See Schedule OOne of the cornerstones of Scott & White Memorial Hospital’s (“SWMH”) mission is providing quality patient care with a focus on research activities Efficiencies are gained through innovation The focus of much of the research is to find innovative & cost-effective ways to treat patients, while increasing patient safety, improving quality and focusing on better outcomes SWMH has the following research departments, centers and institutes cancer research institute, cardiovascular research, center for applied health research (CAHR), center of cell death and differentiation, center for bone, joint and spine research, clinical simulation research, digestive disease research center, ophthalmic research, neuroscience research, podiatric research, division of research, family medicine, and ob/gyn research The Cancer Research Institute has been created to partner research and clinical care The mission of the Cancer Research Institute is to find effective cancer therapies quickly and cost-effectively The Vasicek Cancer Treatment Center, a part of the Scott & White Cancer Institute, is a state-of-the-art facility that offers highly-specialized and coordinated care in one location Patients and their families have one-stop access to cancer diagnosis and treatment, backed by research and education The institute has performed over 550 clinical trials Each year, Scott & White’s Vasicek Cancer Treatment Center holds prevention programs designed to reduce the incidence of a specific cancer type Screening programs are held in order to attempt to decrease the number of patients with late-stage disease Last fiscal year 278 people participated in the free cancer screenings, 98 people participated in uninsured breast cancer screenings, and over 4, 000 people requested information on various cancer related topics The Cardiovascular Research Institute (CVRI) is a joint effort of the Texas A&M Health Science Center, Scott & White and Central Texas Veteran’s Health Care System (CTVHCS) This unique program pairs the world-class research of molecular biologists with clinical applications for the treatment of people suffering from cardiovascular disease or stroke By discovering better strategies for prevention and intervention of these conditions, the work of the Institute will benefit patients and the entire community To facilitate such research Scott & White has focused significant efforts on outcomes based research SWMH has established the Center for Applied Health Research (“CAHR”) This Center focuses on diverse research areas, and brings together expertise in many areas such as health services research, community based health research, patient centered safety and patient activation research, along with research mentoring and the academic development of clinicians The center brings together collaborators from SWMH, Texas A&M Health Science Center and the Central Texas Veteran’s Health Care System (“CTVHCS”) Within the CAHR, the Patient Engagement and Safety Research Program centers on a team perspective in patient care This program partners patients, family members, clinicians and other community and healthcare providers to create the best possible healthcare outcomes The research is based on clinical trials, clinical simulation models, program evaluations, patient education and common intervention strategies The Health Outcomes Core conducts health services research focusing on severe mental illnesses and the management of care for patients with complex medical and psychiatric comorbidities This group works jointly with SWMH, the CTVHCS, Darnall Army Medical Center at the U S Army’s Fort Hood, and the Center of Excellence for Research on Returning War Veterans located in Waco, Texas Clinical Simulation Research is another area directly impacting patients’ healthcare quality and safety The Clinical Simulation Center was created, in collaboration with Temple College, to allow healthcare students and providers to design and test new processes and procedures prior to performing them on patients The Clinical Simulation Center is used by medical and nursing students, residents, fellows, nurses and other healthcare providers Simulation work enhances communication skills and performance of healthcare providers, preparing them for the realities of patient care The goal and objective, of the Digestive Disease Research Center (DDRC), is to discover and share cutting edge knowledge about the digestive system and the diseases that affect millions in the United States The SWMH research team consists of basic scientists and physicians from a wide variety of backgrounds with varying interests and disciplines These combined investigators support the practice of “bench to bedside” research to benefit and contribute to human health Along with seasoned investigators, the DDRC also believes in training of future scientists and provides an excellent learning environment for the training of undergraduates, medical students, graduate students, postdoctoral fellows and residents Scott & White has committed significant resources to establish a one-of-a-kind Ophthalmic Vascular Research Program (OVRP) This is a joint venture between the Division of Ophthalmology at Scott & White, the Department of Systems Biology and Translational Medicine, and Cardiovascular Research Institute at the Texas A&M Health Science Center New theories developed regarding the pathogenesis of various eye diseases as well as potential new therapies proposed and tested in the basic science laboratory, if appropriate and promising, can be taken into the clinical setting to benefit patient care The Neuroscience Institute (NSI) at Scott & White and Texas A&M Health Science Center College of Medicine conducts state-of-the-art translational research, with scientific interests including drug and device trials in humans The NSI is home to an invasive human brain chemistry and electrophysiology lab, neuroinflammation, neurogenesis, a neuromodulation lab, which includes a frameless stereotactic image-guided transcranial magnetic stimulator (TMS), an autonomic psychophysiology lab and a functional neuroimaging (fMRI) lab One of the main scientific objectives of the NSI is the multimodal analysis of human brain function in both healthy and diseased populations Research within the NSI is highly collaborative and expanding, with an internationally recognized team of basic and clinical researchers in the Departments of Neurosurgery, Neurology, Psychiatry and Behavioral Sciences and Radiology The podiatric research team has 12 studies in progress They have received two National Institute of Health (NIH) grants to fund two five-year studies The total contact cast (TCC) study focuses on foot wounds, compliance and cost of care and complications Another study is a collaborative effort with a research team from the U K , which will study the recurrence and prevention of foot ulcers The podiatric research team also has studies sponsored by the American Diabetic Association (ADA) and American Podiatric Medical Association (APMA) and are looking into the occurrence of ulcers in diabetic patients that are currently undergoing dialysis and how foot care affects diabetic foot complications They are also looking into new therapies to deal with treatment of foot infections and open amputations The Division of Research, Family Medicine (DORFAM) has current research projects focusing on bicycle related traumatic brain injuries, weight and contents of backpacks carried by school children, concussions among high school football players and miscommunication as a cause of medication errors in elderly ambulatory patients SWMH has developed a virtual data warehouse which promotes Comparative Effectiveness Research This virtual warehouse allows SWMH to share clinical and research data with other research and healthcare organizations By partnering with other institutes, the data necessary for effective research is quickly and readily available, resulting in larger and more comprehensive data pools and increasing the cost-effectiveness of research The Scott & White system employs many physicians, scientists and technicians devoted to various aspects of research programs In the fiscal year ending August 31, 2013, there were approximately 552 active research projects, of which approximately 31% are self-funded

		Part I, Line 3c Scott & White provides free or discounted care to uninsured patients who are considered Financially Indigent In order to qualify for financial assistance a patient must live within the 31 county service area of the Scott & White Health Care System To determine eligibility for free or discounted care, in addition to income and residency, net assets, other financial resources, credit report, and other relevant information are considered The Scott & White financial assistance policy also provides for exceptional circumstances in which a patient with income over 375% FPG could qualify for financial assistance if the cost exceeds two times their annual household income
		Part I, Line 6a The organization prepares and files an Annual Report of Community Benefit Plan with the Texas Department of State Health Services These reports are made available through the organization's website at www sw org

