service area into Central Illinois and further the mission and strategic goals of the Health System in the ever changing health care provider landscape The Health System also expects that the affiliation will allow it to achieve cost savings through elimination of certain duplicative administrative and other functions The affiliation was accomplished by the Health System becoming the sole member of MHSC and having the ability to appoint the board members of MHSC No consideration was transferred for the net assets of MHSC, thus the fair value of unrestricted net assets received by the Health System is shown as contribution revenue in the consolidated statements of operations

The Health System incurred $787 of costs in connection with this affiliation These costs are included in other expenses in the consolidated statements of operations

(Dollars in Thousands)

The following table summarizes the fair value of the assets acquired and liabilities assumed recognized at the affiliation date

Recognized fair value of identifiable assets acquired and liabilities assumed	
Current assets	$ 104,780
Property, plant and equipment	244,919
Noncurrent assets	165,203
Total assets	514,902
Current liabilities	89,268
Long-term debt	109,891
Long-term liabilities	122,886
Total liabilities	322,045
Total contribution received	$ 192,857
Summary of contribution received by net asset classification	
Unrestricted contribution received	$ 180,325
Temporarily restricted contribution received	8,635
Permanently restricted contribution received	3,897
Total contribution received	$ 192,857

The affiliation resulted in an inherent contribution received of $192,857, which represents the net recognized amount of the identifiable assets acquired over the liabilities assumed Acquisition of the unrestricted net assets has been included in contribution revenue in the consolidated statements of operations The temporarily and permanently restricted net assets have been included as increases to those classes of net assets in the amounts of $8,635 and $3,897, respectively

MHSC contributed revenues of $89,832, excess revenues over expenses of $8,646, and changes in unrestricted, temporarily restricted, and permanently restricted net assets of $3,177, $356 and $23 to the Health System for the period from the affiliation date through December 31, 2011 The following unaudited pro forma summary presents consolidated information of the Health System as if the affiliation had occurred on January 1, 2010

	Pro Forma Year Ended December 31, 2011	Pro Forma Year Ended December 31, 2010
Revenue	$ 2,647,365	$ 2,488,989
Excess of revenues over expenses	20,192	388,261
Change in		
Unrestricted net assets	(72,740)	383,070
Temporarily restricted net assets	2,807	10,009
Permanently restricted net assets	(6)	5,704

Supplemental pro forma earnings for the year ended December 31, 2011 were adjusted to exclude $3,719 of affiliation-related costs incurred by both the Health System and MHSC in 2011, $2,467 of nonrecurring expense related to an adjustment to self-insurance liabilities, and $4,000 of additional contribution revenue related to the fair value adjustment to joint ventures at the affiliation date. The 2010 supplemental pro forma earnings were adjusted to include these adjustments. The unaudited pro forma amounts are not indicative of what actual consolidated results of operations might have been if the affiliation had been effective at the beginning of 2010.

Note 3: Charity Care

The Health System provides charity care and financial assistance discounts for medically necessary health care services provided to persons who meet the Health System's policy. The policy provides a percentage discount to the patient that decreases at gradually higher income levels or higher levels of household net assets. The benchmark upon which the income level is compared to is the Federal Poverty Income Guideline and is updated annually. Patients who are already receiving benefits from certain identified government programs qualify for presumptive eligibility.

The availability of charity care is widely communicated to all patients and patients are notified prior to receiving services if their treatment does not fall within the guidelines of the policy. Amounts charged for care that is provided to individuals eligible for charity may not be more than the amounts generally billed to individuals who have insurance covering such care. Amounts billed are based on either the best, or an average of the three best, negotiated commercial rates, or Medicare rates.

Accounts that are classified by the Health System as charity care are not reported as net patient service revenue. In some cases, the charity care is subsidized by contributions from volunteer organizations or other donors. Charity care subsidies are not material to the consolidated financial statements.

Cost of charity care is calculated by applying hospital specific cost to charge ratios to the total amount of charity care deductions from gross revenue. The cost-to-charge ratio is calculated by taking the hospital total expenses and gross charges and applying adjustments to remove the cost of non-patient care activity, Medicaid provider taxes paid, identifiable community benefit expenses, as well as gross patient charges that are generated for identifiable community benefit services.

