Report of Independent Auditors

The Board of Directors
Ascension Health Alliance

We have audited the accompanying consolidated balance sheets of Ascension Health Alliance (as identified in Note 1) as of June 30, 2012 and 2011, and the related consolidated statements of operations and changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of Ascension Health Alliance's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of Ascension Health Alliance's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Ascension Health Alliance's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Ascension Health Alliance at June 30, 2012 and 2011, and the consolidated results of its operations and changes in net assets and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States.

In the event that bonds are not remarketed upon the exercise of put options or the scheduled mandatory tenders, management would utilize other sources to access the necessary liquidity. Potential sources include liquidating investments, drawing upon the \$1,000,000 line of credit, and issuing commercial paper. The commercial paper program is supported by the \$1,000,000 line of credit, as discussed in the Long-Term Debt note.

Notes to Consolidated Financial Statements *(Dollars in Thousands)*

June 30, 2012

1. Organization and Mission

Organizational Structure

Ascension Health Alliance is a Missouri nonprofit corporation formed on September 13, 2011. Ascension Health Alliance is the sole corporate member and parent organization of Ascension Health, a Catholic national health system consisting primarily of nonprofit corporations that own and operate local healthcare facilities, or Health Ministries, located in 21 of the United States and the District of Columbia.

In addition to serving as the sole corporate member of Ascension Health, Ascension Health Alliance serves as the member or shareholder of various other subsidiaries, including Ascension Health Global Mission, Ascension Health Insurance, Ltd., Edessa Insurance Company, Ltd., the Resource Group, LLC, Clinical Holdings Corporation, Catholic Healthcare Investment Management Company (CHIMCO), Ascension Health Ventures, LLC, Ascension Health Leadership Academy, LLC, and AH Holdings, LLC. Ascension Health Alliance and its member organizations are referred to collectively as the System.

Sponsorship

Ascension Health Alliance is sponsored by Ascension Health Ministries, a Public Juridic Person. The Participating Entities of Ascension Health Ministries are the Daughters of Charity of St. Vincent de Paul in the United States, St. Louise Province, the Congregation of St. Joseph, the Congregation of the Sisters of St. Joseph of Carondelet, and the Congregation of Alexian Brothers of the Immaculate Conception Province – American Province. As more fully described in the Organizational Changes note, Alexian Brothers Health System, which was previously sponsored by the Congregation of Alexian Brothers of the Immaculate Conception Province – American Province, became part of Ascension Health on January 1, 2012.

Mission

The System directs its governance and management activities toward strong, vibrant, Catholic Health Ministries united in service and healing, and dedicates its resources to spiritually centered care which sustains and improves the health of the individuals and communities it serves. In accordance with the System's mission of service to those persons living in poverty and other vulnerable persons, each Health Ministry accepts patients regardless of their ability to pay. The

1. Organization and Mission (continued)

System uses four categories to identify the resources utilized for the care of persons living in poverty and community benefit programs

- Traditional charity care includes the cost of services provided to persons who cannot afford healthcare because of inadequate resources and/or who are uninsured or underinsured
- Unpaid cost of public programs, excluding Medicare, represents the unpaid cost of services provided to persons covered by public programs for persons living in poverty and other vulnerable persons
- Cost of other programs for persons living in poverty and other vulnerable persons includes unreimbursed costs of programs intentionally designed to serve the persons living in poverty and other vulnerable persons of the community, including substance abusers, the homeless, victims of child abuse, and persons with acquired immune deficiency syndrome
- Community benefit consists of the unreimbursed costs of community benefit programs and services for the general community, not solely for the persons living in poverty, including health promotion and education, health clinics and screenings, and medical research

Discounts are provided to all uninsured patients, including those with the means to pay. Discounts provided to those patients who did not qualify for assistance under charity care guidelines are not included in the cost of providing care of persons living in poverty and community benefit programs. The cost of providing care to persons living in poverty and community benefit programs is estimated using each facility's internal cost data and is calculated in compliance with guidelines established by both the Catholic Health Association (CHA) and the Internal Revenue Service.

The amount of traditional charity care provided, determined on the basis of net cost, excluding the provision for bad debt expense, was \$468,970 and \$408,894 for the years ended June 30, 2012 and 2011, respectively. The amount of unpaid cost of public programs, cost of other programs for persons living in poverty and other vulnerable persons, and community benefit cost is reported in the accompanying supplementary information.

2. Significant Accounting Policies

Principles of Consolidation

All corporations and other entities for which operating control is exercised by Ascension Health Alliance or one of its member corporations are consolidated, and all significant inter-entity transactions have been eliminated in consolidation. Investments in entities where the System does not have operating control are recorded under the equity or cost method of accounting. Income from unconsolidated entities is included in consolidated excess of revenues and gains over expenses and losses in the accompanying Consolidated Statements of Operations and Changes in Net Assets as follows:

	Year Ended June 30,	
	2012	2011
Other revenue	\$ 82,473	\$ 138,469
Nonoperating gains, net	8,802	11,915

Use of Estimates

Management has made estimates and assumptions that affect the reported amounts of certain assets, liabilities, revenues, and expenses. Actual results could differ from those estimates.

Fair Value of Financial Instruments

Carrying values of financial instruments classified as current assets and current liabilities approximate fair value. The fair values of other financial instruments are disclosed in the Fair Value Measurements note.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and interest-bearing deposits with original maturities of three months or less.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

2. Significant Accounting Policies (continued)

Short-Term Investments

Short-term investments consist of investments with original maturities exceeding three months and up to one year, as well as assets limited as to use of approximately \$148,000 and \$146,000, at June 30, 2012 and 2011, respectively, which represent assets to be used for payment of the current portion of self-insurance liabilities

Long-Term Investments and Investment Return

As further discussed in the Organizational Changes and Pooled Investment Fund notes, a significant portion of the System's investments historically held in the Ascension Legacy Portfolio (formerly the Health System Depository, or HSD) were transferred to the CHIMCO Alpha Fund, LLC (Alpha Fund), a limited liability company organized in the state of Delaware, in April 2012. Certain System investments continue to be held in the Ascension Legacy Portfolio. Additional System investments include those held and managed by the Health Ministries' consolidated foundations.

Investments, excluding investments in unconsolidated entities, are measured at fair value, are classified as trading securities, and include pooled short-term investment funds, U S government, state, municipal and agency obligations, asset-backed securities, corporate and foreign fixed income securities, and equity securities, including private equity securities. Investments also include alternative investments, including investments in hedge funds and private equity and other funds, which are valued based on the net asset value of the investments, as further discussed in the Fair Value Measurements note. Investments also include derivatives held by the Alpha Fund, also measured at fair value, as discussed in the Pooled Investment Fund note.

