Independent Auditor's Report

To the Board of Trustees
Crittenton Hospital Medical Center
and Subsidiaries

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Crittenton Hospital Medical Center and Subsidiaries (the "Hospital"), which comprise the consolidated balance sheet as of December 31, 2012 and the related consolidated statements of operations, changes in net assets, and cash flows for the year then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

To the Board of Trustees
Crittenton Hospital Medical Center
and Subsidiaries

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Crittenton Hospital Medical Center and Subsidiaries as of December 31, 2012 and the consolidated results of their operations and their cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As described in Note 1 to the consolidated financial statements, the Hospital adopted the provisions of Accounting Standards Update 2011-07, Health Care Entities (Topic 954) *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and Allowance for Doubtful Accounts for Certain Health Care Entities*, during 2012. Our opinion is not modified with respect to this matter.

Other Matter

The consolidated financial statements of Crittenton Hospital Medical Center and Subsidiaries as of December 31, 2011 were audited by other auditors, whose report dated May 31, 2012 expressed an unqualified opinion on those statements.

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The consolidating information in the accompanying schedules is presented for the purpose of additional analysis rather than to present the financial position, results of operations, and cash flows of the individual companies and is not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the consolidated financial statements as a whole.

Crittenton Hospital Medical Center and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 1 - Nature of Business and Significant Accounting Policies

Organization - Crittenton Hospital Medical Center (CHMC) is a Michigan nonprofit corporation which owns and operates a 290-licensed bed acute care hospital in Rochester, Michigan. CHMC is the sole corporate member of Crittenton Hospital Medical Center Foundation (the "Foundation"), Crittenton Development Corporation (CDC), Crittenton Cancer Center (CCC), and Strategic Alliance Assurance Company, Ltd. (SAAC), a captive insurance company, together referred to as the "Hospital". CDC operates a home health agency and a home medical equipment venture. In addition, CDC has a majority interest in an outpatient surgery center. The Hospital provides health care services primarily to residents of the region.

Basis of Consolidation - The accompanying consolidated financial statements include the accounts of all wholly owned, majority-owned, and controlled organizations. Investments, whereby the Hospital holds up to 50 percent ownership interest and exercises significant influence, are accounted for using the equity method of accounting. All significant intercompany transactions and balances have been eliminated in consolidation.

Cash and Cash Equivalents - Cash and cash equivalents include cash and investments in highly liquid investments purchased with an original maturity of three months or less.

Investments - Investments, inclusive of assets limited as to use, in equity securities with readily determinable fair values and all investments in debt securities are measured at fair value using quoted market prices in the consolidated balance sheet. Investments also include commingled funds which hold securities directly and are stated at the fair value of the underlying investments, determined by the fund administrators, based on readily determinable market value of the underlying assets. Purchases and sales of investments are accounted for as of the settlement date, and sales are accounted for using the first-in, first-out method. Investment income or loss (including unrealized gains and losses on trading securities and realized gains and losses on investments, interest, and dividends) is included in the excess of revenue over expenses, unless the income or loss is restricted by donor or law.

Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in values in the near term could materially affect the amounts reported in the accompanying consolidated balance sheet and consolidated statements of operations and changes in net assets.

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 1 - Nature of Business and Significant Accounting Policies (Continued)

Accounts Receivable - Accounts receivable for patients, insurance companies, and governmental agencies are based on gross charges. An allowance for doubtful accounts totaling \$7,650,740 and \$10,315,815 at December 31, 2012 and 2011, respectively, is established on an aggregate basis by the Hospital based upon its past history and trends for each of its major payor sources of revenue. Management regularly reviews data about these major payor sources of revenue in evaluating the sufficiency of the allowance for doubtful accounts. Uncollectible amounts are written off against the allowance for doubtful accounts in the period they are determined to be uncollectible.