The amount of charity care provided at cost was $39,045 and $33,969 for the years ended December 31, 2011 and 2010, respectively. The portion of the increase related to the addition of MHSC was $1,795 for the year ended December 31, 2011.

Community benefit is also provided through reduced price services and free programs offered throughout the year. The Health System provides an array of uncompensated activities and services intended to meet the community health needs. These activities include wellness programs, community education programs and various health screening programs. The cost of providing these community benefit services is reported on Schedule H of the Health System's IRS Form 990.

(Dollars in Thousands)

Note 4: Third-Party Reimbursement

As a provider of health care services, the Health System generally grants credit to patients without requiring collateral or other security. The Health System routinely obtains assignments of (or is otherwise entitled to receive) patients' benefits payable under their health insurance programs, plans or policies. These health insurance programs or providers are commonly referred to as third-party payers and include the Medicare and Medicaid programs, Wellmark and various health maintenance and preferred provider organizations.

A major portion of the Health System's revenues is derived from these third-party payers. Significant changes have been made, and may be made, in certain of these programs, which could have a material, adverse impact on the financial condition of the Health System. These changes include federal and state laws and regulations, particularly those pertaining to Medicare and Medicaid.

The Health System has agreements with certain third-party payers that provide for payment of services at amounts different from established rates. Third-party payer payment rates vary by payer and include established charges, contracted rates less than established charges, prospectively determined rates per discharge, per procedure, or per diem, retroactively determined cost-based rates.

Gross patient service revenue (based on established rates) by payer for the years ended December 31 was as follows:

	2011	2010
Medicare	43%	43%
Medicaid	12	11
Wellmark	21	21
Commercial and other	19	19
Self-pay	5	6
	100%	100%

Gross patient accounts receivable (based on established rates) by payer at December 31 was as follows:

	2011	2010
Medicare	29%	32%
Medicaid	15	10
Wellmark	17	17
Commercial and other	26	27
Self-pay	13	14
	100%	100%

Iowa Medicaid State Plan

In 2011, the state of Iowa enacted a Medicaid State Plan in which an annual tax assessment is levied on certain hospital providers in order to provide funding for Medicaid to obtain federal matching funds. A portion of these additional federal funds are then redistributed to participating Iowa hospitals through increased Medicaid payments in order to help bring Medicaid reimbursement closer to the cost of providing care. The allocation of these funds to specific health care providers is based primarily on the amount of care provided to Medicaid recipients.

The Health System's tax assessment and contribution during 2011 was $16,566 and is included in operating expenses in the consolidated statements of operations. Additional Medicaid reimbursement in the same period was approximately $28,738 and is included in net patient service revenue in the consolidated statements of operations, resulting in a net increase in operating income of $12,172.

Illinois Medicaid State Plan

The Illinois Medicaid State Plan serves a similar purpose as the Iowa plan but has been in place since 2006. Under the amended Illinois Medicaid State Plan, proceeds from the tax assessment are used to obtain federal matching funds, all of which must be distributed to Illinois hospitals and physicians to help bring Medicaid reimbursement closer to the cost of providing care. The allocation of these funds to specific health care providers is based primarily on the amount of care provided to Medicaid recipients. The Health System's tax assessment and contribution in 2011 relate to Trinity Regional Health System and MHSC while in 2010 related to Trinity Regional Health System only.

In 2011 and 2010, the Health System's tax assessment and contribution was $10,632 and $8,312, respectively, and is included in operating expenses in the consolidated statements of operations. Additional Medicaid reimbursement in the same periods was approximately $19,577 and $14,375 and is included in net patient service revenue in the consolidated statements of operations, resulting in a net increase in operating income of $8,945 and $6,063 in 2011 and 2010, respectively.

Electronic Health Records Incentive Program

The Electronic Health Records Incentive Program, enacted as part of the *American Recovery and Reinvestment Act of 2009*, provides for one-time incentive payments under both the Medicare and Medicaid programs to eligible health systems that demonstrate meaningful use of certified electronic health records technology (EHR). Payments under both the Medicare and Medicaid program are generally made for up to four years based on a statutory formula. The Medicaid programs are determined on a state by state basis, which are approved by the Centers for Medicare and Medicaid Services. Payment under both programs are contingent on the Health System initially attesting to being a meaningful user of EHR technology and then continuing to meet escalating criteria, including other specific requirements that are applicable, for consecutive reporting periods. The final amount for any payment year is determined based upon an audit by the fiscal intermediary. Events could occur that would cause the final amounts to differ materially from the initial payments under the program.