Long-term investments include assets limited as to use of approximately \$916,000 and \$848,000, at June 30, 2012 and 2011, respectively, comprised primarily of investments placed in trust and held by captive insurance companies for the payment of self-insured claims and investments which are limited as to use, as designated by donors.

Purchases and sales of investments are accounted for on a trade-date basis. Investment returns consist of dividends, interest, and gains and losses. The cost of substantially all securities sold is based on the average cost method. Investment returns on investments, excluding returns

of self-insurance trust funds, are reported as nonoperating gains (losses) in the Consolidated Statements of Operations and Changes in Net Assets, unless the return is restricted by donor or law. Investment returns of self-insurance trust funds are reported as a separate component of income from operations in the Consolidated Statements of Operations and Changes in Net Assets.

Inventories

Inventories, consisting primarily of medical supplies and pharmaceuticals, are stated at the lower of cost or market value using first-in, first-out (FIFO) or a methodology that closely approximates FIFO.

Intangible Assets

Intangible assets primarily consist of goodwill and capitalized computer software costs, including internally developed software. Costs incurred in the development and installation of internal use software are expensed or capitalized depending on whether they are incurred in the preliminary project stage, application development stage, or post-implementation stage. Intangible assets are included in the Consolidated Balance Sheets as presented in the table that follows. Capitalized software costs in the table below include software in progress of \$363,347 and \$199,137 at June 30, 2012 and 2011, respectively.

Total intangible assets, net	<u>\$ 798,466</u>	<u>\$ 635,117</u>

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

2. Significant Accounting Policies (continued)

Intangible assets whose lives are indefinite, primarily goodwill, are not amortized and are evaluated for impairment at least annually, while intangible assets with definite lives, primarily capitalized computer software costs, are amortized over their expected useful lives. Amortization expense for these intangible assets in 2012 and 2011 was \$90,685 and \$86,490, respectively.

During the year ended June 30, 2010, the System began a significant multi-year, System-wide enterprise resource planning project, including information technology and process standardization (Symphony), which is expected to continue through December 2014. The project is anticipated to result in a transition to a common software product for various finance, information technology, procurement, and human resources management processes, including standardization of those processes throughout the System. Capitalized costs of Symphony were approximately \$279,000 and \$162,000 at June 30, 2012 and 2011, respectively, and are included in capitalized software costs in the preceding table. Certain costs of this project were also expensed. See the Impairment, Restructuring, and Nonrecurring Gains (Losses) discussion below for additional information about costs associated with Symphony.

Property and Equipment

Property and equipment are stated at cost or, if donated, at fair market value at the date of the gift. A summary of property and equipment at June 30, 2012 and 2011, is as follows:

	June 30,	
	2012	2011
Land and improvements	\$ 673,292	\$ 619,465
Building and equipment	13,107,833	12,329,647

Construction in progress	285,866	149,557
Total property and equipment, net	\$ 6,603,603	\$ 5,987,804

Depreciation is determined on a straight-line basis over the estimated useful lives of the related assets. Depreciation expense in 2012 and 2011 was \$581,032 and \$567,070, respectively.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

2. Significant Accounting Policies (continued)

Several capital projects have remaining construction and related equipment purchase commitments of approximately \$179,000

Noncontrolling Interests

The consolidated financial statements include all assets, liabilities, revenues and expenses of entities that are controlled by the System and therefore consolidated. Noncontrolling interests in the Consolidated Balance Sheets represent the portion of net assets owned by entities outside the System, for those entities in which the System's ownership interest is less than 100%.

Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets are those assets whose use by the System has been limited by donors to a specific time period or purpose. Permanently restricted net assets consist of gifts with corpus values that have been restricted by donors to be maintained in perpetuity, which include endowment funds. Temporarily restricted net assets and earnings on permanently restricted net assets, including earnings on endowment funds, are used in accordance with the donors' wishes, primarily to purchase equipment and to provide charity care and other health and educational services. Contributions with donor-imposed restrictions that are met in the same reporting period are reported as unrestricted.

Temporarily and permanently restricted net assets consist solely of controlling interests of the System.

Performance Indicator

The performance indicator is the excess of revenues and gains over expenses and losses. Changes in unrestricted net assets that are excluded from the performance indicator primarily include pension and other postretirement liability adjustments, transfers to or from sponsors and other affiliates, net assets released from restrictions for property acquisitions, change in unconsolidated entities' net assets, cumulative effect of a change in accounting principle, discontinued operations, and contributions received of property and equipment.

2. Significant Accounting Policies (continued)

Operating and Nonoperating Activities

The System's primary mission is to meet the healthcare needs in its market areas through a broad range of general and specialized healthcare services, including inpatient acute care, outpatient services, long-term care, and other healthcare services. Activities directly associated with the furtherance of this purpose are considered to be operating activities. Other activities that result in gains or losses peripheral to the System's primary mission are considered to be nonoperating.

Net Patient Service Revenue, Accounts Receivable, and Allowance for Uncollectible Accounts

Net patient service revenue is reported at the estimated realizable amounts from patients, third-party payors, and others for services provided excluding the provision for bad debt expense and includes estimated retroactive adjustments under reimbursement agreements with third-party payors. Revenue under certain third-party payor agreements is subject to audit, retroactive adjustments, and significant regulatory actions. Provisions for third-party payor settlements and adjustments are estimated in the period the related services are provided and adjusted in future periods as additional information becomes available and as final settlements are determined.

Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. As a result, there is at least a possibility that recorded estimates will change by a material amount in the near term. Adjustments to revenue related to prior periods increased net patient service revenue by \$149,931 and \$70,973 for the years ended June 30, 2012 and 2011, respectively.

During both 2012 and 2011, approximately 36% of net patient service revenue was earned under the Medicare program and 11% under various states' Medicaid programs. The System grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor arrangements. Significant concentrations of net accounts receivable at June 30, 2012 and 2011, include Medicare (20%) and various states' Medicaid programs (10%).

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

2. Significant Accounting Policies (continued)

The provision for bad debt expense is based upon management's assessment of expected net collections considering economic conditions, historical experience, trends in healthcare coverage, and other collection indicators. Periodically throughout the year, management assesses the adequacy of the allowance for uncollectible accounts based upon historical write-off experience by payor category, including those amounts not covered by insurance. The results of this review are then used to make any modifications to the provision for bad debt expense to establish an appropriate allowance for uncollectible accounts. After satisfaction of amounts due from insurance and reasonable efforts to collect from the patient have been exhausted, the System follows established guidelines for placing certain past-due patient balances with collection agencies, subject to the terms of certain restrictions on collection efforts as determined by the System. Accounts receivable are written off after collection efforts have been followed in accordance with the System's policies.

