Details on Database Initiative

Under the leadership of Jim Huang, we are actively building both a prospective and a retrospective database. The retrospective

database has been launched and is a resounding success. The engagement of people spread around the globe in an

approximately 50 institutions has been simply astounding. There will be close to 8000 cases in the retrospective

database once all of the cases have been cleaned and entered. This is an unprecedented resource for all of us, and

an astounding example of global collaboration. The prospective database is being launched, and will be even richer

if we can support this to the same degree. It will provide yet another quantum leap forward. 2012 Expense \$24,560

March 2011 Pathology Workshop. An expense of \$24,923 was incurred in 2012 as a final payment

International Staging Committee

The thymic domain of the international staging committee has begun its work to define an official stage classification system

Histologic Classification

An international multidisciplinary panel, including most of those actively engaged in the microscopic evaluation

of thymic malignancies has been working for quite some time at refining histologic classification

ITMIG as a Model

ITMIG was invited to present before an audience of nearly 1000 at the American Society of Clinical Oncology (ASCO)

a talk with the title "ITMIG as a Model for Rare Diseases". This also involved a paper, published in the 2012 ASCO education book

(and available on the ITMIG website)

Research

Ongoing efforts to institute prospective research have been underway for some time. The background work is beginning to pay off

A major initiative is to conduct an international phase III randomized trial investigating the role of adjuvant radiotherapy

in completely resected stage III tumors. Working with the International Rare Cancer Initiative (IRCI) we have secured a commitment

from the cooperative oncology groups in the US (ECOG) and Europe (EORTC) and the UK to support this