For receivables associated with self-pay patients, which include both patients without insurance and patients with deductible and copayment balances due for which third-party coverage exists for a portion of the claim, the Hospital records a significant provision for bad debts in the period of service on the basis of its past experience, which indicates that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The difference between the standard rates, or the discounted rates if negotiated, and the amounts actually collected after all reasonable collection efforts have been exhausted is charged off against the allowance for doubtful accounts in the period they are determined to be uncollectible.

The Hospital grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor arrangements. The composition of patient account receivables from patients and third-party payors is as follows:

	2012	2011
Medicare	35 %	42 %
Medicaid	13	7
Blue Cross/Blue Shield of Michigan	17	26
Commercial and self-pay patient	35	25
Total	100 %	100 %

Inventories - Inventories, which are principally medical supplies, are stated at the lower of cost or market, with cost determined based on the first-in, first-out method.

Crittenton Hospital Medical Center and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 1 - Nature of Business and Significant Accounting Policies (Continued)

Other Assets - Other assets are composed significantly of loans to physicians and a health care institution.

Assets Limited as to Use - Assets limited as to use, composed principally of short-term and intermediate investments, include assets designated by the board of trustees for future capital expenditures and retirement of debt, assets held by the trustees under indenture agreements, assets held under self-insurance trust agreements, and assets held under donor restrictions. Assets limited as to use are comprised of common stock, treasury notes, mutual funds, mortgage obligations, corporate bonds, and municipal obligations.

Property and Equipment - Property and equipment purchases are recorded at cost. Depreciation is provided over the estimated useful life of each class of depreciable asset and is computed using the straight-line method. Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets. Expenditures for maintenance and repairs are charged to operations as incurred and improvements are capitalized. The Hospital eliminates the costs and related allowances from the accounts for properties sold or retired and any resulting gains or losses are reported separately from operations concurrently.

Asset Impairment - The carrying value of long-lived assets is periodically evaluated for impairment. These evaluations are primarily based on the estimated recoverability of the assets' carrying value. The evaluation of excess of costs over net assets acquired is based principally on the projected undiscounted cash flows generated by the underlying tangible assets.

Deferred Bond Issue Costs - Deferred bond issue costs are amortized using an effective interest method over the lives of the related bonds. Amortization expense is included within depreciation and amortization on the consolidated statement of operations.

Net Patient Service Revenue - The majority of the Hospital's patient service revenue is received under contractual arrangements with Medicare, Medicaid, and Blue Cross/Blue Shield of Michigan. Approximately 43 percent and 40 percent of net patient service revenue was received under the Medicare program during 2012 and 2011, respectively. Approximately 6 percent and 7 percent of net patient service revenue was received under the Medicaid program during 2012 and 2011, respectively. Approximately 24 percent and 25 percent of net patient service revenue was received under the Blue Cross/Blue Shield of Michigan program during 2012 and 2011, respectively.

Crittenton Hospital Medical Center and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 1 - Nature of Business and Significant Accounting Policies (Continued)

Net patient service revenue is reported at the estimated net realizable amount due from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Estimated settlements are recorded in the period the related services are rendered and are adjusted in future periods as final settlements are determined. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. Management believes that adequate provision has been made in the consolidated financial statements for any adjustments that may result from final settlements.

The estimated receivables from or payables to third-party payors related to settlements are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as needed until final settlements are determined.

Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. Management believes that it is in compliance with all applicable laws and regulations. Final determination of compliance of such laws and regulations is subject to future government review and interpretation. Violations may result in significant regulatory action including fines, penalties, and exclusions from the Medicare and Medicaid programs.

The Medicare program has initiated a recovery audit contractor (RAC) initiative, whereby claims subsequent to October 1, 2007 will be reviewed by contractors for validity, accuracy, and proper documentation. A demonstration project completed in several other states resulted in the identification of potential significant overpayments. The RAC program began for Michigan in 2009. The Hospital is unable to determine the extent of liability for overpayment.