Identifier	ReturnReference	Explanation
		Part I, Line 7 The costing method used for Schedule H is the cost to charge ratio, as calculated in Schedule H, Worksheet 2 This method was applied to the costs reported on lines 7a, 7b, and 7c
		Part III, Line 4 Audited financial statement footnote Page 18 The presentation of the provision for bad debts as a reduction of patient service revenue is based on an entity-wide assessment of the significance of patient revenue that is recognized without assessing patients' ability to pay As stated in the combined audited financial statements, the organization maintains allowances for uncollectible accounts for estimated losses resulting from a payer's inability to make payments on accounts The organization assesses the reasonableness of the allowance account based on the historical write-offs, cash collections, the aging of the accounts and other economic factors Accounts are written off when collection efforts have been exhausted Management continually monitors and adjusts its allowance associated with its receivable Bad debt does not include amounts for patients who are known to qualify under the organization's charity care policy The amount of bad debt attributable to patient's accounts is net of contractual allowance, payments received and recoveries of bad debt previously written off The organization has entered zero on Schedule H, Part III, Line 3, however, based on prior experience and certain demographics and other information obtained during admission, the organization believes a portion of the bad debt expenses (estimated to range from 1-5%) would be attributable to patients that would otherwise qualify for charity care Despite all of the effort and ways the organization educates patients about qualifying for its charity care program as demonstrated in Part VI, question 3 below, many uninsured patients either refuse or fail to complete a charity care application or provide sufficient information at the time of admission, during their stay or after being discharged to qualify for assistance under the organization's charity care policy

Identifier	ReturnReference	Explanation
		Part III, Line 8 The amount reported on Part III, Section B, line 7 was calculated in accordance with the Schedule H instructions utilizing the organization's allowable cost reported in the Medicare cost report based on a cost to charge ratio. However, the allowable costs in the Medicare cost report do not reflect the actual cost of providing care to patients since the Medicare cost report excludes many direct patient care costs that are essential to providing quality care to these patients. For example, certain coverage fees to physicians, cost of Medicare C and D, and other similar direct patient care expenses are specifically excluded as allowable cost in the cost reports. Using the same methodology to calculate the unreimbursed cost of providing charity care and Medicaid (using applicable Schedule H Worksheets) would result in a shortfall higher than the shortfall reported on Part III, Section B, Line 7. The organization believes that all of the shortfall should be considered as a community benefit for the following reasons: First, the IRS Community Benefit Standard includes the provision of care to the elderly and Medicare patients. IRS Revenue Ruling 69-545 provides in part, that hospitals serving patients with governmental health benefits, including for example Medicare, is an indication that the hospital operates for the promotion of health in the community. Second, the organization provides care to Medicare patients regardless of this shortfall, i.e., loss, and thereby relieves the state and federal government of the burden of paying the full cost for the care of Medicare beneficiaries. Medicare does not provide sufficient reimbursement to cover the entire cost of providing care to these patients causing the organization to use other surplus funds to cover the shortfall. It is expected that reimbursement under the Medicare program will continue to decline and therefore may further limit access to care due to the anticipated reduction of participating Medicare providers in the community. As a result, the care for these patients will likely continue to increase, and rest on the shoulders of, nonprofit hospitals and/or county hospital districts. Third, many of the Medicare participants have low fixed incomes and therefore would qualify for charity care or other means tested government programs absent being enrolled in the Medicare program. Fourth, Texas nonprofit hospitals must provide a minimum level of community benefit in order to obtain exemption from state and local taxes. According to the current Texas Health and Safety Code, the unreimbursed cost of Medicare is considered to be a community benefit in determining these state statutory requirements as it helps relieve a governmental burden of providing this care that would otherwise be provided through the county hospital system in Texas.
		Part III, Line 9b The Scott & White Healthcare Financial Assistance Policy has a section for coordination with collection policies. It states "notwithstanding any other provision of any other policy or provision at S&W regarding billing and collection matters, S&W will not engage in extraordinary collection actions before it makes reasonable efforts to determine whether an individual who has an unpaid billing from S&W is eligible for financial assistance under this Policy. "Reasonable efforts" includes notification to the patient by S&W of this Policy upon admission or discharge and in written and oral communications with the patient regarding the patient's billings, including invoices, telephone calls, and such other communications as may be set forth in future guidance from the U.S. Department of the Treasury or Internal Revenue Service."

Scott & White Memorial Hospital		Part V , Section B, Line 3 The Community Benefit Task Force identified methods, participants, questions, and procedures for gathering input from community members around issues of health in Bell County It was critical that this report be developed with input from people representing the broad interest of the community and people with special knowledge or expertise in public health as well as those who understand the health needs of the medically underserved, low-income and minority population Direct input from these sources in the form of community surveys and one-on-one interviews, strategically helped us to better understand how best to meet needs based on the community's readiness to change, ability to access, or willingness to access specific services and resources This ensured that hospital resources would be put to the best use Several specific locations and community populations were targeted based on the challenges they face acquiring healthcare and maintaining a healthy lifestyle due to lower income situations For 3 weeks in February, Scott & White sought input from those that are medically underserved in an attempt to focus efforts reaching those who need it most Clients at The Greater Killeen Free Clinic, located on the West side of the county, and the Temple Community Clinic, located on the East side, were surveyed Clients seeking assistance at a local health and human service agency, the Bell County HELP Center, and a local food pantry, Helping Hands Ministry in Belton, also participated To gain input from the broad community, surveys were completed at various health fairs, cultural activities and civic organization meetings across the county as well Five key informants were selected and interviewed based on their special knowledge around local health issues or their service with medically underserved populations Each key informant interview began with a description of the findings from the CHNA and an explanation of the needs that were identified as priorities in the community During the interview, each was asked to comment on all of the needs to either verify or refute the issue as a major concern based on their experiences with serving community members All 5 felt that the issues identified were indeed priority problems that needed to be addressed Through their work in the community, they had first-hand knowledge of the impact these issues caused Interviews were concluded by extending the discussion to learn what resources might currently be available in the community to address the identified needs Marlene DiLillo has served as the Killeen Free Clinic's Executive Director for 17 years She is a spokeswoman for the underserved population with health needs Marlene helped to found the Texas State Association of Charitable Clinics and has served at, and mentored, several charity clinics around Texas She has a Master's degree in Human Resources, and holds certificates in non-profit management and volunteer management DiLillo has also has served on many health related boards including the regional Susan G Komen board Judy Morales currently serves as the 		Part VI, Line 4 Scott & White Memorial Hospital serves children and families across the greater Central Texas area with the majority of its patient population residing in Bell County The Hospital defines Bell County as its primary community served Bell County encompasses 16 zip codes in 11 cities which include Belton, Fort Hood, Harker Heights, Killeen, Moody, Morgans Point Resort, Nolanville, Rogers, Salado, Temple and Troy Bell County is centrally located along the I-35 corridor, is serviced by two major railroads and is home to Fort Hood With a capacity of 50,000 troops, it is one of the largest military installations in the world The most recent census data shows that nearly 321,000 people live in Bell County which is nearly a 3.5% growth across the last 3 years The gender split is nearly even with 49.48% male and 50.52% female Altered as a result of the large military presence in Fort Hood, the base itself is fairly self-contained both as a community and in terms of healthcare services received The base inflates the 25-34 age group which is the largest in Bell County accounting for nearly 17% of the population More than 60% of the residents living in the county are White 21.63% are Black/African American, and just under 23% of the population in Bell County claim to have Hispanic/Latino ethnicity The zip codes with the highest Hispanic population (more than population speaks Spanish at home including nearly 20% of the households in the 76504 and 76541 zip codes The median household income in the county is \$49,736 and the average household income is \$61,315 Nearly one-third of the population has at least an Associate Degree The census reported that 9,341 families in Bell County live in poverty and of those, approximately 89% have children living with them 77.4% of Adults and 90.4% of Children in Bell County have some form of health insurance coverage Medical costs in the United States are extremely high, and many people without health insurance likely cannot afford medical treatment or prescription drugs They are also less likely to get routine checkups and screenings, so if they do become ill they are less likely to seek treatment until the condition is more advanced and therefore more difficult and costly to treat Bell County's demographics are slightly altered as a result of the large military presence in Fort Hood The base inflates the 25-34 age group which is the largest in Bell County accounting for nearly 17% of the population The median household income is \$49,736 and the average household income is \$61,315 Nearly a third of the population has at least an Associate Degree
		Part VI, Line 5 All Scott & White Healthcare System facilities are operated in a manner that furthers exempt purposes Scott & White Healthcare officers and executives plan and direct the activities of all System facilities under the direction and oversight of the Scott & White Healthcare Board of Trustees The Scott & White Memorial Hospital ("SWMH") Board of Directors is comprised of persons residing in the service area As explained in response to Form 990 Part VI, Section A, Question 7b, the SWMH Board of Directors does not consist of a majority of independent directors because SWMH relies on the Scott & White Healthcare Board of Trustees, which is controlled by a majority of community trustees, to meet community board standards Surplus funds are reinvested in facilities, equipment and programs to further SWMH's exempt purposes SWMH is operated for the benefit of the public and no part of income inures to any private individual or serves a private interest Surplus funds are used to improve the quality of patient care, expand facilities, advance medical training and education and fund research Scott & White Healthcare has a Financial Assistance Policy that all hospitals in the Scott & White Healthcare System, including SWMH, follow, which provides assistance to individuals with incomes up to 375% of the Federal Poverty Guidelines