Impairment, Restructuring, and Nonrecurring Gains (Losses)

Long-lived assets are reviewed for impairment whenever events or business conditions indicate the carrying amount of such assets may not be fully recoverable. Initial assessments of recoverability are based on estimates of undiscounted future net cash flows associated with an asset or group of assets. Where impairment is indicated, the carrying amount of these long-lived assets is reduced to fair value based on future discounted net cash flows or other estimates of fair value.

During the year ended June 30, 2012, the System recorded total impairment, restructuring and nonrecurring gains, net of \$297,548. This amount was comprised primarily of pension curtailment gains of \$414,294, as discussed in the Retirement Plans note, partially offset by long-lived asset impairments and restructuring charges of \$61,151, and \$55,595 of nonrecurring expenses associated with Symphony.

For the year ended June 30, 2011, the System recorded total impairment, restructuring and nonrecurring losses, net of \$92,387, comprised of long-lived asset impairments of approximately \$21,834 and restructuring and nonrecurring expenses of approximately \$70,553. The restructuring and nonrecurring expenses for the year ended June 30, 2011, included approximately \$44,355 of nonrecurring expenses associated with Symphony. Symphony nonrecurring expenses include project management and process reengineering costs, as well as costs to establish a shared service center and develop a business intelligence data warehouse.

2. Significant Accounting Policies (continued)

Amortization

Bond issuance costs, discounts, and premiums are amortized over the term of the bonds using a method approximating the effective interest method

Income Taxes

The member healthcare entities of Ascension Health Alliance are primarily tax-exempt organizations under Internal Revenue Code Section 501(c)(3) or Section 501(c)(2), and their related income is exempt from federal income tax under Section 501(a)

Regulatory Compliance

Various federal and state agencies have initiated investigations regarding reimbursement claimed by certain members of the System. The investigations are in various stages of discovery, and the ultimate resolution of these matters, including the liabilities, if any, cannot be readily determined, however, in the opinion of management, the results of the investigations will not have a material adverse impact on the consolidated financial statements of Ascension Health Alliance.

Reclassifications

Certain reclassifications were made to the 2011 accompanying consolidated financial statements to conform to the 2012 presentation.

Subsequent Events

The System evaluates the impact of subsequent events, which are events that occur after the balance sheet date but before the consolidated financial statements are issued, for potential recognition in the consolidated financial statements as of the balance sheet date. For the year ended June 30, 2012, the System evaluated subsequent events through September 12, 2012, representing the date on which the accompanying audited consolidated financial statements were issued. During this period, there were no material subsequent events that required recognition or disclosure in the accompanying consolidated financial statements.

3. Organizational Changes

Business Combinations

Effective January 1, 2012, Ascension Health, a subsidiary of Ascension Health Alliance, became sole corporate member of Alexian Brothers Health System (Alexian Brothers), a Catholic healthcare system that operates acute and specialty care hospitals, ambulatory care clinics, physician practices and senior living facilities in Illinois, Missouri, Tennessee, and Wisconsin. This transaction resulted in a net increase to unrestricted net assets of \$326,333, reflected as contributions from business combinations in the Consolidated Statement of Operations and Changes in Net Assets during the year ended June 30, 2012. Furthermore, this addition resulted in a contribution of restricted net assets of \$16,337, included in other changes in net assets in the Consolidated Statement of Operations and Changes in Net Assets for the year ended June 30, 2012.

Pooled Investment Fund

For the year ended June 30, 2011, and prior to April 2012, the System held a significant portion of its investments in the Ascension Legacy Portfolio, an investment pool of funds in which the System and a limited number of nonprofit healthcare providers participated. In April 2012, a significant portion of the assets in the Ascension Legacy Portfolio was transferred to the Alpha Fund, a separate legal entity created during the year ended June 30, 2012. Certain System assets continue to be held through the Ascension Legacy Portfolio, and subsequent to April 2012, the Ascension Legacy Portfolio no longer holds assets for unrelated entities.

Prior to April 2012, CHIMCO, a wholly owned subsidiary of Ascension Health Alliance, managed the investment portfolio of Ascension Health Alliance held in the Ascension Legacy Portfolio. CHIMCO provides expertise in the areas of asset allocation, selection and monitoring of outside investment managers, and risk management. The System did not consolidate the Ascension Legacy Portfolio prior to April 2012. Accordingly, the System's investments recorded in the consolidated financial statements consisted only of the System's pro-rata share of the Ascension Legacy Portfolio's investments held for participants prior to April 2012.

The Alpha Fund includes the investment interests of Ascension Health Alliance and other Alpha Fund members. CHIMCO manages and serves as the manager and primary investment advisor of the Alpha Fund, overseeing the investment strategies offered to the Alpha Fund's members. Ascension Health Alliance began consolidating the Alpha Fund in April 2012.

Ascension Health Alliance

3. Organizational Changes (continued)

The portion of the Alpha Fund's net assets representing interests held by entities other than Ascension Health Alliance are reflected in noncontrolling interests in the Consolidated Balance Sheet at June 30, 2012, which amount to \$589,493 at June 30, 2012

The consolidation of the Alpha Fund by the System in April 2012 resulted in an increase of net assets of \$440,015, representing the noncontrolling interests of the Alpha Fund as of the date investments were transferred into the Alpha Fund. Additional information about the Alpha Fund is included in the Pooled Investment Fund note.

Divestitures and Discontinued Operations

Effective October 1, 2011, Seton Health System, Inc. (Seton Health) in Troy, New York, separated from the System and became part of a newly formed nonprofit healthcare organization that operates in the state of New York. The operations of Seton Health are reflected in the System's consolidated financial statements as discontinued operations.

Ascension Health Alliance reported a decrease in net assets from discontinued operations of \$54,998 for the year ended June 30, 2012, representing the contribution of net assets related to the separation of Seton Health and the deficit of revenues over expenses for previously discontinued lines of business in Michigan. These entities had recorded operating revenues totaling \$39,659 during the period that they were operational during the year ended June 30, 2012.

Ascension Health Alliance reported an increase in net assets from discontinued operations of \$19,421 for the year ended June 30, 2011, representing the excess of revenues over expenses for previously discontinued lines of business in Michigan, New York, and Tennessee. These entities had recorded operating revenues totaling \$186,902 during the period that they were operational during the year ended June 30, 2011.