The Hospital recognizes patient service revenue associated with services provided to patients who have third-party payor coverage on the basis of contractual rates for the services rendered. For uninsured patients that do not qualify for charity care, the Hospital recognizes revenue on the basis of its standard rates for services provided (or on the basis of discounted rates, if negotiated or provided by policy). On the basis of historical experience, a significant portion of the Hospital's uninsured patients will be unable or unwilling to pay for the services provided. Thus, the Hospital records a significant provision for bad debts related to uninsured patients in the period the services are provided. Patient service revenue, net of contractual allowances and discounts (but before the provision for bad debts), recognized in the period from these major payor sources total \$243,661,694 as of December 31, 2012. This amount is made up of amounts from third-party payors of \$234,696,230 and from self-pay payors of \$8,965,464 at December 31, 2012.

Crittenton Hospital Medical Center and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 1 - Nature of Business and Significant Accounting Policies (Continued)

The provision for bad debts is based upon management's assessment of historical and expected net collections considering business and economic conditions, trends in health care coverage, and other collection indicators. Periodically throughout the year, management assesses the adequacy of the allowance for doubtful accounts based upon historical write-off experience by payor category. The results of this review are then used to make any modifications to the provision for bad debts to establish an appropriate allowance for uncollectible receivables. After satisfaction of amounts due from insurance, the Hospital follows established guidelines for placing certain past due patient balances with collection agencies.

Charity Care - The Hospital provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Because the Hospital does not pursue collection of amounts determined to qualify as charity care, they are not reported as revenue. Charity care is determined based on established policies, using patient income and assets to determine payment ability. The amount reflects the cost of free or discounted health services, net of contributions and other revenues received, as direct assistance for the provision of charity care. The estimated cost of providing charity services is based on a calculation which applies a ratio of cost to charges to the gross uncompensated charges associated with providing care to charity patients. The ratio of cost to charges is calculated based on the Hospital's total expenses divided by gross patient service revenue. The Hospital estimates that it provided \$762,507 and \$548,665 of services to charity patients during 2012 and 2011, respectively.

Excess of Revenue Under Expenses - Included in excess of revenue under expenses in the accompanying consolidated statement of operations are all changes in unrestricted net assets other than equity transfers to or from related entities under common control, net assets released from restrictions for long-lived assets, pension-related changes other than net periodic pension cost, and investment returns restricted by donors.

Unrestricted and Temporarily Restricted Net Assets - Net assets of the Hospital are classified as temporarily restricted or unrestricted depending on the presence and characteristics of donor-imposed restrictions limiting the Hospital's ability to use or dispose of contributed assets or the economic benefits embodied in those assets. Donor-imposed restrictions that expire with the passage of time or that can be removed by meeting certain requirements result in temporarily restricted net assets. Earnings, gains, and losses on restricted net assets are classified as unrestricted unless specifically restricted by the donor or by applicable state law. Included in unrestricted net assets is a noncontrolling interest by a minority stockholder of Bald Mountain Holdings, LLC, which is a surgical center included in CDC.

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 1 - Nature of Business and Significant Accounting Policies (Continued)

Use of Estimates - The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Federal Income Tax - CHMC, the Foundation, and CCC are nonprofit, tax-exempt organizations under Section 501(c)(3) of the Internal Revenue Code and accordingly, no tax provision is reflected in the consolidated financial statements. With few exceptions, the Hospital is no longer subject to U.S. federal, state or local, or non-U.S. income tax examinations by tax authorities for years before 2009.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Hospital and recognize a tax liability if the Hospital has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. Management has analyzed the tax positions taken by the Hospital and has concluded that as of December 31, 2012 and 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements.

CDC is a taxable corporation. Income taxes are not material to the consolidated financial statements.

