Form and Line Reference	Explanation
Part I, Line 6a	Cumberland County Hospital System files a community benefit report annually in the state of North Carolina to the North Carolina Hospital Association

Form and Line Reference	Explanation
Part II, Community Building Activities	Cumberland County Hospital System, Inc ("CCHS") reported coalition building and workforce development details in the Community Building Activities Part II Coalition building promotes the health of the communities it serves by networking with other community agencies to address the health and safety issues of the community The employees of CCHS utilize their clinical expertise to collaborate with other community agencies and county and state health departments to provide education and other initiatives that benefit the health of people in the community Workforce development activities include the recruitment of physicians and other health professionals to medical shortage areas

Form and Line Reference	Explanation
Part III, Line 4	A patient's record is reviewed for possible charity care and if the patient does not qualify for charity and the patient does not pay, their charges are written-off as bad debt. Amounts in line 2 are determined by calculating a cost-to-charge ratio. Total expenses (less bad debts and other operating revenue) are divided into total gross patient revenue. Total bad debt charges are multiplied by this percentage.

Form and Line Reference	Explanation
Part III, Line 8	Cumberland County Hospital Systems, Inc treats the total shortfall of Medicare reimbursement compared to the amount of computed Medicare allowable costs as a community benefit The Hospital improves access to patient care by providing services regardless of a patient's ability to pay or the hospital's ability to receive full cost reimbursement for services The hospital also relieves the government of a financial burden when it provides care to publicly insured patients where reimbursement is less than cost of providing the service

Form and Line Reference	Explanation
Part III, Line 9b	If patients are determined to qualify for charity, then the account is written-off to charity rather than to bad debt

Form and Line Reference	Explanation
Part III, Lines 2-4	A patient's record is reviewed for possible charity care and if the patient does not qualify for charity and the patient does not pay, their charges are written-off as bad debt. Amounts in line 2 are determined by calculating a cost-to-charge ratio. Total expenses (less bad debts and other operating revenue) are divided into total gross patient revenue. Total bad debt charges are multiplied by this percentage.

Part VI, Line 2	The mission of Cape Fear Valley Health System is to strengthen the health and well-being of the greater Cape Fear Valley region through high-quality, compassionate care provided to all who need it. As a community not-for-profit organization, we take seriously our responsibility to invest our resources and energies into understanding and meeting the diverse health care needs of all, and ensure that everyone, regardless of their ability to pay, receive the care they need. The Senior Administrative team serves in various capacities on several local community boards and groups. As members of these various groups, they are able to gain insight to needs of the community. Our community partners are critical to helping us improve the health and well-being of the Cape Fear Valley region. Together, we can combine resources and strengths, positively impacting the greatest number of people. By working closely with the community leaders, we also build a greater sense of community and a shared commitment toward our common goal of improving the community's health. The results help us to determine our short and long term priorities as well as strategies for improving community health. Those community groups and partners CCCC, SRAHEC, CCMAP, Chamber of Commerce, Fayetteville Area PR Alliance, Cumberland County Education Foundation, Communities in Schools of NC, Fort Bragg Regional Alliance, Care Clinic, and the Methodist University Physician Assistant program.

Form and Line Reference	Explanation
Part VI, Line 3	Uninsured patients are screened at the time of registration for their ability to pay for their health care services. If the patient has no ability to pay and is deemed ineligible for governmental programs (Medicare, Medicaid, etc) then they are informed of the Hospital Charity program. They are provided with an application and a listing of the appropriate documents necessary to establish eligibility for the Hospital Charity program. All patients receive a copy of our Charity Care Application accompanying the first billing statement.

Form and Line Reference	Explanation
Part VI, Line 4	Cumberland County Hospital System, Inc ("CCHS") doing business as Cape Fear Valley Medical Center ("CFVMC") is the flag ship of Cape Fear Valley Health System ("CFVHS") CFVHS operates a variety of healthcare facilities from its headquarters in Fayetteville, North Carolina including a tertiary acute care hospital, a long-term acute care hospital, a critical access hospital, an inpatient rehabilitation facility, county emergency medical services, an outpatient psychiatric facility, a detoxification facility, a wellness center, 14 primary care clinics, 16 specialty care clinics, 4 walk-in clinics, and Health Pavilion North, an outpatient complex Cape Fear Valley Health System serves a six-county service area made up of the five counties contiguous to Cumberland County, NC, which is its Primary Service Area Per information from the 2012 Estimated Census Data, Cumberland has a population of over 326,000 residents, this was a growth of 6.9% from the 2000 Census Data Approximately 54.2% of the 326,000 residents in our primary service area are minorities, compared to 35.6% for the state

Form and Line Reference	Explanation
Part VI, Line 5	Chronic diseases like diabetes and obesity are increasing within our community. Our facility has opened a diabetes and endocrine clinic to help those patients diagnosed with diabetic. Our healthplex provides both nutritional and exercise programs to help those in the community address the problem of obesity. The goal is to help all residents learn to manage their conditions and live healthier lives by addressing the challenges associated with these conditions. Example of Program at Cape Fear Valley: Cape Fear Valley Health System's Take Charge of Your Health Program began as an initiative to close the healthcare gap between African-Americans and non-Hispanic Whites in Cumberland County through public service announcements, health fairs, screenings and speaking engagements. It has since broadened its focus to all of Cumberland County. Darwin Jones is the Coordinator of Take Charge of Your Health Program. He serves on the Board of Directors of Community Health Interventions & Sickle Cell Agency, a non-profit that works with individuals with sickle cell disease, hypertension and diabetes. Darwin is also a member of the Cumberland County Council for Healthy Living, a group assembled by the Health Department, and the Cumberland County Schools School Health Advisory Council. Take Charge of Your Health is affiliated with Eat Smart, Move More North Carolina, a statewide initiative. At Cape Fear Valley Health System, it is important to us to give back to our community. In addition to employee United Way donations and volunteer time, our employees participate in a variety of community service initiatives, to include Habitat for Humanity and the Friends of Cancer River Walk. Last year our employees gave over \$150,000 in donations to various community organizations.

Independent Auditors' Report

The Board of Trustees
Cumberland County Hospital System, Inc.
(d/b/a Cape Fear Valley Health System)
Fayetteville, North Carolina:

We have audited the accompanying financial statements of Cumberland County Hospital System, Inc. (d/b/a Cape Fear Valley Health System) (the Health System) and its discretely presented component units as of and for the years ended September 30, 2014 and 2013, and the related notes to the financial statements, which collectively comprise the Health System's basic financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of Cumberland County Hospital System, Inc. (d/b/a Cape Fear Valley Health System) and its discretely presented component units as of September 30, 2014 and 2013, and the respective changes in net position, and cash flows for the years then ended, in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As discussed in note 2(p) to the financial statements, the Health System adopted Governmental Accounting Standards Board (GASB) Statement No. 65, *Items Previously Reported as Assets and Liabilities*. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that management's discussion and analysis on pages 3 through 8, the schedule of plan funding progress on page 48, and the historical summary of actual and required pension contributions on page 49 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audits were conducted for the purpose of forming opinions on the financial statements that collectively comprise the Health System's basic financial statements. The combining schedule of assets, deferred outflows, liabilities and net position, September 30, 2014 and 2013 and combining schedule of revenues, expenses, and changes in net position, years ended September 30, 2014 and 2013 (the Combining Information) are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Combining Information is fairly stated in all material respects in relation to the basic financial statements as a whole.

Management's Discussion and Analysis (Unaudited)

September 30, 2014 and 2013

(Dollar amounts in thousands)

This section of Cumberland County Hospital System, Inc.'s (d/b/a Cape Fear Valley Health System) (the Health System) annual financial report presents management's analysis of the Health System's financial performance during the years ended September 30, 2014, 2013, and 2012. Please read this analysis in conjunction with the financial statements, which follow this section.