Other

In March 2012, Ascension Health Alliance and Daughters of Charity Health System (DCHS) entered into a non-binding memorandum of understanding to explore having DCHS join Ascension Health, a subsidiary of Ascension Health Alliance. Completion of the proposed transaction is subject to the execution of final agreements and obtaining all necessary approvals.

3. Organizational Changes (continued)

In June 2012, Ascension Health Alliance and Marian Health System, Inc (Marian) entered into a non-binding memorandum of understanding to explore having Marian join Ascension Health Alliance. Completion of the proposed transaction is subject to the execution of final agreements and obtaining all necessary approvals.

4. Pooled Investment Fund

As discussed in the Organizational Changes note, in April 2012, substantially all of the System's investments previously held in the Ascension Legacy Portfolio were transferred to the Alpha Fund, in which Ascension Health Alliance and certain other entities are members. At June 30, 2012, a significant portion of the System's investments consist of Ascension Health Alliance's interest in the Alpha Fund.

The Alpha Fund invests in a diversified portfolio of investments including alternative investments, such as real asset funds, hedge funds, private equity funds, commodity funds and private credit funds. Collectively, these funds have liquidity terms ranging from weekly to annual with notice periods ranging from 1 to 93 days. Due to redemption restrictions, investments in certain of these funds, whose fair value was approximately \$683,000 at June 30, 2012, cannot currently be redeemed. However, the potential for the Alpha Fund to sell its interest in these funds in a secondary market prior to the end of the fund term does exist.

The Alpha Fund's investments in certain alternative investment funds also include contractual commitments to provide capital contributions during the investment period which is typically five years and can extend to the end of the fund term. During these contractual periods, investment managers may require the Alpha Fund to invest in accordance with the terms of the agreement. Commitments not funded during the investment period will expire and remain unfunded. As of June 30, 2012, contractual agreements of the Alpha Fund expire between July 1, 2012 and March 31, 2018. The remaining unfunded capital commitments of the Alpha Fund total approximately \$729 million for 51 individual funds as of June 30, 2012. Due to the uncertainty surrounding whether the contractual commitments will require funding during the contractual period, future minimum payments to meet these commitments cannot be reasonably estimated. These committed amounts are expected to be primarily satisfied by the liquidation of existing investments in the Alpha Fund.

In the normal course of operations and within established Alpha Fund guidelines, the Alpha Fund may enter into various exchange-traded and over-the-counter derivative contracts for trading purposes, including futures, option and forward contracts as well as warrants and swaps.

4. Pooled Investment Fund (continued)

These instruments are used primarily to adjust the portfolio duration, restructure term structure exposure, change sector exposure, and arbitrage market inefficiencies. See the Fair Value Measurements note for a discussion of how fair value for the Alpha Fund's derivatives is determined.

At June 30, 2012, the notional value of Alpha Fund derivatives outstanding was approximately \$2,071,000. The fair value of Alpha Fund derivatives in an asset position was \$71,936 at June 30, 2012, while the fair value of Alpha Fund derivatives in a liability position was \$36,266 at June 30, 2012. These derivatives are included in long-term investments in the Consolidated Balance Sheet at June 30, 2012.

The Alpha Fund also participates in a securities lending program, whereby a portion of the Alpha Fund's investments are loaned to selected established brokerage firms in return for cash and securities from the brokers as collateral for the investments loaned, usually on a short-term basis. The fair value of collateral held by the Alpha Fund associated with such lending agreements amounts to approximately \$320,000 and is included in other current assets in the Consolidated Balance Sheet at June 30, 2012, while the liability associated with the obligation to repay such collateral is also approximately \$320,000, and is included in other current liabilities in the Consolidated Balance Sheet at June 30, 2012. In addition, the Alpha Fund has liabilities for investments sold, not yet purchased, representing obligations of the Alpha Fund to purchase investments in the market at prevailing prices. The fair value of this Alpha Fund liability is approximately \$160,000 and is included in other noncurrent liabilities in the Consolidated Balance Sheet at June 30, 2012.

Due from brokers and due to brokers on the Consolidated Balance Sheet at June 30, 2012, represent the Alpha Fund's positions and amounts due from or to various brokers, primarily amounts for security transactions not yet settled, as well as cash held by brokers for securities sold, not yet purchased.

6. Fair Value Measurements

The System categorizes, for disclosure purposes, assets and liabilities measured at fair value in the consolidated financial statements based upon whether the inputs used to determine their fair values are observable or unobservable. Observable inputs are inputs that are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about pricing the asset or liability, based on the best information available in the circumstances.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

6. Fair Value Measurements (continued)

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement of the asset or liability. The System's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

The System follows the three-level fair value hierarchy to categorize these assets and liabilities recognized at fair value at each reporting period, which prioritizes the inputs used to measure such fair values. Level inputs are defined as follows:

Level 1 – Quoted prices (unadjusted) that are readily available in active markets or exchanges for identical assets or liabilities on the reporting date.

Level 2 – Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 pricing inputs include prices quoted for similar assets and liabilities in active markets or exchanges or prices quoted for identical or similar assets and liabilities in markets that are not active. If the asset or liability has a specified (contractual) term, a Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Significant pricing inputs that are unobservable for the asset or liability, including assets or liabilities for which there is little, if any, market activity for such asset or liability. Inputs to the determination of fair value for Level 3 assets and liabilities require management judgment and estimation.

As of June 30, 2012 and 2011, the Level 2 and Level 3 assets and liabilities listed in the fair value hierarchy tables below use the following valuation techniques and inputs:

Cash and cash equivalents and short-term investments

Cash and cash equivalents and certain short-term investments include certificates of deposit, whose fair value is based on cost plus accrued interest. Significant observable inputs include security cost, maturity, and relevant short-term interest rates. Other short-term investments designated as Level 2 investments primarily consist of commercial paper, whose fair value is based on the income approach. Significant observable inputs include security cost, maturity, and credit rating, interest rate and par value.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

6. Fair Value Measurements (continued)

U. S. government, state, municipal and agency obligations

The fair value of investments in U S government, state, municipal and agency obligations is primarily determined using techniques consistent with the income approach. Significant observable inputs to the income approach include data points for benchmark constant maturity curves and spreads.

Corporate and foreign fixed income securities

The fair value of investments in U S and international corporate bonds, including commingled funds that invest primarily in such bonds, and foreign government bonds is primarily determined using techniques that are consistent with the market approach. Significant observable inputs include benchmark yields, reported trades, observable broker/dealer quotes, issuer spreads, and security specific characteristics, such as early redemption options.

