MISSION STATEMENT

Our mission statement remains the same: to improve the research on children illnesses in a medical environment that concentrates on lowering cost even though such reductions diminish medical research.

Reduced Medicare funding by Congress has translated to reduced HMO funding at all levels. The state of Medical care, hospitals, teaching of new doctors in America is getting worse. Existing medical payments has changed the way medicine is delivered, administered and practiced. To complicate the situation, the extent of the acute nature of the problem is recognized by few outside the medical community. In addition, the far reaching implications of the issues are not clearly recognized or understood by the general public.

One implication, the patient doctor contact in the office visit is limited to 7 minutes; further, by nature of patient payments the management of the patients illness has been shifted from the doctor to the patient and his family.

The limit of doctor and patient contact is grossly inadequate for patient welfare, especially when chronic pathologies require constant monitoring, constant education and constant review. Our present system discourages, in fact, prohibits that which is required for minimal good medicine.

Another implication is the effect congressional budget cuts have had on the curtailing of medical research and the diminution in the quality of Resident training.

These and other factors create an egregious diminution in the quality of the American medical system, with no end in sight.

The John Francis Foundation intends to devote much of its funds to address these issues, understand there implications and experiment with creative methods to address the problems created.

In the year **2013**:

A grant of \$35,000 was made to Allegheny General Hospital
Exempt # 251-322-626

"To provide for research & development of new surgical techniques that can be applied more noninvasively using cutting edge special imaging technology".

Through a grant from our foundation we continue support the "Children Musculoskeletal Motion Program". This is the first program of its kind to address the prevention of sequela hip joint disease in children, using a multi disciplinary approach.

In the year 2012, we continue to focus on our program with Legg-Calve-Perthes Disease affecting the hip in children. Perthes Disease affects otherwise normal children and its etiology is unknown. Children who have Perthes Disease of the hip are 10 times more likely to develop more severe forms of this disease when they become adults. Forty per cent of all children with Perthes Disease will require hip joint replacements as adults (Mcandrews and Weinstein)

We continue to offer as free services:

- > An expanded in- office learning center for patient and family education.
- > A focused weekend retreat format emphasizing the importance of required habits of daily living for optimum musculoskeletal health in the context of hip joint disability.
- > An on-line web site to monitor and document hip joint function and to provide feedback for patients, pediatricians and orthopaedic surgeons.