New Accounting Pronouncements - During 2011, the Financial Accounting Standards Board (FASB) adopted Accounting Standards Update (ASU) 2011-07, *Health Care Entities (Topic 954), Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities*, establishing accounting and disclosures for healthcare entities to recognize significant amounts of patient service revenue at the time services are rendered even though the entities do not assess a patient's ability to pay. The provision for bad debts associated with patient service revenue for certain entities is required to be presented on a separate line as a deduction from patient service revenue (net of contractual allowances and discounts) in the consolidated statement of operations. The ASU is effective for the Hospital for the year ended December 31, 2012 and the provision has been applied retrospectively to the year ended December 31, 2011. As a result of the retrospective application, total unrestricted revenue, gains, and other support and total operating expenses decreased by \$11,480,676, with no change to excess of revenue under expenses for the year ended December 31, 2011.

Investment return on temporary cash investments, professional liability funds, and funds held in trust under bond agreements is included in operating income. All other investment return is included in the nonoperating gains and losses section of the consolidated statement of operations.

Note 3 - Fair Value Measurement

Accounting standards require certain assets be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Hospital's assets measured at fair value on a recurring basis at December 31, 2012 and 2011 and the valuation techniques used by Hospital to determine those fair values.

In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Hospital has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

Crittenton Hospital Medical Center and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 3 - Fair Value Measurement (Continued)

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Hospital's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Note 3 - Fair Value Measurement (Continued)

Changes in Level 3 assets measured at fair value on a recurring basis for the years ended December 31, 2012 and 2011 are as follows:

	Corporate Bonds
Balance at January 1, 2012	\$ 85,636
Sales	(85,636)
Total realized gains	128
Total unrealized losses	(128)
Balance at December 31, 2012	<u>\$ -</u>

Balance at January 1, 2011	\$ -	\$ 84,686
Purchases	85,508	-
Sales	-	(84,686)
Total realized/unrealized gains	128	-
Balance at December 31, 2011	<u>\$ 85,636</u>	<u>\$ -</u>

Both observable and unobservable inputs may be used to determine the fair value of positions classified as Level 3 assets and liabilities. As a result, the unrealized gains and losses for these assets presented in the tables above may include changes in fair value that were attributable to both observable and unobservable inputs.

Certain types of instruments are classified within Level 3 of the fair value hierarchy because they trade infrequently and, therefore, have little or no price transparency. The transaction price is initially used as the best estimate of fair value. Accordingly, when a pricing model is used to value such an instrument, the model is adjusted so that the model value at inception equals the transaction price. This valuation is adjusted when changes to inputs and assumptions are corroborated by evidence, such as transactions in similar instruments, completed or pending third-party transactions in the underlying instrument or comparable entities, offerings in the capital markets, and changes in financial results, data, or cash flows. For positions that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect liquidity and/or nontransferability, and such adjustments are generally based in available market evidence. In the absence of such evidence, management's best estimate is used.

Note 3 - Fair Value Measurement (Continued)

The following methods and assumptions were used in estimating fair value of disclosures as of December 31, 2012 and 2011:

Cash and Cash Equivalents - The carrying amount in the consolidated balance sheet for cash and cash equivalents approximates fair value.

Marketable Securities - The fair values for marketable debt and equity securities are based on quoted market prices.

Accounts Receivable, Accounts Payable, and Accrued Liabilities - The carrying amount reported in the consolidated balance sheet for accounts receivable, accounts payable, and accrued liabilities approximates its fair value.

Long-term Debt - The fair values for long-term debt are estimated using discounted cash flow analysis based on the current borrowing rate for similar types of borrowing arrangements.

Note 4 - Property and Equipment

The costs of property, plant, equipment, and depreciable lives are summarized as follows:

	2012	2011	Depreciable Life - Years
Land	\$ 4,902,986	\$ 4,902,986	-

The Hospital entered into several agreements with the Michigan State Hospital Finance Authority for the issuance of hospital revenue and refunding bonds. The proceeds have been loaned to the Hospital under a master indenture. Long-term debt is collateralized by accounts receivable and gross revenues of the obligated group (includes CHMC and Foundation), as well as a first mortgaged lien on the Hospital's facility, adjacent parking structure, and related parking.

