^t - Third-party provided

Cost Basis - the original amount paid for a security including the amount of reinvested dividends and capital gains, plus or minus certain adjustments. See last page of statement for details. **Total Cost Basis** does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

Estimated Annual Income (EAI) & Estimated Yield (EY) - EAI is an estimate of annual income for a specific security position over the next rolling 12 months. EY is calculated by dividing the current EAI for a security position by its statement closing date market value. EY reflects only the income generated by an investment; it does not reflect changes in its price, which may fluctuate. For certain types of securities, EAI and EY could include the return of principal or capital gains which would render them overstated. EAI and EY are estimates provided for informational purposes only and should not be relied on for making investment, trading, or tax decisions. There is no guarantee that your investments will actually generate the EAI or EY presented. Actual income and yield might be lower or higher. EAI and EY should not be confused with a security's 30-day Yield or 7-day Yield, if provided, as such yield quotations reflect the actual historical performance of a security. **For additional information, including calculation details, refer to the "Additional Information and Endnotes" section at the end of your statement.**