Asset-backed securities

The fair value of U S agency and corporate asset-backed securities is primarily determined using techniques consistent with the income approach. Significant observable inputs include prepayment speeds and spreads, benchmark yield curves, volatility measures, and quotes.

Equity securities

The fair value of investments in U S and international equity securities is primarily determined using techniques consistent with the income approach. The values for underlying investments are fair value estimates determined by external fund managers based on quoted market prices, operating results, balance sheet stability, growth, dividend, dividend yield, and other business and market sector fundamentals.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

6. Fair Value Measurements (continued)

Private equity, alternative investments and other investments

The fair value of private equity investments is primarily determined using techniques consistent with both the market and income approaches, based on the System's estimates and assumptions in the absence of observable market data. The market approach considers comparable company, comparable transaction, and company-specific information, including but not limited to restrictions on disposition, subsequent purchases of the same or similar securities by other investors, pending mergers or acquisitions, and current financial position and operating results. The income approach considers the projected operating performance of the portfolio company.

Alternative investments consist of hedge funds, private equity funds, commodity funds, and real estate partnerships. Alternative investments are valued using net asset values, which approximate fair value, as determined by an external fund manager based on quoted market prices, operating results, balance sheet stability, growth and other business and market sector fundamentals.

Other investments include derivative assets and derivative liabilities of the Alpha Fund, whose fair value is primarily determined using techniques consistent with the market approach. Significant observable inputs to valuation models include interest rates, Treasury yields, volatilities, credit spreads, maturity and recovery rates.

Securities lending collateral

The fair value of collateral received under the Alpha Fund's securities lending program is valued using the calculated net asset value for the commingled fund in which the collateral is invested. The underlying investments in the commingled fund are valued using techniques consistent with the market approach, which uses significant observable market inputs such as available trade, quotes, benchmark curves, sector groupings, and matrix pricing.

Benefit plan assets

The fair value of benefit plan assets is based on original investment into a guaranteed pooled fund, plus guaranteed, annuity contract-based interest rates. Significant unobservable inputs to the guaranteed rate include the fair value and average duration of the portfolio of investments underlying annuity contract, the contract value, and the annualized weighted-average yield to maturity of the underlying investment portfolio.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

6. Fair Value Measurements (continued)

Interest rate swap assets and liabilities

The fair value of interest rate swaps is primarily determined using techniques consistent with the market approach. Significant observable inputs to valuation models include interest rates, Treasury yields, volatilities, credit spreads, maturity, and recovery rates.

Investments sold, not yet purchased

The fair value of investments sold, not yet purchased is primarily determined using techniques consistent with the income approach. Significant observable inputs to the income approach include data points for benchmark, constant maturity curves, and spreads.

The following table summarizes fair value measurements, by level, at June 30, 2012, for all financial assets and liabilities measured at fair value on a recurring basis in the System's consolidated financial statements:

7. Significant Investments in Unconsolidated Entities

The System has a 50% membership interest in Via Christi Health, Inc (VCH) The System accounts for this membership interest under the equity method of accounting. The System's investment in VCH is \$493,105 and \$499,910 at June 30, 2012 and 2011, respectively, and is reported in the Consolidated Balance Sheets in investment in unconsolidated entities The System's investment in VCH reflects the financial performance of VCH one month in arrears

At June 30, 2012 and 2011, the difference between the amount at which the System's investment in VCH is carried in the accompanying Consolidated Balance Sheets and its interest in the underlying net assets of VCH is \$30,321 and \$30,568, respectively This difference relates primarily to the excess of the fair value of VCH property and equipment and long-term debt over their carrying values at the date the System received the interest in VCH The difference is being amortized over the remaining life of the property and equipment and term of the long-term debt

The carrying amounts of variable rate bonds and other notes payable approximate fair value. The fair values of the unsecured fixed rate serial and term bonds are estimated based on discounted cash flow analyses that consider current incremental borrowing rates for similar types of borrowing arrangements. The fair value of both Ascension Health Alliance and Alexian Brothers fixed rate serial and term bonds, including the component of variable rate demand bonds subject to long-term fixed interest rates, approximates carrying value at June 30, 2012 and 2011. During the years ended June 30, 2012 and 2011, interest paid was approximately \$148,300 and \$146,000, respectively. Capitalized interest was approximately \$2,000 and \$7,100 for the years ended June 30, 2012 and 2011, respectively.

8. Long-Term Debt (continued)

Certain members of Ascension Health Alliance formed the Ascension Health Alliance Credit Group (Senior Credit Group). Each Senior Credit Group member is identified as either a senior obligated group member, a senior designated affiliate or a senior limited designated affiliate. Senior obligated group members are jointly and severally liable under a Senior Master Trust Indenture (Senior MTI) to make all payments required with respect to obligations under the Senior MTI and may be entities not controlled directly or indirectly by Ascension Health Alliance. Senior designated affiliates and senior limited designated affiliates are not obligated to make debt service payments on the obligations under the Senior MTI. Ascension Health Alliance may cause each senior designated affiliate to transfer such amounts as are necessary to enable the obligated group to comply with the terms of the Senior MTI, including payment of the outstanding obligations. Additionally, each senior limited designated affiliate has an independent limited designated affiliate agreement and promissory note with Ascension Health Alliance with stipulated repayment terms and conditions, each subject to the governing law of the senior limited designated affiliate's state of incorporation.

Pursuant to a Supplemental Master Indenture dated February 1, 2005, senior obligated group members, which are operating entities, have pledged and assigned to the Master Trustee a security interest in all of their rights, title, and interest in their pledged revenues and proceeds thereof.

A Subordinate Credit Group, which is comprised of subordinate obligated group members, subordinate designated affiliates, and subordinate limited designated affiliates, was created under the Subordinate Master Trust Indenture (Subordinate MTI). The subordinate obligated group members are jointly and severally liable under the Subordinate MTI to make all payments required with respect to obligations under the Subordinate MTI and may be entities not controlled directly or indirectly by Ascension Health Alliance. Subordinate designated affiliates and subordinate limited designated affiliates are not obligated to make debt service payments on the obligations under the Subordinate MTI. Ascension Health Alliance may cause each subordinate designated affiliate to transfer such amounts as are necessary to enable the obligated group members to comply with the terms of the Subordinate MTI, including payment of the outstanding obligations. Additionally, each subordinate limited designated affiliate has an independent subordinate limited designated affiliate agreement and promissory note with Ascension Health Alliance, with stipulated repayment terms and conditions, each subject to the governing law of the subordinate limited designated affiliate's state of incorporation.

