Report of Independent Auditors

Board of Trustees Sierra Vista Regional Health Center, Inc

We have audited the accompanying combined balance sheets of Sierra Vista Regional Health Center, Inc and Affiliates (the Company) as of June 30, 2012 and 2011, and the related combined statements of operations, changes in net assets, and cash flows for the years then ended These financial statements are the responsibility of the Company's management Our responsibility is to express an opinion on these financial statements based on our audits

We conducted our audits in accordance with auditing standards generally accepted in the United States Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the combined financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the combined financial position of Sierra Vista Regional Health Center, Inc. and Affiliates at June 30, 2012 and 2011, and the combined results of their operations and their cash flows for the years then ended in conformity with U S generally accepted accounting principles

Notes to Combined Financial Statements

June 30, 2012

1. Organization

Sierra Vista Regional Health Center, Inc (the Hospital) is an Arizona not-for-profit corporation exempt from income taxes The Hospital is an 81-bed acute care hospital that provides a full range of inpatient and outpatient services in Sierra Vista, Arizona, and Cochise County Services range from the inpatient units of medical/surgical, intensive care, progressive care, telemetry, obstetrics, and neonatal intensive care to an emergency room that serves as a base station for many emergency medical service providers Other outpatient services include diagnostic, rehabilitation, surgical, hospice, infusion, imaging center, outpatient surgery center, and clinics The existence of the full continuum of services allows the Hospital to function seamlessly and without interruption to patient care

Combination

The Hospital's affiliates include the Sierra Vista Community Hospital Foundation (the Foundation), the Sierra Vista Community Hospital Auxiliary (the Auxiliary), Arizona Family Care Associates, Inc (AFCA) and SVRHC Office Complex LLC (the Office Complex) The accounts and transactions of the Foundation and the Office Complex are combined with that of the Hospital The Hospital does not control the Auxiliary so it records its interest in the net assets of the Auxiliary with offsetting changes in net assets AFCA is accounted for under the equity method of accounting

The accompanying combined financial statements include the accounts of the Hospital and all combined affiliates after elimination of intercompany accounts and transactions

2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements Estimates also affect the reported amounts of changes in net assets during the reporting period Actual results could differ from those estimates

Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand and money market funds with original maturities of three months or less when acquired

Notes to Combined Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Patient Accounts Receivable

The Hospital grants credit without collateral to its patients, most of whom are local residents who are insured under third-party payor agreements. The following table summarizes the percentage of gross accounts receivable from all payors as of June 30.

2012	2011
31%	27%
16	24
46	42
7	7
100%	100%

Net patient accounts receivable have been adjusted to the estimated amounts expected to be collected Accounts receivable are reduced by an allowance for doubtful accounts In evaluating the collectibility of accounts receivable, the Hospital analyzes its past history and identifies trends for each of its major payor sources of revenue to estimate the appropriate allowance for doubtful accounts and provision for bad debts

Management regularly reviews data about these major payor sources of revenue in evaluating the sufficiency of the allowance for doubtful accounts. For receivables associated with services provided to patients who have third-party coverage, the Hospital analyzes contractually due amounts and provides an allowance for doubtful accounts and a provision for bad debts, if necessary (for example, for expected uncollectible deductibles and co-payments on accounts for which the third-party payor has not yet paid, or for payors who are known to be having financial difficulties that make the realization of amounts due unlikely). For receivables associated with self-pay patients (which includes both patients without insurance and patients with deductible and co-payment balances due for which third-party coverage exists for part of the bill), the Hospital records a provision for bad debts in the period of service on the basis of its past experience, which indicates that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The difference between the standard rates (or the discounted rates if negotiated) and the amounts actually collected after all reasonable collection efforts have been exhausted is charged off against the allowance for doubtful accounts

Notes to Combined Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Inventories

Inventories, consisting of medical devices, and medical supplies, are stated at the lower of cost (first-in, first-out method) or market

Investments

Investments with original maturities greater than three months but less than one year are classified as short-term investments. Common stocks and investments with maturities greater than one year are classified as long-term investments.

