EAI **Estimated Annual Income (EAI) & Estimated Yield (EY)**- EAI is an estimate of annual income for a specific security position over the next rolling 12 months. EY is calculated by dividing the current EAI for a security position by its statement closing date market value. EY reflects only the income generated by an investment, it does not reflect changes in its price, which may fluctuate. For certain types of securities, EAI and EY could include the return of principal or capital gains which would render them overstated. EAI and EY are estimates provided for informational purposes only and should not be relied on for making investment, trading, or tax decisions. There is no guarantee that your investments will actually generate the EAI or EY presented. Actual income and yield might be higher or lower. EAI and EY should not be confused with a security's 30-day Yield or 7-day Yield, if provided, as such yield quotations reflect the actual historical performance of a security. **For additional information, including calculation details, refer to the "Additional Information and Endnotes" section at the end of your statement.**

<sup>c</sup> Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable

<sup>c</sup> Cost basis information (or proceeds from short sales) has been provided by you and has not been adjusted except as otherwise indicated. When positions are transferred between accounts, in certain cases, cost basis information may be automatically transferred and deemed to be customer-provided

Generally, the values noted above are based on information provided by the fund administrator. For purchases made on the secondary market, the information shown in Total Contributions/Distributions reflects your purchase price and your contributions only. This information does not reflect contributions/distributions made or received by the seller from whom you purchased the position.

<sup>6</sup> Original Cost is price paid by purchaser adjusted for annual original issue discount, inclusions and/or return of capital adjustments, if applicable. Adjusted Cost reflects adjustments to Original Cost for market discount, accretion and/or premium amortization. Adjusted cost for GMS Portfolios and Alternative Investments are determined by inception to date contributions minus inception to date distributions.