Overview of the Financial Statements

This annual financial report includes the independent auditor's report, managements' discussion and analysis, the basic financial statements of the Health System and required supplementary and combining information. The basic financial statements also include notes that explain in more detail some of the information in the basic financial statements. As required by U.S. generally accepted accounting principles (GAAP), the basic financial statements also include the Health System's discretely presented component units, the Cape Fear Valley Medical Foundation, Inc. (the Foundation), Bladen Healthcare, LLC (d/b/a Cape Fear Valley – Bladen County Hospital) (Bladen County Hospital or Bladen), Hoke Healthcare, LLC (HHC), and its blended component unit Cape Fear Insurance, Ltd.

In 2014, the Health System adopted GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*, which clarifies the appropriate reporting of deferred outflows of resources and deferred inflows of resources. The adoption of this statement, which was applied retroactively to all periods presented, specifically required certain balances previously reported as assets and liabilities to be reported as deferred outflows of resources and deferred inflows of resources on the balance sheet. Further, its adoption required certain other items previously reported as assets on the balance sheet to be reported as outflows of resources on the statement of revenues, expenses, and changes in net position. The 2013 and 2012 amounts included in the management's discussion and analysis have been recast to reflect the impact of the adoption of GASB 65.

In 2013, the Health System adopted GASB Statement No. 61, *The Financial Reporting Entity: Omnibus, an amendment to GASB Statement Nos. 14 and 34* (GASB 61). GASB 61 modified the existing requirements for the assessment and blending of component units that should be included in the financial statements of the Health System. The adoption of this statement resulted in the presentation of Bladen County Hospital and HHC as discretely presented component units. In the Health System's 2012 financial statements, Bladen County Hospital and HHC were presented as blended component units. The 2012 amounts included in management's discussion and analysis have been recast to reflect the impact of the adoption of GASB 61.

Required Financial Statements

The Health System's financial statements report information of the Health System using accounting methods similar to those used by private sector healthcare organizations. These statements offer short - and long-term financial information about its activities. The balance sheet includes all of the Health System's assets, deferred outflows of resources, and liabilities and provides information about the nature and amounts of investments in resources (assets) and the obligations to the Health System's creditors (liabilities). The balance sheet also provides the basis for evaluating the capital structure of the Health System and assessing the liquidity and financial flexibility of the Health System.

(d/b/a Cape Fear Valley Health System)

Management's Discussion and Analysis (Unaudited)

September 30, 2014 and 2013

(Dollar amounts in thousands)

Revenues and expenses are accounted for in the statement of revenues, expenses, and changes in net position. This statement measures the results of the Health System's operations and can be used to determine whether the Health System has successfully recovered all of its costs through its fees and other sources of revenue.

The final required statement is the statement of cash flows. This statement reports cash receipts, cash payments, and net changes in cash resulting from operating, investing, and financing activities. It also provides information on where the cash came from, what the cash was used for, and the change in the cash balance during the reporting period.

Financial Analysis of the Health System

The balance sheet and the statement of revenues, expenses, and changes in net position report the net position of the Health System and the changes in them. The Health System's net position – the difference between assets and deferred outflows of resources and liabilities – is a way to measure financial health or financial position. Over time, increases or decreases in the Health System's net position are one indicator of whether its financial health is improving or deteriorating. However, one will need to consider other nonfinancial factors, such as changes in economic conditions, population growth, and new or changed governmental legislation.

Revenues, Expenses, and Changes in Net Position

While the balance sheet shows the net position, the statement of revenues, expenses, and changes in net position provides information about the nature and source of changes to net position.

Table A-2

CAPE FEAR VALLEY HEALTH SYSTEM

Condensed Summary of Revenues,
Expenses, and Changes in Net Position

Years ended September 30

		<u>2014</u>	<u>2013</u>	<u>2012</u>

Increase in net position	\$	<u><u>36,506</u></u>	<u><u>21,564</u></u>	<u><u>46,188</u></u>

The Health System's operating revenues decreased \$10,551, or 1.6%, in 2014 compared to 2013 and decreased \$17,026, or 2.5%, in 2013 compared to 2012. The decrease in 2014 and 2013 operating revenues is due to decreases in government payer reimbursement and a slight decrease in volumes.

Operating expenses decreased \$16,615, or 2.6%, in 2014 compared to 2013. The decrease in total expenses included decreases in contract labor and depreciation. The decrease in contract labor was due to better retention and additional hiring. The decrease in depreciation was attributable to several large depreciable assets becoming fully depreciated during the year. Nonoperating income decreased \$1,940 in 2014 compared to 2013. This change is attributed to unrealized investment gains not being as great in 2014 as those that were recognized during 2013. There were no capital contributions during 2014.

Operating expenses decreased \$14,966, or 2.3%, in 2013 compared to 2012. The decrease in total expenses included decreases in professional liability insurance, depreciation, and interest expense. The decrease in depreciation was attributable to a revision of the estimated useful lives of selected buildings based on an engineering consultant's study. The decrease in interest expense was due to the refinancing of 2008C series bonds. Nonoperating income decreased \$11,746 in 2013 compared to 2012. These changes in nonoperating income are attributed to unrealized investment gains not being as great in 2013 as those that were recognized during 2012. Capital contributions totaled \$10,818 in 2013.

Capital Assets and Debt Administration

Capital Assets

The Health System has invested \$291,562, \$293,222, and \$303,994 in net capital assets as shown in Table A-3, for fiscal years 2014, 2013, and 2012, respectively. Construction-in-progress related to improvement projects increased \$4,438 and decreased \$6,442 during 2014 and 2013, respectively. The increase in 2014 is attributed to renovations in the GI Lab and Short Stay. The decrease in 2013 is reflective of the completion of renovations on the Cancer Center, 2 South Surgery, PICU, and the Emergency Department.

At September 30, the Health System had \$257,775, \$265,575, and \$292,255 of long-term bond principal outstanding in 2014, 2013, and 2012, respectively. The Health System made principal payments of \$7,800 and \$6,455 for 2014 and 2013, respectively. More detailed information about the Health System's long-term debt is presented in note 5 to the financial statements.

In December 2012, the Health System refinanced the Series 2008C bonds with Series 2012A bonds, totaling \$108,195. The Health System has a letter of credit in conjunction with its 2008A Series bonds in the amount of \$153,700 (see note 5 to the financial statements).

In October 2013, HHC closed on interim construction financing for the construction and equipping of a 41-bed acute care hospital in Hoke County to be known as the "Cape Fear Valley Hoke Hospital." During the construction of the project, the Health System will guarantee payment of the interim construction financing (see note 5 to the financial statements).

In 2011, HHC entered into a construction loan draw note with a bank to provide financing of \$38,448 to fund the majority of the project costs of an outpatient pavilion in Hoke County. The Health System served as the guarantor of the draw note. In March 2013, HHC refinanced the note with a long-term direct loan through the United States Department of Agriculture.

Economic and Other Factors

The Patient Protection and Affordable Care Act (PPACA) and the Health Care and Education Affordability Reconciliation Act, which contains a number of amendments to PPACA, were signed into law in March 2010. These healthcare bills (collectively, the Reform Legislation) seek to increase the number of persons with access to health insurance in the United States by requiring substantially all U.S. citizens to maintain medical insurance coverage. The Reform Legislation makes a number of other changes to Medicare and Medicaid, such as reductions to the annual market basket update for federal fiscal years 2010 through 2019, a productivity offset to the market basket update beginning October 1, 2011, and a reduction to the disproportionate share payments. The various provisions in the Reform Legislation that directly or indirectly affect reimbursement are scheduled to take effect over a number of years.

Also included in the Reform Legislation are provisions aimed at reducing fraud, waste, and abuse in the healthcare industry. These provisions allocate significant additional resources to federal enforcement agencies and expand the use of private contractors to recover inappropriate Medicare and Medicaid payments. The Reform Legislation amends several existing federal laws, including the Medicare Anti-Kickback Statute and False Claims Act, making it easier for government agencies and private plaintiffs to prevail in lawsuits brought against healthcare providers. These amendments also make it easier for potentially severe fines and penalties to be imposed on healthcare providers accused of violating applicable laws and regulations.