In July 2002, hospital revenue and refunding bonds Series 2002A ("Series 2002A Bonds") were issued by the Michigan State Hospital Finance Authority. The proceeds were loaned to the Hospital under the existing master indenture. A portion of the proceeds was used to advance refund Series 1990A and 1992A Bonds. This bond was refunded in November 2012 with the issuance of the 2012A Bonds.

In July 2003, hospital revenue and refunding bonds Series 2003A Variable Rate Demand ("Series 2003A Bonds") were issued by the Michigan State Hospital Finance Authority. The proceeds were loaned to the Hospital under the existing master indenture. A portion of the proceeds was used to refund the Series 2002B Bonds. This bond was refunded in November 2012 with the issuance of the 2012A Bonds.

Note 5 - Long-term Debt (Continued)

Additionally in July 2003, \$7,600,000 of taxable variable rate demand notes ("Demand Notes") were issued. These notes were issued to provide funds to the Hospital for the purpose of refinancing certain indebtedness secured by a mortgage lien on a medical office building owned by the Hospital. During 2005, the Hospital repaid \$5,600,000 of the outstanding Demand Notes due to the sale of the medical office building. The remaining debt will be repaid from the proceeds of a mortgage loan the Hospital issued in connection with sale of the building. The Demand Notes matured in 2012.

In December 2003, variable rate demand hospital revenue and refunding bonds Series 2003B ("Series 2003B Bonds") were issued by the Michigan State Hospital Finance Authority; the Hospital proceeds were loaned to the Hospital under the existing master indenture. This bond was refinanced in November 2012 with the issuance of the 2012A Bonds.

In November 2012, hospital revenue and refunding bonds Series 2012A ("Series 2012A Bonds") were issued by the Michigan State Hospital Finance Authority. The proceeds was loaned to the Hospital under a new master indenture. A portion of the proceeds was used to advance refund Series 2002A, 2003A, and 2003B Bonds. The remaining portion of \$12,000,000 was used to fund the new South Tower Project at the Hospital. The Series 2012A Bonds mature in annual amounts ranging from \$1,775,000 in 2013 to \$6,925,000 in 2039 and bear interest at rates from 3.00 percent to 5.00 percent.

In December 2012, hospital revenue and refunding bonds Series 2012B ("Series 2012B Bonds") were issued by the Michigan State Hospital Finance Authority. The proceeds were loaned to the Hospital under a new master indenture. The proceeds are being used to fund the new South Tower Project at the Hospital. These bonds were a direct placement with Comerica Bank. The total amount of the Series 2012B Bonds is up to \$45,000,000. This bond will be drawn on during the construction of the South Tower Project through December 2013. Draws are made on the first day of every month and have a variable interest rate which is 140 basis points plus one-month LIBOR. There is also a .60 percent fee on unused funds during the duration of the draw period. Interest only is paid on these bonds until the 2012A Bonds are paid in full in 2039. The Series 2012B Bonds mature in annual amounts ranging from \$5,060,000 in 2040 to \$6,225,000 in 2047. The effective interest rate at December 31, 2012 is 1.6107 percent.

In April 2009, the Hospital and the Karmanos Cancer Center entered into an agreement to jointly guarantee 100 percent of the principal amount for a construction loan in the amount of \$12,795,348 for purposes of constructing a new 30,000 square foot facility located at Crooks Road in Rochester Hills. This facility was completed and opened for business in February 2010. On June 30, 2011, the Hospital purchased Karmanos' interest in the joint venture. The Hospital is 100 percent owner as part of the agreement assumed the debt for the Cancer Center. In November 2012, this loan was paid in full.

Note 5 - Long-term Debt (Continued)

In May 2010, hospital revenue bonds, Series 2010, for \$1,710,000 were issued by the Michigan State Hospital Finance Authority. The bonds were then purchased by PNC Equipment Finance L.L.C. The bonds mature in a monthly amount of \$30,702, including interest. The interest rate is fixed at 2.9679 percent.

