Total Client Investment: Cost of shares directly purchased and still held. Does not include shares purchased through reinvestment.
Cumulative Investment Return: Estimated Market Value minus Total Client Investment. Cumulative Investment Return is the dollar value of the capital appreciation (depreciation) of all shares purchased and still held, including shares acquired through reinvestment of dividends and distributions, which may be greater or less than the actual income distributed.

Unrealized Gain or (Loss): Estimated Market Value minus Total Cost Basis (total cost of shares directly purchased and still held, as well as cost of shares acquired through reinvestment). Provided for Tax Planning purposes only and is not applicable to retirement accounts.
Initial Purchase: Date of your initial investment in this fund.

Market Timing: Merrill Lynch's policies prohibit mutual fund market timing, which involves the purchase and sale of mutual fund shares within short periods of time with the intention of capturing short-term profits resulting from market volatility. Market timing may result in lower returns for long-term fund shareholders because market timers capture short-term gains that would otherwise pass to all shareholders and due to increased transaction costs and fewer assets for investment due to the need to retain cash to satisfy redemptions.

Sales Charge Discounts or Waivers: Many funds offer various sales charge discounts or waivers depending on the terms of the prospectus and/or statement of additional information. You should consult a fund's prospectus and/or statement of additional information to determine whether you may qualify for a discount or waiver. Notify your Financial Advisor, Financial Solutions Advisor or Investment Center representative if you believe you qualify for any of these or any other discounts or waivers. Please contact your Financial Advisor, Financial Solutions Advisor or Investment Center representative for further information on available sales charge discounts and waivers.

[1] Year-to-date income may include closed accounts no longer shown on this statement.

[2] "Market Fluctuation" reflects any increase or decrease in fund share prices since your last statement. It does not reflect a fund's payment of dividends and interest or any reinvestment of dividends and interest into your account. If all of your holdings are in retail or government money market funds, generally there should be no change in account value or principal due to market fluctuation. For institutional investors, if all of your holdings are in an institutional money market fund, your account value may change because an institutional money market fund's share price will fluctuate