Management cannot predict the full impact the Reform Legislation may have on the Health System's financial position, results of operations, or cash flows. Management stays abreast of the various provisions in the Reform Legislation and routinely analyzes the relevant issues as they develop for their potential impact.

(1) Reporting Entity

Cumberland County Hospital System, Inc. (d/b/a Cape Fear Valley Health System) (the Health System), was incorporated under the laws of North Carolina on July 7, 1964, by the board of Commissioners of Cumberland County (the County) for the primary purpose of operating and maintaining certain hospital facilities, owned by the County, under the terms and conditions of a management lease agreement with the County. On May 4, 2006, a transfer agreement (the Transfer Agreement) was entered into with the County converting the Health System, as permitted under North Carolina General Statute (NCGS) § 131E-8, from a public hospital to a private, nonprofit hospital system. The articles of incorporation provide for the Health System to be governed by a board of trustees (the Board of Trustees), the majority of which are to be appointed by the County.

The Transfer Agreement also contains certain covenants that give the County a reversionary interest in the facilities and related property. Such covenants relate to the Health System's operation as a community general hospital, including the provision of services to indigent patients and adhering to certain requirements covering additional liens, additional debt, disposition of assets, maintaining certain financial strength ratios, and maintaining tax-exempt status among other criteria. Management believes the Health System was in compliance with all such covenants on September 30, 2014 and 2013. In addition, the Transfer Agreement provides for an annual payment in lieu of taxes by the Health System to the County (see note 10).

The Health System includes the following described facilities, all located in Fayetteville, North Carolina.

- Cape Fear Valley Medical Center, a 490-bed regional referral, acute care hospital (temporarily licensed at 539 beds since March 2011 due to high census)
- Cape Fear Valley Rehabilitation Center, a 78-bed rehabilitation facility
- Behavioral Health Care of Cape Fear Valley Health System, a 32-bed psychiatric facility
- Highsmith-Rainey Specialty Hospital, a 66-bed long-term acute care hospital
- Health Pavilion North, a multispecialty outpatient facility
- Cumberland County Emergency Medical Services, the HealthPlex of Cape Fear Valley Health System, a medically oriented wellness center, and primary care and specialty care practices are also members of the obligated group.

These facilities are owned and operated by the Health System and are members of the Health System's obligated group under its Master Trust Indenture executed in connection with the issuance of certain long-term debt obligations. Each member of the obligated group is jointly and severally liable for the repayment of principal and interest of the Health System's long-term debt obligations under the Hospital Facility Revenue Bonds.

The assets, liabilities, revenue, and expenses of all these facilities are included in the primary government accompanying financial statements.

Cape Fear Insurance, Ltd., SPC (Cape Fear Insurance), is not a member of the obligated group. Cape Fear Insurance is a wholly owned, captive insurance company domiciled in the Cayman Islands. Although legally separate, the principal activity of Cape Fear Insurance is to provide professional and general liability insurance coverage to the Health System and to purchase reinsurance policies from external markets. The Health System appoints the voting majority of Cape Fear Insurance's Board of Directors. Since Cape Fear Insurance provides services entirely to the primary government, the blending method has been used to incorporate its financial statements into the Health System's financial statements. Under the blending method, transactions between the company and the Health System that generate intercompany receivables, payables, revenues, and expenses are eliminated. After eliminations, the remaining balances and transactions of Cape Fear Insurance are included in the Health System's assets, liabilities, revenues, and expenses.

Following is a summary of Cape Fear Insurance's condensed financial information as of and for the years ended September 30, 2014 and 2013:

(Dollar amounts in thousands)

Discretely Presented Component Units

As required by U.S. generally accepted accounting principles (GAAP), these financial statements reflect the activities of the Health System and its discretely presented component units. The discretely presented component units of the Health System, all of which are nonmajor, include the following:

- Bladen Healthcare, LLC. (d/b/a Cape Fear Valley – Bladen County Hospital) (Bladen County Hospital); a critical access hospital
- Hoke Healthcare, LLC (HHC), which operates a medical office building, opened in the first quarter of 2013, and Cape Fear Valley Hoke Hospital, which is scheduled to open in March 2015
- Hoke Imaging, LLC (Hoke Imaging), which operates a diagnostic imaging center in Hoke County
- Cape Fear Valley Medical Foundation, Inc. (d/b/a Cape Fear Valley Health Foundation) (the Foundation); a nonstock charitable corporation

Under the discrete presentation method, intercompany receivables, payables, revenues, and expenses are not eliminated. The discretely presented component units' financial statements are included in a separate column apart from the Health System's (primary government) financial statements.

On June 1, 2008, the Health System, entered into a lease and operating agreement (the Agreement) with the County of Bladen (Bladen County). To facilitate the arrangement with the County of Bladen, the Health System established Bladen Healthcare, LLC, a 100%-owned subsidiary of the Health System. The Agreement had an initial term of five years and could be renewed for five additional five-year terms. Also on June 1, 2008, the Health System entered into a sublease and assignment agreement (the Sublease) with Bladen County Hospital. The Sublease assigned all rights, duties, and obligations under the Agreement to Bladen County Hospital. In March 2012, Bladen Healthcare, LLC obtained 100% ownership of all assets of Bladen County Hospital's facility through a transaction with Bladen County. Prior to this acquisition, the Bladen Healthcare, LLC operated Bladen County Hospital under a management agreement and was leasing the related hospital facility under an operating lease arrangement. Bladen County Hospital is operated by a Board of Managers which are appointed by the Health System's Board of Trustees.

In June 2009, the Health System established Hoke Healthcare, LLC, a 100% owned subsidiary of the Health System, to conduct healthcare activities in Hoke County, NC. HHC is operated by a Board of Managers which are appointed by the Health System's Board of Trustees.

The Foundation is a legally separate, nonstock charitable corporation. Its purpose is to solicit and receive contributions to assist with and further the mission of the Health System. The Foundation has been included as a component unit because almost all of the resources it holds are available to benefit the Health System and its patients.

Bladen County Hospital, HHC, Hoke Imaging, and the Foundation are not members of the obligated group as defined in the Health System's Master Trust Indenture. Combined, they account for approximately 6% and 5% of the total reporting entity revenues for the years ended September 30, 2014 and 2013, respectively.

(2) Summary of Significant Accounting and Reporting Policies

(a) *Basis of Accounting*

The basic financial statements have been prepared on the accrual basis of accounting using the economic resources measurement focus in accordance with GAAP as prescribed by the Governmental Accounting Standards Board (GASB).

(b) *Use of Estimates*

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Health System considers critical accounting policies to be those that require more significant judgments and estimates in the preparation of its financial statements, including the following: recognition of net patient service revenues; valuation of accounts receivable, including contractual allowances and provisions for bad debt; reserves for losses and expenses related to employee health care, professional liabilities, workers' compensation, general liabilities; valuation of pension and other retirement obligations; and estimated third-party payor settlements. Management relies on historical experience and on other assumptions believed to be reasonable under the circumstances in making its judgments and estimates. Actual results could differ from those estimates.

(c) *Cash and Cash Equivalents*

For purposes of the statements of cash flows, all highly liquid investments with an original maturity of three months or less at the time of purchase, and which are not limited as to their use or been designated as short - or long-term investments, are considered to be cash equivalents and are recorded at cost, which approximates fair value.

(d) *Patient Accounts Receivable – Net*

The Health System's patient accounts receivable is recorded net of allowances for uncollectible accounts of \$112,186 and \$86,464 at September 30, 2014 and 2013, respectively. The Health System's net patient revenue is shown net of provision for uncollectible accounts of \$153,098 and \$138,938 for the years ended September 30, 2014 and 2013, respectively.

(e) *Inventories*

Inventories are stated at the lower of cost (first-in, first-out method) or market.

