Report of Independent Auditors

The Board of Directors
Mercy Health

We have audited the accompanying consolidated financial statements of Mercy Health, which comprise the consolidated balance sheets as of June 30, 2014 and 2013, and the related consolidated statements of operations, changes in net assets, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles, this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Mercy Health at June 30, 2014 and 2013, and the consolidated results of its operations, changes in net assets, and its cash flows for the years then ended in conformity with U S generally accepted accounting principles

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying consolidating balance sheet, statement of operations, and statement of changes in net assets are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the information is fairly stated in all material respects in relation to the consolidated financial statements as a whole.

Notes to Consolidated Financial Statements *(Tables in Thousands)*

June 30, 2014

1. Organization

Mercy Health (Mercy) was incorporated in September 1986 and is the sole corporate member of various health care corporations. Mercy is sponsored by Mercy Health Ministry, a public juridic person whose board members include Sisters of Mercy and lay leaders. Prior to sponsorship by Mercy Health Ministry, Mercy was sponsored by the Institute of the Sisters of Mercy of the Americas, Regional Community of St. Louis, a religious order of the Roman Catholic Church (Sisters of Mercy).

Mercy is incorporated as a not-for-profit corporation under the laws of the state of Missouri and is a tax-exempt organization as described in Section 501(c)(3) of the Internal Revenue Code (the Code).

Mercy's ministry office (headquarters) is located in St. Louis, Missouri. Mercy and Subsidiaries (the Health System) comprise the following corporations and their subsidiaries:

- Mercy Health Fort Smith Communities, Fort Smith, Arkansas
- Mercy Health Northwest Arkansas Communities, Rogers, Arkansas
- Mercy Health East Communities, St. Louis, Missouri
- Mercy Health Springfield Communities, Springfield, Missouri
- Mercy Health Oklahoma Communities, Inc., Oklahoma City and Ardmore, Oklahoma
- Mercy Ministries of Laredo, Laredo, Texas
- Mercy Health Southwest Missouri/Kansas Communities, Joplin, Missouri, and Independence and Fort Scott, Kansas

1. Organization (continued)

Each subsidiary above is a separately incorporated not-for-profit corporation and is tax-exempt pursuant to Section 501(c)(3) of the Code. All significant intercompany transactions and balances have been eliminated in consolidation.

Significant Acquisitions and Divestitures

Acquisitions

Subsidiaries of the Health System entered into asset purchase agreements to make certain acquisitions, including a hospital, physician practices, an ambulatory surgery center, several medical office buildings, and other assets, for a gross purchase price of approximately \$18.8 million in fiscal 2014 and \$272.6 million (\$224.7 million net of cash acquired) in fiscal 2013, respectively. All of these transactions were accounted for as acquisitions in accordance with Accounting Standards Codification (ASC) Topic 958-805, *Business Combinations – Not-for-Profit Entities*.

These acquisitions expanded the Health System's ministry, provided patients with access to a greater number of medical providers, and enhanced the coordination of health services.

The operating results of entities acquired are included in the Health System's consolidated financial statements from the date of acquisition. Operating revenues of the entities acquired in fiscal 2014 included in the consolidated statement of operations were \$86.6 million for the year ended June 30, 2014. Operating revenues of the entities acquired in fiscal 2013 included in the consolidated statement of operations were \$143.6 million for the year ended June 30, 2013.

On an unaudited pro forma basis, had the Health System completed the fiscal 2014 acquisitions as of the beginning of each fiscal year presented, the acquisitions would have reported \$121.6 million and \$126.0 million in additional operating revenues in fiscal 2014 and 2013, respectively, and \$9.2 million and \$9.3 million in additional excess of revenues over expenses for the years ended June 30, 2014 and 2013, respectively. However, the unaudited pro forma information is not necessarily indicative of the historical results that would have been obtained had the transactions actually occurred on those dates, nor of future results.

Mercy Health

Notes to Consolidated Financial Statements (continued) (Tables in Thousands)

1. Organization (continued)

The Health System allocated the purchase price of the acquired businesses to assets acquired and liabilities assumed based on their fair values, which is a Level 3 measurement. The excess of the purchase price over fair value of net assets acquired was recorded as goodwill. The goodwill can be attributed to benefits that the Health System expects to realize from operating efficiencies and increased revenues.

The following table summarizes the fair values as of the acquisition date for the assets acquired and liabilities assumed.

	Fiscal Acquisitions	
	2014	2013
Assets acquired		
Cash	\$ 2	\$ 47,893
Accounts receivable	9,100	25,787
Inventories and other current assets	3,285	9,626
Property and equipment	1,014	166,551
Goodwill	7,063	97,752
Other long-term assets	4,911	1,797
Total assets acquired	25,375	349,406
Liabilities assumed		
Accounts payable	1,303	6,177
Accrued and other liabilities	5,226	12,100
Long-term obligations*	—	58,511
Total liabilities assumed	6,529	76,788
	\$ 18,846	\$ 272,618

* The Health System assumed \$36.1 million of debt related to a fiscal 2013 acquisition. On February 1, 2013, as part of a purchase agreement, the Health System legally defeased and paid off the long-term obligations for \$39.3 million, including principal, interest, and early payment penalties.

Divestitures

Effective April 1, 2014, Mercy sold Mercy Health Hot Springs Communities (Hot Springs) for \$59.7 million in cash, subject to working capital adjustments. Hot Springs, a not-for-profit corporation, operates an acute care hospital and physician clinics in Hot Springs, Arkansas.

The operations of Hot Springs have been classified as discontinued operations in accordance with ASC 205, *Discontinued Operations*. For all periods presented, the operating results for these operations have been removed from continuing operations and presented separately as discontinued operations in the consolidated statements of operations. The assets and liabilities are presented as held for sale on the consolidated balance sheets. The notes to the consolidated financial statements were adjusted to exclude discontinued operations.