Report of Independent Auditors

The Board of Trustees
Scott & White Healthcare

We have audited the accompanying consolidated financial statements of Scott & White Healthcare, which comprise the consolidated balance sheets as of August 31, 2013 and 2012, and the related consolidated statements of operations, changes in net assets, and cash flows for the years then ended, and the related notes to the consolidated financial statements

Management's Responsibility for the Financial Statements

Scott & White Healthcare's management is responsible for the preparation and fair presentation of these financial statements in conformity with U S generally accepted accounting principles, this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Scott & White Healthcare's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Scott & White Healthcare at August 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for the years then ended in conformity with U S generally accepted accounting principles

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying consolidating balance sheet as of August 31, 2013, and the related consolidating statement of operations for the year then ended are presented for purposes of additional analysis and are not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Scott & White Healthcare

Notes to Consolidated Financial Statements

August 31, 2013

1. Organization

Scott & White Healthcare (SWH) is a nonprofit corporation exempt from federal taxes under Section 501(a) of the Internal Revenue Code (IRC) as an organization described in Section 501(c)(3) of the IRC. Scott & White Healthcare controlled entities and noncontrolled affiliate entities include over 1,700 licensed hospital beds, approximately 80 clinic locations, and a health maintenance organization primarily serving the central and eastern regions of Texas.

Scott & White Healthcare and subsidiaries are collectively referred to herein as Scott & White.

2. Significant Accounting Policies

Principles of Consolidation

The equity method of accounting is used for investments in entities in which Scott & White has significant influence and a financial interest, but not control. Entities in which Scott & White has control but not sole membership are included in the consolidated financial statements, with a noncontrolling interest reported in the balance sheet and in the excess or deficiency of revenues and gains over expenses and losses. All entities in which Scott & White has sole membership are consolidated in the consolidated financial statements. All significant intercompany accounts and transactions among entities included in the consolidated financial statements have been eliminated in consolidation.

Cash Equivalents

Scott & White considers all undesignated highly liquid investments with maturities of three months or less when purchased to be cash equivalents.

Inventory

Inventory is stated at average cost, which is not in excess of market value.

Accounts Receivable

Patient accounts receivable are stated at estimated net realizable value. Scott & White maintains allowances for uncollectible accounts for estimated losses resulting from a payer's inability to make payments on accounts. Scott & White uses a balance sheet approach to establish the allowance based on historical payments, payer type, and the aging of the accounts. Accounts are

written off when collection efforts have been exhausted. Management continually monitors and adjusts, as necessary, allowances associated with its receivables. The majority of uncollectible accounts are from uninsured patients and patient copays and deductibles.

Significant concentrations of gross patient accounts receivable from state and federal government-related programs were 25% and 32% at August 31, 2013 and 2012, respectively.

Premiums receivable are established for medical premium revenue and generally are not collateralized. Premiums receivable also include annual settlements under the cost contract established between Scott & White's health maintenance organization and the Centers for Medicare & Medicaid Services (CMS). At August 31, 2013 and 2012, the settlement amounts receivable under this contract were \$37,868,000 (cost years 2007–2013) and \$30,775,000 (cost years 2009, 2011, and 2012), respectively.

Significant concentrations of premiums receivable were 99% from state and federal government-related programs at August 31, 2013 and 2012.

Assets Limited as to Use

Assets limited as to use include assets held for donor or other restricted purposes, assets designated by the Scott & White Board of Trustees for specific purposes such as facility replacement and initiatives that promote the Scott & White mission, and assets held in trust under bond agreements.

Assets limited as to use primarily consist of cash, cash equivalents, debt securities, equity securities, and alternative investments. Assets limited as to use are classified as trading or other than trading based on the manner in which Scott & White manages its investment portfolio. Investments in cash equivalents, debt securities, and equity securities are stated at fair value.

Property and Equipment

Property and equipment are recorded at cost at the date of acquisition or estimated fair value at the date of donation. Depreciation is computed on the straight-line method using the estimated economic lives of the depreciable assets, generally ranging from 2 to 40 years. The amortization related to assets recorded under capital leases is included within depreciation expense.

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Expenditures that materially increase values, change capacities, or extend useful lives are capitalized. Routine maintenance and repair items are charged to operating expenses. The estimated useful lives of the classes of depreciable assets are as follows:

Land improvements	2–25 years
Buildings and improvements	5–40 years
Fixed and movable equipment	3–20 years

Scott & White evaluates whether events and circumstances have occurred that would require a revision to the remaining estimated useful life of long-lived assets or would indicate that the remaining balance of an asset is not recoverable. The assessment of possible impairment is based on whether the carrying amount of an asset exceeds the expected total undiscounted value of cash flows expected to result from the use of the asset and its eventual disposition. No impairment charges were recorded in 2013 or 2012.

Property and equipment and related accumulated depreciation are as follows:

	August 31	
	2013	2012
	<i>(In Thousands)</i>	
Land and improvements	\$ 71,352	\$ 71,104
Buildings and improvements	929,145	784,206
Fixed and movable equipment	869,349	726,456
Construction in progress	115,821	173,661

Less accumulated depreciation	(868,098)	(777,817)
	<u><u>\$ 1,117,569</u></u>	<u><u>\$ 977,610</u></u>

Property and equipment financed under capital leases totaled approximately \$18,742,000 and \$8,329,000 at August 31, 2013 and 2012, respectively, and related accumulated amortization was approximately \$7,468,000 and \$5,043,000 at August 31, 2013 and 2012, respectively. Amortization expense is included in depreciation expense in the consolidated statement of operations.

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

The amounts of total capitalized software costs, including purchased and internally developed software, at August 31, 2013 and 2012, were \$179,715,000 and \$114,000,000, respectively, less accumulated depreciation of \$100,298,000 and \$84,000,000, respectively. Depreciation of these software costs was \$16,000,000 and \$12,000,000 in fiscal year 2013 and 2012, respectively.

