SCHEDULE H, PART VI, LINE 2	COMMUNITY HEALTH NEEDS ASSESSMENT It is was generally recognized that the health of the community was not the responsibility of any one entity, but rather required the coordinated efforts of many entities public and private to realize an improved health status of a community Penn State Health St Joseph Health Network has a strong history of working together to advance community health In 2012, as mandated by the Affordable Care Act (ACA) we partnered with others to conduct a Community Health Needs Assessment with a goal of implementing programs for meeting any needs that are identified This health assessment provided a consensus on needs to establish interventions, solutions and collective action to reduce the prevalence of key health indicators It also provided critical information upon which to make effective resource and program investments and offers a framework for updating data and measuring outcomes The purpose of the needs assessment is to identify and prioritize community health needs so that these organizations can develop strategies and implementation plans that benefit the public as well Following the completion of the CHNA research, Berks County Health Collaborative held its first Berks County Health Collaborative Summit on April 7, 2016 at the Reading Area Community College in Reading, Pennsylvania The meeting highlighted key research findings and facilitated community discussion and prioritization of identified needs The identified needs, in prioritized order of the community were - Access to Care - Chronic Illness - Behavioral/Mental Health On April 18, 2016, the Berks County Health Collaborative Advisory Committee met to discuss feedback secured during the Summit meeting and to make a final recommendation on the prioritized needs of the community After reviewing and evaluating the information, the advisory group made a recommendation to prioritize the following health needs - Obesity - Behavioral/Mental Health Access indicators appear to be generally favorable for Berks County residents, with most residents reporting having health care coverage and a primary care physician However, findings from the key informant interviews and focus groups suggest that residents still struggle when accessing vital health care services Specifically, challenges related to insufficient number of bi-lingual providers, mental health providers, providers accepting Medicaid/Medical Assistance and lack of transportation for medical appointments were some of the major barriers that were identified Another notable finding was more than two out of five residents had some economic hardships, around one in eleven skipped medical treatment due to cost, and around one in nine did not fill a prescription due to cost in the past year Key informant interviews also corroborate this finding in that nearly 80% of participants selected, inability to pay out of pocket expenses such as co-pays and prescriptions, as the most significant barrier to accessing care Long wait times were also found to present key barriers, especially when one is trying to secure an appointment with a specialist The research indicates health disparities exist within certain populations Those groups include Low income or poor residents, older residents and minorities, specifically, Latinos Over the next three year period, interventions should be targeted at these groups The full needs assessment can be accessed at this link http //www.thefutureofhealthcare org/assets/community-health-needs-assessm-ent.pdf

SCHEDULE H, PART VI, LINE 3	PATIENT EDUCATION OF ELIGIBILITY FOR ASSISTANCE We believe that receiving healthcare is a basic human right Our Catholic healing tradition teaches that access to necessary healthcare should never be based on the ability to pay St Joseph participates in the widest number of insurance programs of the hospitals in the region We realize that many people either cannot afford health insurance or do not have enough insurance to cover their bills Those are the reasons for our Payment Options and Financial Assistance Program, which is publicly posted on the hospital website www.thefutureofhealthcare.org A price estimator also was added in order to further create price and cost transparency We understand that the need for health care and hospital services is often unplanned, and some patients may not have sufficient insurance, or may be unable to pay their entire bill right away We assure patients that admission to Penn State Health St Joseph is a medical, not a financial, decision And, for those who need to take advantage of our financial assistance programs, we provide the necessary assistance in completing applications that help to determine eligibility for federal, state or county government health care assistance We also offer Penn State Health St Josephs own assistance plan that can pay all or a significant portion of hospital bills

SCHEDULE H, PART VI, LINE 5	The heart of our mission is to touch and improve the lives in body, mind and spirit of as many people as possible who live in our extended community. We are making a difference with our numerous outreach efforts for which our staff gives unselfishly of their time. Among our programs are -An Award for Better Breast Health. Penn State Health St. Joseph was selected as a winner in the Community Benefit category for its project, Better Breast Health Initiative Breast Screening for the Uninsured Population. This innovative project was specifically developed to provide breast health education and screenings to the uninsured female population. Through the program, Penn State Health St. Joseph was able to provide breast imaging services for over 300 uninsured women. This initiative exemplifies Penn State Health St. Joseph's commitment to the well-being of its patients and community. The HAP Achievement Awards represent Pennsylvania's health care innovation and forward-thinking during a time when much is changing in the health care industry. Fifteen judges representing the public and private sectors, health care, and business organizations chose 15 award winners -Family and Womens Care and Family Practice Clinic in Center City. St. Joseph Family and Womens Care provides comprehensive outpatient primary care that includes services in family practice, pediatrics, and OB/GYN. The Center serves as an entry point into the continuum of care offered by Penn State Health St. Joseph. Physicians, Physician Assistants, Certified Registered Nurse Practitioners, Certified Nurse Midwives, Social Workers, Nurse Navigators, Nurses and Medical Assistants collaborate to provide an interdisciplinary approach to meet the individual healthcare needs of our patients. We offer age-appropriate health, psychological care that is culturally sensitive. Health maintenance education and wellness programs are also offered. This clinic serves as an outreach health program for an underserved patient population in the City of Reading and participates in all of the local health insurance plans including all of the Medical Assistance Plans. Access to primary health care is a significant issue for residents of Berks County. While it is true that residents all across Pennsylvania have to face the consequences of having too few primary care physicians in their communities it remains a problem that many county residents report not having a personal health care provider at a rate that is higher than the state average and higher than the surrounding counties. Latinos are more than three times as likely to report not having a primary health care provider as the Whites. Further, many Latinos face the significant socioeconomic barriers of poverty, language, lack of health insurance and cultural issues, including social support and attitudes about healthcare. The Downtown Campus also is home to Haven Behavioral Health, a full-service, inpatient psychiatric unit providing comprehensive and state-of-the-art behavioral health services to wide range of patients and conditions -About Centering Pregnancy. St. Joseph offers Centering Pregnancy a multifaceted group model of care that integrates the three major components of care: health assessment, education, and support into a unified program within a group setting. Eight to twelve women with similar gestational ages meet together, learn care skills, participate in a facilitated discussion and develop a support network with other group members. Each group meets for at least 10 sessions throughout pregnancy and early postpartum and each session lasts approximately 90 minutes. Within the group space, the medical practitioner and care team complete standard physical health assessments for the women. Through this unique model of care, women are empowered to choose health-promoting behaviors. The effectiveness of this model and delivery of care has been measured by health outcomes for pregnancies, specifically increased birth weight and the gestational age of the mother at delivery. Additionally, scores show increased satisfaction by both the mother and the healthcare providers. Centering Pregnancy groups provide a dynamic atmosphere for learning and sharing that is impossible to create in a one-to-one encounter. Instead of short visits alone with a provider, Centering Pregnancy group participants receive approximately 20 hours of prenatal care across pregnancy, compared to about 2 total hours all at no additional cost. Centering Pregnancy is prenatal care that serves the general needs of all pregnant women and meets the special needs of racial and ethnic groups. This prenatal care model transcends barriers to bring women together to share what they have in common: the desire to have a healthy baby and a safe, satisfying labor and delivery experience. Hearing other women share concerns which mirror their own helps the woman to normalize the whole experience of pregnancy. St. Joseph has implemented Centering Pregnancy at o