The assets and liabilities held for sale at June 30, 2014 and 2013, are summarized below:

	<u>2014</u>	<u>2013</u>
Total current assets	\$ —	\$ 5,000
Property and equipment, net	—	106,576
Goodwill	—	9,540
Other assets	—	238
Total assets of discontinued operations held for sale	<u>\$ —</u>	<u>\$ 121,354</u>
Total liabilities of discontinued operations held for sale	<u>\$ —</u>	<u>\$ 10,066</u>

Mercy recognized a loss on sale of \$47.4 million. Hot Spring's operating revenues were \$175.8 million for the nine months ended March 31, 2014, and \$237.2 million for the year ended June 30, 2013. Hot Spring's loss from operations was \$11.8 million for the nine months ended March 31, 2014, and \$19.2 million for the year ended June 30, 2013.

In April 2014, Mercy entered into transitional service agreements with terms of up to three years with the acquiring entity to provide technology, supply chain, clinical engineering, and revenue management support, which generated continuing cash flows of less than 5% of the Health System's total operating revenues.

Mercy Health

2. Summary of Significant Accounting Policies

Cash and Cash Equivalents

Investments in highly liquid debt instruments with a maturity of three months or less when purchased, excluding amounts classified as investments, are considered cash equivalents. The Health System routinely invests in money market mutual funds. These funds generally invest in highly liquid U.S. government and agency obligations. Financial instruments that potentially subject the Health System to concentrations of credit risk include the Health System's cash and cash equivalents. The Health System places its cash and cash equivalents with institutions with high credit quality. However, at certain times, such cash and cash equivalents are in excess of government-provided insurance limits.

Inventories

Inventories, which consist principally of medical supplies and pharmaceuticals, are stated at the lower of cost or market. Cost is determined principally using the average cost method.

Property and Equipment

Property and equipment are stated at cost or, if donated, at fair value at the date of receipt.

Depreciation is provided using the straight-line method over the estimated useful lives of land and leasehold improvements, buildings, and equipment. The estimated useful lives are as follows: land and leasehold improvements, 2 to 30 years; buildings, 3 to 40 years; and equipment, 2 to 20 years.

Property and equipment under capital lease obligations are amortized using the straight-line method over the lease term or the estimated useful life of the leased asset, whichever period is shorter. Such amortization is included with depreciation in the accompanying consolidated statements of operations.

Mercy Health

Notes to Consolidated Financial Statements (continued) *(Tables in Thousands)*

2. Summary of Significant Accounting Policies (continued)

Asset Impairment

The Health System periodically evaluates the carrying value of its long-lived assets for impairment when indicators of impairment are identified. These evaluations are primarily based on the estimated recoverability of the assets' carrying value based on undiscounted cash flows. Impairment write-downs are recognized in operating income at the time the impairment is identified.

Other Assets

Other assets consist primarily of investment securities held under deferred compensation arrangements, land held for future development, notes receivable, and investments in unconsolidated affiliates. The equity method of accounting is used for investments in unconsolidated affiliates where the Health System does not have significant control or where ownership is 50% or less. The equity income or loss on these investments is recorded in other operating revenues in the consolidated statements of operations.

Goodwill

The Health System records goodwill arising from a business combination as the excess of purchase price and related costs over the fair value of identifiable tangible and intangible assets acquired and liabilities assumed. The Health System has six reporting units. The Health System annually reviews the carrying value of goodwill for impairment. In addition, a goodwill impairment assessment is performed whenever circumstances indicate a potential impairment may exist. If such circumstances suggest that the recorded amounts of any of these assets cannot be recovered, the carrying values of such assets are reduced to fair value. If the carrying value of any of these assets is impaired, a material charge may be incurred to results of operations. There was no goodwill impairment during 2014 or 2013.

Mercy Health

Notes to Consolidated Financial Statements (continued) (Tables in Thousands)

2. Summary of Significant Accounting Policies (continued)

Net Assets

The Health System's net assets and activities are classified into two classes, restricted and unrestricted, based on the existence or absence of donor-imposed restrictions. Restricted net assets include temporarily restricted net assets (75% and 73% of restricted net assets at June 30, 2014 and 2013, respectively), whose use by the Health System has been limited by donors to a specific time period or for a particular purpose, and permanently restricted net assets (25% and 27% of restricted net assets at June 30, 2014 and 2013, respectively), which must be maintained by the Health System in perpetuity with the related investment income available to support the donor-designated purpose. The general nature of the donor restrictions is to support the Health System's indigent care mission and health education programs and to assist with capital projects.

Net Patient Service Revenues and Patient Accounts Receivable

Patient service revenues (net of contractually and discounts) are recorded during the period the health care services are provided and are reported at estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive revenue adjustments due to future audits, reviews, and investigations. Estimates of contractual allowances under managed care health plans are based upon the services provided, historical payment rates, and the payment terms specified in the related contractual agreements. Revenues related to uninsured patients have discounts applied in accordance with the Health System's policy. Net patient service revenue is reported net of the provision for uncollectible receivables.

Patient accounts receivable that are deemed uncollectible, including those placed with collection agencies, are initially charged against the allowance for uncollectible accounts in accordance with collection policies of the Health System and, in certain cases, are reclassified to charity care if deemed to otherwise meet the Health System's charity care policy. The provision for uncollectible receivables is based upon management's assessment of historical and expected net collections considering business and economic conditions, trends in health care coverage, and other collection indicators. Periodically throughout the year, management assesses the adequacy of the allowance for uncollectible receivables based upon the payor composition and aging of receivables with consideration of the historical payment and write-off experience by payor category. The results of these reviews are then used to make any modifications to the provision for uncollectible receivables to establish an appropriate allowance for uncollectible receivables. After satisfaction of amounts due from insurance, the Health System follows established guidelines for placing past-due patient balances with collection agencies.

