### Attachment C

The long term effects x-rays have on babies is not known. In a major effort by GE they have designed an x-ray that not only addresses that problem but have innovated by :

providing for a full body scan of the child. (eliminating multiple required x-rays)

permitting surgeons to create a virtual image that would help in complex operations. for the first time.

Unfortunately this x-ray machine has not been available to Hospitals because they could not justify its cost. In 2016 there were only 6 units installed in the country.

Our Foundation challenged the Allegheny Hospital System. If they would advance \$700,000 we would provide the necessary \$300,000 to complete the sale. As a result, there is an advanced x-ray machine in Pittsburgh that provides x-rays with 1/40 of the radiation of a normal x-ray.

We are proud we brought it about.

A grant of \$300,000 was given to Singer Research for this purpose in 2016.

#### MISSION STATEMENT

Reduced Medicare funding by Congress has translated in reduced HMO funding at all levels. As a result, medical Care (Hospital and Doctor ) has been cut to a dangerous level. The existing payments has changed the way medicine is delivered, administered and practiced. To complicate the situation, the extent of the acute nature of the problem is recognized by few outside the medical community. In addition, the far reaching implications of the issues are not clearly recognize or understood by the general public.

One implication, the patient, doctor contact in the office visit is limited to 7 minutes; further, by nature of patient payments the management of the patients illness has been shifted from the doctor to the patient and his family.

The limit of doctor and patient contact is grossly inadequate for patient

welfare, especially when chronic pathologies require constant monitoring, constant education and constant review. Our present system discourages, in fact, prohibits that which is required for minimal good medicine.

Another implication is the effect congressional budget cuts have had on the curtailing of medical research and the diminution in the quality of Resident Training.

These and other factors create an egregious diminution in the quality of the American medical system, with no end in sight.

The John Francis Foundation intends to devote much of its funds to address these issues, understand their implications and experiment with creative methods to address the problems created.

An example of additional projects that complies with our mission statement follows:

Through a grant from the John Francis Foundation the "Children's Musculoskeletal Motion Program has been established. This is the first program of its kind to address the prevention of sequela hip joint disease in children, using a multi disciplinary approach.

The goal of the program is to use information technology and educational sessions to inform and empower patients and their families to maintain their musculoskeletal health, despite their disabilities and to focus resources to include self-responsibility, as well as to monitor and document the efficacy of this program.

In the year 2016 the focus of our program is on children with Legg-Calve-Perthes Disease affecting the hip in children. Perthes Disease affects otherwise normal children and its etiology is unknown. Children who have Perthes Disease of the hip are 10 times more likely to develop more severe forms of this disease when they become adults. Forty per cent of all children with Perthes Disease will require hip joint replacements as adults (Mcandrews and Weinstein).

The program will offer as free services:

a. An in-office learning center for patient and family education and family education.

b. A focused weekend retreat format emphasizing the importance of healthy habits of daily living for optimal musculoskeletal health in the context of hip

**joint disability.**

**c. An on-line web site to monitor and document hip joint function and to provide feedback for patients, pediatricians and orthopaedic surgeons.**