(f) *Investments*

Investments in marketable debt and equity securities with readily determinable fair values, including assets whose use is limited, are reported at fair value in the accompanying balance sheets. Investment income (including realized and unrealized gains and losses on investments, interest, and dividends)

of \$17,566 and \$19,700 for the years ended September 30, 2014 and 2013, respectively, is included in nonoperating income in the accompanying financial statements.

(g) *Assets Limited as to Use*

Assets limited as to use consist of cash and investments set aside by the Health System's Board of Trustees for future capital improvements over which the Board of Trustees maintains control and may, at its discretion, subsequently use for other purposes. In addition, assets limited as to use consist of restricted cash held by trustee for debt service and investments designated to cover self-insurance claims.

(h) *Other Assets*

Other assets consist of goodwill and investments in certain health care-related businesses.

(i) *Capital Assets*

Capital assets are recorded at cost or, if donated, at fair value on the date of receipt. Depreciation is provided over the estimated useful life of each class of depreciable assets and is computed using the straight-line method. Such depreciation is included in depreciation and amortization in the accompanying financial statements.

<u>Property classification</u>	<u>Estimated lives (years)</u>
Land improvements	12–20
Buildings	10–90
Equipment	3–10

Expenditures for repairs and maintenance are charged to expense as incurred, unless the betterments extend the useful lives of the assets, at which point these costs are capitalized. Interest cost incurred on borrowed funds, less any interest earned on temporary investment of those funds, during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

(j) *Charity Care*

The Health System provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Because the Health System does not pursue collection of amounts determined to qualify as charity care, they are not reported as revenue.

(k) *Interest Rate Swap*

The fair value of the Health System's interest rate swap agreement is reported on the balance sheets as a liability and deferred outflows because Health System management has determined that the interest rate swap is an effective hedging instrument.

(l) Net Patient Service Revenue

Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

(m) Net Position

The financial statements utilize a net position presentation. Net position is categorized as net investment in capital assets, restricted for debt service, and unrestricted.

Net investment in capital assets is intended to reflect the portion of net position that is associated with nonliquid capital assets, less outstanding debt associated with the capital assets. Net position restricted for debt service consists of assets that are restricted, committed or assigned to expenditure for principal and interest based on third-party mandate. Unrestricted net position has no third-party restrictions on use. When both restricted and unrestricted resources are available for use, generally it is the Health System's policy to use restricted resources first and then unrestricted resources when they are needed.

(n) Revenues, Expenses, and Changes in Net Position

All revenue and expenses directly related to the delivery of health care services are included in operating revenue and expenses in the statements of revenues, expenses, and changes in net position. Nonoperating revenue and expenses consist of those revenue and expenses that are related to financing and investing types of activities and result from nonexchange transactions or investment income.

(o) Estimated Malpractice Costs

The provision for estimated medical malpractice claims includes estimates of the ultimate costs for both reported claims and claims incurred but not reported.

(p) Recently Adopted Accounting Pronouncements

In 2014, the Health System adopted GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*, which clarifies the appropriate reporting of deferred outflows of resources and deferred inflow of resources. The Statement is effective for fiscal years beginning after December 15, 2012 and was implemented by the Health System during fiscal year 2014. The adoption of this Statement, which was applied retroactively to all periods presented, specifically required certain balances previously reported as assets and liabilities to be reported as deferred outflows of resources and deferred inflows of resources on the balance sheet. Further, its adoption required certain other items previously reported as assets on the balance sheet to be reported as outflows of resources on the statement of revenues, expenses, and changes in net position.

(Dollar amounts in thousands)

Upon adoption, certain balances for the year ended September 30, 2013 were reclassified or adjusted including 1) previously capitalized bond issuance costs, which resulted in a decrease to other assets and net position and a decrease to depreciation and amortization and 2) deferred losses on long-term debt refunding transactions from components of long-term debt to deferred outflows of resources on the balance sheet. The table below shows the quantitative impact of each of the items referenced above to the financial statements at September 30, 2013:

		September 30, 2013		
		Reported	Adjusted	Impacted
Balance sheet:				
Other assets	\$	5,735	3,258	(2,477)
Deferred outflows of resources		30,355	49,082	18,727
Long-term debt – less current maturities		254,068	272,795	18,727
Net position		412,828	410,351	(2,477)
Statement of revenues, expenses, and changes in net position:				
Depreciation and amortization	\$	29,070	28,780	(290)

(q) Future Accounting Pronouncements

In June 2012, the GASB issued Statement No. 68, *Accounting and Financial Reporting for Pensions – An Amendment of GASB Statement No. 27*. The statement is intended to improve the decision-usefulness of information in employer and governmental nonemployer contributing entity financial reports and will enhance its value for assessing accountability and interperiod equity by requiring recognition of the entire net pension liability and a more comprehensive measure of pension expense. Decision-usefulness will also be enhanced through new note disclosures and required supplementary information. The provisions of GASB Statement No. 68 are effective for financial statement periods beginning after June 15, 2014. The adoption of this Statement will not have a material impact on the net position of the Health System.

In January 2013, the GASB issued Statement No. 69, *Government Combinations and Disposals of Government Operations*. The statement establishes accounting and financial reporting standards related to government combinations and disposals of government operations. This statement also provides guidance for transfers of operations that do not constitute entire legally separate entities and in which no significant consideration is exchanged. The provisions of GASB Statement No. 69 are effective for financial statement periods beginning after December 15, 2013. The Health System is evaluating the impact the adoption of GASB Statement No. 69 will have on its financial statements.

In November 2013, the GASB issued Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date*. The statement is intended to improve accounting and financial reporting by addressing an issue in Statement No. 68, *Accounting and Financial Reporting for Pensions*, concerning transition provisions related to certain pension contributions made to defined benefit pensions plans prior to implementation of GASB Statement No. 68. GASB Statement No. 71 amends GASB Statement No. 68 to require that, at transition, a government recognize a beginning deferred outflow of resources for its pension contributions, if any, made subsequent to the measurement date of the beginning net position liability. The provisions of GASB Statement No. 71 are required to be applied simultaneously with the provisions of GASB Statement No. 68. The Health System is evaluating the impact the adoption of GASB Statement No. 71 will have on its financial statements.

(r) Income Taxes Disclosure

The Health System and the Foundation are exempt from Federal income taxes on related income under Section 501(a) of the Internal Revenue Code as organizations described in Section 501(c)(3). The unrelated business income generated by the Health System and the income generated by the Health System's taxable component are not material to the basic financial statements. Accordingly, no provision for income taxes is required in the accompanying financial statements.

(3) Cash, Investments, and Assets Limited as to Use

(a) Deposits

Custodial credit risk for deposits is the risk that in the event of a financial institution failure, the Health System's deposits may not be returned. As of September 30, 2014 and 2013, the Health System's deposits had a carrying amount of \$69,915 and \$63,636, respectively, and a bank balance of \$72,155 and \$68,069, respectively. Of the bank balance, \$633 and \$725, respectively, was covered by federal depository insurance. The remaining balance of \$71,522 and \$67,344, respectively, was subject to custodial risk as it was neither insured nor collateralized.

(b) Investments and Assets Limited as to Use

The Health System holds a combination of money market and fixed-income securities, including securities issued by government-sponsored enterprises (GSEs), such as the Federal Home Loan Mortgage Corporation (Freddie Mac), the Federal National Mortgage Association (Fannie Mae), and the Government National Mortgage Association (Ginnie Mae). Based on the Transfer Agreement in May 2006, the Health System is no longer subject to NCGS §159-30; as such, the Health System holds certain nongovernmental equity investments.