Scott & White accounts for asset retirement obligations under the provisions of Accounting Standards Codification (ASC) 410, *Asset Retirement and Environmental Obligations*, regarding accounting for conditional asset retirement obligations. The asset retirement obligation as of August 31, 2013 and 2012, was \$9,622,000 and \$9,317,000, respectively, which is recorded in other liabilities in the consolidated balance sheets and relates to required future asbestos remediation.

Derivative Financial Instruments

Scott & White accounts for its derivatives under ASC 815, *Derivatives and Hedging*, regarding accounting for derivative instruments and hedging activities. Scott & White utilizes interest rate swap agreements (derivative agreements) to mitigate interest rate exposures. Scott & White's derivative agreements are measured at fair value and are reflected in the consolidated balance sheets as either a long-term asset or long-term liability. None of Scott & White's derivative financial instruments qualify for hedge accounting at August 31, 2013 or 2012. Changes in the fair value of the derivative agreements and the expense or income, representing the net of the payments made or received under the derivative agreements, are recorded as interest rate swap activity in the consolidated statements of operations.

Interest in Net Assets of Supporting Foundations

Scott & White accounts for its interest in the net assets of supporting foundations under ASC 958-605, *Not-for-Profit Entities – Revenue Recognition*, regarding transfers of assets to a not-for-profit organization or charitable trust that raises or holds contributions for others. At August 31, 2013 and 2012, Scott & White's interest in the net assets of supporting foundations not eliminated upon consolidation was approximately \$7,235,000 and \$6,983,000, respectively.

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Medical Claims Payable

Medical claims payable represent management's best estimate of the ultimate net cost of all reported and unreported claims and claim adjustment expenses incurred through August 31, 2013 and 2012. Reserves for unpaid claims are actuarially estimated using individual case-basis valuations and statistical analysis. These estimates are subject to the effects of trends in claim severity and frequency. Although considerable variability is inherent in such estimates, management believes that reserves for unpaid claims are adequate. The estimates are continually reviewed and adjusted as necessary as experience develops or new information becomes known. Such adjustments are included in operations when determined. There were no material adjustments to these estimates recorded during the years ended August 31, 2013 or 2012.

Contributions, Gifts, and Bequests

Scott & White records contributions, gifts, and bequests of cash or other assets at estimated fair value on the date of receipt. If a contribution, gift, or bequest of cash or other assets is received by Scott & White with a time or purpose restriction, Scott & White records the contribution, gift, or bequest as a temporarily or permanently restricted contribution.

When a time or purpose restriction is fulfilled, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the consolidated statements of operations as research, education, and other nonoperating activity or in the consolidated statements of changes in net assets as net assets released from restrictions for capital expenditures.

Scott & White's temporarily restricted net assets are primarily restricted for research, education, capital projects, and medical care programs.

Scott & White's permanently restricted net assets are primarily restricted for educational and research purposes. Unless explicitly restricted by donors, income from permanently restricted net assets is recorded as temporarily restricted until appropriated for expenditure.

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Pledges and grants receivable are scheduled to be collected as follows

	August 31	
	2013	2012
	<i>(In Thousands)</i>	
Less than one year	\$ 5,882	\$ 5,733
One to five years	10,066	13,771

Reserve for uncollectible pledges	(1,915)	(1,976)
Total pledges receivable, net	\$ 13,272	\$ 17,066

Pledges and grants receivable are reported as assets limited as to use on the consolidated balance sheets. They are further classified as either for restricted purposes or internally designated for specific purposes based on presence or absence of donor restrictions.

Net Patient Service and Premium Revenue

Net patient service revenue is recognized in the period in which services are performed. Net patient service revenue is reported at estimated net realizable amounts due from patients, third-party payers, and others for services rendered and includes estimated revenue adjustments due to audits, reviews, investigations, and bad debts. Revenue adjustments are considered in the recognition of revenue in the period the related services are rendered, and such amounts are adjusted in future periods as better information becomes known or as years are no longer subject to such audits, reviews, or investigations.

Premium revenue is recognized during the period in which members are entitled to receive covered health care benefits. Unearned premiums are determined on a daily pro rata basis. For the years ended August 31, 2013 and 2012, net patient service and premium revenue included premium revenue of \$571,877,000 and \$572,196,000, respectively. Premium revenue from local, state, and federal agencies accounted for 40.2% and 45.8% of total premium revenue in 2013 and 2012, respectively.

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Charity Care

Scott & White provides care without charge or at amounts less than its established rates to patients who meet certain criteria under its charity policy. Because Scott & White does not pursue collection of amounts determined to qualify as charity care, they are not reported as revenue. In 2013, prior to application of disproportionate share funds of approximately \$19,594,000 received from the state of Texas, the cost of charity care provided to patients was approximately \$50,052,000. In 2012, prior to application of disproportionate share funds of approximately \$12,621,000 received from the state of Texas, the cost of charity care provided to patients was approximately \$77,817,000. The cost basis of charity care was determined using a cost-to-charge ratio methodology defined by the American Hospital Association. In 2013, Scott & White amended its charity care policy, which resulted in a decrease in the amount of presumptive charity recognized in 2013 as compared to 2012.

Health Insurance Program Reimbursement

Laws and regulations governing the Medicare and Medicaid programs are extremely complex and are subject to interpretation. Federal regulations require the submission of annual cost reports covering medical costs and expenses associated with services provided to program beneficiaries. Medicare and Medicaid cost report settlements are estimated in the period services are provided to beneficiaries. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. The 2013 and 2012 net patient service and premium revenue increased approximately \$9,824,000 and \$6,536,000, respectively, due to changes in allowances previously estimated as a result of the final settlements for years that are no longer subject to audits, reviews, or investigations. Scott & White believes that it is in compliance with all applicable Medicare and Medicaid laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing.

Certain payments for services provided under the Medicare and Medicaid programs and other organizations are subject to review of the medical necessity of admission and propriety of discharge, diagnosis, and coding. As part of the Tax Relief and Health Care Act of 2006, Congress directed the expansion of the Recovery Audit Contractors (RAC) reviews. Management believes adequate allowance has been provided for possible adjustments that might result from retrospective billing reviews, including the ongoing or future RAC reviews.

Medicare cost reports filed by Scott & White for all years before 2009 have been audited and settled as of August 31, 2013. Certain years prior to 2009 are under appeal.

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Amounts due to the Medicare and Medicaid programs totaled approximately \$16,047,000 and \$10,428,000 at August 31, 2013 and 2012, respectively, and are reported in due to third-party payers in the consolidated balance sheets

During 2012, the proposed changes to Medicaid in Texas under the Medicaid Transformation and Quality Improvement Program and the March 2012 legislatively-mandated expansion of Managed Medicaid resulted in the discontinuation of the Upper Payment Limit (UPL) supplemental payment program in the state. The new programs created to continue these supplemental payments are Uncompensated Care (UC) and Delivery System Reform Incentive Payments (DSRIP). During 2013, Scott & White began to participate in these programs through 3 regional health partnerships. For the years ended August 31, 2013 and 2012, Scott & White recognized revenue of approximately \$23,061,000 and \$2,747,000, respectively, under these programs and these amounts are reflected as an increase in net patient service revenue.