Investments are carried at fair value based on quoted market values. Investment income or loss (including realized or unrealized gains and losses on investments, interest, and dividends) is included in the excess of revenues over expenses unless the income or loss is restricted by donor or law

Property and Equipment

Property and equipment acquisitions are recorded at cost Depreciation is computed using the straight-line method, and is provided over the following estimated useful lives for each class of depreciable asset

	Years
Buildings and improvements	15-30
Land improvements	15-25
Equipment	3-10

Deferred Financing Costs

Certain costs incurred in connection with the issuance of long-term debt have been deferred and are being amortized over the life of the related debt using the straight-line method, which approximates the effective-interest method

Notes to Combined Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Restricted Net Assets

The Hospital reports contributions of cash and other assets as temporarily or permanently restricted revenue if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, restricted net assets are reclassified to unrestricted net assets and reported in the combined statements of operations and changes in net assets as released from restrictions. Donor-restricted contributions whose restrictions are met within the same year as received are reflected as unrestricted contributions. Donor restrictions have been imposed restricting usage of assets primarily for property and equipment and other purposes

Net Patient Service Revenue

The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined

For uninsured patients who do not qualify for charity care, the Hospital recognizes revenue on the basis of discounted rates, as provided by its policy. On the basis of historical experience, a portion of the Hospital's uninsured patients will be unable or unwilling to pay for the services provided. Thus, the Hospital records a provision for bad debts related to uninsured patients in the period the services are provided. Patient service revenue, net of contractual allowances and discounts (but before the provision for bad debts), is recognized from these major payor sources as follows.

	Year Ended June 30			
		2012		2011
Patient service revenue (net of contractual				
allowances and discounts)				
Third-party payors	\$	93,154,773	\$	95,730,753
Self-pay		804,105		452,511
Total	\$	93,958,878	\$	96,183,264

Notes to Combined Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Other Operating Revenue

Other operating revenue consists primarily of cafeteria sales, donations, radiology professional fees, and electronic health record incentive payments

Electronic Health Records Incentive Payments

Starting in 2011, the Medicare and Medicaid programs are providing incentive payments to eligible hospitals and professionals if meaningful-use certified electronic health record (EHR) technology is adopted. The incentive payments are recognized when management is reasonably assured that the Hospital has complied with the conditions set forth by Medicare and Medicaid Approximately \$2 million in incentive payments were recognized in other operating revenue for the year ended June 30, 2012, relating to Medicare and Medicaid incentive programs. Income from incentive payments is subject to retrospective adjustment as the incentive payments are calculated using Medicare cost report data that is subject to audit Additionally, the Hospital's compliance with meaningful use criteria is subject to audit by the federal government

Excess of Revenues Over Expenses

The combined statements of operations include a measurement for excess of revenues over expenses. Changes in unrestricted net assets which are excluded from excess of revenues over expenses, consistent with industry practice, include contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purpose of acquiring such assets)

Physician Income Guarantees

The Hospital enters into agreements with nonemployed physicians that include minimum net collection guarantees. These guarantees arise out of a community need to recruit physicians in certain specialties to the areas surrounding the Hospital and provide a guaranteed level of income to the physicians for the first year of practice. The guarantee provides a buffer between the physicians' actual collections on patient billings in this initial period and an agreed-upon income level based on the specialty. The physicians are expected to practice in the area for a total period of three to four years. The contract-based asset is amortized as a component of professional fees, in the accompanying combined statements of operations, over the period of the physician contract. Over the period subsequent to the guarantee period, amounts paid to the physicians

Notes to Combined Financial Statements (continued)

3. Net Patient Service Revenue

Net patient service revenue is reported at estimated net realizable amounts from patients and third-party payors for services rendered. The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows

Medicare

Inpatient acute care services rendered to Medicare program beneficiaries are paid at prospectively determined rates per discharge Outpatient services rendered are paid at prospectively determined rates using a set fee schedule These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors

AHCCCS

AHCCCS is Arizona's alternative to the Medicaid program and is designed to meet indigent health care needs. The Hospital receives both a percentage of charges adjusted each year for any rate increase and per diem rates depending on the AHCCCS plan payor and the nature of the services provided

Other Third-Party Payors

The Hospital has also entered into payment arrangements with certain commercial insurance carriers, health maintenance organizations, and preferred provider organizations. The basis for payment to the Hospital under these agreements includes prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates

The Hospital's Medicare, Medicaid, and managed care utilization percentages, based upon gross patient service revenue, are summarized as follows

	Year Endo	Year Ended June 30		
	2012	2011		
Medicare	34.0%	34 0%		
AHCCCS	16.0	19 0		
Other commercial third party	47.0	45 0		
Self-pay and other	3.0	2 0		
	100.0%	100 0%		
	· · · · · · · · · · · · · · · · · · ·			

Notes to Combined Financial Statements (continued)

3. Net Patient Service Revenue (continued)

The Hospital is required to meet certain financial reporting requirements to participate in the Medicare and AHCCCS programs Federal regulations require the submission of annual cost reports covering medical cost and expenses associated with the services provided by the Hospital to program beneficiaries Cost report settlements under reimbursement agreements with Medicare and AHCCCS are estimated and recorded in the period the related services are rendered and are adjusted in future periods as final settlements are determined There is a possibility that the recorded estimates could change by a material amount As of June 30, 2012, the Hospital's Medicare cost reports have been audited by the Medicare fiscal intermediary through June 30, 2007

During the years ended June 30, 2012, and 2011, approximately 50%, and 53%, respectively, of the Hospital's revenues related to patients participating in the Medicare and AHCCCS programs, collectively. The Hospital's management recognizes that revenues and receivables from government agencies are significant to the Hospital's operations, but it does not believe that there are significant credit risks associated with these government agencies. The Hospital's management does not believe that there are any other significant concentrations of revenues from any particular payor that would subject the Hospital to any significant credit risks in the collection of its accounts receivable

4. Community Benefit and Charity Care

Traditional Charity Care

In support of its mission and philosophy, the Hospital provides care to all patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. The Hospital does not pursue collection of amounts determined to qualify as charity care. The costs of these services were approximately \$1,431,000 in fiscal 2012 and \$1,248,000 in fiscal 2011. These estimates were determined using a ratio of cost-to-gross charges calculated from the Hospital's most recent combined statement of operations and applying that ratio to the gross charges associated with providing charity care for the period

Notes to Combined Financial Statements (continued)

4. Community Benefit and Charity Care (continued)

Care for Undocumented Patients

The Hospital provides care to patients who have entered the community illegally The charges for these patients are partially reimbursed under Section 1011 of the Medicare Prescription Drug, Improvement and Modernization Act of 2003 The unreimbursed costs for serving these patients were approximately \$1,000 in fiscal 2012 and \$12,000 in fiscal 2011

Unpaid Costs of Public Programs

Public programs such as AHCCCS provide for the poor and indigent Public programs such as Medicare provide for the elderly Public programs do not always cover the costs of providing these services. The unreimbursed costs of the AHCCCS program were approximately \$2,735,000 in fiscal 2012 and \$1,831,000 in fiscal 2011. The unreimbursed costs of the Medicare program were approximately \$8,554,000 in fiscal 2012 and \$8,186,000 in fiscal 2011.

Other Community Benefit Programs

Community benefit includes the cost of providing services to other populations who may not qualify as poor, but may need special services and support This type of community benefit includes the cost of programs for senior citizens such as health promotion and education, health clinics, and screenings It also includes costs incurred by the Hospital for training health professionals such as medical residents, nursing students, and students in allied health professionals

The Hospital also commits significant time and resources to endeavors and critical services which meet otherwise unfilled community needs Many of these activities are sponsored with the knowledge that they will not be financially viable The development of these programs is based

5. Investments and Assets Whose Use Is Limited (continued)

Assets whose use is limited represents assets held by a trustee under indenture agreements Assets whose use is limited are carried at fair value, based upon quoted market prices. The debt reserve fund consists of U.S. government agency and treasury securities. The other funds consist of money market funds. The composition at June 30 follows.

