REPORT OF INDEPENDENT AUDITORS

The Board of Directors Confluence Health System

Report on Financial Statements

We have audited the accompanying consolidated financial statements of Confluence Health System (the Health System), which comprise the consolidated balance sheet as of December 31, 2013, and the related consolidated statements of operations, changes in net assets - release from restrictions, and cash flows for the year then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Health System, as of December 31, 2013, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements that collectively comprise the Health System's consolidated financial statements. The information on pages 24 through 26 is presented for purposes of additional analysis and is not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information on pages 24 through 26 has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain other procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying information on pages 24 through 26 is fairly stated in all material respects in relation to the consolidated financial statements as a whole.

SUPPLEMENTAL SCHEDULE OF INVESTING AND FINANCING ACTIVITIES

The Health System paid interest of \$7,795,953 during the year ended December 31, 2013.

As part of the affiliation as described in Note 1, during 2013 Wenatchee Valley Medical Center (WVMC) transferred the following assets and liabilities, which are included in "Due from affiliates," to the Health System:

Cash	\$ 11,870
Inventory	3,649,209
Other receivables	295,173
Hospital license	3,900,929
Prepaid assets	2,708,293
Other payroll liabilities	(1,017,775)
Net liability to WVMC upon transfer	 9,547,699

Note 1 - Organization

Confluence Health was formed in 2012 as a health system that represents an affiliation between Central Washington Health Services Association, dba Central Washington Hospital (the Association) (a not-for-profit organization) and Wenatchee Valley Medical Center (a for-profit organization). Effective January 1, 2013, the Association affiliated with Confluence Health, and Confluence Health became the sole member of the Association. The Board of Directors of Confluence Health consists of 9 community members and 6 physicians of Wenatchee Valley Medical Center (WVMC).

Confluence Health provides the administrative and shared functions for the health system. It plans to be a separate 501(c)(3) organization. Confluence Health has submitted the application to the IRS for 501(c)(3) not-for-profit tax exempt status. Confluence Health began operations on January 1, 2013, and now employs approximately 600 employees.

The mission statement of Confluence Health is:

We are dedicated to improving our patient's health by providing safe, high-quality care in a compassionate and cost-effective manner.

The affiliation was completed in 2013, at which time WVMC transferred its remaining nonphysician employees and its operations to Wenatchee Valley Hospital (a not-for-profit organization). Confluence Health is the sole member of Wenatchee Valley Hospital. The three affiliated entities, Central Washington Hospital, Wenatchee Valley Hospital, and Confluence Health, are referred to collectively as Confluence Health. The three entities have contracted with WVMC for physician services.

Principles of consolidation - The consolidated financial statements include the accounts of Central Washington Hospital, Wenatchee Valley Hospital, and Confluence Health. All intercompany amounts have been eliminated in consolidation.

Note 2 - Summary of Significant Accounting Policies

Use of estimates - The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents - Cash and cash equivalents include certain investments in highly liquid debt instruments with original maturities of three months or less.

Note 2 - Summary of Significant Accounting Policies (continued)

Patient accounts receivable - Accounts receivable are reduced by an allowance for doubtful accounts. In evaluating the collectibility of accounts receivable, the Health System analyzes its past history and identifies trends for each of its major payor sources of revenue to estimate the appropriate allowance for doubtful accounts and provision for bad debts. Management regularly reviews data about these major payor sources of revenue in evaluating the sufficiency of the allowance for doubtful accounts. For receivables associated with services provided to patients who have third-party coverage, the Health System analyzes contractually due amounts and provides an allowance for doubtful accounts and a provision for bad debts, if necessary (for example, for expected uncollectible deductibles and copayments on accounts for which the third-party payor has not yet paid, or for payors who are known to be having financial difficulties that make the realization of amounts due unlikely). For receivables associated with self-pay patients (which includes both patients without insurance and patients with deductible and copayment balances due for which third-party coverage exists for part of the bill), the Health System records a significant provision for bad debts in the period of service on the basis of its past experience, which indicates that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The difference between the standard rates (or the discounted rates if negotiated) and the amounts actually collected after all reasonable collection efforts have been exhausted is charged off against the allowance for doubtful accounts.

The Health System's allowance for doubtful accounts for self-pay patients is 65% of self-pay accounts receivable at December 31, 2013. In addition, the Health System's self-pay write-offs were \$10,454,000 for the year ended December 31, 2013.

Medical supplies - Medical supplies, composed primarily of medical and surgical inventories, are stated at the lower of replacement or market.