Nonoperating Gains and Losses

Nonoperating gains and losses include unrestricted contributions, gifts and bequests, investment income, research and education expenditures net of assets released from restrictions for research and education expenditures and related grant income, interest rate swap activity, income from investment in unconsolidated entity, and other income, gains, and losses unrelated to Scott & White's primary operations.

Performance Indicator

The performance indicator is (deficiency) excess of revenues over expenses in the consolidated statements of operations, which includes all changes in unrestricted net assets other than net assets released from restrictions for capital expenditures, change in pension and other postretirement benefit liabilities, and unrealized gains and losses on other-than-trading investment securities.

Income Tax

Scott & White evaluates its income tax positions in accordance with ASC 740, *Income Taxes*, regarding accounting for uncertainty in income taxes. ASC 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. There are no material uncertain income tax positions as of August 31, 2013 or 2012.

2. Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management of Scott & White to make assumptions, estimates, and judgments that affect the amounts reported in the financial statements, including the notes thereto, and related disclosures of commitments and contingencies, if any. Scott & White considers critical accounting policies to be those that require more significant judgments and estimates in the preparation of its consolidated financial statements, including the following: recognition of net patient receivables and related revenues, including contractual allowances and provisions for bad debt, settlements with state and federal government programs, reserves for losses and expenses related to health care professional and general liabilities, determination of fair values of certain financial instruments, risks and assumptions for measurement of medical claims incurred but not reported, and defined benefit liabilities. Management relies on historical experience and on other assumptions believed to be reasonable under the circumstances in making its judgments and estimates. Actual results could differ materially from these estimates.

New Accounting Pronouncements

In July 2011, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2011-07, *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities*, which is intended to increase transparency about a health care entity's net patient service revenue and related allowance for doubtful accounts. This update requires certain health care entities to change the presentation of their statement of operations by reclassifying the provision for bad debts associated with patient service revenue from an operating expense to a deduction from patient service revenue. Additionally, these health care entities are required to provide enhanced disclosures about their policies for recognizing revenue and assessing bad debts. Scott & White adopted the provision of ASU 2011-07 beginning September 1, 2011.

3. Net Patient Service Revenue and Net Patient Accounts Receivable

The presentation of the provision for bad debts as a reduction of patient service revenue is based on an entity-wide assessment of the significance of patient revenue that is recognized without assessing patients' ability to pay. The following is a summary of Scott & White's patient service revenue, net of contractual allowances (before the provision for bad debts) by major payer. Medicare and Medicaid managed plans are grouped with Medicare and Medicaid, respectively.

	August 31	
	2013	2012
	<i>(In Thousands)</i>	
Medicare	\$ 659,066	\$ 615,621
Medicaid	119,337	125,508
Commercial	803,781	789,425
Self-insured	55,368	54,945
All other/self-pay	206,664	274,438
	1,844,216	1,859,937
	(273,309)	(278,852)
	\$ 1,570,907	\$ 1,581,085

The allowance for doubtful accounts was approximately \$175,303,000 and \$173,324,000 as of August 31, 2013 and 2012, respectively. These balances as a percentage of accounts receivable, net of contractual allowances were approximately 50% and 45% as of August 31, 2013 and 2012, respectively.

The following is a summary of Scott & White's allowance for doubtful accounts activity:

	August 31	
	2013	2012
	<i>(In Thousands)</i>	
Balance at beginning of year	\$ 173,324	\$ 124,878
Provision for bad debts	225,660	214,794

3. Net Patient Service Revenue and Net Patient Accounts Receivable (continued)

Scott & White continually monitors the allowances established for its patients accounts receivable. During fiscal year 2013, Scott & White determined the historical collection trends on which its accounts receivable allowances are based was not indicative of actual collections and recorded a \$52,000,000 increase in these allowances in May 2013. This adjustment was determined to be a change in estimate and is reflected in 2013 operating results and is a result of enhancements to its revenue recognition process in response to ongoing changes and increased complexities in the healthcare industry.

4. Investment in Unconsolidated Entity

In fiscal year 2008, Scott & White acquired a 32% membership interest in Metroplex Adventist Hospital (MAH), a Texas nonprofit corporation, located in Killeen, Texas. Prior to execution of the membership interest agreement, Adventist Health System Sunbelt Healthcare Corporation was the sole member of MAH. Scott & White accounts for its interest in MAH under the equity method of accounting.

At August 31, 2013 and 2012, the difference between the amount at which the investment in MAH was carried and Scott & White's interest in the underlying net assets of MAH was \$5,754,000 and \$7,038,000, respectively. The excess cost over interest in the underlying net assets of MAH is being amortized over 10 years, which was determined to be the lesser of the approximate remaining life of the assets to which the excess cost over carrying value relates or the period of time from the consummation of the membership interest agreement to the point at which the membership interest agreement may be terminated without cause. Scott & White's interest in the (losses) income of MAH was \$(52,000) and \$3,871,000 for fiscal years 2013 and 2012, respectively, and is included as a component of research, education, and other nonoperating activity on the statements of operations.

5. Self-Insured Liabilities

Scott & White self-insures substantially all of its professional liability risk through a wholly owned insurance subsidiary. Commercial insurance policies are maintained to insure claims exceeding \$7,000,000 individually or \$35,000,000 in the aggregate during 2013 on a claims-made basis. Self-insured liabilities are recorded for incurred but not reported claims and reported claims based on estimates by independent actuaries. Assets have been designated to satisfy professional and general liabilities and are reported in the consolidated balance sheets as assets limited as to use for restricted purposes.

6. Reinsurance of Health Maintenance Organization Medical Claims

Scott & White's health maintenance organization cedes certain premium revenues and medical claims under reinsurance agreements. The ceded reinsurance agreements provide Scott & White with increased capacity to write larger risks and maintain its exposure to loss within its capital resources. Scott & White's health maintenance organization is currently a party to reinsurance contracts under which it is reimbursed for a percentage of claim expenses incurred in excess of a deductible and up to a maximum benefit per member per year.

Under these contracts, Scott & White is not relieved of its primary obligation to provide health care coverage to members. The annual deductible ranged from \$150,000 to \$700,000 per member for the year ended August 31, 2013, and ranged from \$100,000 to \$700,000 per member for the year ended August 31, 2012. The maximum benefit per member ranged from \$3,000,000 to \$10,000,000 for the years ended August 31, 2013 and 2012. Coinsurance benefits for the years ended August 31, 2013 and 2012, vary by type of service.

7. Long-Term Debt (continued)

Certain entities within Scott & White are members of the Scott & White Obligated Group (Obligated Group). Obligated Group members are jointly and severally liable under a Master Trust Indenture (MTI) to make all payments required with respect to obligations secured under the MTI. Obligated Group members have pledged and assigned to the Master Trustee a security interest in all of their rights, title, and interest in their pledged revenues and proceeds thereof. Under the MTI, the Obligated Group was obligated to pay \$926,525,000 and \$675,680,000 at August 31, 2013 and 2012, respectively.

In March 2013, Scott & White issued Series 2013A Revenue Bonds with an aggregate principal of \$176,690,000. Series 2013A bonds mature on various dates through August 2043, and interest is payable semiannually in February and August of each year. Simultaneous to the issuance of its Series 2013A bonds, Scott & White issued Series 2013B Revenue Bonds. The Series 2013B bonds were issued as direct placement variable rate bonds. The Series 2013B bonds mature in 2045, with an initial put date in 2023. Interest is payable monthly. Proceeds of the Series 2013B bonds along with the majority of proceeds for the Series 2013A bonds were used to advance refund Series 2006 FHA Revenue Bonds. With the advance refunding of the Series 2006 bonds, Scott & White recognized a \$66,172,000 loss on extinguishment of debt. The loss was due to the write-off of a significant discount associated with the 2006 bonds as well as the escrow funding required to make future interest payments on the 2006 bonds. The remaining portion of the Series 2013A bonds were used to fund development and construction costs of various expansion and construction projects.