The Health System recognizes revenue ratably over the reporting period starting at the point when management is reasonably assured it will meet all of the meaningful use objectives and any other specific grant requirements applicable for the reporting period

In 2011, several of the Health System's affiliates completed the first-year requirements under the Medicaid program and the Health System has recorded revenue of $9,789, which is included in other operating revenue in the consolidated statements of operations The Medicaid program EHR funds are related to the implementation of EHR technology for the hospitals and physician groups One affiliate completed the first-year requirements under the Medicare program during 2011 and has recorded revenue of $1,362 in the same manner The remaining affiliates of the Health System have not completed the initial attestation under the Medicare program and have not recorded any revenue pertaining to this program

Private Investment Funds

At December 31, 2011 and 2010, 45% and 48%, respectively, of the Health System's investments were invested in PIFs whose portfolios are primarily invested in debt and marketable equity securities These investments are included in either internally designated or other long-term investments in the investment summary tables (previously presented) based on the underlying investments The amounts included in the investment summary tables at December 31 are as follows

	2011	2010
Corporate bonds	$ 190,763	$ 169,479
Equity securities	222,775	232,524
Hedge fund of funds	101,445	77,550
	$ 514,983	$ 479,553

(Dollars in Thousands)

The PIFs are primarily limited partnerships and limited liability companies, including three hedge fund-of-funds and one private equity fund The underlying investments of these funds are primarily debt and marketable equity securities The investment strategies for each fund vary but include low return volatility through tactical investment strategies, investing in growth or value securities for long-term growth and to earn a total rate of return in excess of rates of return compared to a standard index The private equity fund has a strategy of investing in early-stage companies and entrepreneurs within the healthcare industry There is no public market for shares in the private investment funds The value of the investments in the PIFs is determined based on the fair values of the underlying securities

In situations when investments do not have readily determinable fair values (private investment funds), the fund managers provide the net asset value (NAV) per share, or its equivalent, to the Health System The NAV provided by the fund managers is supported by underlying audit reports of the private investment funds The Health System previously adopted ASU 2009-12, which provided a practical expedient for certain investments to use net asset value per share to measure fair value Accordingly, the Health System uses the NAV as a practical expedient for fair value for each of its PIFs

The PIFs generally have certain limits regarding advance notice and timing of withdrawals They generally require advance notice of at least two days prior to a month end to withdraw funds One fund that represents about 16% of the private investment funds requires a 95-day notice to withdraw funds either quarterly or semiannually based on the initial purchase date of the investments In addition, withdrawals may be limited by the PIFs underlying investment funds ability to liquidate their holdings

During 2011, the Health System committed to investing $10,000 in a PIF with a lock-up period of ten years The Health System's interest is nonredeemable and the Health System has contributed a nominal amount to this investment as of December 31, 2011

Investments in Joint Ventures

At December 31, 2011 and 2010, investments in joint ventures amounted to $42,710 and $26,327, respectively The new joint ventures added in the affiliation with MHSC were $14,107 Other investments consist primarily of cash surrender value of life insurance policies and real estate held for investment

The joint ventures consist of 39 privately held health care organizations in which the Health System's ownership interest ranges from 18% to 50% The joint ventures had the following financial information as of and for the years ended December 31

	2011	2010
Total assets	$ 160,253	$ 137,522
Net revenues	151,325	139,626
Net income	43,065	39,971

(Dollars in Thousands)

The Health System's share of earnings on the investments in joint ventures is included in other operating revenue in the consolidated statements of operations The Health System recorded activity related to joint ventures for the years ended December 31 as follows

	2011	2010
Earnings on investments in joint ventures	$ 18,635	$ 16,795
New investments in joint ventures	2,613	343
Distributions received from joint ventures	18,668	15,807

The Health System both purchases services and sells services and supplies to several joint ventures In 2011 and 2010, services purchased from joint ventures totaled $11,016 and $10,370, respectively Services and supplies sold to joint ventures in 2011 and 2010 were $9,105 and $7,261, respectively

