Name: Thompson Cancer Survival Ctr Foundation

Form 990 (2017)

Form 990, Part III, Line 4a:

Cancer Support ServicesThompson Cancer Survival Center Foundation provides grants to support the programs of Thompson Cancer Survival Center (TCSC). TCSC provides a range of cancer support services with the aim of providing patients who are undergoing cancer treatment the best possible outcome for their individual situation. Support services include social services, treatment care coordination and oncology clinical trials. See Schedule O for further information. When a Covenant Health facility patient is identified as someone who could benefit from any of the services provided by TCSC, a referral is made to the TCSC Social Services Department. In 2017, there were 1,479 new patient referrals to Social Services and 3,763 follow-up patients. Included in the Social Services Department is a nutritional counseling and education program, and a Genetics Clinic. The nutritional counseling and education program had 887 new patient referrals in 2017 and 3,506 continuing patients receiving support. In 2017, the Genetics Clinic received referrals for 747 new patients who were in need of counseling, including 191 who pursued genetic testing. The Genetics Clinic is staffed by a licensed and certified genetic counselor who provides breast cancer and hereditary cancer risk assessments and who coordinates genetic testing. In 2017, 16% of individuals who pursued genetic testing were positive for a hereditary cancer syndrome. Whether patients tested positive or negative for a hereditary cancer syndrome, decided not to pursue testing, or were not appropriate candidates for testing, they and their families were able to make informed decisions regarding their medical management based on the genetic testing they received. Treatment care coordination of each patient is one of the goals of TCSC and this goal is achieved by the two means, the Multidisciplinary Treatment program and the Nurse Navigator program. Multidisciplinary treatment is a process of individual patient consultation with the members of that patient's oncology care team, where treatment options are discussed based on that individual's circumstances. This approach affords the opportunity for the physician to relate one-on-one with the oncology patient and explain treatment choices in layman's language. Patients in need of this care coordination come from various Covenant Health facilities, as well as outside facilities. The TCSC Nurse Navigator program was developed to assist oncology patients to help them overcome multiple barriers to healthcare, according to their needs. Common barriers include financial, education, transportation, language, emotional, and a complicated health care system in general. The TCSC Nurse Navigators guide patients to sources of financial support, help complete paperwork, educate patients on diagnoses and medical procedures, arrange and coordinate appointments with multiple providers, help with transportation, assist with housing, communicate with providers about unique patient needs, ensure medical records arrive at scheduled appointments, direct patients to support groups or counseling services, and attend patient appointments for support. They work diligently to meet the needs of patients and families and become their liaison between all physicians and services. In 2017, there were 382 patients who were assisted with their treatment by TCSC Nurse Navigators. For those patients being followed by navigators that have curative treatment, 102 Survivorship Care Plans were completed by Nurse Navigators and discussed with patients in 2017. The Nurse Navigator is actively involved in the multidisciplinary treatment of patients. Nurse Navigators currently schedule, organize, oversee, summarize, and provide follow-up for 4 to 5 multidisciplinary cancer conferences per week. In 2017, there were 918 patients presented at multidisciplinary conferences, with 151 of those patients being seen in our clinics where a Nurse Navigator is in attendance. TCSC Nurse Navigators lead the Low Dose CT Lung Screening Program (LDCT) for Fort Sanders Regional and Fort Sanders West, a program started in 2016. There were 531 patients scheduled for LDCT screening in 2017. Fifty-five patients were found to have an abnormal result. All LDCT patients are tracked in the Multidisciplinary Treatment program. Oncology clinical trials offer patients diagnosed with cancer access to proven standard cancer treatments and to newly developed cutting edge therapies. Since the opening of TCSC in 1988, the Clinical Trials Department has enrolled 2,344 patients in oncology clinical trials. The TCSC Clinical Trials Department currently has 9 active treatment patients, 22 patients actively enrolled in research studies, and 135 patients in follow-up studies. In 2017, the TCSC Clinical Trials Department enrolled 23 patients to oncology clinical trials. To help with screening efforts, Research Nurse Coordinators are assigned to specific physician schedules for screening and to specific locations for coverage, including Thompson Oncology Group's Oak Ridge, Sevierville, West Knoxville, Downtown Knoxville, Lenoir City and Blount sites. Opening new studies increases referrals locally and regionally and gives current patients the ability to be treated with state-of-the-art care in their own community. Involvement in prevention and treatment trials offers an improved means of health strategies for individuals at risk for certain cancers. Other TCSC programs in place to support Covenant Health system patients undergoing cancer treatment include the East Tennessee Cancer Registry, the Fellowship Center, and Cancer Outreach Services.