In March 2013, Scott & White also issued Series 2013C Revenue Bonds to refinance the Series 2008-2 bonds. Series 2013C bonds were issued as direct placement variable rate bonds. The Series 2013C bonds mature in 2046, with an initial put date in 2022.

In June 2010, Scott & White issued Series 2010 Revenue Bonds with a total par amount of \$345,775,000. The majority of the proceeds are being used to fund development and construction costs of various expansion and construction projects. The Series 2010 bonds mature on various dates through August 2045.

Scott & White's Series 2008 Revenue Bonds were issued as variable rate demand bonds in June 2008. They were originally issued in three subseries with a total par amount of \$236,395,000. In October 2010, the Series 2008-3 bonds were refunded with a tax-exempt note in the amount of \$56,225,000 as part of a strategy to manage maturities of the irrevocable

direct-pay letters of credit used to support the payment of principal and interest on the Series 2008 bonds. In March 2013, the Series 2008-2 bonds were refunded with the Series 2013C bonds. The direct-pay letters of credit associated with the Series 2008-2 and 2008-3 bonds were terminated at the time of refunding. The irrevocable direct-pay letter of credit associated with the Series 2008-1 bonds was replaced in April 2011 in advance of its stated expiration. Unless it is extended, terminated early, or replaced, the letter of credit supporting the Series 2008-1 bonds will expire April 11, 2015.

In August 2008, Scott & White issued the Series 2008A Revenue Bonds with a total par amount of \$172,425,000. Proceeds were used to advance refund the outstanding principal of the Series 2000B and Series 2001 Revenue Bonds and pay costs of issuance of the Series 2008A Revenue Bonds. The Series 2008A bonds mature on various dates through August 2031. Interest is paid semiannually in February and August of each year.

As of August 31, 2013 and 2012, Scott & White has \$137,309,000 and \$115,173,000, respectively, in additional long-term debt, which includes capitalized leases, notes payable to others, and lines of credit drawn.

The maturities of Scott & White's long-term debt and capital lease obligations as of August 31, 2013, are shown below (in thousands):

7. Long-Term Debt (continued)

Total interest expense incurred during fiscal 2013 and 2012 was approximately \$23,165,000 and \$27,163,000, respectively, net of approximately \$18,340,000 and \$17,149,000 of capitalized interest costs in 2013 and 2012, respectively. Interest paid during fiscal years 2013 and 2012 was approximately \$50,798,000 and \$44,116,000, respectively, including amounts capitalized.

The estimated fair value of Scott & White's debt is \$1,122,915,000 and \$1,144,224,000 at August 31, 2013 and 2012, respectively. Fair values were derived from market quotes obtained from an independent financial advisor and are considered Level 2 fair value measurements.

The bond indentures and other interim financing agreements, including the revolving lines of credit, each contain certain restrictive covenants, including minimum levels of cash and debt service coverage. Management believes Scott & White is in compliance with all financial covenants.

8. Interest Rate Swap Agreements

Interest rate swap agreements (derivative agreements) between Scott & White and third parties (counterparties) provide for the periodic exchange of payments between the parties based on changes in a defined index and a fixed rate. Derivative agreements expose Scott & White to market risk and credit risk.

Credit risk is the risk that contractual obligations of the counterparties will not be fulfilled. Concentrations of credit risk relate to groups of counterparties that have similar economic or industry characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. Counterparty credit risk is managed by requiring high credit standards for Scott & White's counterparties. The counterparties to these contracts are financial institutions that carry investment-grade credit ratings. The interest rate swap agreements contain certain collateral provisions applicable to Scott & White and counterparties to mitigate credit risk. Scott & White does not anticipate nonperformance by its counterparties.

Market risk is the adverse effect on the value of Scott & White's swap agreements that results from a change in interest rates. The market risk associated with interest rate changes is managed by establishing and monitoring parameters that limit the types and degrees of market risk that may be undertaken. Management also mitigates market risk through periodic reviews of its

8. Interest Rate Swap Agreements (continued)

derivative positions in the context of its blended cost of capital. Scott & White can terminate any of the swap agreements at any time and would make or receive a payment depending on the fair value of the swap agreements on the date of termination.

At August 31, 2013, Scott & White has interest rate swap agreements with a total notional amount of \$480,475,000, as compared to \$566,285,000 at August 31, 2012. Five of the seven fixed payer interest rate swap agreements are associated with the Series 2008-1 bonds, the Series 2013C bonds, and a variable rate tax-exempt note executed in October 2010.

In February 2011, Scott & White entered into two fixed receiver interest rate swap agreements with the intent to offset the cash flows of the two fixed payer swaps that were not associated with outstanding debt. In anticipation of associating one of the forward fixed payer swaps with the 2013 bonds, Scott & White terminated the forward fixed receiver swap with a notional amount of \$82,230,000 in February 2013. The termination resulted in a payment of \$4,431,000 from the counterparty to Scott & White. In March 2013, Scott & White issued its Series 2013B bonds and associated the fixed payer interest rate swap agreement with a notional amount of \$82,715,000 with the bonds.

Scott & White has experienced negative mark-to-market valuations in its swap positions resulting in liabilities to the counterparties that exceeded contractually established thresholds. Since Scott & White's credit rating determines the required collateral threshold amount related to the majority of swap agreements, a downgrade in credit rating could have significant impact on collateral posting requirements. To manage the collateral posting requirements, Scott & White amended all swap agreements with the counterparties to increase or remove minimum threshold collateral posting requirements, or to allow letters of credit to become a form of eligible collateral. At August 31, 2013, a letter of credit for an amount not to exceed \$50,000,000 was available for collateral support related to the three fixed forward swap agreements outstanding at that date. The counterparty holds the undrawn letter of credit, and an actual draw would only be initiated if an event of default or a termination event occurs and is continuing. As of August 31, 2013, no amounts have been drawn on the letter of credit.

Net settlement payments on interest rate swap agreements totaled \$6,715,000 and \$11,516,000 for the years ended August 31, 2013 and 2012, respectively. Net settlement payments and the change in fair value on interest rate swap agreements are reported in interest rate swap activity in the nonoperating section of the consolidated statements of operations. The fair value of interest

9. Employee Benefit Plans

Defined Contribution Plans

Scott & White provides defined contribution plans to eligible employees. There are three types of primary contributions to these plans: employer automatic contributions, employee contributions, and employer matching contributions. Employer automatic contributions are based on a percentage of each participant's compensation and can vary based on years of service. Employer matching contributions are based on each participant's contribution to his or her plan account each payroll period. Scott & White's contribution expense to its defined contribution plans was approximately \$63,256,000 and \$58,465,000 in 2013 and 2012, respectively.

Defined Benefit Plans

Scott & White has two defined benefit retirement plans at August 31, 2013. These two defined benefit retirement plans are collectively referred to herein as the Pension Plans. The Pension Plans are currently frozen. Benefits under the Pension Plans are based on each employee's years of service and compensation computed as of the date the Pension Plans were frozen.