In November 2012, CDC converted a construction loan to a mortgage in the amount of \$2,193,750. The note is payable in 59 equal consecutive monthly principal installments in the amount of \$7,312 plus interest, with a balloon payment due on the maturity date of November 30, 2017. Interest is based on a variable rate at one-month LIBOR plus 3.00 percent. The effective interest rate at December 31, 2012 is 3.209 percent.

Minimum principal payments on long-term debt as of December 31, 2012 are as follows:

<u>Years Ending December 31</u>	<u>Amount</u>
2013	\$ 3,505,828
2014	2,529,986
2015	2,421,011

2017	2,497,750
Thereafter	<u>112,006,768</u>
Total	<u>\$ 125,339,093</u>

Note 6 - Retirement Plans

The Hospital has a defined contribution pension plan and a noncontributory defined benefit pension plan covering substantially all of its employees. Under the noncontributory defined benefit plan, the benefits are based on years of service and final average earnings. The Hospital's funding policy for the defined benefit plan is to fund an amount based on the recommendation of consulting actuaries, in compliance with the requirements under the Employee Retirement Income Security Act of 1974. Funding for the defined contribution plan is based on the participating employees' base pay with a maximum percentage contributed by the employee based on their collective bargaining agreement and the remainder contributed by the Hospital.

In November 2006, the Hospital announced that benefits provided under the defined contribution pension plan would be frozen effective January 1, 2007 to reduce the expected increase in pension expense in future years.

The Hospital also has a defined contribution retirement plan for employees. The Hospital contributes a fixed percentage of employees' salaries to the plan and will also match contributions made by the employees to the plan during the year.

Total recognized in net periodic benefit cost and unrestricted net assets	<u>\$ 4,752,869</u>	<u>\$ 9,209,258</u>

The estimated amount to be amortized from unrestricted net assets into net periodic benefit cost over the next fiscal year is \$1,833,114.

Assumptions

Weighted average assumptions used to determine benefit obligations at December 31 are as follows:

	2012	2011
Weighted average discount rate	4.35 %	5.10 %
Rate of compensation increase	4.50	4.50

Weighted average assumptions used to determine net periodic benefit cost for years ended December 31 are as follows:

	2012	2011
Weighted average discount rate	5.10 %	5.45 %
Rate of compensation increase	4.50	4.50
Expected rate of return on plan assets	8.00	8.00

Crittenton Hospital Medical Center and Subsidiaries

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 6 - Retirement Plans (Continued)

To develop the expected long-term rate of return on assets assumption, the Hospital considered the current level of expected returns on risk-free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested, and the expectations for future returns of each asset class. The expected return for each asset class was then weighted based on the target asset allocation to develop the expected long-term rate of return on assets assumption for the portfolio. This resulted in the selection of the 8.00 percent assumption.

Pension Plan Assets

Plan investments include immediate participation funds held by an insurance company and units of certain collective investment funds held by a commercial bank.

For 2012, the Hospital elected to use the bond model approach for valuation of obligations. The Hospital believes the bond model approach provides greater precision given the increased volatility in the high-quality fixed-income universe which shows no signs of reverting to historic norms.

The Hospital's pension plan weighted average asset allocation as of December 31, 2012 is 78 percent equity securities, 20 percent debt securities, and 2 percent other investments. The weighted average asset allocation as of December 31, 2011 is 79 percent equity securities, 20 percent debt securities, and 1 percent other investments.

The plan assets are invested in separately managed portfolios using investment management firms. The plan's objective is to maximize total return without assuming undue risk exposure. The plan maintains a well-diversified asset allocation that best meets these objectives. Plan assets are largely composed of equity securities, which include all market capitalization sizes in addition to international and convertible securities. Debt securities include both intermediate and international securities.

Investments in derivative securities are not permitted for the sole purpose of speculating on the direction of market interest rates. Included in this prohibition are leveraging, shorting, swaps, futures, options, forwards, and like strategies.