(c) Credit Risk

Credit risk is the risk that the Health System will not recover its investments due to the failure of the counterparty to fulfill its obligation. The credit quality ratings for the Health System's fixed-income investments as of September 30, 2014 and 2013 are listed below:

	2014		2013	
	<u>Moody's Rating</u>	<u>Investment percentage</u>	<u>Moody's Rating</u>	<u>Investment percentage</u>
U S Treasury and agency obligations	AAA	11.9%	AAA	9.7%
Mortgage-backed securities	AAA	11.4	AAA	11.9
Corporate obligations	AAA	0.8	AAA	0.5
Corporate obligations	AA	1.6	AA	1.9
Mortgage-backed securities	AA	0.4	AA	0.5
Corporate obligations	A	6.0	A	5.8
Mortgage-backed securities	A	1.1	A	1.9
Corporate obligations	BBB	2.5	BBB	2.3
Mortgage-backed securities	BBB	0.2	BBB	0.3
Mutual funds-fixed income	Not rated	20.7	Not rated	21.0

The Health System's investment policy requires that fixed income securities rated below "BBB" by at least one major rating agency not exceed 5% of the Health System's portfolio. At September 30, 2014 and 2013, the Health System met this overall average requirement.

The mutual funds-fixed income investments that are not rated consist primarily of an investment in the PIMCO Total Return Fund with a fair value of approximately \$72,700 and \$71,500 as of September 30, 2014 and 2013, respectively.

(d) Custodial Credit Risk

Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Health System will not be able to recover the value of its investments or collateral securities that are in the possession of a third party.

Fixed-income investments and equity securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the Health System, and are held by either the counterparty or the counterparty's trust department or agent, but not in the Health System's name. As of September 30, 2014 and 2013, all of the Health System's fixed-income investments and equity securities are held by the Health System's custodial bank in the Health System's name and are, therefore, not exposed to custodial credit risk.

(e) Interest Rate Risk

Interest rate risk is the risk that fair value of the Health System's investments will decrease as a result of an increase in interest rates. The Health System maintains a formal investment policy to manage its exposure to fair value losses arising from increasing interest rates by holding equity investments in addition to fixed-income investments and by allocating its fixed-income investments between both short - and long-term investments. Short-term funds, investments with a time horizon of one year or less, amount to \$21,996 and \$26,164 as of September 30, 2014 and 2013, respectively. The remaining portfolio is allocated to long-term investments. Within the long-term section of the portfolio, the Health System's targeted allocations are approximately 55% fixed-income investments, 35% equity investments, 5% global tactical investments, and 5% global real estate investments.

The Health System invests in mortgage-backed securities. The fair values of these securities are based on cash flows from principal and interest payments on the underlying mortgages. Prepayments reduce the future cash flows of these investments and consequently their fair values. Therefore, these securities are sensitive to decreases in interest rates, which may result in an increase in prepayments by mortgagees. As of September 30, 2014 and 2013, the Health System had \$45,679 and \$49,775, respectively, invested in this type of asset-backed security.

Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the fair values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements. Refer to the distribution of maturities for the reporting entity's debt-related investments as of September 30, 2014 and 2013, in the preceding investment composition tables.

Depreciation expense for the Health System was \$25,712 and \$28,769 for the years ended September 30, 2014 and 2013, respectively. During fiscal year 2013, the Health System contracted with an independent engineering firm to perform a facility life analysis. Their review concluded that the useful lives of several buildings were higher than their estimated remaining useful lives. Using their recommendations, the Health System extended the lives of the buildings in question, which resulted in a reduction in depreciation expense during 2013.

(5) Long-Term Debt

In September 2008, the Health System issued \$152,000 in Health Care Facilities Revenue Bonds, Series 2008A (the Series 2008A Bonds) and \$133,335 in Health Care Facilities Revenue Bonds, Series 2008C (the Series 2008C Bonds) through the North Carolina Medical Care Commission. The Series 2008A Bonds have interest payable at a weekly rate as determined by the remarketing agent and are backed by a letter of credit from BB&T in the amount of \$153,700. The Series 2008C Bonds were fully registered, whereby interest was payable at fixed rates ranging from 3.10% to 4.75% for 2010 to 2019 and 5.25% to 5.63% for 2020 to 2033. The Series 2006A Bonds were repaid during 2014 and are fully registered bonds, whereby interest is payable at fixed rates ranging from 3.75% to 5.0%. The Series 2008C Bonds were refinanced in December 2012 in connection with the issuance of the Series 2012A Bonds.

In December 2012, the Health System issued \$108,195 in Health Care Facilities Revenue Refunding Bonds, Series 2012A (the Series 2012A Bonds) through the North Carolina Medical Care Commission. The proceeds of the Series 2012A Bonds were used to (1) refund in advance the Series 2008C Bonds and (2) pay certain expenses incurred with the issuance of the 2012A Bonds. The Series 2012A Bonds are fully registered, whereby interest is payable at fixed rates ranging from 2.00% to 5.00% for 2013 to 2022 and 3.5% to 5.00% for 2023 to 2033.

Under the terms of the advance refunding related to the issuance of the Series 2012A Bonds, the bond indenture permits the 2008C bonds to be defeased in whole or in part with no security requirement by the bond indenture or any obligation of the Health System if the bond trustee holds cash or defeasance

obligations sufficient to provide for the payment of such 2008C bonds. At the issuance of the respective Series 2012A bonds, the Health System secured a sufficient amount of cash to meet all scheduled principal and interest payments associated with outstanding balances on the Health System's Series 2008C Bonds.

The difference between the reacquisition price and the net carrying amount of the previously existing Series 2008C Bonds is being deferred and amortized as a component of interest expense over the remaining scheduled life of the old debt, which represents the shorter of the original amortization period remaining from the prior refundings or the life of the latest refunding debt. At September 30, 2014 and 2013, unamortized deferred loss of \$17,877 and \$18,727, respectively, are included in deferred outflows of resources in the Health Systems balance sheet. For financial reporting purposes, the debt has been considered defeased and, therefore, removed from the Health System's 2014 and 2013 balance sheet. As of September 30, 2013, the amount of defeased debt outstanding but removed from the Health System's balance sheet amounted to \$128,420, including unamortized discounts. All defeased bonds were paid in full on October 1, 2013.

The bonds (Series 2006A, Series 2008A, and Series 2012A) are governed by multiple bond documents that include the bond indenture, the Master Trust Indenture, and the supplemental master trust indenture that will be referred to collectively herein as the "Bond Indenture." The indentures for the Health System's Series 2008A Bonds and Series 2012A Bonds include covenants that require the Health System to maintain specified financial ratios, levels of working capital, and equity and other nonfinancial covenants. Management believes the Health System was in compliance with these covenants under the Bond Indenture as of and during the years ended September 30, 2014 and 2013.

As discussed above, the Health System has entered into an irrevocable letter of credit related to the Series 2008A Bonds. The letter of credit, as amended, expires on October 23, 2016. In the event of a failed remarketing of the bonds, the bank is required to make a letter of credit payment to tendering bondholders. The Health System is required to pay the bank the aggregate amount of the tender advances on the earliest of (i) the subsequent remarketing of such bonds or (ii) the date 180 days following such liquidity draw; provided that if any liquidity draw is outstanding 180 days following such liquidity draw (term out commencement date), then the amount outstanding shall be repaid in equal monthly principal payments sufficient to fully amortize the principal balance of the amount outstanding over the period (not to exceed 60 months) from the term out commencement date to the expiration of the term of the letter of credit. Drawings under the letter of credit will bear interest, payable monthly, at a fluctuating interest rate equal to (i) for the first 90 days the 30-day London InterBank Offered Rate (LIBOR), plus 2.75% and (ii) beginning on the ninety first day the 30-day LIBOR, plus 3.25%. The letter of credit agreement includes certain covenants, including financial ratio covenants related to debt to capitalization, long-term debt service coverage ratio, and days of unrestricted cash on hand. Management believes the Health System was in compliance with all such financial ratio covenants as of September 30, 2014 and 2013.

In addition, the Health System had previously entered into an interest rate swap agreement with Citibank, N.A., New York, with respect to the Health Care Facilities Revenue Bonds, Series 2006B (the Series 2006B Bonds) in a notional amount of \$202,275 (the Swap Agreement) (see note 6). In conjunction with the refunding of the Series 2006B Bonds and the issuance of the Series 2008A and 2008C Bonds, the Health System terminated approximately 30% of the Swap Agreement and, therefore, the outstanding notional amount of the Swap Agreement is \$137,000 after the refunding.