Note 6: Property, Plant and Equipment

Property, plant and equipment are stated at cost and are summarized at December 31 as follows

	2011	2010
Land	$ 95,753	$ 52,940
Land improvements	64,770	43,758

(1) Variable rates shown represent rates as of December 31, 2011 and 2010, respectively

The Series 2011 Bonds are obligations of MHSC that were issued prior to their affiliation with the Health System The Methodist Medical Center of Illinois, a subsidiary of MHSC, is the sole obligor under the bond indenture, which requires the maintenance of certain financial ratios through the master trust indenture and letter of credit agreement (related to the variable rate demand bonds)

The Series 2009, 2008, and 2005 Bonds (collectively "the Bonds") are general obligations of the Health System and its affiliates The Health System is required to meet certain operating and financial ratios contained in the master bond trust indenture, bond insurance agreements and bank letter of credit agreements (related to the variable rate demand bonds) The Bonds are subject to the provisions of amended and restated master trust indentures, which generally require monthly or quarterly deposits for principal and interest payments be made, and certain funds be maintained by the trustee for interest payment and bond retirement purposes

(Dollars in Thousands)

The variable interest rates on substantially all of the bonds are adjusted daily or weekly by remarketing agents The bonds may be tendered by the bond holders each interest rate period The Health System maintains a combination of letters of credit and standby purchase agreements that can be drawn on should the bonds not be remarketed The agreements will expire beginning in 2014 through 2016 The agreements are renewable, subject to trustee approval and at the option of the agreement providers, throughout the term of the bonds Outstanding amounts under the agreements are due at the earlier of expiration of the agreements or over a period of three years commencing after an initial outstanding period of 366 days or more

In December 2010, the Health System completed an interest rate mode conversion for the 2009C bonds converting the interest rate from a daily rate to an index rate The interest rate modification was not considered a significant modification of terms, thus, all costs incurred from the mode conversion were expensed during the year In 2010, a Direct Note Obligation for the 2009C bonds was issued to a financial institution, eliminating the supporting letter of credit requirement

The $50,000 of 2009F bonds outstanding are subject to a mandatory tender on August 14, 2012 and therefore are classified as current maturities within the consolidated balance sheet at December 31, 2011 The Health System is in the preliminary stages of developing a financing plan to cover any redemption required on bonds put to the Health System under exercise of the tender agreement

Aggregate annual maturities of long-term debt during the years ending December 31 are as follows

	Accelerated Maturities with Letter of Credit Terms	Scheduled Maturities Based on Loan Agreements
2012	$ 73,258	$ 73,258
2013	186,875	21,666
2014	157,924	21,665
2015	11,116	42,671
2016	16,364	23,394
Thereafter	347,467	610,350
	$ 793,004	$ 793,004

At December 31, 2011 and 2010, the Health System has included $0 and $17,097, respectively, in current maturities of long-term debt related to letters of credit and standby purchase agreements for related bonds that if not remarketed would require a payment within the next year

Note 8: Interest Rate Swaps

Swaps Designated as Hedging Instruments

As a risk management strategy to maintain acceptable levels of exposure to the risk of changes in future cash flows due to interest rate fluctuations, the Health System entered into the following interest rate swap agreements

Trade Date	Maturity Date	Current Notional Amount	Health System Pays	Health System Receives	Accounting Treatment	Fair Value 2011	Fair Value 2010
2005	2035	$ 192,540	3 5%	62 4% of LIBOR + 29 bps	Cash Flow Hedge	$ (37,026)	$ (16,684)

In 2005, the Health System entered into three interest rate swap agreements, which effectively converted the Series 2005B variable rate bonds into fixed rate debt at a rate of 3 5% (4 1% including transaction costs) During 2009, these swaps were redesignated to hedge the Series 2009 A-D Bonds The swap agreements have an aggregate notional amount of $192,540 at December 31, 2011

Management has designated the above interest rate swap agreements as cash flow hedging instruments, and has determined that these agreements are highly effective The aggregate fair value of the swap agreements is recorded as a long-term liability of $(37,026) at December 31, 2011 and $(16,684) at December 31, 2010 The change in fair value of $(20,342) and $(6,819) for the years ended December 31, 2011 and 2010, respectively, is reported as part of the change in unrealized gains and losses on swaps Interest, the net of what the Health System pays and receives under the two legs of the swaps, is settled monthly on each swap agreement and is reported as interest expense