In each investment account, investment managers are responsible to monitor and react to economic indicators, such as gross domestic product, Consumer Price Index, and the federal monetary policy, that may affect the performance of their account. The performance of all managers and the aggregate asset allocation are formally reviewed on a quarterly basis, with a rebalancing of the asset allocation occurring at least once a year. The current asset allocation objective is to maintain 50 percent of plan assets in equity securities and 50 percent fixed-income securities, with both classes allowing for a 10 percent deviation from the target.

The tables above present information about the pension plan assets measured at fair value at December 31, 2012 and 2011 and the valuation techniques used by the Hospital to determine those fair values.

In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Hospital has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Hospital's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each plan asset.

Changes in Level 3 assets measured at fair value on a recurring basis for the years ended December 31, 2012 and 2011 are as follows:

Contributions

The Hospital expects to contribute \$2,899,081 to its pension plan in 2013.

Estimated Future Benefit Payments

Benefits expected to be paid by the Hospital during the ensuing five years and thereafter are approximately as follows:

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 7 - Professional Liability Self-insurance

The Hospital has established an offshore captive insurance company to provide professional and general liability coverage to the Hospital, certain medical staff members, and other affiliates. Under these insurance programs, a portion of the risk of loss from professional liability claims is retained by SAAC. The Hospital has accrued its best estimate of the ultimate cost of losses payable by the captive insurance company and the retained portion of losses under other insurance arrangements.

The Hospital established a self-insurance program for professional liability claims reported after May 31, 1986, and prior to December 31, 2003, and arising from services to patients after May 31, 1985. A trust was established for the payment of covered losses and related expenses, as specified under the Hospital's insurance program. The irrevocable trust is funded based on recommendations of a consulting actuary. Assets of the trust are reported in the consolidated balance sheet and income on the trust assets is reported as operating revenue. The Hospital accrues its best estimate of self-insured losses as they occur, based upon recommendations by the consulting actuary. The discount rate used in estimating the liability was 1.50 percent and 3.00 percent in 2012 and 2011, respectively. The malpractice expense was \$1,585,689 and \$1,163,557 for the years ended December 31, 2012 and 2011, respectively.

Because of the nature of its operations, the Hospital is, at all times, subject to pending and threatened legal actions that arise in the normal course of its activities. There are known incidents that have occurred through December 31, 2012 that may result in the assertion of professional liability claims. At December 31, 2012, Hospital management accrued its best estimate of these contingent losses to the extent they fall within the limits of the Hospital's self-insurance program, as well as an estimate of incurred but not reported claims, and to the extent claims are subject to reimbursement from insurance, a receivable has been recorded.

Note 8 - Investment in Corporate Joint Ventures

The Hospital invested \$100,000 for a 33-1/3 percent equity interest in a magnetic resonance imaging center (the "Center"). The Center reported operating gains of \$668,820 and \$1,273,165 during the years ended December 31, 2012 and 2011, respectively, of which the Hospital's share was approximately \$232,000 and \$500,000 in 2012 and 2011, respectively. The investment in the joint venture is accounted for on the equity method.

The Hospital purchased the remaining 50 percent interest in Crittenton-Karmanos Health Services, in which it already had a 50 percent interest as of July 1, 2011. This acquisition was treated as an acquisition achieved in stages. The consolidated balance sheet was recorded as such and Crittenton Cancer Center is now reported within the consolidated statements of the Hospital starting in 2011. The consolidated income statements represent the last six months of activity for 2011. The first six months were recorded under the equity method with the Hospital's share of the loss of approximately \$(542,478).

