"Unfunded Commitment" is only available for Private Equity Funds denominated in USD. "Estimated Profit/(Loss)" is the comparison of your cash adjusted "Estimated Value" to your "(Net Capital Called)/Distributed Since Inception". This is an estimated value and is not intended to be used for the purposes of estimated taxable income nor as a substitute for Schedule K-1. "Vintage Year" refers to the first year in which the private equity fund called capital.

Amounts shown above under "Estimated Capital Account Balance" for private equity funds are estimates of your value in the fund and are based on the latest fund-level values provided by the relevant funds as of the date noted below the value, which values may be as of a date (underlying fund value date) prior to the period covered by this statement. Therefore, such "Estimated Capital Account Balance" may not reflect the value of your interest for a specific private equity investment for the similar period. For additional information, please contact your J.P. Morgan representative.

Amounts shown above under "Estimated Value" for private equity funds are estimates based on the latest fund values received from each underlying fund, which values may be as of a date (underlying fund value date) prior to the period covered by this statement. The values provided by the underlying fund have been adjusted for any cash flows between your account and such fund that have occurred subsequent to the underlying fund value date to derive the "Estimated Value". Therefore, such "Estimated Value" may not reflect the value of your interest shown on any fund's actual books and records as of the date of this statement. For additional information, please contact your J.P. Morgan representative.

For private equity funds, amounts shown under "Estimated Value" are based on estimates provided by the underlying funds that are generally presented on a US GAAP basis, which records investments at fair value, or "marked-to-market". Most of these underlying funds also present their audited financial statements on a US GAAP basis (i.e., "marked-to-market"). However, some of these underlying funds present their audited financial statements using the Income Tax Basis of Accounting, which records investments "at cost" based on the accrual basis of accounting for Federal income taxes. Where the underlying fund provides periodic estimates on a "marked-to-market" basis but reflects investments "at cost" in its audited financial statements, the marked-to-market "Estimated Value" shown herein for a private equity fund may be materially different from the value reflected on such fund's audited financial statements (which are also based on the audited financial statements of the underlying fund).