The following section sets forth a reconciliation of benefit obligations, plan assets, and balance sheet position for the Pension Plans (in thousands):

The amounts recognized as an increase (decrease) in unrestricted net assets totaled \$10,770,000 and \$(8,576,000) for the years ended August 31, 2013 and 2012, respectively. The amount in unrestricted net assets that has not yet been recognized as a component of net periodic benefit cost is \$3,144,000 at August 31, 2013, which consists entirely of an actuarial net loss. Of this amount, \$55,000 is expected to be recognized in expense during fiscal year 2014.

Components of net periodic benefit cost for the year were as follows (in thousands):

	August 31	
	2013	2012
Interest cost	\$ 2,117	\$ 2,360
Expected return on plan assets	(2,974)	(2,648)
Amortization of actuarial loss	738	228
Net periodic benefit income	<u>\$ (119)</u>	<u>\$ (60)</u>

Weighted-average assumptions used to determine the benefit obligation and net periodic benefit cost were as follows:

	August 31	
	2013	2012
Discount rate used to determine the benefit obligation	4.62%	3.61%
Discount rate used to determine the benefit cost	3.61	4.97
Expected long-term return on plan assets	8.00	8.00

In determining the expected long-term rate of return on plan assets, a building block approach was used. Historical markets are studied and long-term historical relationships between equities and fixed income are preserved consistent with the widely accepted capital market principle that assets with higher volatility generate a greater return over the long run. Current market factors such as inflation and interest rates are evaluated before long-term market assumptions are determined. The long-term portfolio return is established via a building block approach with proper consideration of diversification and rebalancing. Peer data and historical returns are reviewed to check for reasonability and appropriateness.

Information for pension plans with accumulated benefit obligations in excess of plan assets is as follows (in thousands)

	August 31	
	2013	2012
Projected benefit obligation	\$ 51,951	\$ 59,416
Accumulated benefit obligation	51,591	59,416
Fair value of plan assets	42,243	37,117

The following section sets forth information on the assets of the Texas Hospital Association Retirement Trust (Master Trust), in which the Pension Plans participate

The weighted-average asset allocations for the Master Trust by asset category were as follows

	Percentage of Master Trust Assets August 31	
	2013	2012
Equity securities	77%	86%
Debt securities	22	12
Cash	1	2
Total	100%	100%

A total return investment approach is used, whereby a mix of equities and fixed income investments is used to maximize the long-term return of plan assets for a prudent level of risk. Risk tolerance is established through careful consideration of plan liabilities, plan funded status, and corporate financial condition. The investment portfolio contains a diversified blend of equity and fixed income investments. Furthermore, equity investments are diversified across U S and non-U S stocks, as well as growth, value, and small and large capitalizations. Investment risk is measured and monitored on an ongoing basis through quarterly investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

The Master Trust invests plan assets for the plans of approximately 30 participating hospitals. The Master Trust includes assets for both defined benefit and defined contribution plans. The investment objectives for the Master Trust reflect two general goals:

1. To provide returns that improve the funded status of the participating hospitals' plans over time and reduce pension costs.
2. To receive favorable performance from the pension fund's active managers in exchange for the fees paid to the investment management fund.

Based on the Master Trust's risk posture, the trustees developed the following asset mix targets:

	<u>Target Allocation</u>
Large cap U S equities	50%
Small cap U S equities	15
International equities	10
Fixed income	25

The Pension Plans' interest in the Master Trust is considered an asset measured at fair value using Level 2 inputs from the perspective of the Pension Plans. At August 31, 2013, 46% and 54% of the assets in the Master Trust were measured using Level 1 and Level 2 inputs, respectively. At August 31, 2012, 47% and 53% of the assets in the Master Trust were measured using Level 1 and Level 2 inputs, respectively.

Other Postretirement Benefits

Certain Scott & White employees participate in Scott & White's medical postretirement benefit plan. This plan provides medical and dental benefits to retirees who meet specific eligibility requirements upon retirement. The plan is unfunded and requires covered retirees to contribute a portion of the cost of benefits based on age at retirement and years of service. Scott & White uses an incremental cost approach in estimating the annual accrued cost related to the postretirement benefit plan, which is based on estimates by independent actuaries. Such an approach is considered appropriate since substantially all of the health care benefits are provided by Scott & White to retirees, using Scott & White's health maintenance organization to manage the care provided.

In August 2013, the benefits under the plan were modified such that future retirees (current and future employees) who have not earned access to the plan as of December 31, 2013, will have fewer benefits. They will no longer be eligible for retiree medical benefits before age 65 but will still earn the right to benefits after age 65. This is considered a "negative plan amendment" under ASC 715, *Compensation – Retirement Benefits*, and not a curtailment as some level of benefits is still available to all employees who become eligible. As a result of the plan amendment, the accumulated postretirement benefit obligation decreased by approximately \$7 million and is reflected within other changes in net assets on the consolidated financial statements. The

Scott & White Healthcare

amendment has appropriately been reflected as of August 31, 2013, as it was approved by the appropriate governance in August 2013 and communicated to the employees in a reasonable period of time

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 introduced a prescription drug benefit under Medicare (Medicare Part D), as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. Scott & White has not made the determination that the prescription drug benefit provided by its medical postretirement benefit plan is actuarially equivalent to the benefit provided by Medicare Part D. Therefore, the measures of the accumulated benefit obligation or net periodic benefit cost do not reflect any amounts associated with the federal subsidy.

The amount recognized as an increase (decrease) in unrestricted net assets totaled \$8,472,000 and \$(4,883,000) for the years ended August 31, 2013 and 2012, respectively. The amount in unrestricted net assets that has not yet been recognized as a component of net periodic benefit cost is \$(348,000) at August 31, 2013, which consists of an actuarial net loss of \$6,327,000 and a net prior service credit of \$6,675,000. Of this amount, \$139,000 is expected to be recognized as a reduction to net periodic benefit cost during fiscal year 2014.

Components of net periodic benefit cost for the period were as follows (in thousands):

	August 31	
	2013	2012
Interest cost	\$ 643	\$ 591
Employer service cost	1,220	785
Net prior service cost amortization	58	56
Net loss amortization	384	78
Net periodic benefit cost	<u>\$ 2,305</u>	<u>\$ 1,510</u>

Weighted-average assumptions used to determine the benefit obligation and net periodic benefit cost were as follows:

	August 31	
	2013	2012
Discount rate used to determine the benefit obligation	4.0%	3.5%
Discount rate used to determine the benefit cost	3.5%	4.6%
Health care cost trend rate	8.0%	9.0%
Ultimate health care cost trend rate	5.0%	5.0%
Year of ultimate trend rate	2031	2031
Expected long-term return on plan assets	N/A	N/A

The effect of a 1% increase in the assumed health care cost trend rates on the accumulated postretirement benefit obligation and on the aggregate of employer service cost and interest cost as of and for the year ended August 31, 2013, would be an increase of \$1,073,000 and \$353,000, respectively. The effect of a 1% decrease in the assumed health care cost trend rates

10. Assets Limited as to Use

Scott & White's investment portfolio includes investments classified as trading and other than trading. Investments classified as trading were \$711,343,000 and \$707,488,000 at August 31, 2013 and 2012, respectively.

