Estimated Yield

The Estimated Yield (EY) in the preceding sections(s) compares the anticipated earnings on your investments in the coming year to the current price of the investments. It is based on past interest and dividend payments made by the securities held in your account. Changes in the price of a security over time or in the amount of the investment held in your account will cause the EY to vary. The EY is only an estimate and cannot be guaranteed by Edward Jones or the issuers of the securities. Your actual yield may be higher or lower than the estimated amounts. Estimates for any securities that have a return of principal or capital gain may be overstated. Income cannot be estimated for any securities that do not have an annual payment amount or frequency available at the time of estimation. Yield to Maturity is typically reported for Zero Coupon Bonds as these securities do not have an annual payment.
