Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (n = 10) and the experimental group (n = 10). The control group received a standard training protocol, while the experimental group received a modified training protocol. The subjects were then subjected to a series of tests: a pre-test, a post-test, and a follow-up test. The results of the tests were compared between the two groups.