Investments classified as other than trading were \$85,424,000 and \$120,601,000 at August 31, 2013 and 2012, respectively. The cost basis of investments classified as other than trading was \$78,238,000 and \$117,478,000 at August 31, 2013 and 2012, respectively. Investments in other than trading fixed income securities with stated maturities are presented in the table below by their contractual maturity.

All interest and dividends, realized gains (losses), and unrealized gains (losses) on investments classified as trading as well as all interest and dividends and realized gains (losses) on investments classified as other than trading are included in investment income in the consolidated statements of operations. Investment income included in the consolidated statements of operations consists of the following:

	Year Ended August 31	
	2013	2012
	<i>(In Thousands)</i>	
Net realized gains	\$ 9,251	\$ 4,504
Net unrealized gains	21,596	983
Dividends and interest	8,422	11,331
	<u>\$ 39,269</u>	<u>\$ 16,818</u>

Unrealized (losses) gains on investments classified as other than trading were \$(3,861,000) and \$1,247,000 for the years ended August 31, 2013 and 2012, respectively. Unrealized gains (losses) on investments classified as other than trading are included in other changes in unrestricted net assets in the consolidated statements of changes in net assets. For other-than-trading debt securities in an unrealized loss position, Scott & White does not intend to sell the investments and it is not more likely than not that Scott & White will be required to sell the investments before recovery of their amortized cost base. For other-than-trading equity securities, Scott & White has evaluated the near-term prospects of the investment in relation to the severity and duration of the impairment and based on that evaluation has concluded that it has the ability and intent to hold these investments until a recovery of fair value.

Sale-Leaseback Agreements

Scott & White accounts for sale-leaseback transactions under the provisions of ASC 840-40, *Leases—Sale-Leaseback Transactions*.

During fiscal year 2013, Scott & White entered into one sale-leaseback transaction. Computer equipment with an approximate carrying value of \$1,298,000 was sold for \$1,528,000. Concurrent with the sale, Scott & White entered into an operating lease agreement to lease back the sold computer equipment. As a result of this transaction, Scott & White recorded a deferred gain of approximately \$229,000 to be recognized as a reduction of lease expense over a period equal to the term of the operating lease. At August 31, 2013, the deferred gain related to this sale-leaseback transaction remaining to be recognized was approximately \$172,000 and is included in other liabilities in the consolidated balance sheet.

During fiscal year 2012, Scott & White entered into two sale-leaseback transactions. Property and equipment with an approximate carrying value of \$13,863,000 was sold for \$17,913,000. Concurrent with the sales, Scott & White entered into operating lease agreements to lease back the sold property and equipment. As a result of these transactions, Scott & White recorded deferred gains of approximately \$4,050,000 to be recognized as a reduction of lease expense over a period equal to the term of the operating lease. At August 31, 2013, the deferred gain related to these sale-leaseback transactions remaining to be recognized was approximately \$2,789,000 and is included in other liabilities in the consolidated balance sheet.

Legal Proceedings

Scott & White is a defendant in various legal proceedings arising in the ordinary course of business. Although the results of litigation cannot be predicted with certainty, management believes the outcome of pending litigation will not have a material adverse effect on Scott & White's consolidated financial statements.

13. Fair Values of Financial Instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). ASC 820, *Fair Value Measurement*, establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy defined by ASC 820 are listed below in order of priority:

Level 1 – Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market that the reporting entity has the ability to access at the measurement date.

Level 2 – Fair value is based on quoted prices in markets that are not active, quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Fair value is based on prices or valuation techniques that require inputs which are both significant to the fair value measurements and unobservable. These inputs reflect management's judgment about the assumptions that a market participant would use in pricing the investment and are based on the best available information, some of which may be internally developed.

Scott & White estimates the values of its U.S. government agency securities, certain corporate fixed income securities, collateralized debt obligations, and interest rate swap agreements using Level 2 inputs. These investments are valued primarily using a market approach using inputs such as evaluated bid prices provided by third-party pricing services when quoted market values are not available. Interest rate swaps are valued using an income approach that utilizes present value techniques which are affected by inputs such as interest rate curves and credit rating. Valuation of Scott & White's Level 3 asset at August 31, 2012, is based on redemption value.

13. Fair Values of Financial Instruments (continued)

In addition, Scott & White has alternative investments, primarily partnership investment trusts (investment trusts), which provide Scott & White with a proportionate share of the investment gains and losses and take their positions in part through derivative contracts. Investments in investment trusts are accounted for using the equity method of accounting and are therefore excluded from the scope of ASC 820-10.

Interpretation of Relevant Law

The Board of Trustees of Scott & White has interpreted the Texas enacted version of the Uniform Prudent Management of Institutional Funds Act (UPMIFA) as requiring the preservation of the fair value of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, Scott & White classifies as permanently restricted net assets (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure by Scott & White in a manner consistent with the standard of prudence prescribed by Texas law. In accordance with Texas law, if relevant, the organization considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds:

- (1) The duration and preservation of the endowment fund
- (2) The purposes of the institution and the endowment fund

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

14. Endowments (continued)

- (3) General economic conditions
- (4) The possible effect of inflation and deflation
- (5) The expected total return from income and the appreciation of investments
- (6) Other resources of the institution
- (7) The investment policy of the organization

Return Objectives and Risk Parameters

Scott & White has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets. Endowment assets include donor-restricted assets that Scott & White must hold in perpetuity or for a donor-specified period as well as board-designated funds. Under this policy, as approved by the Board of Trustees, the endowment assets are invested among various asset classes to produce investment returns that exceed the price and yield results of the respective benchmark asset classes and peer groups while assuming a moderate level of investment risk. Actual returns in any given year vary.

Strategies Employed for Achieving Objectives

To satisfy its long-term rate-of-return objectives, Scott & White relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). Scott & White oversees its investment portfolio through an Investment Committee of the Scott & White Board of Trustees, and uses the recommendations of an independent investment consultant to manage the funds within the portfolio and review asset allocations.

Spending Policy and How the Investment Objectives Relate to Spending Policy

The appropriation for expenditure in any year will not exceed the Board of Trustees' approved appropriation and spending rate. The Board of Trustees' approved appropriation and spending rate takes into account Scott & White's historical long-term rate of return on investments and Scott & White's policy of acting to preserve the purchasing power of the endowment fund. As

Scott & White Healthcare

Notes to Consolidated Financial Statements (continued)

14. Endowments (continued)

such, Scott & White's Board of Trustees has resolved that each fiscal year the lesser of 75% of an endowment fund's investment return or 5% of the invested fund balance of an endowment fund (as of the end of the previous fiscal year) may be appropriated for expenditure

In establishing this policy, Scott & White considered the long-term expected return on its endowment. Accordingly, over the long term, Scott & White expects the current spending policy to allow its endowment to grow at a rate comparable to annual inflation. This is consistent with Scott & White's objective to maintain the purchasing power of the endowment assets.

15. Subsequent Events

Effective October 1, 2013, SWH and Baylor Health Care System, a Texas nonprofit corporation (BHCS), consummated their affiliation (the Affiliation) pursuant to an Affiliation Agreement (the Agreement) dated June 19, 2013. The Affiliation was accomplished through the creation of a new Texas limited liability company, Baylor Scott & White Health LLC (Baylor Scott & White Health). SWH and BHCS are equal members in Baylor Scott & White Health, which has control and substantial reserved powers over all SWH and BHCS material affiliates.

Management has evaluated subsequent events through January 15, 2014, the date the financial statements were available to be issued.