The Health System has provisions within certain interest rate swap agreements that would require it to post collateral should the negative fair value of the agreements exceed $25,000 individually, the Health System's credit rating fall below Aa3 by Moody's or AA- by S&P, or the bond insurers rating fall below A- by S&P As of December 31, 2011, the Health System has not been requested to post collateral under these agreements

The table below presents certain information regarding the Health System's interest rate swap agreements designated as cash flow hedges The Health System has additional derivative instruments at December 31, 2011 and 2010 that are no longer designated as hedging instruments under ASC 815 *(Derivatives and Hedging)*, as shown below

	2011	2010
Other Long-term Liabilities

Other Swap Agreements

The Health System has also entered into the following interest rate swap agreements which are not designated as hedging instruments The Health System has elected to carry these swaps as an investing activity, until such time that satisfactory termination value can be obtained, or their respective maturity date

Trade Date	Maturity Date	Notional Amount	Health System Pays	Health System Receives	Fair Value 2011	Fair Value 2010
2006	2030	$ 60,000	100% of SIFMA*	68 0% of LIBOR + 59 2 bps*	$ 938	$ -
2006	2037	143,000	3 8%	61 9% of LIBOR + 31 bps	(42,529)	(20,531)
2006	2023	42,700	3 5	61 9% of LIBOR + 31 bps	(7,593)	(4,251)
2005	2035	64,180	3 3	62 4% of LIBOR + 29 bps	(11,312)	(4,758)
					$ (60,496)	$ (29,540)

*Rate represents the terms of the swap agreement, as originated The agreement has been amended for the period until November 15, 2014 Until that date, MHSC will not make a quarterly payment and will receive fixed quarterly payments of $188,250 After that date, the terms revert back to the original contracted terms, which are as stated in the table above

The aggregate fair value of the unhedged swap agreements are recorded as long-term investments of $938 and $0 and long-term liabilities of $(61,434) and $(29,540), as of December 31, 2011 and 2010, respectively The change in fair value of $(31,141) and $(7,640) are included as a component of other income (loss) as of December 31, 2011 and 2010, respectively Interest, the net of what the Health System pays and receives, is settled monthly or quarterly on each swap agreement and is reported as other income (loss)

In prior years, certain swap agreements previously designated as hedges by the Health System were deemed to be ineffective The effective portion of these changes in fair value, previously deemed effective, is being amortized into other income (loss) over the remaining life of the swap As of December 31, 2011 and 2010, $(699) and $(760) of net unrealized losses remain in net assets to be amortized and $(61) and $475 was amortized into other income (loss), respectively

In January 2010, the Health System terminated a swap agreement with a notional value of $67,090, at a cost of $(2,795) The Health System's counterparty also called swap agreements with a notional amount of $80,760, in accordance with the agreement, in February 2010

Note 9: Related-Party Transactions

The Health System leases real estate from certain companies controlled by members of the Board of Directors of the Health System or its subsidiaries Minimum payments under these operating leases are $4,842 per year The leases expire in various periods through 2021 Rent expense under these leases, including a pro rata portion of certain operating expenses of the facilities, was $4,915 and $7,107 for 2011 and 2010, respectively At December 31, 2011 and 2010, the Health System also had outstanding debt related to real estate capital lease obligations of $10,963 and $1,503, respectively The Health System also leases real estate to physicians who may serve the Health System through board of director or medical director roles

The Health System purchases a variety of services and products from companies affiliated with members of the Boards of Directors of the Health System and/or its subsidiaries Services and products purchased from these affiliated companies during 2011 and 2010 totaled $13,693 and $13,382, respectively, of which $4,902 and $7,526, respectively, were related to construction project costs In addition, the Health System purchases services from several joint ventures and sells services and supplies to several joint ventures in which the Health System is also an investor The Health System believes these transactions are consummated under commercially reasonable business arrangements

The Health System has recorded receivables for amounts held by nonconsolidated foundations on behalf of the Health System of $41,527 and $40,594 as of December 31, 2011 and 2010, respectively Contributions received from nonconsolidated foundations and other related parties were $2,326 and $3,562 in 2011 and 2010, respectively