8. Long-Term Debt (continued)

The unsecured variable rate demand bonds of both the Senior and Subordinate Credit Groups, while subject to long-term amortization periods, may be put to Ascension Health Alliance at the option of the bondholders in connection with certain remarketing dates. To the extent that bondholders may, under the terms of the debt, put their bonds within 12 months after June 30, 2012, the principal amount of such bonds has been classified as a current liability in the accompanying Consolidated Balance Sheets. Management believes the likelihood of a material amount of bonds being put to Ascension Health Alliance to be remote. However, to address this possibility, management has taken steps to provide various sources of liquidity in the event any bonds would be put, including the line of credit, commercial paper program, and maintaining unrestricted assets as a source of self-liquidity.

On January 1, 2012, Alexian Brothers became part of Ascension Health Alliance. Subsequently, Ascension Health Alliance redeemed or refinanced a portion of Alexian Brothers' debt; however, a portion of the bonds previously issued for the benefit of Alexian Brothers remains outstanding (the Alexian Brothers' Bonds). The Alexian Brothers' Bonds continue to be secured by the Alexian Brothers Health System Master Trust Indenture (As Amended and Restated), dated October 1, 1992, between the Members of the Alexian Brothers Health System Obligated Group established under this document and the Alexian Brothers Health System Master Trustee.

In May 2012, Ascension Health Alliance issued a total of \$435,370 of tax-exempt bonds, Series 2012A through 2012E, through four different issuing authorities in four different states. The proceeds of the bonds, including original issue premium, were used to reimburse Ascension Health Alliance for previous capital expenditures.

Due to aggregate financing activity during the fiscal years ended June 30, 2012 and 2011, losses on extinguishment of debt of \$2,828 and \$1,007 were recorded, which are included in nonoperating gains (losses) in the accompanying Consolidated Statements of Operations and Changes in Net Assets.

Ascension Health Alliance is a party to multiple interest rate swap agreements that convert the variable or fixed rates of certain debt issues to fixed or variable rates, respectively. See the Derivative Instruments note for a discussion of these derivatives.

Ascension Health Alliance

8. Long-Term Debt (continued)

As of June 30, 2012, the Senior Credit Group has a line of credit of \$1,000,000 which may be used as a source of funding for unremarketed variable debt (including commercial paper) or for general corporate purposes, towards which bank commitments totaling \$1,000,000 extend to November 9, 2014. As of June 30, 2012 and 2011, there were no borrowings under the line of credit.

As of June 30, 2012, the Subordinate Credit Group has a \$50,000 revolving line of credit related to its letters of credit program toward which a bank commitment of \$50,000 extends to December 27, 2012. The revolving line of credit may be accessed solely in the form of Letters of Credit issued by the bank for the benefit of the members of the Credit Groups. Of this \$50,000 revolving line of credit, letters of credit totaling \$26,067 have been issued as of June 30, 2012. No borrowings were outstanding under the letters of credit as of June 30, 2012 and 2011.

9. Derivative Instruments

The System uses interest rate swap agreements to manage interest rate risk associated with its outstanding debt. These swaps have historically been used to effectively convert interest rates on variable rate bonds to fixed rates and rates on fixed rate bonds to variable rates. At June 30, 2012 and 2011, the notional values of outstanding interest rate swaps were \$2,189,232 and \$2,310,187, respectively.

The System recognizes the fair value of its interest rate swaps in the Consolidated Balance Sheets as assets, recorded in other noncurrent assets, or liabilities, recorded in other noncurrent liabilities, as appropriate. At June 30, 2012 and 2011, the fair value of interest rate swaps in an asset position was \$94,082 and \$64,426, respectively, while the fair value of interest rate swaps in a liability position was \$248,511 and \$141,287, respectively.

Prior to July 1, 2006, the System designated certain of its interest rate swaps as cash flow hedges, for accounting purposes, and accordingly deferred gains or losses associated with those swaps in net assets. As of June 30, 2012, the deferred net gain associated with these interest rate swaps was \$4,660. The portion of this gain that will be reclassified into nonoperating gains (losses) over the next 12 months is immaterial.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

9. Derivative Instruments (continued)

Beginning July 1, 2006, previously designated cash flow hedging relationships were de-designated for accounting purposes. Accordingly, all changes in the fair value of interest rate swaps have been recognized in nonoperating gains (losses) in the accompanying Consolidated Statements of Operations and Changes in Net Assets. A net nonoperating loss of \$77,568 was recognized for the year ended June 30, 2012, while a net nonoperating gain of \$25,257 was recognized for the year ended June 30, 2011.

The System's interest rate swap agreements include collateral requirements for each counterparty under such agreements, based upon specific contractual criteria. The System's collateral requirements are based upon Ascension Health Alliance's Senior Credit Group long-term debt credit ratings (Senior Debt Credit Ratings), as obtained from each of two major credit rating agencies, as well as the net liability position of total interest rate swap agreements outstanding with each counterparty. At June 30, 2012 and 2011, based upon the System's net liability positions and Senior Debt Credit Ratings, no collateral on interest rate swap agreements was required to be posted. The aggregate net fair value of interest rate swap agreements with credit-risk-related contingent features on June 30, 2012 and 2011, was a liability of \$154,429 and \$76,861, respectively.

10. Retirement Plans

Defined-Benefit Plans

Certain System entities participate in defined-benefit pension plans (the System Plans), which are noncontributory, defined-benefit pension plans covering substantially all eligible employees of certain System entities. Benefits are based on each participant's years of service and compensation. Substantially all of the System Plans' assets are invested in a master trust (the Trust) consisting of cash and cash equivalents, equity, fixed income funds, and alternative investments. Contributions to the System Plans are based on actuarially determined amounts sufficient to meet the benefits to be paid to participants.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) *(Dollars in Thousands)*

10. Retirement Plans (continued)

During the year ended June 30, 2012, the System approved and communicated to employees a redesign of associate retirement benefits, which affects certain System Plans, as well as provides an enhanced comprehensive defined contribution plan. These changes will become effective January 1, 2013. This redesign resulted in the recognition of one-time curtailment gains of \$415,834, of which \$414,294 was recognized in total impairment, restructuring and nonrecurring gains for the year ended June 30, 2012, with the remaining amount recognized in nonoperating losses for the year ended June 30, 2012. This redesign also resulted in a one-time decrease to the projected benefit obligation as of December 31, 2011. The projected benefit obligation is included in pension and other postretirement liabilities in the Consolidated Balance Sheets.