Mercy Health

Notes to Consolidated Financial Statements (continued) *(Tables in Thousands)*

2. Summary of Significant Accounting Policies (continued)

Retroactive third-party adjustments are considered in the recognition of revenue on an estimated basis in the period the related services are rendered, and such amounts are adjusted in future periods as adjustments become known. Adjustments to revenue based on prior periods (decreased) increased net patient service revenues by approximately \$(4.6) million and \$12.0 million in 2014 and 2013, respectively, due to revised estimates consisting primarily of retroactive third-party adjustments for years that are subject to audits, reviews, and investigations.

Capitation Revenues and Medical Claims Expense

Certain Mercy Subsidiaries have entered into various risk-based contracts with certain health maintenance organizations (HMOs). Under these arrangements, the Subsidiaries receive capitated payments based on the demographic characteristics of covered members in exchange for providing certain medical services to those members. These payments are reflected as capitation revenues in the consolidated statements of operations. The Subsidiaries recognize medical claims expense for services provided to members from out-of-network providers. The medical claims expense represents claims paid, claims reported but not yet paid, and an estimate of claims incurred but not reported (IBNR). The claims IBNR amount is estimated based upon prior experience modified for current trends. The claims IBNR amount was \$9.9 million and \$11.7 million at June 30, 2014 and 2013, respectively, and was included in accrued liabilities and other in the consolidated balance sheets.

Electronic Health Record Incentive Program

The American Recovery and Reinvestment Act of 2009 included provisions for implementing health information technology under the Health Information Technology for Economic and Clinical Health Act (HITECH). The provisions were designed to increase the use of electronic health record (EHR) technology and establish the requirements for a Medicare and Medicaid incentive payment program beginning in 2011 for eligible physicians and hospitals (collectively, providers) that adopt and meaningfully use certified EHR technology. Eligibility for annual Medicare incentive payments is dependent on providers demonstrating meaningful use of EHR technology in each period over a four- to five-year period, with the majority of funding ending in 2016. Initial Medicaid incentive payments are available to providers that adopt, implement, or upgrade certified EHR technology. Providers must demonstrate continued meaningful use of such technology in subsequent years to qualify for additional Medicaid incentive payments.

Mercy Health

Notes to Consolidated Financial Statements (continued) *(Tables in Thousands)*

2. Summary of Significant Accounting Policies (continued)

The Health System accounts for EHR incentive payments as other operating revenue. The Health System utilizes a grant accounting model to recognize EHR incentive revenues and records incentive revenue ratably throughout the incentive reporting period when it is reasonably assured that the respective eligible provider will meet the meaningful use objectives for the reporting period and that the payments will be received. The EHR reporting period for hospitals is based on the federal fiscal year, which runs from October 1 through September 30, and for physicians is based on the calendar year. The Health System recognized revenue of approximately \$34.2 million and \$36.6 million during the years ended June 30, 2014 and 2013, respectively. The Health System believes that the eligible providers that met meaningful use objectives will continue to meet the objectives through their applicable reporting periods. Income from incentive payments is subject to retrospective adjustment as the incentive payments are calculated using Medicare cost report data that is subject to audit. In addition, the Health System's compliance with the meaningful use criteria is subject to audit by the federal government.

In addition, the Health System has an incentive program with its physicians whereby the Health System compensates eligible physicians if certain criteria are met. The Health System expensed approximately \$15.8 million and \$14.0 million for incentives paid to physicians for the years ended June 30, 2014 and 2013, respectively. These amounts are included in salaries and benefits in the accompanying consolidated statements of operations. The net amount reflected in the consolidated statements of operations for the EHR incentive program is \$18.4 million and \$22.6 million for the years ended June 30, 2014 and 2013, respectively.

Services to the Community

In support of its mission, the Health System provides care to patients who personally bear a significant financial burden relative to their health care services and are deemed to be medically indigent. Traditional charity care includes the cost of services provided to persons who cannot afford health care because of the financial burden of the health care services and/or who are uninsured or underinsured. Traditional charity care also includes services for which the patient may not participate in the charity care process but is otherwise deemed to meet the Health System's charity care policy.

Mercy Health

Notes to Consolidated Financial Statements (continued) *(Tables in Thousands)*

2. Summary of Significant Accounting Policies (continued)

Because the Health System does not pursue collection of amounts determined to qualify as charity care, such amounts are not reported as net patient service revenue. The cost of traditional charity care was \$95.6 million and \$107.5 million in 2014 and 2013, respectively. The Health System estimates cost of charity care using a calculated ratio of costs to charges by hospital and applies that ratio to the relevant gross charges respectively, less any payments received.

Health care services to patients under government programs, such as Medicare and Medicaid, are also considered part of the Health System's benefit provided to the community since a portion of such services are reimbursed at amounts less than cost. In addition, the Health System maintains community benefit programs designed to positively impact the health status of the communities served. These services include various clinics and outreach programs (designed to deliver health care services to underserved communities), medical education and research activities, and direct cash and in-kind charitable contributions.

These community benefit programs also include the activities of Mercy Ministries of Laredo (MML), Mercy Caritas, Catherine's Fund, and Mercy Family Center that are administered by the Health System. These programs finance charitable activities to help meet the needs of the poor, sick, and uneducated.

Investments

Investments include assets set aside through resolution by the Board of Directors for future long-term purposes, including capital improvements and self-insurance. In addition, investments include amounts contributed by donors with stipulated restrictions. These assets include investments in equity securities and debt securities, which are measured at fair value. The cost of securities sold is based on the specific-identification method. The Health System accounts for its ownership interest in alternative investments under the equity method. Management has utilized the best available information for reported alternative investment values, which in some instances are valuations as of an interim date.