Note 10: Retirement Benefit Plans

Defined Contribution Retirement Plans

The Health System has several defined contribution benefit plans, which are available to substantially all employees meeting age and length of service requirements Participating employers annually determine the amount, if any, of the Health System's contributions to the plan Total benefit expenses under the defined contribution plans were approximately $46,250 and $44,537 for 2011 and 2010, respectively The Health System also has deferred compensation plans for certain employees Total expenses under the deferred compensation plans were $2,394 and $2,534 for 2011 and 2010, respectively

Defined Benefit Plans

Prior to 2001, substantially all employees of four of the Health System's subsidiaries were covered by noncontributory defined benefit pension plans, all of which have subsequently been frozen to new participants or terminated The Health System's funding policy is to make the minimum annual contribution that is required by applicable regulations, plus such amounts as the Health System may determine to be appropriate from time to time

Upon the affiliation with MHSC (Peoria) during the year, the Health System inherited their noncontributory defined benefit pension plan, which has been frozen to new participants since 2007 Pension benefits are based on compensation of employees and years of service and are actuarially determined As part of the accounting for the affiliation transaction, unrecognized pension benefit costs in unrestricted net assets were eliminated as they will not be recognized through earnings on the Health System's financial statements

The Health System expects to contribute $15,592 to the plans in 2012

In 2010, the Sioux City affiliate completed its plan for termination and distribution of the assets in its defined benefit pension plan The plan was terminated effective January 31, 2008 In December 2009, a determination letter was received from the IRS approving the termination

The Health System has estimated the long-term rate of return on plan assets based primarily on historical returns on plan assets, adjusted for changes in target portfolio allocations and recent changes in long-term interest rates based on publicly available information

Plan assets are held by a bank-administered trust fund, which invests the plan assets in accordance with the provisions of the plan agreement The plan agreements permit investment in common stocks, corporate bonds and debentures, U S Government securities and other specified investments, based on certain target allocation percentages

Asset allocation is primarily based on a strategy to provide stable earnings while still permitting the plans to recognize potentially higher returns through a limited investment in equity securities The target asset allocation percentages for 2011 and 2010 are as follows

		2011			
		Des Moines	Cedar Rapids	Waterloo	Peoria
Equity securities	Not to exceed	20%	50%	25%	60%
Fixed income	Not to exceed	80	50	75	25

Defined Benefit Plan Assets

Following is a description of the valuation methodologies used for pension plan assets measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of pension plan assets pursuant to the valuation hierarchy

Where quoted market prices are available in an active market, plan assets are classified within Level 1 of the valuation hierarchy. Level 1 plan assets include highly liquid U.S. Treasuries and exchange traded equities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of plan assets with similar characteristics or discounted cash flows. Level 2 plan assets include U.S. Government agency obligations, collateralized mortgage obligations, corporate bonds and PIFs. For these investments, the inputs used by the pricing service to determine the fair value include one or a combination of observable inputs, such as broker/dealer quotes, issuer spreads, benchmark securities, bid offers and reference data market research publications. In certain cases where Level 1 and Level 2 inputs are not available, plan assets are classified within Level 3 hierarchy. The plans have no Level 3 investments.

PIFs include interest in fixed income and equity security investment portfolios as well as alternative asset partnerships. PIFs are valued based on the Health System's proportionate interest in the fair value of the underlying investment assets held by the fund, adjusted to reflect risk associated with liquidity of their investment in the partnership, restrictions on transfer and other matters, if any. Interest in funds that consist of underlying securities with observable inputs, such as quoted market prices or quoted prices of securities with similar characteristics, are categorized as Level 2 of the fair value hierarchy.

Note 11: Risk Management

The Health System's hospitals are primarily self-insured for professional and general liability for amounts of $5,000 per claim and $25,000 in the aggregate annually. Professional and general liability insurance coverage is maintained on a claims-made basis, with a liability limit of $25,000. Other entities of the Health System maintain their professional and general liability coverage on a claims-made basis with no significant deductibles.

The Health System is primarily self-insured for workers' compensation and employee health care claims. Workers' compensation claims individually and in the aggregate that exceed certain amounts are covered by insurance.

