Part I, Line 3c	
Part I, Line 7	The costing methodology used to calculate the amounts in the table is a combination of average costs and actual costs pertaining to supplies, wages, and benefits. For supplies, the actual cost of items used for each event is applied. If no actual cost is available, we then use an estimate. Wages are calculated by multiplying the average wage rate times actual hours worked. The benefit rate used includes a fringe ratio of all benefits related to the above wage calculation. The cost accounting system does not differentiate between different payer types and no cost-to-charge ratio is used.