Assets limited as to use - Assets limited as to use primarily include assets held by trustees under indenture agreements and designated assets set aside by the board of trustees for future capital improvements, over which the board retains control and may, at its discretion, subsequently use for other purposes. Amounts required to meet current liabilities of the Health System have been reclassified in the consolidated balance sheet at December 31, 2013.

Investments in equity securities with readily determinable fair values and all investments in debt securities are measured at fair value in the consolidated balance sheet. Investment income or loss (including realized gains and losses on investments, interest, and dividends) is included in the excess of revenues over expenses unless the income or loss is restricted by donor or law. Unrealized gains and losses on investments are excluded from the excess of revenues over expenses unless the investments are trading securities.

Property and equipment - Property and equipment acquisitions are recorded at cost. Depreciation is provided over the estimated useful life of each class of depreciable asset and is computed on the straight-line method, which ranges from 3 to 40 years. Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

Note 2 - Summary of Significant Accounting Policies (continued)

Gifts of long-lived assets such as property and equipment are reported as unrestricted donations, unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as temporarily or permanently restricted donations. Absent explicit donor stipulations about how long those long-lived assets must be maintained, expirations of donor restrictions are reported when the donated or acquired long-lived assets are placed in service.

Deferred financing costs - Costs of bond financing related to bond issuance are amortized using the effective interest method over the 30-year life of the bonds.

Estimated malpractice costs - The provision for estimated medical malpractice claims includes estimates of the ultimate costs for both reported claims and claims incurred but not reported.

Federal income tax - The Health System is formed as three separate 501(c)(3) organizations and has submitted application to the IRS for not-for-profit tax exempt status for Confluence Health and Wenatchee Valley Hospital.

The Health System will operate as exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code except to the extent of unrelated business taxable income as defined under IRC Sections 511 through 515. Any unrelated business income generated is not significant; therefore, no provision for income taxes has been recorded. The Health System has adopted accounting for uncertain tax positions. The accounting standard prescribes a recognition threshold and measurement process for uncertain tax positions. As of December 31, 2013, the Health System had no uncertain tax positions requiring accrual.

Net patient service revenue - The Health System has agreements with third-party payors that provide for payments to the Association at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments. Net patient service revenue is reported at estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

Charity care - The Health System provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Because the Health System does not pursue collection of amounts determined to qualify as charity care, they are not reported as revenue.

Contributions received - Contributions received, including property or investments, are recorded as unrestricted, temporarily restricted, or permanently restricted support and net assets depending on the existence and/or nature of any donor restrictions.

Note 2 - Summary of Significant Accounting Policies (continued)

Net assets - Net assets of the Health System and changes therein are classified and reported as follows:

Unrestricted net assets - Net assets that are not subject to donor-imposed stipulations but can be designated by the Board of Directors.

Temporarily restricted net assets - Net assets subject to donor-imposed stipulations that may or will be met by actions of the Association and/or the passage of time. When a restriction expires, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of operations as net assets released from donor restrictions. Temporarily restricted net assets include assets restricted for a construction project. The associated receivable due from Central Washington Hospital Foundation was \$3,569,446 for the year ended December 31, 2013, and is expected to be received within five years.

Permanently restricted net assets - Net assets subject to donor-imposed stipulations that they be maintained permanently by the Health System. Donors of these assets may permit the Health System to use all or part of the income earned on any related investments for general or specific purposes. The Health System has no permanently restricted assets.

Donor-restricted gifts - Unconditional promises to give cash and other assets to the Health System are reported at fair value at the date the promise is received. Conditional promises to give and indications of intentions to give are reported at fair value at the date the gift is received. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified as unrestricted net assets and reported in the statements of operations and changes in net assets release from restrictions as assets released from restrictions. Donor-restricted contributions whose restrictions are met within the same year as received are reported as unrestricted contributions in the accompanying consolidated financial statements.

Excess of revenue over expenses - The consolidated statement of operations includes excess of revenue over expenses. Changes in unrestricted net assets that are excluded from excess of revenue over expenses, consistent with industry practice, include unrealized gains and losses on investments other than trading securities, permanent transfers of assets to and from affiliates for other than goods and services, contributions of long-lived assets (including assets acquired using contributions that by donor restriction were to be used for the purpose of acquiring such assets), management services, and other similar items.

Donated services - A substantial number of volunteers donate significant amounts of their time for the Health System's program activities. These donated hours are a necessary part of the Health System's activities because its services could not be sustained without such support and because these activities enhance the financial assets of the Health System. No dollar amounts have been reflected in the accompanying statements for these services because the services do not require specialized skills.

Note 2 - Summary of Significant Accounting Policies (continued)

Subsequent events - Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. The Health System recognizes in the consolidated financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing the consolidated financial statements. The Health System's consolidated financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after the balance sheet date and before financial statements are issued.