Property insurance is maintained with at least 90% replacement value coverage and minimal deductibles. Business interruption insurance coverage is also maintained by the Health System.

The Health System has accrued as other liabilities $72,724 and $50,241 for self-insured losses at December 31, 2011 and 2010, respectively. As the Health System adopted ASU 2010-24 in 2011 *(see Note 1)*, the liabilities are presented on a gross basis as of December 31, 2011 and the Health System has recorded the expected offsetting insurance recoveries as a receivable. The accrued liabilities are based on management's evaluation of the merits of various claims, historical experience and consultation with external insurance consultants and actuaries, and include estimates for incurred but not reported claims. There can be no assurance that the accrued liabilities will be sufficient for the ultimate amounts that will be paid for claims and settlements. Also, in the ordinary course of business, the Health System is involved in other litigation and claims, none of which management believes will ultimately result in losses that will adversely affect the Health System's consolidated net assets or results of operations to a material degree.

Cash and investments have been internally designated to be held for payments of claims, if any, which may result from the self-insured or uninsured portion of liability insurance and workers' compensation claims. At December 31, 2011 and 2010, the cash and investments amounted to $37,049 and $32,803, respectively.

Note 12: Lease Commitments

Certain property and equipment is being leased under long-term noncancelable operating leases. In most cases, management expects that, in the normal course of operations, the leases will be renewed or replaced by other leases. The total rent expense under operating leases during 2011 and 2010 was $46,499 and $41,629, respectively.

(Dollars in Thousands)

The following is a schedule by year of future minimum rental payments required under noncancelable operating leases that have initial or remaining noncancelable lease terms in excess of one year as of December 31, 2011

Note 13: Disclosures About Fair Value of Financial Instruments

ASC Topic 820, *Fair Value Measurements*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date Topic 820 also specifies a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value The standard describes three levels of inputs that may be used to measure fair value

Level 1 Quoted prices in active markets for identical assets or liabilities

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in active markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

Financial Instruments Measured at Fair Value on a Recurring Basis

Following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such instruments pursuant to the valuation hierarchy

Investments

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy Level 1 securities include highly liquid U S Treasuries, exchange traded equities and mutual funds If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows Level 2 securities include U S government agency obligations, collateralized mortgage obligations, corporate debt obligations and PIFs For these investments, the inputs used by the pricing service to determine the fair value include one or a combination of observable inputs, such as broker/dealer quotes, issuer spreads, benchmark securities, bid offers and reference data market research publications In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy and include certain less liquid securities The Health System has no Level 3 investments

PIFs include interests in fixed income and equity security investment portfolios as well as alternative asset partnerships PIFs are valued based on the Health System's proportionate interest in the fair value of the underlying investment assets held by the fund, adjusted to reflect risk associated with liquidity of their investment in the partnership, restrictions on transfer and other matters, if any Interest in funds that consist of underlying securities with observable inputs, such as quoted market prices or quoted prices of securities with similar characteristics, are categorized as Level 2 of the fair value hierarchy

Quoted market prices were used to determine the fair value of Level 1 items For Level 2 investments, inputs include maturity and coupon rates and/or closing prices of similar securities from comparable industry financial data, as well as private investment fund's net asset values

Interest Rate Swap Agreements

The fair value of interest rate swap agreements are estimated by a third party using inputs that are observable or that can be corroborated by observable market data and, therefore, are classified within Level 2 of the valuation hierarchy

Beneficial Interests in Trusts

The fair value is estimated at the present value of the future distributions expected to be received over the term of the agreement Due to the nature of the valuation inputs, the interest is classified within Level 2 of the hierarchy

Financial Instruments Not Measured at Fair Value

The fair value for certain financial instruments approximates the carrying value because of the short-term maturity of these instruments, which include cash and cash equivalents, short-term investments, receivables, accounts payable, accrued liabilities, estimated settlements due to third-party payers and other current liabilities

The carrying amount of the variable rate bonds and notes is assumed to approximate fair value For the fixed-rate bonds, the estimated fair value is based on quoted prices for similar liabilities and is obtained from a financial institution that deals in these types of instruments Other debt obligations are insignificant, and the carrying amounts are assumed to approximate fair value