The assets of the System Plans are available to pay the benefits of eligible employees and retirees of all participating entities. In the event entities participating in the System Plans are unable to fulfill their financial obligations under the System Plans, the other participating entities are obligated to do so.

10. Retirement Plans (continued)

The prior service credit and actuarial loss included in unrestricted net assets and expected to be recognized in net periodic pension cost during the year ending June 30, 2013, are approximately \$6,500 and \$63,900, respectively

The assumptions used to determine the benefit obligation and net periodic benefit cost for the System Plans are set forth below

	June 30,	
	2012	2011
Weighted-average discount rate	4.42%	5.63%
Weighted-average rate of compensation increase	4.00%	4.00%
Weighted-average expected long-term rate of return on plan assets	8.43%	8.50%

The System Plans' assets are invested in a portfolio designed to protect principal and obtain competitive investment returns and long-term investment growth, consistent with actuarial assumptions, with a reasonable and prudent level of risk. Diversification is achieved by allocating to funds and managers that correlate to one of three economic strategies: growth, deflation and inflation. Growth strategies include U.S. equity, emerging market equity, global equity, international equity, directional hedge funds, private equity, high yield and private credit. Deflation strategies include core fixed income, absolute return hedge funds and cash. Inflation strategies include inflation-linked bonds, commodity-related investments, and real assets. The System Plans use multiple investment managers with complementary styles, philosophies, and approaches. In accordance with the System Plans' objectives, derivatives may also be used to gain market exposure in an efficient and timely manner.

In accordance with the System Plans' asset diversification targets, as presented in the table that follows, the Trust holds certain alternative investments, consisting of various hedge funds, real asset funds, private equity funds, commodity funds, private credit funds and certain other private funds. These investments do not have observable market values. As such, each of these investments is valued at net asset value as determined by each fund's investment manager, which approximates fair value. The fair value of the System Plans' alternative investments as of June 30, 2012, is reported in the fair value measurement table that follows. Collectively, these

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

funds have liquidity terms ranging from weekly to annual with notice periods ranging from 1 to 93 days. Due to redemption restrictions, investments of certain private funds, whose fair value was approximately \$515,000 at June 30, 2012, cannot be redeemed. However, the potential for the System Plans to sell their interest in real asset funds and private equity funds in a secondary market prior to the end of the fund term does exist.

The investments in these alternative investment funds may also include contractual commitments to provide capital contributions during the investment period, which is typically five years, and may extend to the end of the fund term. During these contractual periods, investment managers may require the System Plans to invest in accordance with the terms of the agreement. Commitments not funded during the investment period will expire and remain unfunded. As of June 30, 2012, investment periods expire between July 2012 and March 2018. The remaining unfunded capital commitments of the Trust total approximately \$528,000 for 50 individual contracts as of June 30, 2012.

The weighted-average asset allocation for the System Plans at the end of fiscal 2012 and 2011 and the target allocation for fiscal 2013, by asset category, are as follows:

Asset Category	Target Allocation	Percentage of Plan Assets at Year-End	
	2013	2012	2011
Growth	50%	49%	52%
Deflation	30	32	32
Inflation	20	19	16

The following tables summarize fair value measurements at June 30, 2012 and 2011, by asset class and by level, for the System Plans' assets and liabilities. As also discussed in the Fair Value Measurements note, the System follows the three-level fair value hierarchy to categorize plan assets and liabilities recognized at fair value, which prioritizes the inputs used to measure such fair values. The inputs and valuation techniques discussed in the Fair Value Measurements note also apply to the System Plans' assets and liabilities as presented in the following tables.

The Trust has entered into a series of interest rate swap agreements with a net notional amount of \$948,150. The combined targeted duration of these swaps and the Trust's fixed income investments approximates the duration of the liabilities of the Trust. Currently, 60% of the dollar duration of the liability is subject to this economic hedge. The purpose of this strategy is to economically hedge the change in the net funded status for a significant portion of the liability that can occur due to changes in interest rates.

10. Retirement Plans (continued)

The expected long-term rate of return on the System Plans' assets is based on historical and projected rates of return for current and planned asset categories in the investment portfolio. Assumed projected rates of return for each asset category were selected after analyzing historical experience and future expectations of the returns and volatility for assets of that category using benchmark rates. Based on the target asset allocation among the asset categories, the overall expected rate of return for the portfolio was developed and adjusted for historical and expected experience of active portfolio management results compared to benchmark returns and for the effect of expenses paid from plan assets.

Information about the expected cash flows for the System Plans follows:

Expected employer contributions 2013	\$ 32,500
Expected benefit payments	
2013	371,100
2014	364,200
2015	371,800
2016	384,900
2017	396,900
2018–2022	2,065,000

The contribution amount above includes amounts paid to the Trust. The benefit payment amounts above reflect the total benefits expected to be paid from the Trust.

Other Postretirement Benefit Plans

In addition to the retirement plan described above, certain Health Ministries sponsor postretirement benefit plans that provide healthcare benefits to qualified retirees who meet certain eligibility requirements. The total benefit obligation of these plans at June 30, 2012 and 2011, is \$47,428 and \$44,446, respectively. The net obligation included in pension and other postretirement liabilities in the accompanying Consolidated Balance Sheets at June 30, 2012 and 2011, is \$12,423 and \$10,086, respectively. The change in the plans' assets and benefit obligations recognized in unrestricted net assets during the year ended June 30, 2012, was \$6,551.

10. Retirement Plans (continued)

Defined-Contribution Plans

System entities participate in contributory and noncontributory defined-contribution plans covering all eligible associates. There are three primary types of contributions to these plans: employer automatic contributions, employee contributions, and employer matching contributions. Benefits for employer automatic contributions are determined as a percentage of a participant's salary and, for certain entities, increases over specified periods of employee service. These benefits are funded annually and participants become fully vested over a period of time. Benefits for employer matching contributions are determined as a percentage of an eligible participant's contributions each payroll period. These benefits are funded each payroll period and participants become fully vested in these employer contributions immediately. Expenses for the defined-contribution plans were \$128,250 and \$113,337 during 2012 and 2011, respectively.

