Open Source Software Development (Dev)
Mifos X is a free and open source financial software developed to build the complete range of financial services required for effective financial inclusion. The reference apps are examples of how to build microcredit and micro-savings applications using Mifos X. In 2017, the core team led ongoing development of the Mifos X software platform on top of Apache Fineract and successfully guided the technical contributions from external partners, volunteers, and interns. This year, the focus of the community was on client-facing applications on top of the platform including a mobile banking app, mobile wallet app, and online banking app for clients, & version 4 of our mobile app for field officers. New features developed including two factor authentication support, integration with credit bureau support for notifications, and campaigns via SMS, as well as a redesign of the user interface.
Our team also finalized the design and released the initial microservices for a brand new cloud-native third generation architecture which will provide a reference framework to allow a wide range of digital financial service applications for financial inclusion to be built.

We started 2017 with approximately 300 Mifos Installations reaching a total poor client base of 6M clients. By the end of 2017 we had 350+ Mifos Installations reaching more than 8M clients. We grew this client base by more deeply engaging the community, focusing on new outreach within the fintech sector, emphasizing the impact of our ecosystem in building on top of open APIs and continued outreach to new markets in the Caribbean. We grew our partner program to more than 100 local deployment partners & 25 platform partners building solutions to lift people out of poverty. This year as part of our sustainability efforts, we also took on more technical assistance projects, assisting with knowledge transfer and custom development for new solutions on Mifos X. We continued to leverage our network of volunteers, bringing on a higher percentage of product management volunteers and strategic advisors. We grew external contributions through increased participation in Internship programs like Google Summer of Code in which we worked with 11 interns and Google Code-In educating high schoolers on how to contribute to open source projects.