The debt service requirements of the 2008A Bonds and 2012A Bonds, as of September 30, 2014 (over the next five years and in five-year increments thereafter), are as follows:

In July 2011, HHC entered into a contract for construction services to build an outpatient pavilion in Hoke County. The contract is a gross maximum price contract not to exceed \$29,920. The budget for the entire project including land, equipment, consulting, and architecture costs is \$42,740. HHC entered into a construction loan draw note with a bank in November 2011, that will provided financing of \$38,448 to fund the majority of the project costs during the construction period. The Health System serves as the guarantor for this draw noted. In March 2013, the Health System refinanced the note with a long-term direct loan, through the United States Department of Agriculture (USDA). The borrowings under the direct loan of the USDA bear interest at 3.13%. The construction process was completed in January 2013.

HHC is constructing and equipping a 41-bed acute care hospital in Raeford, Hoke County, North Carolina to be known as “Cape Fear Valley Hoke Hospital” (the Project). The United States Department of Agriculture – Rural Development (the USDA) will provide permanent financing for the Project through its Community Facilities Direct Loan and Guaranteed Loan Programs. The terms and conditions of the USDA programs require HHC to obtain interim construction financing for the Project.

On October 31, 2013, HHC closed on its interim construction financing, which consists of the following components:

- A construction loan in the principal amount of up to \$30,000 (the Construction Loan) from Fifth Third Bank (Fifth Third). HHC has drawn \$17,319 against this loan as of September 30, 2014.
- Taxable Bonds, Series 2013A in the principal amount of \$24,579 (the Series 2013A Bonds) to Fifth Third. While Fifth Third holds the Series 2013A Bonds, they are bearing interest at a variable rate. Simultaneous with the issuance of the USDA Guarantee, the Series 2013A Bonds were remarketed at a fixed rate of interest to their final maturity date, which is October 1, 2043.
- Taxable Bonds, Series 2013B in the principal amount of \$2,732 (the Series 2013B Bonds) to Branch Banking and Trust Company (BB&T).

Upon completion of construction, HHC expects the USDA to do the following:

- Execute and deliver a guarantee (the USDA Guarantee) of the Series 2013A Bonds. The USDA Guarantee will constitute an obligation supported by the full faith and credit of the United States of America.
- Refinance the Construction Loan with the Direct Loan.

As the sole member of HHC, the Health System will guaranty payment of the interim construction financing during the construction of the Project, and until the issuance of the USDA Guarantee and closing of the Direct Loan.

(6) Interest Rate Swap

On April 1, 2006, the Health System entered into the Swap Agreement (see note 5) as a means to lower its borrowing costs on the Series 2006B Bonds when compared against fixed-rate bonds at the time of issuance. The agreement was effective May 4, 2006, with a notional amount of \$202,275.

Under the Swap Agreement, the Health System pays the swap provider fixed amounts based on a fixed rate of 3.91%, and the swap provider pays to the Health System floating amounts based on 63.50% of the British Bankers' Association 30-day LIBOR, plus 0.20%. Each such amount is based on the outstanding notional amount of the Swap Agreement.

On September 18, 2008, in conjunction with the issuance of the Series 2008A Bonds and the refunding of the Series 2006B Bonds (see note 5), the Health System terminated \$65,275 of the notional amount of the swap, reducing the associated notional amount to \$137,000. The significant terms of the swap remain unchanged as of September 30, 2014.

The significant terms and features of the Swap Agreement are as follows:

Notes to Financial Statements

September 30, 2014 and 2013

(Dollar amounts in thousands)

(a) Fair Value

As of September 30, 2014 and 2013, the swap has a negative fair value of \$34,488 and \$30,355, respectively, developed by a mark-to-market pricing service using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement of the swap.

The Health System has determined that its interest rate swap is an effective hedging derivative. Because the swap is an effective hedge, the changes in its fair value of \$4,133 and \$17,732 for the years ended September 30, 2014 and 2013, respectively, are deferred and are reported on the balance sheets as a deferred outflow of resources.

(b) Credit Risk

The Health System seeks to limit its counterparty risk by contracting only with highly rated entities. As of September 30, 2014 and 2013, the credit rating for the counterparty of the interest rate swap was rated A3 by Moody's Investors Service (Moody's), A by Standard & Poor's (S&P), and A by Fitch Investors Services (Fitch). To mitigate the potential for credit risk, under the terms of the Swap Agreement if the counterparty's credit quality falls below AA – for Fitch or S&P or Aa3 for Moody's and the swap has a fair value that is positive in favor of the Health System, the fair value of the swap will be collateralized by the counterparty with U.S. government securities. Collateral would be posted by the counterparty with a third-party custodian.

(c) Basis Risk

The Health System is exposed to basis risk on its interest rate swap agreement because the variable rate payments received by the Health System on these hedging derivative instruments are based on a rate or index (30-day LIBOR) other than the interest rates that the Health System pays on its hedged variable rate debt (SIFMA).

(d) Termination Risk

The swap uses the International Swap Dealers Association Master Agreement (the Master Agreement), which includes standard termination events, such as failure to pay and bankruptcy. The Master Agreement also includes an "additional termination event." The Master Agreement can be terminated if, at any time, a relevant rating with respect to a party declines below the termination level or is withdrawn, or if any party has no relevant rating but was previously rated by such rating agency. The termination levels are, with respect to Moody's, Baa3; S&P, BBB-; and Fitch, BBB-.

The negative swap fair value is the termination payment that would be owed by the Health System to the swap counterparty if the swap were terminated. The payments from the Health System to the swap counterparty are insured by Ambac Financial Group, Inc. (Ambac). This insurance provides

CUMBERLAND COUNTY HOSPITAL SYSTEM, INC.

Notes to Financial Statements

September 30, 2014 and 2013

(Dollar amounts in thousands)

protection to the swap counterparty in the event the Health System fails to make payments due under the swap.

When the Health System entered into the swap in 2006, Ambac was rated AAA by each of three rating agencies. Under the terms of the Swap Agreement, an “insurer event” will occur if both Moody’s and S&P’s ratings for Ambac fall below the A category. If an insurer event happens, and the Health System were downgraded below the A category, the Health System would be required to post collateral in an amount equal to the market value of the swap minus a threshold of up to \$5 million as defined in the Swap Agreement.

As of September 30, 2014 and 2013, Ambac’s rating had been withdrawn by Moody’s, by S&P, and by Fitch. As of September 30, 2014 and 2013, the Health System was rated A3 by Moody’s Investors Service and A- by S&P. Accordingly, an insurer event has occurred; however, the Health System is not required to post collateral based on its current rating.

(e) Rollover Risk

Rollover risk is the risk that occurs when the term of the swap does not match the term or maturity of the debt associated with the hedge. The Health System does not have rollover risk.

(7) Net Patient Service Revenue

Net patient service revenue for the years ended September 30, 2014 and 2013 consisted of the following (in thousands):

	<u>2014</u>	<u>2013</u>
Gross patient charges at established rates – including charges foregone for charity care	\$ 2,592,562	2,522,311
Deductions:		
Contractual adjustments	1,759,892	1,708,514
Charity care provided at established billing rates and provision for bad debts	<u>211,632</u>	<u>182,847</u>
Net patient service revenue	<u>\$ 621,038</u>	<u>630,950</u>

The Health System has agreements with third-party payors that provide for payments to the Health System at amounts different from its established rates. A summary of the payment arrangements with third-party payors is as follows:

Medicare – Inpatient acute care services rendered to Medicare program beneficiaries are paid primarily at prospectively determined rates per discharge. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors and cover both operating and capital costs. As of August 1, 2000, outpatient services are reimbursed at prospectively determined rates. The Health System is reimbursed for cost reimbursable items at a tentative rate, with final settlement determined after

submission of annual cost reports by the Health System, and audits thereof, by the Medicare fiscal intermediary. The Health System's and Bladen's Medicare cost reports have been audited by the Medicare fiscal intermediary for cost report periods through September 30, 2009, respectively. The cost reports for Highsmith-Rainey have been audited for 2008 and 2009; however, audits are incomplete for fiscal years 2006, 2007, 2010, and subsequent years.