For purposes of recognizing investment returns as a component of excess of revenues over expenses, substantially all investments, other than alternative investments, are considered to be trading securities. Unrestricted investment returns, including alternative investments, are included in nonoperating gains (losses) in the consolidated statements of operations. Investment

Mercy Health

Notes to Consolidated Financial Statements (continued) *(Tables in Thousands)*

2. Summary of Significant Accounting Policies (continued)

returns arising from donor-restricted resources are reported as a direct increase or decrease in restricted net assets in the consolidated statements of changes in net assets, consistent with the donors' restrictions. In addition, cash flows from the purchases and sales of marketable securities designated as trading are reported as a component of operating activities in the accompanying consolidated statements of cash flows.

Derivative Financial Instruments

Derivative instruments are contracts between the Health System and a third party (counterparty) that provide for economic payments between the parties based on changes in a defined market security or index or combination thereof. The Health System's derivative financial instruments are primarily interest rate swap agreements utilized as part of its debt management process. The Health System recognizes all derivative instruments as either assets or liabilities in the consolidated balance sheets at fair value. The Health System does not offset fair value amounts recognized for derivative instruments and fair value amounts recognized for cash collateral. The Health System does not account for any of its interest rate swap agreements as hedges, and accordingly, realized and unrealized gains (losses) and net settlement payments are reflected as a component of nonoperating gains (losses) in the accompanying consolidated statements of operations.

Pledges, Bequests, and Gifts for Specific Purposes

Unconditional promises to give cash and other assets are reported at fair value at the date the promise is received. Conditional promises to give and indications of intentions to give are reported at fair value at the date the gift is received. Gifts are recorded as an increase in restricted net assets if they are received with donor stipulations that limit the use of the assets. Upon expenditure in accordance with a donor's restrictions and when the asset is placed in service, net assets restricted for capital acquisitions are reported as direct additions to unrestricted net assets, and assets restricted for operating purposes are reported as an increase in other operating revenues. Donor-restricted contributions for operating purposes whose restrictions are met within the same year as received, and contributions received by donors without restrictions, are reflected as other operating revenues in the accompanying consolidated statements of operations.

Mercy Health

Notes to Consolidated Financial Statements (continued) *(Tables in Thousands)*

2. Summary of Significant Accounting Policies (continued)

Unconditional promises to give, less an allowance for uncollectible amounts, are recorded as receivables in the year made. Net pledges receivable of \$8.3 million and \$8.1 million were included in other current assets and other assets, respectively, at June 30, 2014. Net pledges receivable of \$3.3 million and \$7.0 million were included in other current assets and other assets, respectively, at June 30, 2013.

Functional Classification of Expenses

The Health System provides general health care services to residents within communities served, including acute inpatient, subacute inpatient, physician, outpatient, ambulatory, long-term, and home care, as well as related general and administrative services.

The Health System does not present expense information by functional classification because its resources and activities are primarily related to providing health care services. Furthermore, since the Health System receives substantially all of its resources from providing health care services in a manner similar to a business enterprise, other indicators contained in these consolidated financial statements are considered important in evaluating how well management has discharged its stewardship responsibilities.

Operating Indicator

The Health System's operating indicator (operating income before Joplin operations and related insurance recovery) includes all unrestricted revenue, gains and other support, and expenses directly related to the recurring and ongoing health care operations during the reporting period. The operating indicator excludes operating revenues, expenses, and insurance proceeds related to Joplin (see Note 3), nonoperating gains and losses, pension liability adjustments, loss from discontinued operations, and net assets released from restrictions for property acquisitions.

Performance Indicator

The Health System's performance indicator (excess of revenues over expenses) includes all changes in unrestricted net assets other than pension liability adjustments, loss from discontinued operations, and net assets released from restrictions for property acquisitions.

Mercy Health

Notes to Consolidated Financial Statements (continued) (Tables in Thousands)

2. Summary of Significant Accounting Policies (continued)

Operating and Nonoperating Gains (Losses)

The Health System's primary mission is to meet the health care needs in its market areas by providing general health care services to residents within communities served, including acute inpatient, subacute inpatient, physician, outpatient, ambulatory, long-term, and home care, as well as related general and administrative services. Activities directly associated with the furtherance of this purpose are considered to be operating activities. Other activities that result in gains or losses peripheral to the Health System's primary mission are considered to be nonoperating. Nonoperating activities include net investment returns and net realized and unrealized gains (losses) on interest rate swaps.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Accounting Pronouncements Adopted

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, *Balance Sheet (Topic 210): Disclosure about Offsetting Assets and Liabilities*, which was further clarified in January 2013 by ASU 2013-01, *Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*, which enhances disclosures by requiring improved information about financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement. This information will enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments. Effective July 1, 2013, the Health System adopted this guidance. Adoption of this guidance did not have a material impact on the financial statements.

Mercy Health

Notes to Consolidated Financial Statements (continued) (Tables in Thousands)

3. Joplin Operations and Related Insurance Recovery

On May 22, 2011, an EF-5 tornado struck parts of the city of Joplin, Missouri, including Mercy's acute care hospital and adjacent medical office buildings. Management determined the damage was so severe that these facilities were considered completely impaired at June 30, 2011, and the facilities were subsequently demolished. The Health System has continued to provide health care services in temporary facilities, but capacity is limited.

At the date of the tornado, the Health System maintained insurance coverage of \$750 million, which covered emergency response, temporary facilities, property damage, business interruption, and related costs, subject to a \$50,000 deductible. The claim has been final settled as of December 2012. In total, the Health System received \$733.4 million in insurance proceeds related to this event. The breakdown between fiscal 2014 and 2013 is described below.

