990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part I, Line 7	Costing Methodology A cost-to-charge ratio based on the most recent as-filed Medicaid cost report was used to calculate the amounts reported on each line of the table
Part I, Line 7g	No physician clinic costs are included in the costs of subsidized health services

990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part III, Line 2	As a result of certain changes required by Accounting Standards Update (ASU) 2014-09, the majority of Baptist's provision for uncollectible accounts is recorded as a direct reduction to net patient service revenue instead of being presented as a separate line on the consolidated statements of operations. The core principle of the guidance in ASU No. 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. For Baptist's health care operations, the adoption of ASU No. 2014-09 resulted in changes to the presentation for and disclosure of revenue related to uninsured and underinsured patients. Under ASU No. 2014-09, the estimated uncollectible amounts due from these patients are generally considered an implicit price concession and are a direct reduction to patient service revenue.
Part III, Line 3	Rationale for including other bad debt amount in community benefit: No other bad debt amounts have been included as community benefit. The hospital educates patients with limited ability to pay regarding financial assistance and for this reason, the organization believes it accurately captures all charity care deductions provided according to the financial assistance policy, and the amount of bad debt expense attributable to patients eligible under the organization's charity care policy is negligible.

990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part III, Line 4	Bad debt expense footnote Per the financial statements of Baptist Healthcare System, Inc (which include the activity of Baptist Health Madisonville), there is no bad debt footnote for the current year The amount on line 2 was calculated using a cost-to-charge ratio
Part III, Line 8	Treatment of Medicare shortfall as community benefit Due to the fact that Medicare rates are non-negotiable and are established by the government, all of the shortfall for Medicare should be included as a community benefit Medicare Costing Methodology Medicare revenues and allowable costs were taken from the as-filed Medicare cost report Much care is taken to ensure that all adjustments to remove non-allowable costs are taken

990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part III, Line 9b	Collection practices Once a patient has been determined to qualify for charity care, the patient is classified as such for three months If the patient returns for services within three months, they are automatically qualified for charity care, which improves their access to healthcare services
Part VI, Line 2	NEEDS ASSESSMENT The community served by the hospital was defined by utilizing inpatient and outpatient data regarding patient origin Population demographics and socioeconomic characteristics of the community were gathered and reported utilizing various third parties The health status of the community was then reviewed Information on the leading causes of death and morbidity information was analyzed in conjunction with health outcomes and factors reported for the community by countyhealthrankings.org Health factors with significant opportunity for improvement were noted An inventory of health care facilities and resources were prepared and the estimated demand for physician and hospital services were evaluated Community input was provided through key information interviews and surveys Information gathered was analyzed and reviewed to identify health issues of uninsured persons, low-income persons, minority groups and the community as a whole Health needs were ranked utilizing a weighting method and then prioritized taking into account the perceived degree of influence the hospital has to impact the need Information gaps were identified during the prioritization process and were reported

990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part VI, Line 3	PATIENT EDUCATION OF ELIGIBILITY FOR ASSISTANCE The organization identifies uninsured patients by requesting insurance information at the time of the appointment request. If the patient has no insurance benefits, appointment scheduling staff will inform the patient of the self-pay policy. Except for emergency room visits, new patients who are unable to pay at the time of service are provided services by financial counselors for education and assistance. Emergency department patients are not asked for payment or insurance upon registration or admission. During financial counseling, patients will be informed of the Kentucky Physicians Care Program (KPC) in coordination with the Disproportionate Share Hospital (DSH) Program. They will also be counseled on potential eligibility for Medicaid and disability programs. Patients will also be advised of the financial assistance policy and applications will be provided.
Part VI, Line 4	COMMUNITY INFORMATION The organization is based in Madisonville, Kentucky (Hopkins County) near interstate 69, approximately 50 miles south of Evansville, Indiana. The bulk of the community's population is concentrated in and around the city of Madisonville, with portions of the nearby counties of Webster and Muhlenberg also having significant discharge numbers. Approximately 25% of the community's population falls in the under 18 age range and 16.5% fall in the over 65 age range. Approximately 51% are female and 49% are male based on 2018 data. The area's healthy business climate boasts strong employment with a 4.3% unemployment rate.

If applicable, provide separate descriptions for each facility in a facility reporting group, designated by "Facility A," "Facility B," etc.

Form and Line Reference	Explanation
Baptist Health Madisonville	Part V, Section B, Line 5 Baptist Health Madisonville has formed a community health coalition with other healthcare, civic, governmental and educational organizations in the area for the purpose of working collaboratively to identify and address the medical and socioeconomic factors impacting the health of the people in its region. Bringing these groups together may help avoid duplication of efforts in data collection and resource allocation. Through these contacts and public surveys, Baptist Health Madisonville collected primary data and feedback on the health issues confronting its service area. Baptist Health Madisonville's Community Health Needs Assessment committee met to develop the public survey instrument and identify mechanisms by which the survey would be distributed to reach a representative sample of the population, to include demographic groups often underrepresented in public data gathering and to consider all the information. A survey of area residents, including the hospital employee base, provided primary data. To secure a representative sample, the committee determined that the survey should be made available in both online and printed formats. For the online survey, the group used the Qualtrics system at the University of Kentucky College of Public Health to host the survey, collect and analyze the data. There were also 750 copies of the printed survey distributed by members of the community health coalition to ensure that socioeconomic groups that were unlikely to, or unable to participate in the online survey were represented. The committee decided to design a more detailed survey than in the past that would provide information on not just medical factors, but also socioeconomic factors that influenced health and the ability to access health and health related resources. The final survey consisted of 60 questions and took approximately 10 to 15 minutes to complete. Five hundred sixty four (564) service area residents were surveyed from the April 15, 2018, to June 15, 2018. The committee enlisted the assistance of the University of Kentucky College of Public Health in gathering and processing the information. They discussed the data presented and created a list of the health issues identified in both primary and secondary data sources. After robust interaction, the committee prioritized the list and discussed various ways the hospital could help to meet these needs. Secondary data from demographic and socioeconomic sources, Kentucky vital statistics, disease prevalence records and health indicators and statistics were collected from national, state and local sources.