Medicaid – The North Carolina Department of Health and Human Services Division of Medical Assistance reimburses costs for “inpatient” Medicaid services using a payment per discharge system with case-mix adjustments based on diagnostic-related groups, similar to those used by the Medicare program. The Health System is reimbursed for “outpatient” costs at a tentative rate, with final settlement determined after submission of annual Medicaid cost reports by the Health System, and audits thereof, by the Medicaid fiscal intermediary. The Health System recognizes the impact of new information obtained from audits or reviews as it is obtained. The Health System's Medicaid cost reports have been audited by the Medicaid program through September 30, 2007. Bladen County Hospital's cost reports have been audited through 2010 while Highsmith-Rainey's cost reports have been audited through the period ended 2011.

Laws governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by material amounts in the future. The effect of these settlement adjustments to net patient service revenue was an increase of \$741 and a decrease of \$316 in 2014 and 2013, respectively.

The Health System receives supplemental Medicaid funds under the North Carolina Medicaid Reimbursement Initiative (the MRI Program) based on the costs related to the treatment of a disproportionate share of indigent patients. This program was amended in 2012 to provide additional funds to cover a portion of the unreimbursed costs of treating uninsured patients. The amended funding plan is referred to as the GAP Plan. The GAP Plan requires hospitals to pay assessments into a state fund as a condition to receive the additional funds. The state submitted the GAP Plan to Centers for Medicare and Medicaid Services (CMS) for approval in January 2010. It was approved in April 2012, retroactive to the submission date of January 2010.

The funds received under the MRI Program and the GAP Plan are included in net patient service revenue, and the assessments paid are included in other operating expenses in the statement of revenues, expenses, and changes in net position. A summary of the funds received and assessments paid under these programs during fiscal years 2014 and 2013 is as follows:

	<u>2014</u>	<u>2013</u>
MRI funds received	\$ 37,089	34,384
GAP Plan funds received	12,894	14,124
Less assessments paid	<u>(5,815)</u>	<u>(5,557)</u>

Other – The Health System has also entered into payment agreements with certain commercial insurance carriers, health maintenance organizations, preferred provider organizations, and directly with local employers. The basis for payment to the Health System under these arrangements includes prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates.

The Health System's payor mix as a percent of gross revenue was as follows for the years ended September 30, 2014 and 2013:

	<u>2014</u>	<u>2013</u>
Medicare	47.8%	47.6%
Medicaid	20.0	20.2
Tricare	5.7	5.6
Self-Pay	7.6	7.8
Commercial, managed care, and other	18.9	18.8
Total	<u>100.0%</u>	<u>100.0%</u>

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government health care program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has increased with respect to investigations and/or allegations concerning possible violations of fraud and/or abuse statutes and regulations by health care providers. Violations of these laws and regulations could result in expulsion from government health care programs, together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed. Compliance with such laws and regulations can be subject to future government review and interpretation, as well as regulatory actions unknown or unasserted at this time. Management is proactively monitoring compliance with these matters through its corporate compliance program to mitigate the inherent risks of operating in the health care industry.

(8) Charity Care

The Health System maintains records to identify and monitor the level of charity care it provides. These records include the approximate amount of charges forgone for services and supplies furnished under its charity care policy. The estimated cost of services provided under the System's charity care policy, based on applying an estimated cost to charge ratio to the amount of applicable charges foregone, was approximately \$15,400 and \$20,700 for the years ended September 30, 2014 and 2013, respectively.

(9) Risk Management

The Health System is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Health System is self-insured for medical malpractice and workers' compensation up to the various limits discussed below. The Health System has purchased commercial insurance to cover losses exceeding the self-insurance limits.

Estimated Malpractice Costs

The Health System is self-insured for medical malpractice risks up to \$5,000 per claim and an annual aggregate of \$25,000, on a claims-made basis. In addition, the Health System has an excess coverage policy, which is limited to annual costs of \$50,000.

Losses from asserted claims and from unasserted claims identified under the Health System's incident reporting system, and possible losses attributable to incidents that may have occurred, but that have not been identified under the incident reporting system, are accrued based on estimates that incorporate the Health System's past experience, as well as other considerations, including the nature of each claim or incident and relevant trend factors. The Health System has retained an independent actuary to assist management in preparing such estimates. Accrued malpractice losses have not been discounted.

The following is a summary of the activity in the liability for medical malpractice claims for the years ended September 30, 2014 and 2013. The summary includes the activities and liabilities of Cape Fear Insurance.

Year ended September 30		Beginning balance	Incurred claims	Paid claims	Ending balance
2014	\$	35,288	3,508	(2,289)	36,507
2013		43,024	7,604	(15,340)	35,288

The current portion of the above liability was \$10,200 and \$10,650 as of September 30, 2014 and 2013, respectively, and is included in the accompanying balance sheets within other liabilities and accruals. The remaining noncurrent portion is included in other liabilities in the accompanying balance sheets. The Health System transfers funds to Cape Fear Insurance for the payment of medical malpractice claim settlements. Independent actuaries have been retained to assist the Health System with the annual determination of funds to be transferred.

Workers' Compensation

The Health System is self-insured for workers' compensation claims up to \$400 per incident, with a corridor of \$200 (e.g., a one-time additional retention of \$200 above \$400). The Health System has an excess coverage policy with statutory limits. The Health System has utilized independent actuaries to assist management in estimating the ultimate cost of the self-insurance portion of the settlement of such claims.

The following is a summary of the activity in the liability for workers' compensation claims for the years ended September 30, 2014 and 2013.

Year ended September 30		Beginning balance	Incurred claims	Paid claims	Ending balance
2014	\$	8,710	1,203	(1,640)	8,273
2013		9,032	1,885	(2,207)	8,710

The workers' compensation liability reflected in the balance sheet within other liabilities was \$8,273 and \$8,710 as of September 30, 2014 and 2013. The current portion of this liability was \$2,600 and \$2,700 as of September 30, 2014 and 2013, respectively. Workers' compensation expense for the years ended September 30, 2014 and 2013 was \$1,416 and \$1,166, respectively.

Employee Health Benefit

The Health System self-insures employee health and dental insurance. The Health System's accrued employee health and dental costs amounted to \$4,585 and \$5,300 at September 30, 2014 and 2013, respectively, and are included in other liabilities and accruals in the accompanying balance sheet.

Year ended September 30		Beginning balance	Incurred claims	Paid claims	Ending balance
2014	\$	5,300	28,372	(29,087)	4,585

(10) Commitments and Contingencies

(a) Leases

The Health System leases various types of equipment and outpatient clinic locations. These leases are classified as operating leases with various expiration dates. Management expects that in the normal course of events leases will be renewed or replaced by other leases. Minimum lease payments projected below also include servicing and licensing agreements.

Total expenses for all operating leases and related agreements, including the payment in lieu of taxes, were \$10,927 and \$11,482 for the years ended September 30, 2014 and 2013.

Future minimum payments that have noncancelable lease terms in excess of one year as of September 30, 2014 are as follows:

	<u>Minimum lease payments</u>
Years ending September 30:	
2015	\$ 1,764
2016	1,787
2017	618
2018	228
2019	228
2020–2024	1,244
2025–2028	<u>761</u>
Total	<u>\$ 6,630</u>

(b) Transfer Agreement

The Transfer Agreement specifies that a payment in lieu of taxes will be paid by the Health System to the County on each July 1, beginning on July 1, 2006. The annual payment in lieu of taxes includes a base payment, as specified in the Transfer Agreement. The annual payment also includes an additional payment that shall be an amount equal to the ad valorem taxes that would have been received by the County on any real property acquired by or for the use of the Health System after January 1, 1998.