11. Self-Insurance Programs

Certain System hospitals and other entities participate in pooled risk programs to insure professional and general liability risks and workers' compensation risks to the extent of certain self-insured limits. In addition, various umbrella insurance policies have been purchased to provide coverage in excess of the self-insured limits. Trust funds and two captive insurance companies, Ascension Health Insurance, Ltd. (AHIL) and Edessa Insurance Company, Ltd. (Edessa) are established for the self-insurance programs. Edessa was acquired as part of the Alexian Brothers business combination, as discussed in the Organizational Changes note. Actuarially determined amounts, discounted at 6% for the System, excluding Alexian Brothers which are discounted at 3%, are contributed to the trusts and the captive insurance companies to provide for the estimated cost of claims. The loss reserves recorded for estimated self-insured professional, general liability, and workers' compensation claims include estimates of the ultimate costs for both reported claims and claims incurred but not reported, which are discounted at 6% in 2012 and 2011 for the System, except for Alexian Brothers, which are not discounted. Those entities not participating in the self-insured programs are insured under separate policies.

11. Self-Insurance Programs (continued)

Professional and General Liability Programs

Professional and general liability coverage is provided on a claims-made basis through a wholly owned onshore trust and through AHIL and Edessa

AHIL has a self-insured retention of \$10,000 per occurrence with no aggregate. Excess coverage is provided through AHIL with limits up to \$185,000. AHIL retains \$5,000 per occurrence and \$5,000 annual aggregate for professional liability. AHIL also retains a 20% quota share of the first \$25,000 of umbrella excess. The remaining excess coverage is reinsured by commercial carriers.

Edessa has a self-insured retention of \$1,000 per occurrence with no aggregate. Excess coverage is provided through Edessa with limits up to \$110,000. Edessa retains \$10,000 per occurrence and \$20,000 annual aggregate for professional liability. The remaining excess coverage is reinsured by commercial carriers.

Self-insured entities in the states of Indiana and Wisconsin are provided professional liability coverage on an occurrence basis with limits in compliance with participation in the Patient Compensation Funds. The Patient Compensation Funds apply to claims in excess of the primary self-insured limit.

Included in operating expenses in the accompanying Consolidated Statements of Operations and Changes in Net Assets is professional and general liability expense of \$71,687 and \$69,073 for the years ended June 30, 2012 and 2011, respectively. Included in current and long-term self-insurance liabilities on the accompanying Consolidated Balance Sheets are professional and general liability loss reserves of approximately \$596,381 and \$522,489 at June 30, 2012 and 2011, respectively.

AHIL and Edessa also offer physician professional liability coverage through insurance or reinsurance arrangements to nonemployed physicians practicing at the System's various facilities, primarily in Michigan, Indiana and Illinois. Coverage is offered to physicians with limits ranging from \$100 per claim to \$1,000 per claim with various aggregate limits.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

11. Self-Insurance Programs (continued)

Workers' Compensation

Workers' compensation coverage is provided on an occurrence basis through a grantor trust. The self-insured trust provides coverage up to \$1,000 per occurrence with no aggregate. The trust provides a mechanism for funding the workers' compensation obligations of its members. Workers' compensation coverage for Alexian Brothers is self-insured up to \$400 per occurrence with no aggregate. Excess insurance against catastrophic loss is obtained through commercial insurers. Premium payments made to the trust are expensed and represent claims reported and claims incurred but not reported.

Included in operating expenses in the accompanying Consolidated Statements of Operations and Changes in Net Assets is workers' compensation expense of \$40,256 and \$41,973 for the years ended June 30, 2012 and 2011, respectively. Included in current and long-term self-insurance liabilities on the accompanying Consolidated Balance Sheets are workers' compensation loss reserves of \$110,657 and \$98,867 at June 30, 2012 and 2011, respectively.

12. Lease Commitments

Future minimum payments under noncancelable operating leases with terms of one year or more are as follows:

Year ending June 30	
2013	\$ 208,072
2014	191,994
2015	152,166
2016	117,939

Thereafter	250,031
Total	<u>\$ 1,016,415</u>

Certain System entities are lessees under operating lease agreements for the use of space in buildings owned by third parties, including medical office buildings (MOBs), and medical and information technology equipment. In addition, certain System entities have subleased space within buildings where the entity has a current operating lease commitment. Certain System entities are also lessors under operating lease agreements, primarily ground leases related to third-party-owned MOBs on land owned by the System entity.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

12. Lease Commitments (continued)

The System's future minimum noncancelable payments associated with operating leases where a System entity is the lessee, as well as future minimum noncancelable receipts associated with operating leases where a System entity is the sublessor or lessor, are presented in the table that follows. Future minimum payments and receipts relate to noncancelable leases with terms of one year or more.

Total	<u>\$ 1,016,415</u>	<u>\$ 387,995</u>	<u>\$ 628,420</u>

Rental expense under operating leases amounted to \$341,918 and \$290,692 in 2012 and 2011, respectively.

13. Contingencies and Commitments

The System is involved in litigation and regulatory investigations arising in the ordinary course of business. Regulatory investigations also occur from time to time. In the opinion of management, after consultation with legal counsel, these matters are expected to be resolved without material adverse effect on the System's Consolidated Balance Sheet.

Ascension Health Alliance

Notes to Consolidated Financial Statements (continued) (Dollars in Thousands)

13. Contingencies and Commitments (continued)

In September 2010, Ascension Health received a letter from the U S Department of Justice (the DOJ) in connection with its nationwide review to determine whether, in certain cases, implantable cardioverter defibrillators were provided to certain Medicare beneficiaries in accordance with national coverage criteria. In connection with this nationwide review, identified System hospitals are reviewing applicable medical records and responding to the DOJ. The DOJ's investigation spans a time frame beginning in 2003 and extending through the present time. Through September 12, 2012, the DOJ has not asserted any claims against any System hospitals. The System continues to fully cooperate with the DOJ in its investigation.

The System enters into agreements with nonemployed physicians that include minimum revenue guarantees. The terms of the guarantees vary. The carrying amounts of the liability for the System's obligation under these guarantees were \$26,675 and \$15,395 at June 30, 2012 and 2011, respectively, and are included in other current and noncurrent liabilities in the accompanying Consolidated Balance Sheets. The maximum amount of future payments that the System could be required to make under these guarantees is approximately \$26,300 and is included in the table that follows.

The System entered into agreements with sponsors for support through January 2017. The System's obligation under these agreements totals \$65,808 at June 30, 2012, and is included in other current and noncurrent liabilities in the accompanying Consolidated Balance Sheets.

Guarantees and other commitments represent contingent commitments issued by Ascension Health Alliance Senior and Subordinate Credit Groups, generally to guarantee the performance of an affiliate to a third party in borrowing arrangements such as commercial paper issuances, bond financing, and other transactions. The terms of guarantees are equal to the terms of the related debt, which can be as long as 28 years.
