Schedule H, Part III, Line 2 Bad debt expense - methodology used to estimate amount	Patient service revenues are reported at estimated net realizable amounts for services rendered. BHS recognizes patient service revenues associated with patients who have third-party payor coverage on the basis of contractual rates for the services rendered. For uninsured patients that do not qualify for charity care, revenue is recognized on the basis of discounted rates in accordance with BHS' policy. Patient service revenues are reduced by the provision for bad debts and accounts receivable are reduced by an allowance for uncollectible accounts. These amounts are based on management's assessment of historical and expected net collections for each major payor source, considering business and economic conditions, trends in health care coverage and other collection indicators. Management regularly reviews collections data by major payor sources in evaluating the sufficiency of the allowance for uncollectible accounts. On the basis of historical experience, a significant portion of BHS' self-pay patients will be unable or unwilling to pay for the services provided. Thus, BHS records a significant provision for bad debts in the period services are provided related to self-pay patients. For receivables associated with patients who have third-party coverage, BHS analyzes contractually due amounts and provides an allowance for uncollectible accounts and a provision for bad debts, if necessary. Accounts receivable are written off after collection efforts have been followed in accordance with BHS' policies.

Schedule J, Part I, Line 3 Arrangement used to establish the top management official's compensation	In accordance with the Executive Compensation policy of Baptist Health System, Inc. (BHS), the organization's sole member, BHS's Compensation Committee (made up of independent Directors of BHS) engages annually a third party compensation consultant who provides a database composed of current data regarding compensation paid for each executive position by similarly situated tax exempt health systems in the country. These health systems are generally the same size as BHS, considering revenue and other appropriate indicators. The group of comparator companies that is derived based on the above stated parameters comprise the "Market." When the Committee meets with such consultant, the consultant provides to Committee members compensation target levels that are competitive with the Market. Generally, the median of the Market is targeted. The actual amount that health system executives receive as compensation may be higher or lower than the median, depending on the health system and the individual's performance. The objective is to have a strong link between health system and individual performance and executive compensation such that if the health system and the individual perform at an optimal level, his or her compensation is in the higher range of the Market. Conversely, if either the health system or individual performance is below expectation, compensation may be in the lower range of the Market. The minutes of the annual Compensation Committee are recorded by the Committee's compensation consultant and are approved promptly by the Chair of such Committee.
Schedule J, Part I, Line 4b Supplemental nonqualified retirement plan	Baptist Health System, Inc. (BHS) parent affiliate of Baptist Medical Center of Nassau, Inc., has two active supplemental nonqualified retirement plans (SERPs). One is for certain executives (supplemental executive retirement plan) and the other is for certain vice presidents (vice-president supplemental executive retirement plan). These SERPs are plans described in IRS Section 457(f). The benefits under these plans accrue during each executive's term of employment. These benefits are unvested and subject to forfeiture until the covered employee reaches retirement age. After over 26.5 years of service, A. Hugh Greene reached retirement age under the executive SERP during 2015, causing his SERP benefit to vest. Accordingly, the total amount of Mr. Greene's SERP taxable benefit included in his W-2, box 5 was \$12,666,683 in addition to his current year income. Like other participants in the Executive SERP, Mr. Greene's SERP compensation is payable over his lifetime with a 15-year period certain. This SERP amount is reported on Schedule J, Part II, Column (B)(iii) "Other Reportable Compensation" in addition to other reportable compensation, Column (F) "Compensation in column (B) reported as deferred in prior Form 990", and Form 990, Part VII. The following individuals accrued unvested benefits under these plans during calendar year 2015: John F. Wilbanks, \$233,628; Harvey Granger, \$176,442; and Scott Wooten, \$170,354. These amounts are included on Schedule J, part II, column (c) for each of the listed individuals.

Form 990, Part VI, Line 15a Process to establish compensation of top management official	In accordance with the Executive Compensation policy of Baptist Health System, Inc (BHS), the organization's sole member, BHS's Compensation Committee (made up of independent Directors of BHS) engages annually a third party compensation consultant who provides a database composed of current data regarding compensation paid for each executive position by similarly situated tax exempt health systems in the country. These health systems are generally the same size as BHS, considering revenue and other appropriate indicators. The group of comparator companies that is derived based on the above stated parameters comprise the "Market". When the Committee meets with such consultant, the consultant provides to Committee members compensation target levels that are competitive with the Market. Generally, the median of the Market is targeted. The actual amount that health system executives receive as compensation may be higher or lower than the median, depending on the health system's and the individual's performance. The objective is to have a strong link between health system and individual performance and executive compensation such that if the health system and the individual perform at an optimal level, his or her compensation is in the higher range of the Market. Conversely, if either the health system or individual performance is below expectation, compensation may be in the lower range of the Market. The minutes of the annual Compensation Committee are recorded by the Committee's compensation consultant and are approved promptly by the Chair of such Committee.