On November 30, 2007, the Hospital invested \$2,880,000 for a 20 percent equity interest in USC, LLC. USC, LLC is engaged in the business of owning and operating an ambulatory surgery center in Troy, Michigan. In 2009, the ownership interest increased to 28.7 percent and in 2011, the ownership interest increased to 30.3 percent. The surgical center reported operating income of approximately \$2,273,700 and \$1,520,000 for the years ended December 31, 2012 and 2011, respectively, of which the Hospital's share of the income was approximately \$549,000 and \$275,000 in 2012 and 2011, respectively. The investment in the joint venture is accounted for on the equity method. During the years ended December 31, 2012 and 2011, the Hospital incurred expenses related to the surgical center of \$6,077,497 and \$5,348,847, respectively.

Notes to Consolidated Financial Statements December 31, 2012 and 2011

Note 8 - Investment in Corporate Joint Ventures (Continued)

The Hospital had other joint ventures accounted for on the equity method. The Hospital's share was approximately \$583,000 and \$578,000 in 2012 and 2011, respectively.

The Hospital acquired the Cancer Center by assuming the loan outstanding with Bank of America for the building of the Cancer Center of \$12,532,430 at June 30, 2011, and amending the promissory note that the Hospital has with Barbara Ann Karmanos Cancer Center, a reduction of \$997,658. The Hospital recorded assets of \$18.7 million in the consolidated balance sheet at the acquisition date. Based on the purchase price allocation, the fair value of identifiable assets acquired and liabilities assumed exceeded the fair value of consideration paid and accrued. The transaction resulted in a recognized gain of \$2.4 million in nonoperating items in the consolidated statements of operations and changes in net assets for the year ended December 31, 2011.

Note 9 - Leases

The Hospital is obligated under certain operating leases, primarily for facilities and equipment. Total rent expense under these leases was \$4,837,293 and \$5,015,865 for the years ended December 31, 2012 and 2011, respectively.

The Hospital has facilities leases and subleases under rental income. Total rental income for 2012 and 2011 for all rental leases was approximately \$1,314,000 and \$985,000, respectively.

Future minimum operating lease commitments and sublease receipts under noncancelable operating leases (with an initial or remaining term in excess of one year) at December 31, 2012 are as follows:

<u>Years Ending December 31</u>	<u>Payments</u>	<u>Receipts</u>
2013	\$ 2,985,670	\$ 1,357,797
2014	2,425,783	1,092,966

Note 10 - Functional Expenses

The Hospital provides general healthcare services to patients within its geographic location. Expenses related to providing these services for the years ended December 31, 2012 and 2011 are as follows:

	2012	2011
Health care services	\$ 222,169,268	\$ 208,186,291
General and administrative	33,004,896	35,763,623
Total	<u>\$ 255,174,164</u>	<u>\$ 243,949,914</u>

Note 11 - The American Recovery and Reinvestment Act of 2009

The American Recovery and Reinvestment Act of 2009 (ARRA) established funding in order to provide incentive payments to hospitals and physicians that implement the use of electronic health record technology (EHR) by 2014. The Hospital may receive an incentive payment for up to four years, provided the Hospital demonstrates meaningful use of certified EHR technology during the EHR reporting period. Criteria for demonstrating meaningful use is established by the Centers of Medicare and Medicaid Services (CMS) using a phased approach defining meaningful use through three stages. Stage One has been defined and is applicable to the federal fiscal year 2011 and 2012 payments. For Medicare, the incentive payments are based on estimated total hospital discharges and days, Medicare days, and total hospital charges less charity care.

During 2012, the Hospital attested to CMS that it had met the first stage of meaningful use criteria for the first year EHR reporting period. The Hospital received \$336,216 and \$2,588,098 in EHR funds in 2012 for Medicaid and Medicare, respectively. As such, the incentive payments were recognized as income within operating revenue as of December 31, 2012.

Retroactively calculated adjustments to the incentive payments recorded may occur as incentive payments are based on management's best estimates and the amounts are subject to change until final settlement occurs on related Medicare cost reports. Changes to incentive payment revenue will be recorded within operating income in the period in which the adjustments occur.

Management believes that it is in compliance with all applicable meaningful use criteria as attested. Final determination of the Hospital attestation is subject to audit by the federal government or its designee.
