Liberty Bank

Audit Committee Meeting

Whittlesey & Hadley FDICIA Presentation

1. FDICIA Improvement Act of 1991 (FDICIA)

- Regulatory response to the S&L and the Northeast banking crisis of the mid 1980's to early 1990's.
- All banks with total assets over \$1.0 billion are required to document and test internal controls.
- Independent auditors are required to test internal controls.
- Became the model that the SEC followed when adopting the Sarbanes-Oxley Section 404 internal control requirements for public companies.

2. Internal Control Documentation at Liberty Bank

- Compiled and summarized by a third party Navis Group.
- Work product is a listing of key controls with complete descriptions for each key control.

3. Key Control Identification

- Key controls for financial reporting only.
- A key control is a control that, if it is not functioning properly, could result in a material financial statement misstatement.
- Management determined that there were 110 key controls. Management makes this
 determination based in part on input from the Navis Group and Wolf & Company.

4. Management Testing of Key Controls

- Management contracts with Whittlesey & Hadley to perform the key control testing.
- Whittlesey & Hadley has been doing the testing since 2012.
- Work is performed between August and November.
- Complete set of our working papers provided to management who then provide to Wolf & Company.
- Wolf & Company is able to place reliance on our test work in order to reduce their extent of testing.

Benefits to the Audit Committee

 Added level of comfort from documenting and testing the internal controls most important to financial reporting.

- Third-party specialists are advising on what should be tested and performing the testing.
- Internal audit might not test all of these controls annually internal audit responsibilities include compliance and operational audits.
- In a financial statement only audit, the auditor is only required to gain an understanding of control not required to test internal controls.

Ms. Lina R. Curtin Comptroller Liberty Bank 315 Main Street Middletown, CT 06457

Dear Ms. Curtin:

We have completed our internal control testing at Liberty Bank (the Bank) for the year ending December 31, 2015. This letter serves to summarize our approach and the results of our testing.

You have asked us to perform internal controls testing over "key controls" as determined by senior management. Our testing documentation was designed to support management's assertion related to the Bank's effectiveness of internal control over financial reporting. American Institute of Certified Public Accountants (AICPA) audit standard AT Section 501, An Examination of an Entity's Internal Control Over Financial Reporting that is Integrated with an Audit of its Financial Statements (AT501) is the authoritative guidance related to reporting on the effectiveness of an entity's internal control over financial reporting. AT501 was significantly changed by Statement on Standards for Attestation Engagements (SSAE) No. 15, An Examination of an Entity's Internal Control Over Financial Reporting that is Integrated with an Audit of its Financial Statements (SSAE 15) that was issued in September 2008. SSAE 15 aligns the internal control standards of AT501 with PCAOB Audit Standards No. 5 (AS5) that was issued back in 2007. In addition to supporting management's assertion, our testing is designed so that your independent auditors, Wolf & Company, can place reliance on our testing in order to reduce their extent of testing.

The extent of our testing was driven by the number of key controls and the methods to testing internal controls – re-performance, examination/inspection, observation and inquiry. Management, with the assistance of a third-party, The Navis Group determined the extent of testing and the testing methods. Management was responsible for evaluating the adequacy of our documentation and the results of our testwork. Management is responsible for establishing and maintaining internal controls, and determining that such controls are appropriate for the Bank.

Hardcopies of our documentation for this engagement have been provided to the Bank and is property of the Bank.

Mario L. Solari was the engagement partner on this engagement and the partner that signed this summary report.

We tested a total of 110 key controls, including 5 IT-related controls. Of the 110 key controls tested we noted that 5 had testing exceptions as follows:

Control Number	Control Description	Testing Exception
Loans 1-5	Residential Loans Approval Protocol	We noted one out of 60 new loans tested in which Form 1008 (loan approval form) was not signed by an employee of the Bank. The residential loan underwriting area subsequently obtained the proper authorization signature.
Loans 3-2	Advances on Lines of Credit - Authorization	We noted one exception out of 40 items tested. A signed "Request for Advance Form" from the customer was not completed. The customer requested the advance via email but there was no call-back verification procedure documented.
Loans 4-3	Warehouse Lines – Weekly Collateral Report	We tested 26 items in total and noted seven instances in which the reconciliation was not completed.
OREO 4-1	OREO G/L Entry Protocol	One exception noted - the person entering the OREO transfer into the system did not sign-off on the worksheet. The originator and the approver did sign the worksheet.
Deposits 2-6	New Account Set-up Protocol	We noted one exception out of 60 items tested. The signature card and account agreement could not be located.

We will be pleased to discuss this letter with you or your auditors at any time.

Very truly yours,

Whittlesey & Hadley, P.C.
