Supplemental Information

Return Reference	Explanation
Part X, Line 2	The Corporation has adopted the accounting standard on accounting for uncertainty in income taxes, which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken, or expected to be taken, in a tax return and requires the affirmative evaluation that is more-likely-than-not, based on the technical merits of a tax position, that an enterprise is entitled to economic benefits resulting from tax positions taken in income tax returns. If a tax position does not meet the more-likely-than-not recognition threshold, the benefit of that position is not recognized in the financial statements. This standard also requires organizations to disclose additional quantitative and qualitative information in their financial statements about uncertain tax positions. The Corporations adoption of this standard did not have a material impact on the financial statements.