	Year Ended June 30	
	2014	2013
Insurance proceeds – property damage	\$ –	\$ 23,259
Insurance proceeds – business interruption	–	272,000
Total insurance proceeds received	<u>\$ –</u>	<u>\$ 295,259</u>

As a result of settling the claim, an impairment charge of \$65.1 million was recorded to reduce certain assets, primarily temporary facilities, to fair value. The impairment is netted against 2013 Joplin insurance proceeds in the accompanying consolidated statements of operations.

Mercy Health

Notes to Consolidated Financial Statements (continued) (Tables in Thousands)

3. Joplin Operations and Related Insurance Recovery (continued)

Since the post-tornado operations of Joplin are not comparable to the pre-tornado operations and since Joplin's results are impacted significantly by insurance proceeds, management has determined that Joplin's financial results should be segregated in the accompanying consolidated statements of operations for both periods presented

	Year Ended June 30	
	2014	2013
Operating revenues		
Patient service revenues (net of contractually and discounts)	\$ 205,187	\$ 203,250
Provision for uncollectible receivables	(17,376)	(21,690)
Net patient service revenues	187,811	181,560
Other operating revenues	2,911	4,014
Total operating revenues	190,722	185,574
Operating expenses		
Salaries and benefits	132,510	134,869
Supplies and other	92,841	96,890
Depreciation and amortization	10,550	21,258
Total operating expenses	235,901	253,017
Joplin insurance proceeds, net of impairment charge	—	230,174
Joplin operating (loss) income	\$ (45,179)	\$ 162,731

Mercy Health

Notes to Consolidated Financial Statements (continued) (Tables in Thousands)

4. Net Patient Service Revenue and Patient Receivables

The following is a summary of the Health System's patient service revenues, net of contractual allowances and discounts (before the provision for uncollectible receivables), by major payor. Medicare and Medicaid managed plans are grouped with Medicare and Medicaid, respectively.

	Year Ended June 30	
	2014	2013
Medicare	\$ 1,529,575	\$ 1,417,430
Medicaid	559,982	467,823
Managed care/other	1,885,541	1,789,573
Self-pay	273,590	238,834
	\$ 4,248,688	\$ 3,913,660

Laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. Noncompliance with Medicare and Medicaid laws and regulations can make the Health System subject to significant regulatory action, including substantial fines and penalties, as well as exclusion from the Medicare and Medicaid programs.

The Health System provides health care services through inpatient and outpatient care facilities located in several states. The Health System grants credit to patients in return for health care services rendered to said patients, substantially all of whom are residents of the communities served. The Health System does not require collateral or other security in extending credit to patients, however, it routinely obtains assignment of (or is otherwise entitled to receive) patients' benefits payable under their health insurance programs, plans, or policies (e.g., Medicare, Medicaid, HMOs, and commercial insurance policies). At June 30, 2014 and 2013, approximately 33% and 37%, respectively, of net accounts receivable were collectible from governmental payors (including Medicare and Medicaid), with approximately 53% and 50%, respectively, of net accounts receivable collectible from commercial insurance and managed care payors.

4. Net Patient Service Revenue and Patient Receivables (continued)

The allowance for uncollectible receivables was approximately \$182.3 million and \$203.8 million as of June 30, 2014 and 2013, respectively. These balances as a percent of accounts receivable net of contractual allowances were approximately 23% and 25% as of June 30, 2014 and 2013, respectively. The Health System's allowance for uncollectible receivables covered approximately 71% and 60% of self-pay patient receivables, including patient responsibility, as of June 30, 2014 and 2013, respectively. The Health System has experienced an increase in write-off trends related to bad debt and charity driven by higher unemployment, loss of employer-sponsored insurance plans, and rising patient responsibility balances. The Health System reviews and updates its uninsured discount rate on an annual basis. There have been no significant changes to the charity care policies for the years ended June 30, 2014 or 2013. The Health System does not maintain a material allowance for uncollectible receivables from third-party payors, nor did it have significant write-offs from third-party payors.

The following is a summary of the Health System's allowance for uncollectible receivables activity:

The Health System's investments are exposed to various kinds and levels of risk. Fixed income securities expose the Health System to interest rate risk, credit risk, and liquidity risk. As interest rates change, the value of many fixed income securities is affected, particularly those with fixed rates. Credit risk is the risk that the obligor of the security will not fulfill its obligations. Liquidity risk is affected by the willingness of market participants to buy and sell given securities. Equity securities expose the Health System to market risk, performance risk, and liquidity risk. Market risk is the risk associated with major movements of the equity markets, both foreign and domestic. Performance risk is the risk associated with a company's operating performance. Liquidity risk as previously defined tends to be higher for foreign equities and equities related to small capitalization companies.

Certain of the Health System's investments are made through alternative investments, primarily private equity limited partnership investments and hedge funds. These investments provide the Health System with a proportionate share of the investment gains and losses. The fund manager has full discretionary authority over the investment decisions and provides the net asset valuation. The hedge funds and private equity funds present risks similar to those of traditional investments, as well as some additional risks. Due to the fact that these funds are invested through limited partnerships or other limited access-type vehicles, pricing is infrequent and liquidity may also be limited, in some cases, up to 24 months for hedge funds. Due to infrequent

pricing and illiquidity of underlying investments, it is common practice for private equity funds to require investors to commit to a ten-year investment period, although the distribution of capital is likely to occur prior to the ten-year termination date. These investments may also employ leverage, which may lead to additional risk of loss. These investments are subject to market risk, default risk, interest rate risk, and credit risk, as well as various other types of risks. At June 30, 2014, the Health System has commitments to fund \$117.5 million in these investments.

At the balance sheet dates, receivables and payables for investment trades not settled are presented with other current assets and accrued liabilities and other. Unsettled sales resulted in receivables due from brokers of \$9.0 million and \$186.6 million at June 30, 2014 and 2013, respectively. Unsettled buys resulted in payables of \$7.4 million and \$144.2 million at June 30, 2014 and 2013, respectively.

6. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurements and disclosures topic of the FASB ASC establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement).

The three levels of the fair value hierarchy and a description of the valuation methodologies used for instruments measured at fair value are as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities as of the reporting date.

Level 2 – Pricing inputs other than quoted prices included in Level 1, which are either directly observable or can be derived or supported from observable data as of the reporting date.

Mercy Health

Notes to Consolidated Financial Statements (continued)

(Tables in Thousands)

6. Fair Value Measurements (continued)

Level 3 – Pricing inputs include those that are significant to the fair value of the financial asset or financial liability and are not observable from objective sources. In evaluating the significance of input, the Health System generally classifies assets or liabilities as Level 3 when their fair value is determined using unobservable inputs that individually, or when aggregated with other unobservable inputs, represent more than 10% of the fair value of the assets or liabilities. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value.

Financial assets and financial liabilities measured at fair value on a recurring basis were determined using the following inputs at June 30, 2014:

Investments in the fair value tables above also exclude land held for investment, which is recorded at cost, of \$15.6 million and \$15.4 million at June 30, 2014 and 2013, respectively.

Deferred compensation plan assets and interest rate swaps (assets) are reported in other assets and interest rate swaps (liabilities) are reported in insurance reserves and other liabilities in the consolidated balance sheets.

The following is a description of the Health System's valuation methodologies for assets and liabilities measured at fair value. Fair value for Level 1 is based upon quoted market prices. The fair value of certain Level 2 securities was determined using multiple price types of bid/offer, last traded, settlement, evaluated, and the official primary exchange close-time pricing, provided by third-party pricing services if quoted market prices were not available. The quality of the prices received is evaluated through price comparisons and tolerance level checks. These Level 2 investments include cash equivalents, international equities, corporate debt securities, government agencies and obligations, other debt securities, commingled funds, and real assets – commodities. The fair values of the interest rate swap contracts, also Level 2 measurements, are determined based on the present value of expected future cash flows using discount rates appropriate with the risks involved. The valuations reflect a credit spread adjustment to the London Interbank Offered Rate (LIBOR) discount curve in order to reflect nonperformance risk. The credit spread adjustment is derived from the Health System's and other comparable rated

entities' bonds priced in the market and adjusted with a gross up of the tax-exempt spread to a taxable equivalent spread for the Health System and counterparty bond trading levels (or credit default swap spreads) The fair values of other securities in the deferred compensation plan's assets are based on unobservable inputs and are recorded based on information provided by the trustee

The deferred compensation plans invest in a fully benefit-responsive guaranteed investment contract (GIC) with MetLife, which is a general account evergreen group annuity contract and a Level 3 fair value measurement MetLife maintains the contributions in the general account The deferred compensation plans own a series of guarantees that are embedded in the insurance contract The contractual guarantees are backed up by the full faith and credit of MetLife, the contract issuer MetLife is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the deferred compensation plan There are no reserves against contract value for credit risk of the contract issuer or otherwise The crediting interest rate is based on a formula agreed upon with the issuer Such interest rates are reviewed on an annual basis for resetting

The carrying values of cash and cash equivalents, accounts receivable, pledges receivable, and current liabilities are reasonable estimates of their fair values due to the short-term nature of these financial instruments The fair value of the Health System's fixed rate bonds is based on quoted market prices for the same or similar issues and approximates \$250.2 million and \$235.6 million as of June 30, 2014 and 2013, respectively, which is a Level 2 measurement The carrying amount approximates fair value for all other long-term debt, which is variable rate, and excludes the impact of third-party credit enhancements, this is a Level 2 measurement

Due to the volatility of the financial market, there is a reasonable possibility of changes in fair value and additional gains and losses in the near term subsequent to June 30, 2014

At June 30, 2014, construction and software-related contracts and commitments exist for capital improvements at certain of the Health System's facilities. The remaining commitment on these contracts at June 30, 2014, was approximately \$201.9 million, out of which \$84.2 million relates to the construction of the new hospital in Joplin. During the years ended June 30, 2014 and 2013, interest of \$6.7 million and \$3.6 million, respectively, was capitalized.

10. Liability Programs

The Health System administers a liability program to provide for general and professional liability risks within certain limits. Health care professional liabilities in excess of self-insured limits are insured on a claims-made basis subject to an annual maximum of \$20.0 million over the self-insured retention of \$10.0 million, after which the Health System would again be responsible. The recorded liabilities are based upon actuarial estimates of reported claims and IBNR claims using historical claim experience and other relevant industry and hospital-specific factors and trends, discounted at an interest rate of 5% and 4.75% for 2014 and 2013, respectively. The discounted general and professional liability was \$136.5 million and \$135.3 million at June 30, 2014 and 2013, respectively, which is included in accrued liabilities and insurance reserves and other liabilities in the accompanying consolidated balance sheets. In addition, at June 30, 2014 and 2013, Mercy recorded net insurance receivables of \$2.0 million, which is included in other assets in the accompanying consolidated balance sheets.

11. Employee Retirement Plans

Prior to July 1, 2011, the Health System sponsored an active defined benefit retirement plan (the Plan) to provide coverage under a single plan for groups acquired in business combinations. Pension benefits were provided to substantially all Health System employees through the Plan. As new employee groups were transitioned to the Plan, the Plan was modified through plan amendments to provide credit for service with the acquired provider. Plan benefits were originally provided based on a final average pay formula but were later transitioned to a cash

balance-type formula. The cash balance formula provided an annual pay credit, based on employee compensation and years of service, and an interest credit based on the 30-year U.S. Treasury bill rate, subject to a floor of 5.25%. Effective June 30, 2011, the Plan was closed to new entrants, and pay credits ceased. Interest credits continue to be paid under the Plan. The Plan is funded consistent with actuarial funding recommendations.