Estimates of fair values are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision Changes in assumptions could affect the estimates The fair market value of the Health System's financial instruments at December 31 approximates the carrying value except as follows

	2011		2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt, excluding capital leases	$ 779,426	$ 803,109	$ 687,203	$ 674,486

Note 14: Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets are available for the following purposes or periods as of December 31

	2011	2010
Purchase of equipment	$ 7,555	$ 6,257
Indigent care/operations	12,278	6,308

	2011	2010
Investments (generally including net investment appreciation and depreciation) to be held in perpetuity (income is restricted)	$ 24,875	$ 24,904
Investments (generally including net investment appreciation and depreciation) to be held in perpetuity (income is restricted for various purposes as directed by the donors)	12,810	13,001
Other	9,384	5,263
Total permanently restricted net assets	$ 47,069	$ 43,168

Note 15: Asset Retirement Obligation

Accounting principles generally accepted in the United States of America require that an asset retirement obligation (ARO) associated with the retirement of a tangible long-lived asset be recognized as a liability in the period in which it is incurred or becomes determinable (as defined by the standard) even when the timing and/or method of settlement may be conditional on a future event The Health System's conditional asset retirement obligations primarily relate to asbestos contained in various buildings Environmental regulations in many of the states where the Health System operates require the Health System to handle and dispose of asbestos in a special manner if a building undergoes major renovations or is demolished

A summary of changes in asset retirement obligations, which is included on the accompanying consolidated balance sheets in other long-term liabilities, during 2011 and 2010 is included in the table below

	2011	2010
Liability, beginning of year	$ 12,108	$ 11,910

Note 16: Commitments and Contingencies

The health care industry is subject to numerous laws and regulations of federal, state and local governments Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time Government activity has increased with respect to investigations and allegations concerning possible violations of regulations by health care providers, which could result in the imposition of significant fines and penalties as well as significant repayments of previously billed and collected revenues for patient services The Health System has a corporate compliance plan intended to meet federal guidelines As a part of this plan, the Health System performs periodic internal reviews of its compliance with laws and regulations As part of the Health System's compliance efforts, the Health System investigates and attempts to resolve and remedy all reported or suspected incidents of material noncompliance with applicable laws, regulations or policies on a timely basis The Health System believes that these compliance programs and procedures lead to substantial compliance with current laws and regulations

The Health System is in various stages of responding to inquiries and investigations These various inquiries and investigations could result in fines and/or financial penalties, which could be material At this time, the Health System is unable to estimate the possible liability, if any, that may be incurred as a result of these inquiries and investigations, but the Health System does not believe it would materially affect the financial position of the Health System

Guarantees

The Health System has guaranteed approximately $13,236 and $7,302 at December 31, 2011 and 2010, respectively, relating to long-term debt for the construction of two cancer centers, an endoscopy center, a medical office building that includes clinic and office space, and debt related to joint ventures

Employment Contracts

The Health System is committed for noncancelable physician employment contracts in the following amounts, prior to inflationary adjustments and bonuses based on future events

2012	$ 12,726
2013	980
2014	429

Current Economic Conditions

The current protracted economic decline continues to present healthcare organizations with difficult circumstances and challenges, which in some cases have resulted in large and unanticipated declines in the fair value of investments and other assets, large declines in contributions and constraints on liquidity The financial statements have been prepared using values and information currently available to the Health System

Some of the Health System's patients are covered by government sponsored Medicare or Medicaid programs The effect of the current economic conditions on government budgets may have an adverse effect on the cash flow from these programs

Further, current economic conditions have made it difficult for certain of the Health System's other patients to pay for services rendered As employers make adjustments to health insurance plans or more patients become unemployed, services provided to self-pay and other payers may significantly impact net patient service revenue, which could have an adverse impact on the Health System's future operating results

Note 17: Subsequent Events

Subsequent events have been evaluated through April 19, 2012, which is the date the financial statements were issued

On January 6, 2012, the Health System entered into a revolving line of credit facility (Revolver) that provides for an aggregate principal amount of $50,000 in borrowings and bears an interest rate of LIBOR plus 60 basis points for funds drawn against the facility Additionally, a facility fee of 10 basis points is required on the undrawn portion of the Revolver The maturity date of this facility is January 5, 2014