The Health System has evaluated subsequent events through June 18, 2014, which is the date the consolidated financial statements are issued, and concluded that there were no events or transactions that need to be disclosed.

Note 3 - Net Patient Service Revenue

The Health System has agreements with third-party payors that provide for payments to the Health System at amounts different from its established rates. A summary of the payment arrangements with major third-party payors is as follows:

Medicare - Inpatient acute care services rendered to Medicare program beneficiaries are paid at prospectively determined rates. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Beginning April 1, 2001, Central Washington Hospital qualifies for disproportionate share payments from Medicare. The disproportionate share payment rate is added on to the prospective rate paid on Medicare inpatients. Central Washington Hospital is eligible for a higher disproportionate share payment rate estimated at 13.39% in 2012. Central Washington Hospital met the criteria for this additional payment as a result of the high number of low-income patients served exceeding the eligibility threshold of qualified patient days as a percentage of total patient days. The majority of outpatient services are reimbursed on a prospective payment system or fee schedule. Central Washington Hospital's Medicare cost reports have been audited by the Medicare fiscal intermediary through 2012, with exception to the 2011 cost report. Central Washington Hospital's classification of patients under the Medicare program and the appropriateness of their admission are subject to an independent review by a peer review organization. Net revenue billed under the Medicare program totaled approximately \$138,605,000 in 2013.

Medicaid - Inpatient and outpatient services rendered to Medicaid program beneficiaries are reimbursed under a cost reimbursement methodology. The Health System is reimbursed at a tentative rate with final settlement determined after submission of annual cost reports by the Health System and audits thereof by the Medicaid fiscal intermediary. Net revenue billed under the Medicaid program totaled approximately \$23,288,000 for 2013.

The Health System has also entered into payment agreements with certain commercial insurance carriers and preferred provider organizations. The basis for payment to the Health System under these agreements varies from established charges.

Note 3 - Net Patient Service Revenue (continued)

The Health System recognizes patient service revenue associated with services provided to patients who have third-party payor coverage on the basis of contractual rates for the services rendered. For uninsured patients who do not qualify for charity care, the Health System recognizes revenue on the basis of its standard rates for services provided (or on the basis of discounted rates, if negotiated or provided by policy). On the basis of historical experience, a significant portion of the Health System's uninsured patients will be unable or unwilling to pay for the services provided. Thus, the Health System records a significant provision for bad debts related to uninsured patients in the period the services are provided. Patient service revenue, net of contractual allowances and discounts (but before the provision for bad debts), recognized in the period from these major payor sources is as follows.

	Third-Party		Total
	Payors	 Self-Pay	All Payors
Patient service revenue (net of contractual allowances and discounts) for the year ended			
December 31, 2013	\$ 340,758,134	\$ 17,180,843	\$ 357,938,977

Note 4 - Charity Care

The Health System maintains records to identify and monitor the level of charity care it provides. These records include the amount of charges forgone for services and supplies furnished under its charity care policy and the estimated cost of those services and supplies. The following information measures the level of charity care provided for the year ended December 31, 2013:

Charges forgone, based on established rates \$ 10,277,366

Management estimates charity care costs by calculating a ratio of cost to gross charges, and then multiplying that ratio by the gross uncompensated charges associated with providing care to charity patients. Charity care costs were \$4,859,260 for the year ended December 31, 2013.

Note 5 - Assets Limited as to Use

The composition of assets limited as to use at December 31, 2013, is set forth in the following table. Investments are stated at fair value.

By board designated for malpractice costs Pooled funds and mutual funds	\$ 2,729,000

Note 7 - Long-Term Debt

A summary of long-term debt at December 31, 2013, follows:

Series 2009 - Washington Health Care Facilities Authority Revenue Bonds, due through July 1, 2039, in principal payments ranging from \$1,725,000 to \$8,745,000 annually and interest ranging from 5% to 7%.	\$ 112,190,000
Utility Local Improvement District No. 2 - loan payable due in 2028, payable in 20 annual installments of principal with interest. The interest rate is fixed at 2.9%.	232,260
Less current portion	112,422,260 1,824,516
	\$ 110,597,744

In July 2009, Central Washington Hospital advance refunded the Series 2001 Revenue Bonds with the proceeds of the Series 2009 Revenue Bonds by depositing in escrow accounts amounts that, with interest, were sufficient to meet principal, interest, and premium payments on the advance refunded debt. As a result of the refinancing, the Series 2001 Revenue Bonds have been legally satisfied. Therefore, neither the advance refunded debt nor the related trust funds are reflected in the accompanying consolidated balance sheet.