	 2012	2011
Assets held by trustee under bond indenture		
Bond reserve fund	\$ 3,272,557	\$ 3,184,383
Bond principal fund	624,213	586,382
Bond interest fund	136,504	142,122
	 4,033,274	3,912,887
Less current portion	 760,717	728,504
	\$ 3,272,557	\$ 3,184,383

In 1998, the Hospital entered into agreements with a broker whereby the Hospital sold the future income stream pertaining to the Series 1997 bond reserve fund and the Series 1997, 1996A, 1996B, and 1996C principal and interest funds of the respective bonds in exchange for fees totaling \$750,000 The terms of the agreements include provisions for termination penalties in certain events. The Hospital recorded the proceeds received as an other long-term liability which is being amortized over the terms of the agreements under the interest method. The unamortized balance was approximately \$202,000 and \$239,000 at June 30, 2012 and 2011, respectively

6. Fair Value Measurements

The Hospital utilizes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows

• Level 1 – Pricing is based on observable inputs such as quoted prices in active markets Financial assets in Level 1 generally include US government agency and treasury securities, listed equities and bond mutual funds

Notes to Combined Financial Statements (continued)

6. Fair Value Measurements (continued)

- Level 2 Pricing inputs are based on quoted prices for similar instruments in active
 markets, quoted prices for identical or similar instruments in markets that are not active,
 and model-based valuation techniques for which all significant assumptions are
 observable in the market or can be corroborated by observable market data for
 substantially the full term of the assets or liabilities Financial assets in this category
 generally include corporate bonds, municipal bonds, closed-end funds, and mortgagebacked securities
- Level 3 Pricing inputs are generally unobservable and include situations where there is little, if any, market activity for the investment. The inputs into the determination of fair value require management's judgment or estimation of assumptions that market participants would use in pricing the assets or liabilities. The fair values are therefore determined using factors that involve considerable judgment and interpretations, including but not limited to private and public comparables, third-party appraisals, discounted cash flow models, and fund manager estimates

Assets measured at fair value are based on one or more of three valuation techniques. The three valuation techniques are identified in the tables below. Where more than one technique is noted, individual assets were valued using one or more of the noted techniques. The valuation techniques are as follows.

- (a) *Market approach* Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities
- (b) Cost approach Amount that would be required to replace the service capacity of an asset (replacement cost)
- (c) *Income approach* Techniques to convert future amounts to a single present amount based on market expectations (including present value techniques, option-pricing, and excess earnings models)

Fair Value Disclosures

The Hospital currently has no other financial instruments subject to fair value measurement on a recurring basis. Disclosures about fair value of financial instruments require disclosure of fair value information about those financial instruments, whether or not recognized in the balance sheets, but would be practicable to estimate that value. Management believes the carrying value

Thereafter	16,660,000
	23,064,596
Less unamortized discount	 122,740
	\$ 22,941,856

Pursuant to the terms of the bond indentures, the Hospital is required to maintain amounts on deposit with a trustee which may only be used to satisfy obligations as permitted by the trust agreements Such deposits are included in assets whose use is limited in the accompanying combined balance sheets

The Hospital is subject to certain financial covenants and management believes they are in compliance for the year ended June 30, 2012 In addition, the indenture places certain restrictions on the incurrence of additional indebtedness and the sale or acquisition of property

In 2011, the Hospital purchased \$1,500,000 of their 2003 revenue bonds for a purchase price of \$1,463,250, which was then held in long-term investments During 2012, the Hospital determined that is was more appropriate to account for the purchase as an extinguishment of debt Accordingly, both the investment and the portion of debt have been eliminated from the 2012 financial statements. The impact of this transaction on the 2012 and 2011 financial statements is insignificant.

Notes to Combined Financial Statements (continued)