The Health System maintains various non-qualified defined benefit retirement plans that provide retirement income in excess of the limitations on benefits imposed by Internal Revenue Service (IRS) limitations to certain key executives. These plans are closed to new entrants.

The following table sets forth the Plan's and certain other of the Health System's pension plans' benefit obligations, fair value of plan assets, and funded status at the measurement date.

The following table is a rollforward of the pension plan assets classified within Level 3 of the valuation hierarchy

	Hedge Funds	Private Equity	Real Assets – Limited Partnerships	Other

Fair value methodologies for Level 1 and Level 2 assets are consistent with the inputs described in Note 6. Level 3 securities, which consist of alternative investments (principally limited partnership interests in hedge funds and private equity funds) and a GIC, represent the Plan's ownership interest in the net asset value (NAV) of the respective partnership.

Management opted to use the NAV per share, or its equivalent, as a practical expedient for fair value of the Plan's interest in hedge funds and private equity funds. Valuations provided by the respective fund's management include variables such as the financial performance of underlying investments, recent sales prices of underlying investments, and other pertinent information. In addition, actual market exchanges at period-end provide additional observable market inputs of the exit price. The majority of these funds have restrictions on the timing of withdrawals, which may reduce liquidity, in some cases for up to 24 months in the case of hedge funds and up to 10 years for private equity funds. At June 30, 2014, the Plan has commitments to fund \$48.9 million in these investments.

11. Employee Retirement Plans (continued)

The Plan employs investment managers to invest fund balances in a structured portfolio of equity, fixed income, and alternative investments (which includes hedge funds, private equity, and real assets). The Plan retains outside consultants to support the overall asset allocation and manager selection process. The Plan's current investment policy was updated and approved in fiscal 2012. The performance of all managers is reviewed to test that market performance has been calculated accurately, to monitor performance versus peers and benchmarking, and to evaluate portfolio structure considering current and future needs based on economic forecasts and actuarial projections. The Health System believes that a diversified portfolio will limit the degree of risk to the Plan and stabilize the long-term results. The Plan's diversified blend of marketable securities also takes into consideration the cash flow requirements of the Plan to help ensure the ability to meet the monthly payout of benefits required. Projected rates of return for each asset category were selected after analyzing historical experience and future expectations of the returns and volatility for assets of that category.

The Health System expects to contribute at least \$5.5 million to the Plan during fiscal 2015.

The following benefit payments, which reflect expected future service, are expected to be paid by the Plan:

	<u>Amount</u>
Year ending June 30	
2015	\$ 81,200
2016	75,000
2017	79,900

11. Employee Retirement Plans (continued)

The Health System has a defined contribution 401(k) plan and a 403(b) plan for the benefit of substantially all employees. Participant contributions to the plans are subject to IRS limitations. The 401(k) plan has always included an employer-provided match contribution. Effective July 1, 2011, the 401(k) plan was amended to enhance the match contribution and add a non-matching service contribution to replace the pay credit previously earned under the defined benefit plan. The 403(b) plan allows participant contributions, and amounts contributed to the plan are eligible for a match contribution and service contribution under the provisions of the 401(k) plan.

The match contribution is equal to 50% of the first 4% of the participant's compensation contributed and 25% of the next 2% of the participant's compensation contributed. The service contribution is equal to compensation multiplied by a percentage of pay based on years of service (1%–9% for employees hired prior to July 1, 2011, and 1%–4% for those hired on July 1, 2011 or later). In order to earn a match contribution or service contribution, an employee must work at a rate of 1,000 hours during the year. Employees become vested in both match and service contributions upon the completion of three years of vesting service.

For the years ended June 30, 2014 and 2013, the total expenses incurred related to the 401(k) and 403(b) plans were \$93.9 million and \$83.1 million, respectively.

12. Long-Term Obligations (continued)

Certain of Mercy's subsidiaries have executed a commitment agreement governing certain borrowing arrangements under the Mercy Master Trust Indenture and related agreements (Financing Agreements). While only the revenues of Mercy collateralize the outstanding borrowings of the Health System, each of these subsidiaries has committed to transfer such funds to Mercy to pay the amounts due on borrowings when they come due. The Financing Agreements contain certain restrictive covenants, including debt service coverage and liquidity ratios. At June 30, 2014, Mercy was in compliance with all covenants.

Tax-exempt revenue bonds have been issued by various issuing authorities, the proceeds of which were used by Mercy primarily to finance capital projects and to refinance existing indebtedness of certain subsidiaries.

During 2014, Mercy repurchased \$118.1 million of its \$378.3 million outstanding auction rate securities at a discount of \$11.8 million from multiple parties. A prorated portion of unamortized issuance costs of \$1.8 million were written off, resulting in a net gain of \$10.0 million recorded in supplies and other in the consolidated statements of operations. Following the repurchase, Mercy had auction rate securities aggregating to \$260.2 million. The interest rate is set through a weekly auction process among bond investors. Starting in fiscal 2008, due to the market-wide financial crisis, institutional buyers and investment banks opted not to participate in the market for securities of this type, causing a failure of the auction process and resulting in the bonds resetting to a maximum rate predefined in the bond agreement based on the higher of the current LIBOR or commercial paper index, adjusted for the current rating and current tax rate plus a fixed spread.

12. Long-Term Obligations (continued)

In December 2012, \$250.0 million of fixed rate, tax-exempt health facility revenue bonds were issued by the Health and Educational Facilities Authority of the State of Missouri on behalf of Mercy under the Master Trust Indenture. The proceeds of these bonds were used to finance all or a portion of several capital projects, including a portion of the new hospital in Joplin, Missouri. The bonds have various maturities between November 15, 2019 and November 15, 2042. Coupon rates were set at 3%–4% with yields to maturity ranging from 1.75%–3.86%. Most of the bonds were sold at a premium to institutional and retail investors. The net premium paid to the Health System totaled \$7.1 million. Issuance costs totaled \$2.6 million. The bonds pay interest on May 15 and November 15 of each year, commencing May 15, 2013.