Note 7 - Long-Term Debt (continued)

The Washington Health Care Facilities Authority (the Authority) issued special-obligation Series 2009 Revenue Bonds and loaned the proceeds to Central Washington Hospital. The Series 2009 Revenue Bonds are payable solely from payments made by Central Washington Hospital and are collateralized by an interest in Central Washington Hospital's gross receivables, gross receipts, equipment, a deed of trust in certain property, and funds held by the trustee under the bond indenture agreement (Note 5).

The Bond Loan and Security Agreement and the Trust Indenture contain restrictive covenants that require, among other matters, that the Association maintain minimum debt service coverage, excess margin, and cushion ratios. The Association is in compliance with these financial covenants at December 31, 2013.

Principal maturities of long-term debt are as follows:

2014	\$ 1,825,000
2015	1,915,000
2016	2,030,000
2017	2,140,000
2018	2,275,000
Thereafter	102,237,260
	\$ 112,422,260

A summary of interest cost on borrowed funds held by the trustee under the Series 2009 Revenue Bond indentures during the year ended December 31, 2013, follows:

Interest expense \$ 7,593,638

Note 8 - Estimated Medical Malpractice Costs

Confluence Health is insured through a contract with an insurance company that provides coverage on a claims-made basis. In general, the Health System is self-insured for hospital medical malpractice insurance claims up to \$1,000,000 per incident with \$3,000,000 in aggregate. In addition, the Health System maintains excess malpractice insurance coverage on a claims-made basis up to \$25,000,000 per incident and in aggregate on both hospital and insured physician claims.

The Health System recognizes expenses associated with unasserted medical malpractice claims in the period in which the incidents are expected to have occurred rather than when a claim is asserted. Expenses associated with these incidents are estimated and based on actuarial assumptions of current settlement costs. In calculating the 2013 estimated malpractice liability, the Health System's actuaries used an undiscounted 90% confidence level for determining the present value of future claims.

Note 9 - Retirement Plan

The Health System has a defined contribution retirement plan for qualified employees. The Health System contributes an amount equal to a specified percentage of the employees' effective compensation as defined by the plan. The plan is a safe harbor plan where the Health System contributes a specified percentage of the employees' effective contribution based on the contribution made by the employee. Employees are eligible to participate in the plan after one year of continuous service. Plan benefits are fully vested to employees upon entry into the plan. The Health System may also make a discretionary contribution to the plan. There is a six-year vesting schedule for the discretionary contributions to the plan. The Health System made a discretionary contribution in 2013. Central Washington Hospital also has a defined contribution retirement plan for qualified employees who are part of a collective bargaining unit. Central Washington Hospital contributes an amount equal to a specified percentage of the employees' effective compensation as defined by the plan. Overall retirement plan costs charged to operations were approximately \$8,520,000. It is the Health System's policy to fund retirement plan costs accrued.

Note 10 - Self-Insured Plans

Liabilities related to self-insured plans in the amount of \$2,207,196 at December 31, 2013, were included in the accrued liabilities on the consolidated balance sheet.

Health - The Health System has a self-funded employee health care plan. The plan is funded from the Health System's unrestricted cash and cash equivalents. Confluence Health has stop-loss coverage through an insurance company that provides coverage for employee claims in excess of \$300,000 for individual claims. Payments by the Health System for health insurance expense were approximately \$13,219,000.

Workers' compensation - Central Washington Hospital has a self-insured workers' compensation plan for its employees. The Association pays its share of actual injury claims, maintenance of reserves, administrative expenses, and reimbursement premiums. Costs of the Association for workers' compensation expense were approximately \$1,006,000.

Unemployment - Central Washington Hospital has a self-insured unemployment plan for its employees. The Association pays its share of actual unemployment claims and administrative expenses. Payments by the Association for unemployment expense were approximately \$151,000.

Note 11 - Concentrations of Credit Risk

The Health System grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor agreements. The mix of receivables from patients and third-party payors at December 31, 2013, was as follows:

Medicare	40%
Medicaid	12%
Other payors	24%
Premera	12%
Commercial	12%_
	100%

Note 12 - Commitments and Contingencies

Operating leases - The Health System leases various equipment and facilities under operating leases. These operating leases are not long-term commitments. Total rental expense in 2013 for all operating leases was \$2.183,671.

Future minimum commitments are as follows for the years ended December 31:

2014	\$	656,331
2015		329,968
2016		237,679
2017		31,635
2018		15,133
Thereafter		718,827
	_ \$	1,989,573

Regulation and litigation - The Health System is involved in litigation and regulatory investigations arising in the course of business. After consultation with legal counsel, management estimates that these matters will be resolved without material adverse effect on the Health System's future financial position or results from operations.