Effective with the year ended September 30, 2010, the base payment shall be the previous agreement year's base payment amount adjusted by the most recently published Consumer Price Index for South Urban Size C Communities. Minimum payments above do not include a Consumer Price Index adjustment or the additional payment in lieu of taxes specified under the Transfer Agreement. The Health System made payments including these adjustments totaling \$3,722 and \$3,645 for 2014 and 2013, respectively. These payments are reflected in the other expenses line of the statement of revenues, expenses, and changes in net position.

(c) Health Care Industry Matters

The health care industry continues to attract legislative interest and public attention. In recent years, an increasing number of legislative proposals have been introduced or proposed in Congress and in some state legislatures that, like the Medicare Modernization Act, would effect major changes in the health care system. During 2010, the U.S. Congress passed the Patient Protection and Affordable Care Act, which calls for significant changes to the health care payment and delivery system. The legislation calls for changes in Medicare, Medicaid, and other state and federal programs, cost controls on hospitals, and mandatory health insurance coverage for individuals. While the Health System is planning and preparing for the certain changes called for in the legislation, it cannot predict the ultimate impact of this or future health care legislation or other changes in the administration or interpretation of governmental health care programs and the effect that any legislation, interpretation, or change may have on the Health System. Such effects may include material adverse changes to the amounts of reimbursement received by the Health System.

(d) Legal and Regulatory Matters

The Health System is involved in litigation, administrative proceedings, and regulatory examinations arising in the normal course of business. The Health System's management believes that the ultimate outcome of these matters will not have a material impact on the Health System's net position, operations, or cash flows.

(11) Employee Benefits

(a) Retirement Plan

The Health System has a single-employer defined benefit pension plan administered by the Pension Committee of the Health System (the Plan). The Plan provides retirement benefits to Plan members and beneficiaries. Employees are eligible to become participants in the Plan on the first day of the Plan year in which the employee has completed five years of credited service and attained age 25.

Notes to Financial Statements

September 30, 2014 and 2013

(Dollar amounts in thousands)

The Plan provides pension benefits to vested participants who have attained at least five years of service. The benefits are based on years of service, age, and the employee's compensation. The Health System reserves the right to amend or terminate the Plan at any time. Accordingly, the amounts disclosed herein relate to the Plan as a whole. Separate financial statements for the Plan have not been issued. The Plan is not subject to the requirements of the Employee Retirement Income Security Act of 1974, and the assets and liabilities of the Plan are not recorded in the basic financial statements in accordance with governmental accounting standards. The Plan was closed to new employees hired on or after July 1, 2011, through an amendment to the Plan effective July 1, 2011.

The January 1, 2013 Plan actuarial valuation used the Frozen Initial Liability Method with initial liability determined by the Unit Credit Method. This method is often referred to as the Attained Age Normal Method. The factors considered under this method include: average compensation (highest 10 years out of the last 15 years), years of credited service (maximum of 35 years), age, the Social Security taxable wage base, and employee's accrued benefit as of December 31, 2008. However, for Plan participants with a sum total of age and credited service of at least 85 years as of January 1, 2009; average compensation is based on highest five years out of the last 10 years and a maximum credited service of 25 years. Normal retirement age under the Plan is 65 with provisions for early retirement if the participant is 55 years of age and has attained 15 years of credited service or 60 years of age with 10 years of credited service. These benefit levels may be modified upon approval by the Board of Trustees. Benefits under the early retirement provision are reduced to reflect the Plan participant's age at the time benefits begin.

The Health System intends to fund the annual required contribution (ARC) during the employer's fiscal year beginning after the valuation date. The ARC is composed of the normal cost, plus amortization of the unfunded actuarial accrued liability (UAAL) on a level-dollar basis over an open period of 20 years.

Based on the funding status of the Plan, there was no net pension obligation as of September 30, 2014 and 2013. The Health System's annual pension cost and funding for the years ended September 30, 2014 and 2013 were as follows (unaudited):

		<u>2014</u>	<u>2013</u>
Years ending September 30:

The ARC for 2014 and 2013 was determined as part of the January 1, 2013 actuarial valuations. The actuarial cost method used to determine the ARC is called the "Attained Age Normal Methods." Participant data used for 2014 and 2013 is as follows:

	<u>2014</u>	<u>2013</u>
Covered payroll for the calculation of the actuarial information	\$ 146,263	146,263
Covered payroll as a percentage of total payroll of \$268,226	55%	55%

Total	<u><u>3,999</u></u>	<u><u>3,999</u></u>

The more significant actuarial assumptions utilized in the most recent actuarial valuation (January 1, 2013) for computing the annual required contributions for the Plan are as follows:

(b) Funding Status and Progress

The Health System accounts for the Plan using an actuarial accrued liability (AAL) as the standardized measure of disclosure on a net present value basis of pension benefits, which will become payable at future dates. The calculation of the AAL includes projected salary data. This measure is intended to help users assess the funding status of the pension plan on a going-concern basis, assess progress in accumulating sufficient assets to pay benefits when due, and make comparisons among employers. The actuarial measure is the basis for the determination of the annual funding requirements used to determine the contributions made to the Plan. Funding levels and obligations to contribute to the Plan are established by the Board of Trustees and can be amended by the Board of Trustees. The actuarial value of plan assets is determined based on a three-year smoothing method with a 30% corridor.

(c) Trend Information (Unaudited)

The Health System's progress in accumulating sufficient assets to pay benefits when due is presented as follows:

<u>Actuarial valuation date</u>	<u>Actuarial value of assets</u>	<u>AAL Projected unit credit</u>	<u>Unfunded AAL (UAAL)</u>	<u>Funded ratio</u>	<u>Covered payroll</u>	<u>UAAL as percentage of covered payroll</u>
January 1, 2012	\$ 105,533	144,619	39,086	73.0	\$ 145,384	26.9

January 1, 2014	118,606	157,413	38,807	75.3	145,472	26.7

The schedules of Plan funding progress, presented as required supplementary information following the notes to the basic financial statements, present multiyear trend information about whether the actuarial values of Plan assets are increasing or decreasing over time relative to the AAL for benefits.

The Health System has a 49% equity interest in Valley Regional Imaging. The investment is accounted for using the equity method. The Health System's investment in Valley Regional Imaging as of September 30, 2014 and 2013 is \$1,013 and \$1,202, respectively, and is reflected within other assets in the balance sheets.

The Health System is an investor in other medical-related organizations that are accounted for using the cost method and had a carrying amount of \$394 and \$469 as of September 30, 2014 and 2013, respectively, and is reflected within other assets in the balance sheet. Information about the availability of separate financial statements of the above-mentioned organizations may be obtained from the Health System's office of financial services.

(13) Regulatory Investigation

During 2004, the Health System was advised that it was the subject of an investigation by the Office of the Inspector General of the Department of Health and Human Services (OIG) related to billing practices associated with Emergency Medical Services and LifeLink services. On July 24, 2009, the Health System reached an agreement with the OIG to resolve the investigation by paying the government approximately \$1,500 and entering into a five-year corporate integrity agreement that requires the Health System to maintain a formal compliance program for the term of the agreement. Management believes it has complied with this corporate integrity agreement through its expiration date in July 2014.

(14) Subsequent Events

On November 3, 2014, the Health System entered into a Management Services Agreement with Harnett Health System, Inc. (Harnett), effective as of that date. Under the Management Services Agreement, the Health System is supervising and managing the day to day operations of Harnett and its various affiliates, including Betsy Johnston Memorial Hospital in Dunn, North Carolina and its provider-based location, Central Harnett Hospital, in Lillington, North Carolina (collectively, "Harnett Health System). In conjunction with the Management Services Agreement, the Health System also extended a Line of Credit to Harnett and was granted certain rights to assume an ownership interest in Harnett Health System in the future. As of January 23, 2015 Harnett has \$1,500 outstanding against the extended line of credit.