In May 2014, \$350.2 million of variable rate, tax-exempt health facility revenue bonds were issued by the Health and Educational Facilities Authority of the State of Missouri on behalf of Mercy under the Master Trust Indenture. The proceeds of these bonds were used to refund the Series 2011 variable rate demand bonds aggregating \$350.2 million. These bonds were directly purchased by three banks and mature at various dates between June 1, 2016 and 2039. Interest is paid monthly at a borrowing rate based on a percentage of one-month LIBOR plus an applicable spread. The bonds include mandatory puts by the purchasing banks between June 2019 and June 2023. Mercy may elect to renegotiate with the initial purchasers, remarket or redeem the bonds.

In June 2014, \$110.0 million of variable rate, tax-exempt health facility revenue bonds were issued by the Health and Educational Facilities Authority of the State of Missouri on behalf of Mercy under the Master Trust Indenture. The proceeds of these bonds were used to finance all or a portion of several capital projects, including a portion of the new hospital in Joplin, Missouri. These bonds were directly purchased by two banks and have maturities between June 1, 2050 and June 1, 2051. Interest is paid monthly at a borrowing rate based on a percentage of one-month LIBOR plus an applicable spread. The bonds include a mandatory put by the purchasing banks between June 2018 and June 2024. Mercy may elect to renegotiate with the initial purchasers, remarket or redeem the bonds.

Other notes payable, mortgage notes payable, and capital lease obligations are secured by certain property and equipment of the specific borrowers.

In July 2012, as part of an acquisition, the Health System assumed a \$21.9 million fixed rate commercial real estate loan. Interest is paid monthly at an annual rate of 7.25%, and the debt matures on December 31, 2014.

12. Long-Term Obligations (continued)

Aggregate maturities of long-term obligations as scheduled at June 30, 2014, are as follows

	<u>Amount</u>
Year ending June 30	
2015	\$ 40,098
2016	15,217
2017	8,396
2018	8,648
2019	7,227
Thereafter	1,018,466
	<u>\$ 1,098,052</u>

Mercy has \$150.0 million of unused 364-day lines of credit with three banks. Agreements terminate on December 11, 2014, however, the Health System anticipates renewal of the agreements. During 2014, Mercy borrowed and repaid \$106.4 million against the line of credit. There were no borrowings outstanding under these lines of credit as of June 30, 2014.

13. Derivatives

The Health System has interest rate-related derivative instruments to manage its interest rate exposure on its variable rate debt instruments and does not enter into derivative instruments for any purpose other than risk management. Interest rate swap contracts between the Health System and a third party (counterparty) provide for the periodic exchange of payments between the parties based on changes in a defined index and a fixed rate. These agreements expose the Health System to market risk and credit risk. Credit risk is the risk that contractual obligations of the counterparties will not be fulfilled. Concentrations of credit risk relate to groups of counterparties that have similar economic or industry characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. Counterparty credit risk is managed by requiring high credit standards for the Health System's counterparties. The Health System will enter into transactions where the counterparty rating is high enough to maintain the rating on Health System bonds. The interest rate swap contracts contain collateral provisions applicable to both parties to mitigate credit risk. The Health System does not anticipate nonperformance by its counterparties. Market risk is the

Mercy Health

adverse effect on the value of a financial instrument that results from a change in interest rates. The market risk associated with interest rate changes is managed by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken. Management also mitigates risk through periodic reviews of the Health System's derivative positions in the context of its blended cost of capital.

The following is a summary of the outstanding positions under these interest rate swap agreements:

Interest Rate Swap Type	Expiration Date	Health System Pays	Health System Receives	Notional Value June 30	
				2014	2013
Fixed payor	June 2, 2031	3.36% – 3.751%	70% of one-month LIBOR	\$ 252,200	\$ 252,200

Fixed payor	June 1, 2016	3.94%	67% of one-month LIBOR	12,150	20,750

The fair value of derivative instruments is as follows:

Derivatives Not Designated as Hedging Instruments	Balance Sheet Location	June 30	
		2014	2013
Interest rate swap agreements	Other liabilities	\$ 54,162	\$ 53,845

The effects of derivative instruments on the consolidated statements of operations and changes in net assets for the years ended June 30, 2014 and 2013, are reflected in realized and unrealized gains (losses) on interest rate swaps in the consolidated statements of operations.

14. Operating Leases

Rent expense for the years ended June 30, 2014 and 2013, totaled \$78.0 million and \$65.3 million, respectively.

Future minimum rental payments under noncancelable operating leases as of June 30, 2014, that have initial or remaining terms in excess of one year are as follows:

	<u>Amount</u>
Year ending June 30	
2015	\$ 56,342
2016	52,454

15. Commitments and Contingencies

Regulatory Compliance

The U.S. Department of Justice and other federal agencies are increasing resources dedicated to regulatory investigations and compliance audits of health care providers. The Health System is not exempt from these regulatory efforts and has received correspondence from federal agencies with regard to such initiatives. In consultation with legal counsel, management estimates these matters will be resolved without a material adverse effect on the Health System's consolidated financial position or results of operations.

15. Commitments and Contingencies (continued)

Litigation

The Health System is involved in litigation arising in the normal course of business. After consultation with legal counsel, it is management's opinion that these matters will be resolved without a material adverse effect on the Health System's consolidated financial position or results of operations.

16. Subsequent Events

The Health System evaluated events and transactions occurring subsequent to June 30, 2014 through September 23, 2014, the date the consolidated financial statements were issued. During this period, there were no subsequent events that required recognition in the consolidated financial statements.