Note 13 - Central Washington Hospital Foundation

The health care industry is subject to numerous laws and regulations from federal, state, and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government health care program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity continues with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by health care providers. Violations of these laws and regulations could result in expulsion from government health care programs, together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed. Management believes that the Health System is in compliance with the fraud and abuse regulations, as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation, as well as regulatory actions unknown or unasserted at this time.

Central Washington Hospital Foundation (the Foundation) is a separate not-for-profit corporation whose articles of incorporation identify Central Washington Hospital as the Foundation's primary beneficiary.

The Foundation is authorized by Central Washington Hospital to solicit contributions on its behalf. In the absence of donor restrictions, the Foundation has discretionary control over the amounts, timing, and use of its distributions.

Summarized financial information as of and for the year ended December 31, 2013, relating to the Foundation is as follows:

Assets, primarily cash and investments	\$	12,868,000
Payable to Central Washington Hospital Other liabilities	\$	3,568,000 859,000
		4,427,000
Net assets		8,441,000
	\$	12,868,000
Increase in net assets	<u>\$</u>	1,399,000

Note 14 - Fair Value of Assets

The Health System adopted fair value accounting, which establishes a framework for measuring fair value and expands disclosures about fair value measurements.

Fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. Fair value accounting also establishes a hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets.

Level 2 - Quoted prices in markets that are not considered to be active or financial instruments without quoted market prices, but for which all significant inputs are observable, either directly or indirectly.

 $\textbf{Level 3} \ \textbf{-} \ \textbf{Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets.}$

The following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheet, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Available-for-sale securities - Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, the fair values are estimated by using pricing models, quoted prices of securities with identical characteristics, or discounted cash flows. In certain cases where Level 1 or Level 2 inputs are not available, securities would be classified within Level 3 of the hierarchy.

Note 14 - Fair Value of Assets (continued)

Total gains are included in the consolidated statement of operations in investment income and unrealized gain on investments.

Note 15 - Fair Value of Financial Instruments

The following methods and assumptions were used by the Health System in estimating the fair value of its financial instruments.

Cash and cash equivalents - The Association maintains its cash and cash equivalent accounts, which at times may exceed federally insured limits, at financial institutions. The carrying amount reported in the consolidated balance sheet for cash and cash equivalents approximates its fair value.

Assets limited as to use - These assets consist primarily of cash and short-term investments and interest receivable. The carrying amount reported in the consolidated balance sheet is fair value.

Accounts payable and accrued expenses - The carrying amount reported in the consolidated balance sheet for accounts payable and accrued expenses approximates its fair value.

Estimated third-party payor settlements - The carrying amount reported in the consolidated balance sheet for estimated third-party payor settlements approximates its fair value.

Long-term debt - Fair values of Central Washington Hospital's revenue bonds are based on current traded value. The fair value of Central Washington Hospital's remaining long-term debt is estimated using discounted cash flow analyses, based on Central Washington Hospital's current incremental borrowing rates for similar types of borrowing arrangements. These instruments are categorized as Level 2 in the fair value hierarchy (Note 14).

The carrying amounts and fair values of the Association's financial instruments, excluding instruments that have carrying amounts that approximate fair value, as of December 31, 2013, are as follows:

	Carrying	Fair
	Amount	Value
Long-term debt	\$ 112,422,260	\$ 118,653,873

Note 16 - Affiliation Transactions

Professional services - As part of the affiliation described in Note 1 between Confluence Health, Wenatchee Valley Medical Center, and Central Washington Hospital, the Health System reimbursed Wenatchee Valley Medical Center for professional services rendered. Expenses incurred under this arrangement totaled \$38,059,737 for the year ended December 31, 2013. The amount due to WVMC for these services was \$23,866,168 at December 31, 2013.

Note payable to affiliate - Wenatchee Valley Medical Center and Confluence Health entered into a note payable for a maximum amount of \$30,000,000. The note bears interest at the prime rate plus 2% (3.25% at December 31, 2013). The terms of the note payable provide for quarterly interest and principal payments due in 19 installments of \$500,000. The aggregate balance is due in July 2021. The amount outstanding as due, including accrued interest to Wenatchee Valley Medical Center under this agreement, is \$2,000,000 at December 31, 2013.

Management services - The employees of Confluence Health provide administrative services to Wenatchee Valley Medical Center. In connection with services provided, WVMC reimbursed Confluence Health in the amount of \$12,044,472 for the year ended December 31, 2013.
